[L. *migratus*, p. p. of *migrare* to migrate, transfer.] **1.** To go from one place to another ; esp., to move from one country, region, or place of abode or sojourn to another, with a view to residence ; to change one's place of residence ; to move ; as, the Moors who *migrated* from Africa into Spain ; to migrate to the West.

2. To pass periodically from one region or climate to another for feeding or breeding, as various birds and animals.

mi-gra'tion (mī-grā'shŭn), *n.* [L. *migratio* : cf. F. *migration.*] **1.** Act of migrating ; also, collectively, the individuals taking part in a migratory movement, or those migrating during a given period. The majority of birds of the north temperate and arctic regions perform regular migrations, which are dependent on food supply more than on temperature, moving north in the spring and south in the fall. At such times they move in flocks, most species chiefly at night, sometimes flying from one to two miles high. Migrations of mammals occur in a few Arctic species (as reindeer and lemmings, which make irregular movements determined by food supply). Certain bats, various fishes, notably the anadromous forms, and some insects, also perform migrations.

2. *Chem.* **a** A shifting of an atom or atoms from one part of the molecule to another. Cf. REARRANGEMENT. **b** A general movement or drift of ions toward one or the other electrode under the influence of electromotive force. MILL the tenth of a cent, MILLION.] A measure of distance originating with the Romans and subsequently coming into general use, with varying value, among Western nations. The ancient Roman mile was about 1,620 English yards (1,482 meters). The English **statute mile**, used in Great Britain, the United States, etc., is equal to 320 rods or poles, 1,760 yards, or 5,280 feet (1,609.3 meters). The old Scotch mile is 1.127, the Irish 1.273, statute miles. On the Continent most of the old miles have been replaced, officially at least, by the kilometer. They varied from about 1,100 yards to over 12,000 yards. The **geographical**, *or* **nautical, mile** is the length of a minute, or $\frac{1}{21600}$ of a great circle of the earth, but, because the earth is not a perfect sphere, several different values are in use. That adopted by the British Hydrographic Office is 6,080 feet (1,853.2 meters), and is called the **Admiralty mile**; that of the United States Coast Survey is 6,080.27 feet (1,853.248 meters); of France, 1,851.9 meters.

milk (mĭlk), *n.* [AS. *meolue, meoloc, meolc, milc*; akin to OFries. *melok*, D. *melk*, G. *milch*, OHG. *miluh*, Icel. *mjǫlk*, Sw. *mjölk*, Dan. *melk*, Goth. *miluks*, OIr. *melg, mlicht, blicht*, AS. *melcan* to milk, G. *melken*, OHG. *melchan*, Lith. *milszti*, L. *mulgere*, Gr. ἀμέλγειν. Cf. MILCH, EMULSION.] **1.** A white or yellowish fluid secreted by the mammary glands of female mammals for the nourishment of their young, consisting of minute globules of fat suspended in a solution chiefly of casein and other proteid matters, milk sugar, and inorganic salts. That secreted before delivery and for some days thereafter is called *colostrum*. It is yellower and richer in solids than ordinary milk, and is adapted to the special needs of the newborn offspring. The constituents of milk naturally vary in amount with different animals and different individuals. The average composition of ordinary cow's milk (**whole milk**) and some related products has been given as follows:

PRODUCT.	Water.	Protein.	Fat.	Carbohydrates.	Ash.	Fuel value per lb.
	Per ct.	*Per ct.*	*Per ct.*	*Per ct.*	*Per ct.*	*Calories.*
Whole milk	87.0	3.3	4.0	5.0	.7	310
Skim milk	90.5	3.4	.3	5.1	.7	165
Buttermilk	91.0	3.0	.5	4.8	.7	160
Condensed milk	26.9	8.8	8.3	54.1	1.9	1,490
Cream	74.0	2.5	18.5	4.5	.5	865
Whey	93.0	1.0	.3	5.0	.7	125

The specific gravity of ordinary cow's milk varies from 1.028 to 1.035. Owing to the lower specific gravity of the fat globules as compared with the solution, or **milk plasma**, the product called **cream**, rich in fat, separates by slow rising or is separated centrifugally. Milk is capable of undergoing various fermentations, such as lactic (ordinary souring of milk) and alcoholic (preparation of koumiss, kefir, etc.).

Standard *milk* is *milk* containing not less than twelve per cent of total solids and not less than eight and one half per cent of solids not fat, nor less than three and one quarter per cent of milk fat *Circular, U. S. Dept. of Agric.*

2. A liquid resembling milk in appearance, as the latex of a plant, the juice of the coconut, the contents of an unripe kernel of grain, the ripe, undischarged spat of an oyster, or an emulsion made by bruising seeds.

The **Uttara Mimamsa** is more metaphysical, teaching that God is the sole reality from whom all things issue and into whose being all things eventually resolve, the material world having only an illusional existence.

mime (mīm), *n.* [L. *mimus*, Gr. *μῖμος*, akin to *μιμεῖσθαι* to imitate, to mimic: cf. F. *mime*. Cf. MIMOSA.] **1.** *Antiq.* A kind of drama in which scenes from life were imitated and generally represented in a ridiculous manner; also, a dialogue composed to be recited at such representations. The Greek mime was a sort of popular rhythmical prose, full of slang, dialect, and aphorism, performed as a private comedy, apparently originating with Sophron of Syracuse (5th century B. C.). The Roman mime was a more or less unconventional character play of everyday life, chiefly of the towns, in which the actors wore no masks or buskins. Dancing was an important feature. The chief writer of them was Publilius Syrus (1st century B. C.). Occasionally the name *mime* is applied to modern plays of this sort.

2. An actor in such a representation.

3. A mimic; jester; clown; buffoon.

4. An imitator. *Rare.*

9. *Philos.* The conscious element or factor in the universe; spirit; intelligence; — contrasted with *matter*.
Of these self-expressions of the substance, we mortals know only two One is the material world, — Spinoza calls it body or bodily substance. The other is the inner world of thought, — Spinoza calls it thinking substance, or *mind*. These two worlds, Spinoza holds, are equally real, equally revelations of the one absolute truth, equally divine, equally full of God, equally expressions of the supreme order. *Josiah Royce.*
Syn. — MIND, INTELLECT, INTELLIGENCE are here compared in their nontechnical uses only; for technical senses see defs. MIND (commonly contrasted with *body*, sometimes with *heart* or *soul*) is the general term; INTELLECT (contrasted esp. with *feeling* or *will*) suggests rather more definitely a specific faculty; INTELLIGENCE implies quickness or readiness of comprehension; as, "health of body, peace of *mind*" (*Pope*); "an adamantine veil between his heart and *mind*" (*Shelley*); "that *mind* and soul, according well, may make one music" (*Tennyson*); "all-subtilizing *intellect*" (*id.*); "The extraordinary union of this regnant *intellect* with that ill-starred temperament" (*J. M. Robertson*); "In manner . . . an *intellect* speaking to *intellects*, but with something which raised it above the mere intellectual, a subdued glow of feeling pervading all" (*J. R. Green*); "Our chief characteristics are . . . energy and honesty, not an open and clear *mind*, not a quick and flexible *intelligence*" (*M. Arnold*); "That [Montaigne's] keen-edged *intelligence*, dividing evidence so finely, like some exquisite steel instrument, with impeccable sufficiency, always leaving the last word loyally to the central *intellectual* faculty, in entire disinterestedness" (*W. Pater*). See MENTAL, REASON, SOUL, FEELING.

min'er (mīn'ẽr), *n.* [OF. *mineor*, F. *mineur*.] **1.** One who mines; one engaged in the business of getting ore, coal, or precious stones out of the earth; broadly, any one working underground in a mine; more narrowly, one who drills, blasts, stopes, drives levels, etc., in a mine. **2.** *Mil.* A soldier employed in constructing a military mine. In the United States and British armies the engineers usually have charge of this work, and the term is not technically used. **3.** *Zoöl.* **a** Any of numerous insects which, in the larval state, excavate galleries in the parenchyma of leaves. They are mostly minute moths and dipterous flies. **b** A honey eater (*Myzantha garrula*) of Tasmania. **4.** A kind of strong plow for deep plowing.

min'er-al (mĭn'ẽr-ăl), *n.* [F. *minéral*, or LL. *minerale*. See MINERAL, *a.*] **1.** Any chemical element or compound occurring naturally as a product of inorganic processes. Minerals are usually solids, the only ones which are liquids at ordinary temperatures being water and mercury. Except in rare instances they have a definite molecular structure which manifests itself in crystal form, optical properties, etc. Rocks, except certain glassy forms, are either simple minerals or, more frequently, aggregates of two or more minerals. Such substances as coal and amber, though frequently classed with minerals for the sake of convenience, are not minerals in the true sense. **2.** **a** A mine. *Obs.* **b** *Mining.* Ore. **3.** Anything which is neither animal nor vegetable, as in the old general classification of things into three kingdoms (animal, vegetable, and mineral).

min'er-al, *a.* [F. *minéral*, or LL. *mineralis*, fr. *minera* mine, fr. OF. *miniere*, fr. LL. *minaria*. See MINE, *n.* & *v.*] **1.** Of or pertaining to mines or mining; also, versed in matters relating to mines or mining. *Obs.* **2.** Of or pertaining to minerals; consisting of, or of the nature of, a mineral or minerals; inorganic; as, a *mineral* substance; *mineral* acids. **3.** Impregnated with minerals; as, *mineral* waters.

mineral alkali, *Chem.*, soda. *Obs.* — **m. black,** a permanent black pigment composed of ground graphite or graphitic shale, used esp. in painting metallic surfaces. — **m. blue.** **a** The mineral azurite, or blue copper carbonate, ground and used as a pigment; also, a pigment of the same composition artificially prepared. **b** Prussian blue lightened by mixture, as with white clay. — **m. candle,** a candle made of paraffin. — **m. caoutchouc,** elaterite. — **m. chameleon.** *Chem.* = CHAMELEON MINERAL. — **m. charcoal,** a substance, resembling ordinary charcoal, interlaminated in silky fibrous layers in beds of ordinary bituminous coal; — called by miners *mother of coal.* — **m. coal,** coal (in sense 3). — **m. colza oil,** a burning oil of high fire test, prepared from petroleum. — **m. cotton.** = MINERAL WOOL. — **m. green.** **a** Malachite, or green carbonate of copper, ground and used as a pigment; also, an artificial pigment of the same composition. **b** Scheele's green. — **m. jelly,** vaseline. — **m. kingdom,** popularly, that division of nature which embraces inorganic objects. See MINERAL, *n.*, 3. — **m. lake,** a pink pigment consisting of a glass colored with tin chromate. — **m. line,** *Railroads,* a line that carries only minerals, esp. coal. *Eng.* — **m. oil,** specif., petroleum. — **m. orange.** = ORANGE LEAD. — **m. paint,** a pigment made chiefly of some natural mineral substance, as red or yellow iron ocher. — **m. pitch.** = ASPHALT, 1. — **m. pulp,** a fibrous variety of talc, used as a filling in paper manufacture. — **m. purple.** **a** A dark red pigment consisting of an artificial iron oxide. **b** Purple of Cassius. — **m. right,** the right or title to all, or to certain specified, minerals in a given tract, — usually including the right to remove them by mining. — **m. salt.** **a** A salt of a mineral (inorganic) acid. **b** A salt occurring as a mineral. — **m. seal oil,** m. sperm oil. = MINERAL COLZA OIL. — **m. tallow,** hatchettite. — **m. tar.** = MALTHA, 2 a. — **m. vein.** *Geol. & Mining.* **a** A vein formed by aqueous deposition or by sublimation. **b** A vein containing ore. — **m. water,** any natural water so impregnated with gaseous or saline substances as to have a particular flavor or medicinal effect; also, water artificially so impregnated. — **m. wax,** ozocerite. — **m. white.** **a** Permanent white. **b** Gypsum ground and used as a pigment. — **m. wool,** a fibrous wool-like material, resembling spun glass, made by blowing a powerful jet of steam through melted slag; slag wool. It is a poor conductor of heat, and is used as a packing for steam pipes, etc. — **m. yellow,** a yellow pigment consisting of an oxychloride of lead; patent yellow.

min'er-al-i-za'tion (mĭn'ẽr-ăl-ĭ-zā'shŭn), *n.* Act or process of mineralizing.

min'er-al-ize (mĭn'ẽr-ăl-īz), *v. t.*; -IZED (-īzd); -IZ'ING (-īz'ĭng). **1.** To transform (a metal) into an ore. **2.** To petrify; as, *mineralized* leaves or bones. **3.** To impregnate or supply with minerals; as, *mineralized* water; a well-*mineralized* region.

min'er-al-ize, *v. i.* **1.** To go on an excursion for observing and collecting minerals; to mineralogize. **2.** To promote the formation of minerals; as, heat is a *mineralizing* agent.

min'er-al-iz'er (-īz'ẽr), *n.* **1.** An element which, in combination with a metal, forms an ore. Thus, in galena, or lead ore, sulphur is a *mineralizer.* **2.** *Petrog.* A dissolved gas or vapor, as water, fluorine, etc., which promotes the crystallization of minerals from a molten magma.

min'er-al-og'i-cal (-ăj'ĭ-kăl), *a.* [See MINERALOGY.] Of or pertaining to mineralogy; as, a *mineralogical* table.

min'er-al'o-gist (-ăl'ŏ-jĭst), *n.* **1.** Specialist in mineralogy. **2.** A carrier shell.

min'er-al'o-gy (-jĭ), *n.*; *pl.* -GIES (-jĭz). [*mineral* + *-logy:* cf. F. *minéralogie.*] **1.** The science of minerals. It deals with their crystallography and their physical and chemical properties in general, their classification (commonly on a chemical basis), and the ways of distinguishing them (by inspection, by blowpipe analysis, etc.). **2.** A treatise on this science.

min'er's el'bow (mĭn'ẽrz). *Med.* A swelling on the back of the elbow due to inflammation of the bursa over the olecranon; — so called because often seen in miners.

Mi-ner'va (mĭ-nûr'vă), *n.* [L.; akin to E. *mind.*] **1.** *Rom. Relig.* An ancient Italian goddess whose cult probably entered Rome from Etruria. She was primarily a goddess of the handicrafts, and her temple was the center of the worship of the Roman guilds. As patroness of the guild of physicians she was a health goddess. As connected with Jupiter and Juno, in a supreme triad (see JUPITER), she was a political or civic goddess. Under Greek influence she was identified with *Athena* (which see) and took over many of the attributes of that goddess. The *Quinquatrus,* March 19, primarily a feast of Mars, falling on the anniversary of the founding of Minerva's chief temple, on the Aventine, became in popular estimation a Minerva feast and was eventually extended over five days. Cf. DI. **2.** Wisdom. *Obs. or Archaic.*

3. Short for MINERVA MACHINE.

Minerva machine, *Printing,* a kind of small jobbing machine. — **M. press.** **a** An ultrasentimental series of novels issued by a Leadenhall Street (London) press of this name at the beginning of the 19th century. **b** = MINERVA MACHINE.

mi-nette' (mĭ-nĕt'), *n.* [F.] *Petrog.* A dark trap rock, mainly biotite and orthoclase, occurring usually in narrow dikes and sheets; mica trap. **b** An oölitic iron ore containing as a rule 28–48 per cent of iron and 1.5–2 per cent of phosphorus. It is most plentiful in Luxemburg and Lorraine, and is adapted for the basic Bessemer process.

Ming (mĭng), *n.* [Chin. *ming*² bright.] A dynasty in Chinese history, from A. D. 1368 to 1644, during which commerce and the arts of peace were encouraged. Its capital city was Nanking. It was succeeded by the present Manchu dynasty, the Ch'ing, having its capital at Peking.

min'gle (mĭng'g'l), *v. t.*; MIN'GLED (-g'ld); MIN'GLING (-glĭng). [Freq. of ME. *mengen*, AS. *mengan*; akin to D. & G. *mengen*, Icel. *menga*, also to E. *among.* Cf. AMONG, MONGREL.] **1.** To combine or join (one thing with another, or two or more things together), esp. so that the original elements are distinguishable in the combination; to mix; intermix.

There was . . . fire *mingled* with the hail. *Ex.* ix. 24.

Cluny stopped *mingling* the cards. *Stevenson.*

2. To associate or unite, as things by interspersion or persons by ties of relationship; to join in company.

3. To put together, or pool (funds). *Obs.* *Shak.* **4.** To make or prepare by mixing the ingredients of; to concoct; as, to *mingle* a sleeping draft. **5.** To confuse; confound. *Obs.*

Syn. — Combine, unite, consolidate, amalgamate, fuse, confound. — MINGLE, MIX, BLEND, MERGE, COALESCE agree in denoting the conjoining of two or more objects, with varying loss of identity, in a new product (see JOIN). So far as they differ, MINGLE, rather more than *mix,* implies that the constituent elements are distinguished in the product; MIX is apt to lay somewhat greater stress on the interpenetration (often promiscuous) of the elements combined; as, *mingled* colors, sensations; to *mix* salt and pepper, wine and water. BLEND expresses a union so intimate as to obscure the individuality of the component parts, whose qualities are shared by the resultant product; as, *blended* teas, shades; MERGE still more distinctly implies the loss in the whole of the constituent elements, or the complete absorption of one element in another; as, to *merge* the private in the general good. COALESCE differs from *merge* in suggesting more definitely the action or process resulting in the fusion of parts; as, two drops of water in contact *coalesce.* Cf. ATTACH.

Music heard at the pool-side while people fish, or *mingled* with the sound of the pitcher in the well. *W. Pater.*

And they were all *mixed* together; the blast of fire, the flaming breath, and the great tempest. 2 *Esdras* xiii. 11.

See MODE, 3 **b.**

mi'nor, *n.* **1.** [*cap.*] A Minorite; a Franciscan friar.
2. *Logic.* The minor term, that is, the subject of the conclusion; also, the minor premise, that is, that premise which contains the minor term; in hypothetical syllogisms, the categorical premise. It is the second proposition of a regular syllogism, as in the following: Every act of injustice partakes of meanness; to take money from another by fraud is an act of injustice; therefore, the taking of money from another by fraud partakes of meanness.
3. A person of either sex under full age or majority, that is, one who has not attained the age at which full civil rights are accorded; an infant; in England and generally in the United States, one under twenty-one years of age (see INFANT, AGE). A minor attains full age at the beginning of the day preceding the 21st anniversary of his birth. In hereditary monarchies the minority of a sovereign ends at an earlier age than that of a subject. The sovereign of Great Britain as such has no minority, and his minority in a private capacity ends upon the completion of the eighteenth year of his age.
4. *Scots Law.* Sometimes, specif., a person over the age of pupillarity but not of full age.
5. *Math.* = MINOR DETERMINANT.

miss (mĭs), *n.*; *pl.* MISSES (mĭs'ĕz; -ĭz; 151). [Contr. fr. *mistress*.] **1.** A mistress; also, a prostitute. *Obs.* **2.** A title of courtesy prefixed to the name of an unmarried girl or woman (except, in Great Britain, one entitled because of her rank to be addressed as "Lady," "Countess," etc.). See MISTRESS, II. It is customary in social usage to indicate the eldest unmarried daughter by omitting her Christian name; as, *Miss* Brown, but *Miss Emily* Brown (a younger sister). The use of *Miss* without the surname or Christian name in speaking either to or of a particular girl or woman is now vulgar or uncultivated.

☞ There is diversity of usage in the application of this title to two or more persons of the same name. One may write either *the Misses Brown* or *the Miss Browns*.

3. A young unmarried woman or a girl; as, she is a *miss* of sixteen; children's and *misses'* shoes. Now often sportive or contemptuous, or in trade use.

4. = MRS. *Dial. or Illiterate.*

5. [Perh. a different word.] *Card Playing.* In the game of three-card loo, an extra hand dealt on the table, which may be substituted for the hand dealt to a player; a cat. Cf. WIDOW, 4.

mite (mīt), *n.* [AS. *mīte* mite (in sense 1); akin to LG. *mite*, D. *mijt*, OHG. *mīza*; cf. Goth. *maitan* to cut.]

1. Any of numerous small, often very minute, arachnids of the order Acarina (cf. TICK). The body is saclike, without a constriction between the cephalothorax and abdomen, the mandibles generally chelate or adapted for piercing; there are usually four pairs of short legs in the adult, though but three in the young larva; the breathing organs (when such are present) are tracheæ. Many are parasitic on insects or vertebrates, some on plants, on which they may produce galls; others infest stored food products; others are aquatic. See ITCH MITE, CHEESE MITE, BLISTER MITE, etc.

2. [OD. *mīte*, *mijte*, D. *mijt*; perh. through OF. *mite*; prob. the same word.] A small coin (orig. a small Flemish copper coin) or small sum of money; — applied in the New Testament to the *lepton* (which see). > Now don't you worry one *mite* about it. *Mary Wilkins.*

one's mite, the small amount which is all one can afford to contribute to some object (alluding to the widow's mite, *Luke* xxi. 2); fig., of immaterial things, one's best, although insignificant, contribution; as, to offer *one's mite* of sympathy to a friend in affliction.

mi-tel'la (mĭ-tĕl'ă), *n.* [L., headband, dim. of *mitra.*]

1. *Surg.* A sling for the arm.

2. [*cap.*] *Bot.* A genus of saxifrageous herbs, the miterworts, having flowers with trifid or pinnatifid petals and a superior 1-celled ovary. The 5 species are natives of North America and Asia. They are low slender plants with opposite leaves and a narrow raceme of small white flowers.

mi'ter, mi'tre (mī'tẽr), *n.* [F. *mitre*, fr. L. *mitra* headband, turban, Gr. *μίτρα.*]

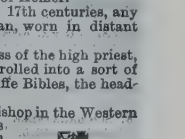
1. *Antiq.* A headband or fillet worn by women; also, an Asiatic headdress, perhaps a kind of turban, worn by Greek and Roman women or occasionally by effeminate young men.

2. A belt or girdle; — in translations of Homer.

3. In works of travel of the 16th and 17th centuries, any of various headdresses, as the turban, worn in distant countries. *Obs.*

4. *Jewish Antiq.* The official headdress of the high priest, made from a long piece of fine linen rolled into a sort of turban; also, in the Douay and Wycliffe Bibles, the headdress of the ordinary priests.

5. *Eccl.* The official headdress of a bishop in the Western Church since about 1000 A. D. It has been of various forms, the one now in use being a kind of tall cap, deeply cleft at the top, the outline of the front and back being that of a pointed arch, and it has been usually made of white linen, silk, or satin, often embroidered and jeweled, but occasionally of gold and silver. Certain abbots and other ecclesiastics have had the right of wearing it conferred on them as an exceptional dignity. In the churches of the Anglican Communion the miter had fallen into virtual disuse until recent times, when some bishops have revived its use at special ceremonies. In British heraldry it is borne over the arms of episcopal sees, instead of helmet and crest, and occasionally as a charge. The name was given to it doubtless from a fancied analogy to the miter of a Jewish high priest.



The Pope's Miter.

6. Hence, episcopal office or dignity.

7. A fancy headdress having a cleft top like a miter, worn by women in the 15th century.

8. The head of an alembic. *Obs.*

miter, *or* mitre, square. *Carp.* A bevel with an immovable arm at an angle of 45°, for striking lines on stuff to be mitred; also, a square with an arm adjustable to any angle.

miter, *or* mitre, valve. *Mech.* A valve consisting of a disk fitting in a conical seat the face of which is inclined at an angle of 45° to the valve axis.

miter, *or* mitre, wheel. *Mach.* Either of a pair of bevel gears, of equal diameter, adapted for working together, usually with their axes at right angles.

mi'ter-wort', mi'tre-wort' (mī'tẽr-wûrt'), *n.* Any plant of the genus *Mitella*; — so called from the capsule, which somewhat resembles a bishop's miter.

Mith-ra'ic (mĭth-rā'ĭk), *a.* Of or pert. to Mithras, or Mithra. — **Mith-ra'i-cism** (-ĭ-sĭz'm), **Mith-ra'i-cist** (-sĭst), *n.*

Mith'ras (mĭth'răs); **Mith'ra** (mĭth'rä; mĭ'thrä), *n.* [L., fr. Gr. Μίθρας, OPer. *Mithra.*] A Persian god of the light of the middle zone, between heaven and hell, the defender of truth, and the chief helper of Ahura-Mazda in his struggle with the powers of darkness. Mithras was regarded as an earth-born or rock-born hero who captured and slew the divine bull (**Mithras Tauroctonus**) from whose body sprang all the plants and animals beneficial to man, who aided man in his early struggles against adverse nature, and who was translated to heaven, there to watch over and aid the faithful until the day of his second coming, when the evil should be destroyed and the good saved to eternal life. Cf. TAUROBOLIUM. The Mithraic cult was attended with mysteries including sacraments closely resembling the Christian, celebrated in grottoes and underground chapels. It was introduced into Rome in the time of Trajan, and given powerful impulse by Commodus, who was an initiate. It was a prevailing religion among the Roman legionaries, by whom it was carried throughout the empire, and in the last days of paganism it was the most serious rival of Christianity.—**Mith'ra-ism** (mĭth'rā-ĭz'm; mĭ'thrā-), *n.*—**Mith'ra-ist,** *n.*

Mithras Tauroctonus, from an ancient shrine.

Mithra . . . is, to speak in the philosophical language of the times, the Logos that emanated from God and shared His omnipotence; who, having fashioned the world as demiurge, continued to watch faithfully over it. *Cumont (McCormack).*

mith'ri-date (mĭth'rĭ-dāt), *n.* [LL. *mithridatum*; cf. F. *mithridate*, L. *mithridatium.*] *Old Pharm.* An antidote against poison; an alexipharmic; specif., an electuary, supposed to serve either as a remedy or as a preservative against poison; — so called from King Mithridates VI. (see MITHRIDATISM), its reputed inventor.

[Love is] a drop of the true elixir; no *mithridate* so effectual against the infection of vice. *Southey.*

mith'ri-dat'ic (-dăt'ĭk), *a.* [L. *Mithridaticus.*] **1.** [*cap.*] Of or pert. to Mithridates VI. (see MITHRIDATISM); also, like him or his alleged insusceptibility to poisons.
2. Of, pertaining to, or of the nature of, a mithridate.
3. *Med.* Of, pert. to, or of the nature of, mithridatism.

mith'ri-da'tism (mĭth'rĭ-dā'tĭz'm), *n. Med.* Immunity from a poison, produced by administration of gradually increased doses of it. Mithridates VI., King of Pontus (d. B. C. 63), is said to have produced this condition in himself.

mit'i-gant (mĭt'ĭ-gănt), *a.* [L. *mitigans*, p. pr. of *mitigare.* See MITIGATE.] Tending to mitigate; mitigating; lenitive. — *n.* That which mitigates; a lenitive.

mit'i-gate (-gāt), *v. t.*; MIT'I-GAT'ED (-gā'tĕd); MIT'I-GAT'ING (-gā'tĭng). [L. *mitigatus*, p. p. of *mitigare* to soften, mitigate; *mitis* mild, soft + the root of *agere* to do, drive.]
1. To make mild or milder; to mollify; appease; — applied to persons, their dispositions, etc. *Obs. or R.*

This opinion . . . *mitigated* kings into companions. *Burke.*

2. To render mild or milder; to make less severe, violent, fierce, cruel, intense, harsh, rigorous, painful, etc.; to soften; appease; meliorate; alleviate; diminish; lessen; moderate; temper; as, to *mitigate* heat or cold; to *mitigate* grief; to *mitigate* a punishment or an offense.
Syn. — Allay, assuage. See ALLEVIATE.

mit'i-gate, *v. i.* To be or become mitigated; to grow mild or milder.

mit'i-gat'ed (mĭt'ĭ-gā'tĕd), *p. p.* of MITIGATE. — **mitigated caustic.** See SILVER NITRATE. — **mit'i-gat'ed-ly,** *adv.*

mit'i-ga'tion (-gā'shŭn), *n.* [ME. *mitigacioun*, F. *mitigation*, fr. L. *mitigatio.*] Act of mitigating, or state of being mitigated; specif.: **a** Abatement or diminution of anything painful, harsh, severe, afflictive, or calamitous; alleviation; moderation; palliation; as, the *mitigation* of pain, grief, rigor, punishment. **b** A mitigating thing or fact. **c** Softening or qualifying, as of words; a qualification. *Obs.* **d** Propitiation; of an animal, taming. *Obs.*
Syn. — Alleviation, abatement, relief.

mit'i-ga-tive (mĭt'ĭ-gā-tĭv), *a.* [L. *mitigativus*; cf. F. *mitigatif.*] Tending to mitigate; alleviating; lenitive. — *n.* That which mitigates; a mitigant.

mit'i-ga'tor (-gā'tẽr), *n.* One that mitigates.

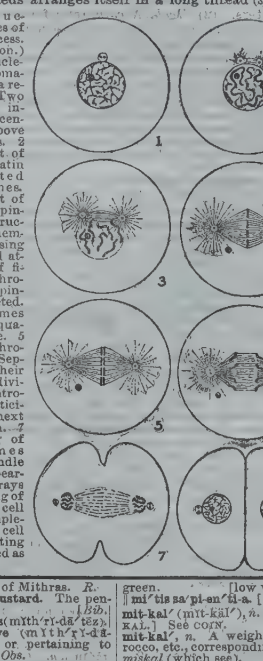
mit'i-ga-to-ry (-gā-tō-rĭ), *a.* [L. *mitigatorius.*] Tending or serving to mitigate or alleviate; mitigative; palliative. — *n.* That which mitigates; a lenitive; a palliative.

mi'tis cast'ing (mī'tĭs; mē'tĭs). [Perh. fr. L. *mitis* mild.] A process, invented by P. Ostberg, for producing malleable iron castings by deadmelting wrought iron, to which from 0.05 to 0.1 per cent of aluminium is added to lower the melting point, usually in a petroleum furnace, and pouring the molten metal into a mold lined with a special mixture consisting essentially of molasses and ground burnt fire clay; also, a casting made by this process; — called also *wrought-iron casting.*

mitis metal. The malleable iron produced by mitis casting; — called also simply *mitis.*

mi'tome (mī'tōm), *n.* [Gr. μίτος a thread.] *Biol.* The reticulum of the protoplasm of a cell, as distinguished from the ground substance.

mi-to'sis (mĭ-tō'sĭs), *n.* [NL., fr. Gr. μίτος a thread.] *Biol.* The usual, and more complex, of the two methods in which the cells of animals and plants multiply; indirect cell division; karyokinesis. Cf. AMITOSIS. Its evident purpose is the exact distribution, both qualitative and quantitative, of the chromatin (which see) of the parent cell to the resulting new cells. Many modifications of the process occur. In the typical method the chromatin of the nucleus arranges itself in a long thread (*spireme*),



Mitosis. Successive stages of typical process. (After Wilson.) 1 Resting nucleus with chromatin forming a reticulum. 2 Two centrosomes inclosed in a centrosphere above the nucleus. 3 Arrangement of the chromatin in elongated chromosomes. 4 Development of asters and spindle. 5 Destruction of membrane inclosing nucleus, and attachment of fibers to the chromosomes. 6 Spindle completed. Chromosomes drawn into equator of spindle. 7 Splitting of chromosomes. 8 Separation of their halves, and division of centrosomes in anticipation of next cell division. 9 Grouping of chromosomes at the spindle poles. Disappearance of asters, and beginning of division of cell body. 10 Completion of the cell division. Resting nuclei formed as in Stage 1.

which segments into the definite number of parts (*chromosomes*) characteristic of the species. Meanwhile two differentiated areas surrounded by radiating fibers of a slightly staining substance appear near the nucleus. These are the *asters*, and they frequently contain a definite central body, the *centrosome* (which see). The nuclear membrane breaks down, some of the aster fibers appear to attach themselves to the chromosomes, and draw them into a position between the asters, so that a spindle-shaped figure results, the asters being at the poles and the chromosomes at the equator. The process is continued by the longitudinal splitting of each chromosome into halves, one of which is drawn, apparently by the contraction of the fibers, toward each aster. The cell then divides through the equator of the spindle, one group of the new chromosomes and one aster remaining in each new cell. Each group of chromosomes now forms itself into a nucleus for the new cell. The aster and spindle fibers usually entirely disappear; the centrosome may persist and divide into two for a succeeding cell division. The principal stages of mitosis are known as *prophase*, *metaphase*, and *anaphase* (see these words). The process is essentially similar in animals and plants; but in the latter true centrosomes are distinguished only in the lower forms.

mi-tot'ic (mĭ-tŏt'ĭk), *a. Biol.* Of or pertaining to mitosis; karyokinetic; as, *mitotic* cell division; — opposed to *amitotic.* — **mi-tot'i-cal-ly** (-ĭ-kăl-ĭ), *adv.*

mitotic figure, *Biol.*, the figure presented by the chromosomes, asters, etc., of a cell during mitosis (which see).

mi'tra (mī'trä), *n.* [L., fr. Gr. μίτρα. See MITER, the headdress.] **1.** *Antiq.* = MITER, 1.
2. [*cap.*] *Zoöl.* A genus of marine rachiglossate gastropods having a fusiform shell with a rather long aperture, fluted columella, and sharp spire whose outline suggests a bishop's miter, whence the species, which are especially numerous in the East Indies, are called miter shells. The genus is divided into many subgenera and is the type of a family, Mitridæ.

Mitra, 2 (*M. episcopalis*). (½)

3. *Bot.* **a** = GALEA. **b** The thick hood-shaped pileus of certain mushroom fungi.

‖ **mi'traille'** (mē'trä'y'; mĭ-trăl'), *n.* [F. See MITRAILLEUSE.] Small missiles, as bits of iron, grape, etc., used sometimes in loading cannon. *Rare.* — *v. t.* To fire at with mitraille. *Rare.*

‖ **mi'tra'illeur'** (mē'trä'yûr'), *n.* [F.] *Mil.* **a** An artilleryman who serves a mitrailleuse. **b** A mitrailleuse. *Encyc. Brit.*

‖ **mi'tra'illeuse'** (mē'trä'yûz'), *n.* [F., fr. *mitrailler* to fire grapeshot, fr. *mitraille* old iron, grapeshot, dim. of OF. *mite* a mite. See MITE a coin.] *Mil.* A breech-loading machine gun, using small projectiles, consisting of a number of barrels fitted together, so arranged that the barrels can be fired simultaneously or successively and rapidly; esp., a form of such a gun used by the French army in the war of 1870 with Germany.

mi'tral (mī'trăl), *a.* [Cf. F. *mitral.* See 1st MITER.] Pertaining to, or resembling, a miter; specif., *Anat.*, designating, or pertaining to, the valve (the mitral valve) which guards the left auriculo-ventricular orifice of the heart and prevents the blood in the ventricle from returning to the auricle; the bicuspid valve. It consists of two triangular flaps attached at their bases to the fibrous ring which surrounds the opening and connected by their margins with the ventricular walls by chordæ tendineæ and musculi papillares.
mitral orifice, *Anat.*, the left auriculo-ventricular orifice.

mi'tri-form (mī'trĭ-fôrm; mĭt'rĭ-, 277), *a.* [*miter* + *-form*; cf. F. *mitriforme.*] *Bot. & Zoöl.* Miter-shaped, as the calyptra in certain mosses.

Mitsch'er-lich's law (mĭch'ẽr-lĭks). [After Eilhard *Mitscherlich*, German chemist.] *Chem. & Cryst.* The principle of isomorphism. See ISOMORPHISM.

mitt (mĭt), *n.* [Abbr. fr. *mitten.*] **1.** A kind of glove without fingers or with short fingers, covering the wrist and main part of the hand; specif., *Baseball*, a kind of glove protected on the palm side by a large mitten-shaped pad.
2. = MITTEN, 1.
3. A hand. *Slang, U. S.*

mit'ten (mĭt'ĕn), *n.* [ME. *mitaine, meteyn*, F. *mitaine*; cf. OF. *mite*, LL. *mita*; orig. uncert. Cf. MITT.] **1.** A covering for the hand, worn to protect it from cold or injury. It differs from a glove in not having a separate sheath for each finger, but has a division for the thumb. *Chaucer.*
2. A glove, esp. a thick worsted one. *Dial. Eng. & Scot.*
3. *pl. Slang.* **a** The hands. *Rare.* **b** Boxing gloves.
4. = MITT, 1.
5. A sleeve extending as far as the knuckles of the hand.
to get, *or* give, the mitten, to be refused or jilted, or to refuse or jilt, as a lover.

mit'tened (-ĕnd), *a.* Covered with, or wearing, mittens.

mit'ti-mus (mĭt'ĭ-mŭs), *n.* [L., we send, fr. *mittere* to send.] *Law.* **1. a** A writ formerly used in England for directing the trial of a cause in a county palatine. **b** A warrant of commitment to prison. **c** A writ for removing records from one court to another.
2. A discharge or dismissal; a notice to leave; also, quietus; as, to get one's *mittimus. Collog.*
3. A magistrate. *Humorous.*

miter, *or* mitre, drain. A drain of V section.
miter, *or* mitre, flower. The cyclamen.
miter, *or* mitre, gauge *or* gage. *Carp.* A gauge for determining the angle of a miter.
miter, *or* mitre, iron. An angle miter.
miter, *or* mitre, jack. A miter board or box.
miter, *or* mitre, line. The line made by the junction of the two pieces forming a miter joint.
miter, *or* mitre, shell. See MITRA, 2.
miter, *or* mitre, shoot. = MITER BOARD.
miter, *or* mitre, sill. *Hydraul. Engin.* A raised step against which a canal-lock gate shuts.
mith. Obs. pres. indic. (3d pers. sing.) and pret. (1st and 3d pers. sing.) of MAY.
mith'an (mĭth'ăn), *n.* [Native name in Assam and Chittagong.] *Zoöl.* The gayal.
Mith'ca (mĭth'kä). *Bib.* To conceal or be concealed; to hide; to dissemble. *Obs.*
mi'ther (mī'thẽr). Dial. Eng. var. of MOTHER, [of MOTHER.]
mith'er (mĭth'ẽr). Scot. var. of MIGHTY.
mith'ful. ✝ MIGHTFUL.
Mith'garth (mĭth'gärth'), **Mith'gar'thr** (-gär'thr). Vars. of MIDGARD.
mith'ic. ✝ MYTHIC.
Mith'kah (mĭth'kä). *Bib.*
Mith'nite (-nīt). *Bib.*
mithologic, mithology, etc. ✝ MYTHOLOGIC, etc.
Mith'ra (mĭth'rä; mĭ'thrä), *n.* = MITHRAS.
Mith-ræ'um, Mith-re'um (mĭth-rē'ŭm), *n.* [NL.] One of the subterranean chambers in which were celebrated the rites and mysteries of Mithras.
Mi-thra'i-cize, *v. i.* See -IZE.
Mith'ra-ize, *v. i.* See -IZE.
Mith-rat'ic, *a.* Mithraic. [*Bib.*]
Mith're-dath (mĭth'rē-dăth). [*Bib.*]
Mith'ri-ac, *a.* [L. *Mithriacus.*] Mithraic. *R.* — **Mith'ri-acs,** *n. pl.* Festivals of Mithras. *R.*
mithridate mustard. The pennycress.
Mith'ri-da'tes (mĭth'rĭ-dā'tēz). [*Bib.*]
mith'ri-da-tive (mĭth'rĭ-dā-tĭv), *a.* Of or pertaining to mithridate. *Obs.*
mith'ri-dat'ize (-dăt'īz), *v. t.* To produce mithridatism in.
mith'ri-da'tum, *n.* [LL.] Mithridate. [RARE.]
mit'ic (mĭt'ĭk), *a.* See PETROGRAPHY.
mit'i-fy, *v. t.* [L. *mitificare*, fr. *mitis* mild; see -FY.] To pacify; mitigate. *Obs.*
mit'i-ga-ble (mĭt'ĭ-gä-b'l), *a.* Admitting of mitigation; that may be mitigated.
mitigal. ✝ MISKAL.
mit'i-gate, *a.* Mitigated. *Obs.*
mit'ing (mīt'ĭng), *n.* [From MITE.] A little one; — chiefly in endearment or contempt. *Obs.*
mi'tis, *n.* = MITIS METAL.
Mi'tis green (mē'tĭs). [G. *Mitisgrün*, after the manufacturer, Ignaz *Mitis* of Kirchberg.] Paris green.
[low wisdom.]
‖ **mit'tis sa'pi-en'ti-a** [L.] Mel-
mit-kal' (mĭt-käl'), *n.* [See MISKAL.] See COIN.
mit-kal', *n.* A weight of Morocco, etc., corresponding to the *miskal* (which see).
Mi'tlan (mē'tlän), *n.* One of the Indians of the ancient city of Mitlan, in Oaxaca, Mexico, the ruins of which place comprise temples or palaces of rectangular design, built of huge blocks of stone, and adorned with mosaics and mural paintings.
mi-tos'chi-sis, *n.* [NL.; Gr. μίτος thread + σχίζειν to split.] = MITOSIS. *Obs.* [Mitotic. *R.*]
mi-to'sic (mĭ-tō'sĭk), *a. Biol.* = MITOTIC.
mit'o-some (mĭt'ō-sōm), *n.* [Gr. μίτος thread + 2d *-some.*] *Zoöl.* A body occurring early in the development of a spermatozoön and supposed to give rise to the middle piece and tail envelope.
mi-to'te (mē-tō'tā), *n.* [Sp., fr. Mex. *mitotiqui, mitotiani*, a dancer.] A Mexican Indian dance connected with the taking of an intoxicating drink.
Mi'tra (mē'trä), *n. Vedic Myth.* A celestial deity, probably the same as the Persian Mithras, but early sunk to relative unimportance
mi'trate (mī'trāt), *a.* [L. *mitratus* wearing a turban, fr. *mitra.*] Suggestive of a miter (in sense 1) or bonnet in shape; as, the *mitrate* pileus of certain mushrooms.
mi're (mī'rẽr). Var. of MITER.
mi'rer (mī'rẽr), *n.* = MITERER. *Eng.* [WORT.]
mi're-wort'. Var. of MITER-WORT.
Mi'ri-dæ (mī'rĭ-dē), *n. pl.* [NL.] *Zoöl.* See MITRA.
mi'try (mī'trĭ), *a. Her.* Charged with miters.
Mi'su-ku-ri'na (mĭ'soo-koo-rī'nä), *n.* [NL., after Prof. Kakichi *Mitsukuri* of the University of Tokyo.] *Zoöl.* A remarkable genus of sharks having the snout prolonged into a flat blade extending far beyond the mouth. A single species, the goblin shark (*M. owstoni*), is known, from the coast of Japan. It constitutes a family, **Mitsukuri'dæ** (-rĭ'dē), *n. pl.*
mit'tane, *n.* A species of hawk. *Obs. Scot.*
mitte. ✝ MID, *adv. & prep.*

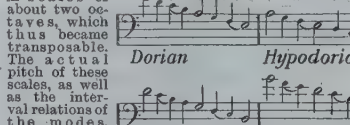
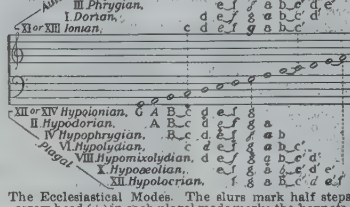
2. *Logic.* That qualification of propositions according to which they are distinguished as asserting (or denying) the possibility, impossibility, contingency, or necessity, of their content. Kant distinguished actuality, possibility, and necessity as the three modes of existence which give rise to assertorial, problematical, and apodeictic propositions. Logicians are not agreed as to whether modalities represent characteristics in some sense true of nature itself, or only states of human knowledge or forms of expression with regard to nature.

mode (mōd), *n.* [L. *modus* a measure, due or proper measure, bound, manner, form; akin to E. *mete*. See METE; cf. COMMODIOUS, MOOD in grammar, MODUS.] **1.** *Music.* **a** An arrangement of the eight diatonic tones of an octave according to one of certain fixed schemes of their intervals; an octave species. The three historic systems of modes in European music are: (1) The **Greek modes**, in which the octave species consists of two disjunct tetrachords lying between the extreme notes of the "Greater Perfect" system (see TETRACHORD, *Illust.*). Seven modes were reckoned: four principal ones, the *Dorian*, *Phrygian*, *Lydian*, and *mixolydian*; and three subordinate ones, the *hypodorian*, *hypophrygian*, and *hypolydian*, in which the conjunct fourth and fifth composing the octave are in inverse order. The interval schemes of the Greek modes are shown in the accompanying figure, half steps being marked by small slurs. The modes were embodied in scales of about two octaves, which thus became transposable. The actual pitch of these scales, as well as the interval relations of the modes, must doubtless be taken into account to explain the traditional characterization of the Dorian as bold and grave, of the Phrygian as briskand spirited, and of the Lydian as soft and enervating. The term *mode* is usually confined to the diatonic octave species, as the only ones now known; but other modes, based on chromatic and enharmonic tetrachords, were used by the Greeks. (2) The **ecclesiastical, Gregorian**, or **medieval modes**, though adapted and named from the Greek modes, are *ascending* scales of an octave, consisting of a pentachord and a tetrachord of which the highest tone of one is the lowest of the other. The lowest tone of the pentachord is the *final* or *key note*. With respect to its position the ecclesiastical modes are of two kinds: (*a*) *authentic*, in which the pentachord comes first, and the keynote is the lowest of the octave; (*b*) *plagal*, in which the tetrachord comes first, and the keynote is the fourth of the octave. Each plagal mode thus begins a fourth below its corresponding authentic mode, from which it is named by prefixing *hypo-*, under; as, the *hypodorian* mode, A to *a* in the fig., begins a fourth below the *Dorian*, D to *d* in the fig., D being their common keynote. The pentachords and tetrachords comprise the intervals of *perfect* fifth and fourth, respectively, in all the modes except the theoretical *Locrian* and *hypolocrian*, which, having their pentachord and their tetrachords respectively of the forbidden *diminished* fifth and *augmented* fourth, were in consequence very rarely used. In every mode four tones, called *modulations*, are of special importance: the *final*, on which every melody ends, the *dominant*, *mediant*, and *participant* (in authentic modes normally the fifth tone, third tone, and a tone between the mediant and either final or dominant), on which, within certain rules, phrases may begin and end. With respect to the octave compass of its mode, a melody is called *perfect* if it covers the compass, *imperfect* if it falls short of it, *superfluous* if it exceeds it. A melody covering the complete range of an authentic mode and the corresponding plagal is said to be in a *mixed mode*. Ecclesiastical modes are still used, esp. in the Roman Catholic Church. The relation of the authentic to the plagal modes, and the interval schemes of all the modes, are shown in the figure on the ascending scale of the white keys from G to b'.



The Greek Modes.



The Ecclesiastical Modes. The slurs mark half steps. The arrow head (▾) in each plagal mode marks the keynote, which is the first of its corresponding authentic mode. Black-faced letters indicate dominants; italics, mediants.

(3) The modern major and **minor modes** comprise two of the historic modes, the *major mode* being equivalent to the Greek Lydian and the "descending" *minor* being equivalent to the Greek hypodorian. See 6th SCALE, 3 **a** (1) & (2). **b** See MENSURABLE MUSIC.

2. *Gram.* = MOOD.

3. *Logic.* **a** The form in which the proposition connects the predicate and subject, whether by simple, contingent, or necessary assertion. **b** The form of the syllogism, as determined by the quantity and quality of the constituent propositions; mood. The nature of the modes of the four figures of the syllogism is shown in the following statement, which gives also the names of the modes, invented by Petrus Hispanus of Lisbon in the 13th century. In the statement the letter S stands for the subject of the conclusion, P for its predicate, and M for the middle term.

The FIRST FIGURE of the syllogism has four valid modes: — 1. **Barbara**: all M is P; all S is M; hence all S is P (for example all trees are plants; all elms are trees; hence all elms are plants) 2. **Celarent**; no M is P; all S is M; hence no S is P. 3. **Darii**: all M is P; some S is M; hence some S is P. 4. **Ferio**: no M is P; some S is M; hence some S is not P.

The names *Barbara*, etc., commence each with one of the first four consonants of the alphabet, and each has three vowels which indicate the quantity of the propositions; a, universal affirmative (all are); e, universal negative (none are); i, particular affirmative (some are); o, particular negative (some are not). Propositions differ by quality, affirmative and negative; and by quantity, universal and particular (all and some).

The names of the modes in the second, third, and fourth figures use the letters m, p, s, and c (or k) to show how they (the modes) may be changed into corresponding modes of the first figure, it being supposed that the mind makes this reduction in reaching a conclusion. In the second figure the middle term is the predicate in both major and minor premises, while in the first figure it is subject in the major and predicate in the minor. The major and minor terms are the extremes which are connected in the conclusion. The major premise shows the relation of the middle term to the predicate, while the minor premise shows its relation to the subject.

In SECOND FIGURE. 1. **Cesare**: no P is M; all S is M; hence no S is P. 2. **Camestres**: all P is M; no S is M; hence no S is P. 3. **Festino**: no P is M; some S is M; hence some S is not P. 4. **Baroco** (or **Fakofo**): all P is M; some S is not M; hence some S is not P. — In *Cesare* the S shows that the major premise is to be simply (i. e., without change of quantity) converted, so that instead of "no P is M" we shall have "no M is P." We shall then have the mode *Celarent*. In *Camestres* the S indicates that the minor premise and the conclusion are to be converted simply, while the M indicates that the major and minor premises are to be transposed (*metathesis*). The c in *Baroco* shows that if the conclusion is changed into its contradictory ("some S is not P" into "all S is P"), it contradicts also the major and the minor premises, and hence proves, by *reductio ad absurdum*, that if it is not true that some S is not P it is not true that all P is M and some S is not M (this proof is called also *per impossibile*).

In the THIRD FIGURE, the middle term is the subject in both premises: 1. **Darapti**: all M is P; all M is S; hence some S is P. 2. **Disamis**: some M is P; all M is S; hence some S is P. 3. **Datisi**: all M is P; some M is S; hence some S is P. 4. **Felapton**: no M is P; all M is S; hence some S is not P. 5. **Bocardo** (or **Dokmarok**): some M is not P; all M is S; hence some S is not P. 6. **Ferison**: no M is P; some M is S; hence some S is not P. In the first and fourth modes the letter p indicates that the minor premise, a universal affirmative, should be converted into a particular affirmative (instead of "all M is S," read "some S is M"). Instead of simple conversion (indicated by S) we have *conversion per accidens*, in which the universal changes into a particular (if some are and some are not, accident determines which).

In the FOURTH FIGURE, the middle term is predicate of the major and subject of the minor. But as this is apparently brought about by metathesis or transposition, together with conversion of the conclusion, the modes of this figure were long regarded as indirect modes of the first figure, being first mentioned by Averroës (A. D. 1126–98), who refers it to Galen (A. D. 131–200). 1. **Bramantip** or **Bamalip** (*Baralipton*): all P is M; all M is S; hence some S is P. 2. **Camenes, Calemes, Calentes** (*Celantes*): all P is M; no M is S; hence no S is P. 3. **Dimaris, Dimatis, Dibatis** (*Dabitis*): some P is M; all M is S; hence some S is P. 4. **Fesapo** (*Fapesmo*): no P is M; all M is S; hence some S is not P. 5. **Fresison** (*Frisesomorum*): no P is M; some M is S; hence some S is not P. (After each of the foregoing modes the name of the old mode, an indirect one of the first figure, is given, in parenthesis, as its equivalent.)

4. Manner of doing or being; method; form; fashion; way; style; as, the *mode* of speaking or dressing

The duty of itself being resolved on, the *mode* of doing it may easily be found. *Jer. Taylor.*

A table richly spread in regal *mode*. *Milton.*

5. Variety; kind; particular form. *Pope.*

6. *Metaph.* Any combination of qualities or relations, considered apart from the substance to which they belong, and treated as entities; more generally, condition, or state of being; manner or form of arrangement or manifestation. Mode is a manner of being or of action, and as such must always pertain to some subject or substance, that is, it must always be a mode *of* something. Anything is accidents, qualities, states, are all modes; yet none of these terms bears the implication, peculiar to *mode*, of variation or vicissitude in connection with dependence. Any given substance must always exist in some mode or other, but no mode need (from its own nature) be permanent. But while mode is thus relative, it has often been treated by philosophers as if absolute, because of the negativity of the correlative concept of substance; thus, Spinoza calls mind and matter (though of such extension) *modes* of the divine substance; consciousness and conscious states are also called *modes* with reference to the soul as their subject; and Locke, in an idiosyncratic use, designated as *modes* such ideas (thoughts or impressions) as show themselves to be attributive. The distinction of *mode* and *substance* is analogous to, but not identical with, that of *form* and *matter*. *Forms* may have real independent existence; *modes* are always dependent.

The word *mode* (in the sense of "modification"), already familiar to us in the writings of Descartes and Malebranche, is older than "attribute," and came into use as the correlative of "substance." *J. Martineau.*

Modes I call such complex ideas, which, however compounded, contain not in them the supposition of subsisting by themselves, but are considered as dependencies on, or affections of, substances. *Locke.*

7. [F., fr. L. *modus* manner.] A prevailing popular custom or style; a fashion, esp. that of a particular time or place; conventional style of dress, manners, etc.; with *the* (*Archaic*), the fashion of dress, manners, etc., in vogue.

Mo'doc (mō'dŏk), *n.* One of a small tribe of Lutuamian Indians, formerly dwelling in northeastern California, but, after a long series of wars with the whites, placed part upon the Klamath reservation in Oregon, part upon the Quapaw in Oklahoma.

mod'u-lar (mŏd'ū-lăr), *a.* [See MODULE.] **1.** *Arch.* Of or pertaining to a module.

2. Of or pertaining to a modulus.

modular equation, *Math.*, a relation connecting the moduli λ and κ when elliptic functions of argument u and modulus κ are used to express other elliptic functions of argument v/M and modulus λ, where M is called the *multiplier*. — **m. function**, *Math.*, a uniform function M, such that an algebraic equation connects $M(z)$ and $M\left(\frac{az+b}{cz+d}\right)$, where a, b, c, d are integers and $ad-bc=1$.

mod'u-late (mŏd'ū-lāt), *v. t.*; **-U-LAT'ED** (-lāt'ĕd); **-U-LAT'-ING** (-lāt'ĭng). [L. *modulatus*, p. p. of *modulari* to measure, to modulate, fr. *modulus* a small measure, meter, melody, dim. of *modus*. See MODE.] **1.** To form or adjust to, or regulate by, a certain proportion; to temper; to soften; to tone down.

2. To tune to a certain key or pitch; to vary or inflect in tone; to give tune to; as, to *modulate* the voice in reading.

3. To sing or intone.

4. *Music.* To make transition to (a note) in sounding a series of notes. *Obs.*

mod'u-late, *v. i. Music.* **a** To pass by regular chord progression from one key or tonality into another, or from one mode to another. **b** To pass by regular melodic progression from one note to another.

mod'u-la'tion (-lā'shŭn), [L. *modulatio*: cf. F. *modulation.*] **1.** Act of modulating, or state of being modulated; specif.: **a** A forming according to a certain proportion; a tempering or toning down. **b** Inflection or varying of the voice musically; variation of key or pitch; a particular intonation or inflection of the voice. **c** A singing or making of music; a melody or musical sound.

2. *Music.* **a** See MODE, I **a** (2). **b** Act or process of changing, in the course of a piece, from one key to another; a shifting of tonality so that the succeeding tones center upon a new keynote; art of transition from one key to another, esp. of transition without a break in the melody or chord succession. A modulation is in general effected by introducing a tone of the new key which is foreign to the original. It is passing or transient unless carried to a cadence in the new key, when it is called final. The simplest modulations are those to the keys of the dominant or subdominant of the original key, or to the relative minors of these three keys, as from C major to G or F major, or to E, D, or A minor. Modulation is a most important resource for securing melodic and harmonic variety.

3. Melodious use of language, esp. in writing.

4. *Arch.* The determination of proportions in a classic order by means of the module, or unit, of length.

mod'u-la'tor (mŏd'ū-lā'tĕr), *n.* [L.]

1. One that modulates. *Derham.*

2. *Music.* A chart indicating the relations both of the essential tones of a scale and of the scale to its related scales.

mod'u-la-to-ry (mŏd'ū-lā-tō-rĭ), *a. Music.* Of or pertaining to modulation.

mod'ule (mŏd'ūl), *n.* [F., or L. *modulus* a small measure, dim. of *modus*. See MODE; cf. MODEL, MODULUS, MOLD matrix.] **1.** Measure; compass; capacity. *Obs.*

2. A plan or design on a small scale; also, a representation, as a plastic one, usually on a small scale. *Obs.*

3. An empty representation; a mere image. *Poetic. Obs.*

This counterfeit *module*. *Shak.*

4. A model or exemplar; pattern. *Poetic. Obs.*

5. A standard or unit of measurement; specif., one hundred liters per second, the legal Italian unit of flowing water.

6. *Arch.* The size of some one part, as the diameter or semidiameter of the base of a shaft, taken as a unit of measure by which the proportions of the other parts of a classical or nonclassical composition are regulated. Generally, for columns, the semidiameter is taken, and divided into a certain number of parts, called *minutes* (see MINUTE, *n.*, 4), though often the diameter is taken, and any dimension is said to be so many *modules* and *minutes* in height, breadth, or projection.

7. *Numis.* Diameter.

8. *Math.* = MODULUS. *Rare.*

9. *Gearing.* The pitch diameter of a gear wheel in millimeters divided by the number of teeth.

10. **a** A device used for measuring the flow of water, or for delivering a fixed volume of water, as in irrigation, consisting essentially of an orifice with a gate or other contrivance upstream to hold the water at a fixed height above the opening. **b** The volume discharged by such a device.

mod'u-lus (mŏd'ū-lŭs), *n.*; *L pl.* **-LI** (-lī). [L., a small measure. See MODULE, *n.*] **1.** *Arch.* = MODULE, 6. *Obs.*

2. A real positive quantity, numerical or physical, that expresses the measure of some function, property, or effect, as of elasticity, strength, efficiency, etc., esp. under unit conditions; — often denoted by μ or M.

3. *Math.* **a** The absolute value of a complex number $a+ib$, written $|a+ib|$ and equal to $+\sqrt{a^2+b^2}$. Geometrically it is the line segment from the origin (or zero point) to the point $a+ib$. **b** *Theory of Numbers.* See RESIDUE, *n.*, 2.

4. A standard or norm.

5. [*cap.*] [NL.] A genus of tænioglossate gastropods of tropical seas having no siphon and a depressed trochiform shell with a strongly toothed columella. It constitutes a family, **Mo-du'li-dæ** (mō-dū'lĭ-dē).

modulus of a machine, the efficiency of a machine. See EFFICIENCY, 2. — **m. of a matrix**, the corresponding determinant. — **m. of an elliptic integral** *or* **function**, the multiplier k in Legendre's elliptic integral of the first kind $F(\phi,k)=\int_0^{\phi}\frac{d\phi}{\sqrt{1-k^2\sin^2\phi}}$. — **m. of an imaginary**, *Math.*, the real positive ratio of the imaginary to a root of 1. — **m. of a section**, *Engin.*, a function of the dimensions of the section proportional to the moment of resistance of the section (*W. C. Unwin*). It is equal to the moment of inertia (about the neutral axis) of a section subjected to bending, divided by the distance of the farthest stressed fiber from the neutral surface. — **m. of a system of logarithms**, *Math.*, the constant ratio of any logarithm in that system to the natural logarithm of the same number. — **m. of cubic compressibility**, *Mech.*, the ratio of the intensity of stress to the volume strain (change of volume divided by total volume) produced by it. — **m. of elasticity.** See ELASTICITY, *n.*, 1. Besides the common *modulus of elasticity* (**Young's modulus**), the *modulus of rigidity*, *modulus of cubic compressibility*, and *Poisson's ratio* are also *moduli of elasticity*, but are not commonly so called. — **m. of linear transformation**, the square of the determinant whose constituents are the coefficients taken as they stand in the equations of transformation. — **m. of resilience**. = RESILIENCE, *n.*, 2. — **m. of rigidity**. *Mech.* = COEFFICIENT OF RIGIDITY. — **M. of rupture**. *Mech.*, the measure of the force which must be applied longitudinally in order to produce rupture. As determined experimentally its value in pounds per square inch is taken to be eighteen times the load in pounds required to break a horizontal bar of the material one inch square and supported at two points one foot apart, the load being at the midway point. — **m. of transverse elasticity.** = COEFFICIENT OF RIGIDITY.

mo'dus (mō'dŭs), *n.*; *pl.* MODI (-dī). [L. See MODE.]

1. Mode; manner.

2. **a** *Law.* The immediate manner in which property may be acquired, as occupation or prescription. See TITLE. **b** *Rom., Civil, & Early Eng. Law.* The manner, mode, restriction, or enlargement of rights under which the instrument making a gift or conveyance expressly directs that the subject of the gift or conveyance shall be enjoyed; hence, the mode, restriction, or the like, so imposed, or the clause in which it is expressed. Specif.: (1) The clause in a will or other instrument making a gift charging some obligation upon the enjoyment of the gift so that acceptance of the gift assumes the obligation. (2) Formerly, in conveyancing, a clause by which the estate granted was qualified from what otherwise would have been granted. **c** *Eccl. Law.* A customary mode (*modus decimandi*) of tithing by composition instead of by payment in kind.

‖ **mo'dus vi-ven'di** (vī-vĕn'dī). [L.] Mode, or manner, of living; hence, a temporary arrangement of affairs until disputed matters can be settled; specif., a temporary manner of conducting themselves in regard to matters in dispute agreed upon by convention or treaty by two or more states pending adjustment of the matters.

Mœ'ra (mē'rä), *n.*; *pl.* **-RÆ** (-rē). [L., fr. Gr. Μοῖρα.] *Gr. Myth.* The goddess, or a goddess, of fate or destiny, who gives to all their portion of good or of evil. Hence in Homer she is often the goddess of death. See FATE, *n.*, 4.

Mœ'so-Goth'ic, *or* **Mœ'so-goth'ic** (mē'sō-gŏth'ĭk), *a.* Of or pertaining to the Mœso-Goths or their language. — *n.* The form of Gothic spoken by the Mœso-Goths. — **Mœso-Gothic alphabet**, a composite alphabet based on the Byzantine uncials of the 4th century, constructed about 350 A. D. by Ulfilas, or Wulfila, for his translation of the Gospels.

mo-fette' (mō-fĕt'), *n.* [F.; cf. It. *mofeta.*] *Geol.* An emanation from the earth of noxious gas, chiefly carbon dioxide, marking the last stage of volcanic activity; also, the opening from which the gas issues.

moff (mŏf), *n.* A thin silk stuff made in Caucasia.

mo-fus'sil (mō-fŭs'ĭl), *n.* [Hind. *mufassal*, *mufassil*, fr. Ar. *mufaṣṣal*, fr. *faṣṣala* to separate.] In India, the provincial or rural districts; the country.

mog (mŏg), *v. i. & t.*; MOGGED (mŏgd); MOG'GING (mŏg'ĭng). [Etym. unknown.] To move away or on; to go off; to depart; to move slowly and steadily; to jog. *Dial.*

mog'i- (mŏj'ĭ-), **mog'o-** (mŏg'ō-). [Gr. μόγις with difficulty, μόγος labor.] Combining forms signifying *difficult, painful*; as, *mogi-* or *mogographia*; *mogiphonia*, difficulty in speech.

mog'i-graph'i-a (mŏj'ĭ-grăf'ĭ-ä), *n.* [NL. See MOGI-; -GRAPH.] *Med.* Difficulty in writing; writer's cramp. — **mog'i-graph'ic** (-ĭk), *a.*

mog'i-la'li-a (-lā'lĭ-ä), *n.* [NL., fr. Gr. μογιλάλος speaking with difficulty; μόγις with difficulty + λαλεῖν to speak.] *Med.* Difficulty in speaking; stammering.

Mo-gul' (mō-gŭl'), *n.* [Per. *mughul*, a Mongolian, the Great Mogul, fr. source of MONGOL.] **1.** A person of the Mongolian race; specif.: **a** One of the Mongol conquerors of India or their descendants. **b** A follower of Genghis Khan.

2. Hence: [*l. c.*] **a** A great personage; magnate; autocrat. **b** A kind of white plum. **c** A mogul locomotive. See LOCOMOTIVE, *n.* **d** *pl.* Playing cards of a superior grade. *Now R.*

the Mogul, short for *the Great Mogul*.

Mo-gul', *a.* Pert. to the Moguls or their empire in India.

mo'hair' (mō'hâr'), *n.* [Ar. *mukhayyar* a kind of coarse camelot or haircloth. Cf. MOIRE.] **1.** A fine camlet made from the hair of the Angora goat, or an imitation of such fabric, now usually a smooth lustrous one of wool and cotton mixed; also, yarn of this hair. Cf. ALPACA, 3.

2. A garment of this fabric.

3. The long silky hair of the Angora goat.

4. A civilian; — a soldier's nickname. *Old Slang.*

Mo-ham'med-an (mō-hăm'ĕd-ăn), *a.* [From *Mohammed*, fr. Ar. *muḥammad* praiseworthy, highly praised.] Of or pertaining to Mohammed, or the religion and institutions founded by Mohammed.

Mohammedan calendar, a lunar calendar reckoning from the year of the hegira, 622 A. D. Thirty of its years constitute a cycle, of which the 2d, 5th, 7th, 10th, 13th, 16th, 18th, 21st, 24th, 26th, and 29th are leap years, having 355 days; the others are common, having 354 days. By the following tables any Mohammedan date may be changed into the Christian date, or vice versa, for the years 1900–1935 A. D.

* Leap year. † First year of the 46th cycle.
‡ First year of the 46th cycle

The following general rule for finding the date of commencement of any Mohammedan year has a maximum error of a day: Multiply 970,224 by the Mohammedan year, point off six decimal places, and add 621.5774. The whole number will be the year A. D., and the decimal multiplied by 365 will give the day of the year. — **M. Era**, the era in use in Mohammedan countries. See ERA; MOHAMMEDAN CALENDAR. — **M. year**, the year used by Mohammedans, consisting of twelve lunar months without intercalation, so that they retrograde through all the seasons in about 32½ years. The Mohammedan era begins with the year 622 A. D. (see HEGIRA), the first day of the Mohammedan year 1318 being May 1, 1900, according to the Gregorian calendar.

Mo-ham'med-an, *n.* A follower of Mohammed, the founder of Islamism; one who professes Mohammedanism.

Mo-ham'med-an-ism (-ĭz'm), *n.* The religion, doctrines, or precepts, of Mohammed, chiefly contained in the Koran; Islam.

Mo-ham'med-an-ize (-ĭz), *v. t.*; **-IZED** (-ĭzd); **-IZ'ING** (-ĭz'ĭng). To make conformable to the principles, or customs and rites, of, or to convert to, Mohammedanism. — **Mo-ham'med-an-i-za'tion** (-ĭ-zā'shŭn; -ĭ-zā'shŭn), *n.*

MOLE an animal.] **1.** Crumbling, soft, friable earth; esp., earth containing the remains or constituents of organic matter, and suited to the growth of plants; soil; humus.

2. The ground; earth, as for a grave; hence, a grave. *Obs. or Archaic or Scot.* (usually in *pl.*) *or Dial. Eng.*

For thee was a *mold* meant
Ere thou of mother camest. *Longfellow.*

3. Earthy material; the matter of which anything is formed; composing substance; material.

The ethereal *mold*,
Incapable of stain. *Milton.*
Nature formed me of her softest *mold*. *Addison*

4. The earth on which we dwell; also, the land of a particular country or region. *Obs.* *Oxf. E. D.*

mold, mould, *n.* [ME. *molde*, OF. *mole, modle*, F. *moule*, fr. L. *modulus*. See MODEL.] **1.** The matrix, or cavity, in which anything is shaped, and from which it takes its form; also, the body or mass containing the cavity; as, a sand *mold* for casting metals; a jelly *mold*. *Milton.*

2. That on which, or in accordance with which, anything is modeled or formed; anything which serves to regulate the size, form, etc., as the pattern or template used by a shipbuilder, carpenter, or mason.

The glass of fashion and the *mold* of form. *Shak.*

3. Cast; character; nature; kind.

Helen, whose spirit was of softer *mold*. *Shelley.*

4. Form; shape; also, body or corporeal form. "Woman's beauteous *mold*." *Pope.*

Crowned with an architrave of antique *mold*. *Pope.*

5. That out of which something is to be molded; material for molding. *Obs.* *Milton.*

6. In technical uses: **a** *Arch.* A group of moldings; as, the arch *mold* of a porch or doorway; the pier *mold* of a Gothic pier, meaning the whole profile, section, or combination of parts. **b** *Paper Making.* A frame with a wire cloth bottom, on which the pulp is drained to form a sheet, in making paper by hand. **c** That which is cast or made in a mold, as a piece of molded copper, or a kind of candle. **d** *Photo-engraving.* The gelatin positive; also, the copper plate taken from this. **e** A pile of goldbeater's skin, usually about 950 pieces. **f** *Geol.* An impression made in earth by the outside of a fossil shell or other organic form; — sometimes misused for *cast*, n.

mold, mould (mōld), *v. t.* To cover with mold, or soil. *R.*

mold, mould, *v. t.* [Cf. F. *mouler*, OF. *moler, molter*. See MOLD the matrix.] **1.** To mix or knead (esp. dough or bread) into a required consistency or shape; specif., to form (dough) into loaves.

2. To mingle or blend (together or with), as to form a paste. *Obs.* *Oxf. E. D.*

3. To form in or into a particular shape; to shape; to model; to fashion; as, his character was *molded* by his parents; his style was *molded* on Addison.

He forgeth and *moldeth* metals. *Sir M. Hale.*
Did I request thee, Maker, from my clay
To *mold* me man? *Milton.*

4. To ornament by molding or carving the material of; as, a *molded* window jamb.

5. *Founding.* To form a mold of, as in sand, in which a casting may be made.

Mol-da'vi-an (mōl-dā'vĭ-ăn), *a.* Of or pert. to Moldavia, a principality in southeastern Europe, founded in the 14th century, and successively under the suzerainty of Poland, Hungary, Turkey, and Russia. After the Crimean war it was joined to Wallachia in the formation of Roumania. — *n.* A native or citizen of Moldavia; also, the language of the Moldavians, the official tongue being Slovenian.

Moldavian balm, a European mint (*Dracocephalum moldavica*), with loose clusters of rather large purple flowers.

mold'board', mould'board' (mōld'bōrd'; 201), *n.* **1.** A curved plate of iron (orig. of wood) back of a plowshare. It turns over the earth in plowing. Also, an analogous part in a road-building machine. See PLOW, *Illust.*

2. *Founding.* A follow board.

mold'ed, mould'ed (mōl'dĕd; -dĭd; 151), *p. p.* of MOLD, MOULD. — **molded,** *or* **moulded, breadth,** *Shipbuilding*, the greatest breadth of a ship measured horizontally exclusive of the outside plating. — **m. depth,** *Shipbuilding*, the vertical distance from the top of the keel to the top of the main deck beam amidships, at the ship's side. — **m. form,** *Shipbuilding*, the form of a ship, without plating or planking.

mold'er, mould'er (mōl'dẽr), *v. i.;* -ERED (-dẽrd); -ER-ING. [From MOLD fine soft earth.] To crumble into small particles; to turn to dust by natural decay; to lose form, or waste away, by a gradual separation of the component particles, without the presence of water; to crumble away.

The *moldering* of earth in frosts and sun. *Bacon.*
If he had sat still, the enemy's army would have *moldered* to nothing. *Clarendon.*

mold'er, mould'er, *v. t.* To turn to dust; to cause to crumble; to cause to waste away.

[Time's] gradual touch
Has *moldered* into beauty many a tower. *Mason.*

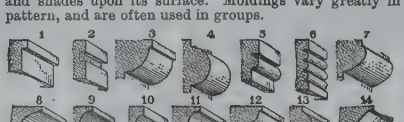
mold'er, mould'er, *n.* One that molds or forms into shape; specif.: **a** One who molds dough into bread. **b** *Founding.* One skilled in the art of making molds for castings. **c** One who molds bricks.

mold, *or* **mould, fungus.** Any fungus which produces a mold; specif., any fungus of the order Mucorales.

mold'ing, mould'ing, *n.* **1.** Act or process of shaping in or on a mold, or of making molds; molder's art or occupation.

2. Anything cast in a mold, or which appears to be so, as grooved or ornamental bars of wood or metal.

3. *Arch.* A plane, or curved, narrow surface, either sunk or projecting, used for decoration by means of the lights and shades upon its surface. Moldings vary greatly in pattern, and are often used in groups.



Moldings. 3. 1 Fillet and Fascia; 2 Sunk Fillet; 3 Quarter-round, sometimes called Ovolo; 4 Torus (when large and combined with other moldings); 5 Bead or Astragal; 6 Reed or Reeding; 7 Ovolo, or Thumb; 8 Cavetto; 9 Scotia; 10 Congé; 11 Cyma Recta; 12 Cyma Reversa; 13 Beak; 14 Splay.

molding, *or* **moulding, board.** **a** A follow board. **b** A board on which bread or pastry is kneaded and shaped.

molding, *or* **moulding, edge.** *Shipbuilding.* The line or curve defining the form of the frame in its molding plane.

molding, *or* **moulding, machine.** **a** *Woodworking.* A planing machine for cutting moldings. **b** *Founding.* A machine to assist in making molds for castings, esp. one for molding wheel teeth.

molding, *or* **moulding, mill.** A mill for shaping timber.

molding, *or* **moulding, plane.** *Shipbuilding.* The plane traversing the middle of a wooden frame, or the back of the standing flange of the outer angle bar in a metal frame.

molding, *or* **moulding, sand.** *Founding.* A kind of sand containing clay, used in making molds.

mold, *or* **mould, loft.** *Shipbuilding.* A room, usually a loft, in a shipyard, used for laying down a vessel's lines.

mold'y, mould'y (mōl'dĭ), *a.;* MOLD'I-ER, MOULD'I-ER (-dĭ-ẽr); MOLD'I-EST, MOULD'I-EST. [From 1st MOLD.] **1.** Overgrown with, or containing, mold; musty; fusty; stale, lit. or fig.; as, *moldy* cheese or bread. "*Moldy* jokes." *Hawthorne.*

2. Of or like mold.

mole (mōl), *n.* [See MOLECULE.] *Chem.* Gram-molecular weight, or a weight of as many grams as there are units in the molecular weight of the substance in question. See 1st MOLAR, *a.*, 2.

mole, *n.* [F. *môle*, L. *mola*, Gr. μύλη.] **1.** A mass of fleshy or other more or less solid matter generated in the uterus; a false conception; a mola.

2. *Rom. Antiq.* A sacrificial cake of salted, coarse-ground spelt. *Obs.*

mole (mōl), *n.* [AS. *māl;* akin to OHG. *meil*, Goth. *mail*.] **1.** A spot; a stain, as on cloth. *Obs.* *Langland.*

2. A spot, mark, or small permanent protuberance on the human body; now, esp., a circumscribed pigmentary deposit, either congenital or acquired, on the body; a pigmentary nævus. It is a dark-colored spot, and may be hairy.

3. *Obs.* Fig.: **a** A blemish; an imperfection. **b** A mark of identification or distinction.

mole, *n.* [ME. *molle*, either shortened fr. *moldwerp*, or from the root of E. *mold* soil: cf. D. *mol*, OD. also *molworp*. See MOLDWARP.] **1.** Any of numerous Insectivora belonging to various genera, chiefly of the family Talpidæ, mostly found in temperate parts of Europe, Asia, and North America. They have minute eyes often covered with skin, small concealed ears, very soft and often iridescent fur, and strong fossorial fore feet. They live almost entirely under ground, making extensive galleries and feeding on small life, esp. earthworms. The common European mole is *Talpa europæa*. The common species of the eastern United States is *Scalopus aquaticus*, which has partially webbed feet. The star-nosed mole (*Condylura cristata*) of the same region has a long thick tail and a fleshy starlike appendage on the snout. In the western United States are found several species of the genus *Scapanus*, also the small Gibbs's mole (*Neurotrichus gibbsii*). The golden moles (see CHRYSOCHLORIS) inhabit South Africa. See also DESMAN, MARSUPIAL MOLE.

2. One who works in a dark place or in the dark; also, one whose vision is regarded as imperfect.

3. Short for MOLE CRICKET. *Obs.*

4. Short for MOLESKIN; *pl.*, moleskins; moleskin garments.

5. **a** The borer of a mole plow; also, a mole plow. **b** A subsoil plow.

mole, *n.* [F. *môle*, It. *molo*, prob. fr. LGr. μῶλος, fr. L. *moles* mass, massive structure, mole. Cf. DEMOLISH.] **1.** [L. *moles.*] A mass or large piece; mass or bulk. *Obs.*

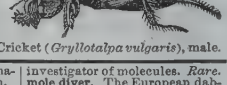
2. A mound or massive work formed of masonry or large stones, etc., laid in the sea, often extended either in a right line or an arc of a circle before a port which it serves to defend from the violence of the waves, thus protecting ships in a harbor; also, sometimes, the harbor itself.

3. *Rom. Antiq.* A kind of massive Roman tomb or mausoleum; as, the *mole* of Hadrian (now called the *Castle of Sant' Angelo*). *Obs.*

mole, *v. t.;* MOLED (mōld); MOL'ING (mōl'ĭng). **1.** To clear of molehills or moles. *Pegge.*

2. To form holes in, as a mole; to burrow; to excavate; as, to *mole* the earth.

mole cricket. Any of certain orthopterous insects of the genera *Gryllotalpa* and *Scapteriscus*, having large fossorial front legs adapted



European Mole Cricket (*Gryllotalpa vulgaris*), male.

for excavating subterranean galleries, and throwing up mounds of earth. They feed largely on the roots of plants, and when abundant do much damage. The common European species (*Gryllotalpa vulgaris*), the American (*G. borealis*), and the changa of Porto Rico are the best-known.

mo-lec'u-lar (mō-lĕk'ū-lẽr), *a.* [See MOLECULE.] *Phys. & Chem.* Pertaining to, connected with, produced by, or consisting of, molecules; as, *molecular* grouping, etc — **molecular attraction,** attraction between the molecules of bodies, to which the phenomena of cohesion, etc., are ascribed. — **m. compound,** a compound regarded as a union of molecules which still retain their identity, as the salt $FeSO_4(NH_4)_2SO_4{\cdot}6H_2O$. — **m. conductivity of a solution,** *Phys. Chem.*, a value equal to the specific conductivity multiplied by the volume in liters of the solution which contains a gram molecule of the dissolved substance; — usually denoted by μ. — **m. depression** *or* **lowering,** *Phys. Chem.*, the lowering of the freezing point produced by a gram-molecular weight of the solute in one hundred grams of the solvent. *Raoult.* — **m. formula,** *Chem.*, a formula indicating molecular weight as well as percentage composition. See FORMULA. — **m. heat,** *Phys. Chem.*, the thermal capacity of one gram molecule of any substance; the product of the specific heat by the molecular weight. — **m. latent heat,** *Phys. Chem.*, the amount of heat required to convert a gram molecule of liquid into vapor at the same temperature. It decreases with the temperature, becoming zero at the critical temperature. — **m. layer,** *Anat.*, the outer layer of the cortex of the cerebellum. It consists largely of fibers (many of them processes of the cells of Purkinje) with comparatively few cells. — **m. magnetic friction,** magnetic hysteresis. See HYSTERESIS. — **m. refraction** *or* **refractive power,** *Phys. Chem.*, the product of the molecular weight of a compound into its specific refractive power. This value is essentially additive, each atom in the molecule contributing its share. Hence, from a number of *molecular refractions*, values known as *atomic refractions* can be calculated for the different elements. — **m. rotation** *or* **rotatory power,** *Phys. Chem.*, a value obtained by multiplying the specific rotation by the molecular weight and (to obtain numbers of convenient size) dividing by 100. — **m. volume,** *Chem.*, the quotient obtained by dividing the molecular weight of a substance by its specific gravity. — **m. weight,** *Chem.*, the weight of a molecule of any gas or vapor as compared with some standard of atomic weight; the sum of the weights of the constituent atoms of a molecule; as, the *molecular weight* of water (H_2O) is (in round numbers) 18. See ATOMIC WEIGHT.

mo-lec'u-lar'i-ty (-lăr'ĭ-tĭ), *n. Physics & Chem.* State or quality of being molecular.

mo-lec'u-lar-ly (-lăr-lĭ), *adv. Physics & Chem.* In a molecular manner; with reference to molecules.

mol'e-cule (mŏl'ē-kūl; mōl'ē-kūl; 277), *n.* [Dim. fr. L. *moles* a mass: cf. F. *molécule*. See 5th MOLE.] **1.** *Chem.* A unit of matter, the smallest portion of an element or compound which retains identity in character with the substance in mass. The molecule may be, as in the case of mercury and argon, identical with the atom, but it usually consists of a union of two or more atoms, some organic compounds containing a very large number. According to Avogadro's hypothesis one cubic centimeter of any gas contains, under standard conditions, the same number of molecules, which number is estimated at 25-36 million million millions. An aggregate of some hundreds of molecules is conceivably visible in an ordinary high-power microscope. See ATOMIC THEORY, ION.

2. *Chem.* A quantity proportional to the molecular weight; specif., a gram molecule.

3. *Physics.* The smallest portion of a substance that moves about as a whole; — applied to the particles considered in the kinetic theory of gases without implication as to their identity or nonidentity with the chemical molecules.

4. Loosely, any minute particle.

mole'hill' (mōl'hĭl'), *n.* A little hillock or ridge of earth thrown up by moles working under ground; hence, a very small hill, or an insignificant obstacle, difficulty, or the like; as, to make a mountain out of a *molehill*, to magnify absurdly a difficulty or the like.

mole plant. The caper spurge; — so called because of its supposed efficacy in driving away moles.

mole rat. **a** Any of various Old World rodents of the families Spalacidæ and Bathyergidæ. They are molelike in habits and appearance, having very small eyes and ear conchs, large claws, and short tail. The great mole rat of southeastern Europe and Egypt (*Spalax typhus*) has the eyes covered by skin. The Cape mole rat of South Africa is *Bathyergus maritimus*. **b** Any of several rodents of eastern Europe and Asia, related to the voles, but more adapted to subterranean life. **c** An Indian rodent of the subfamily Murinæ and genus *Nesokia*.

mole'skin' (mōl'skĭn'), *n.* **1.** The skin of the mole used as fur, or some skin cut to look like it.

2. Any fabric having a thick soft nap or pile, like the fur of a mole; esp., a kind of strong twilled fustian.

3. *pl.* Garments, esp. trousers, made of this fabric.

mo-lest' (mŏ-lĕst'), *v. t.;* MO-LEST'ED; MO-LEST'ING. [F. *molester*, L. *molestare*, fr. *molestus* troublesome; cf. *moles* a heavy mass, load, burden. See 5th MOLE.] **1.** To trouble; disturb; to render uneasy; to annoy; vex.

Molested the church with needless opposition. *Hooker.*

2. To afflict or affect; — said of a disease. Also fig. *Obs.*

3. To interfere with or meddle with unwarrantably or hostilely; to disturb.

Syn. — Trouble, disturb, incommode, inconvenience, annoy, vex, pester, tease. See HARASS.

mo'les-ta'tion (mō'lĕs-tā'shŭn; mōl'ĕs-; 277), *n.* [Cf. F. *molestation.*] **1.** Act of molesting, or state of being molested; disturbance; annoyance; hostile, pestering, or vexatious interference.

2. An annoyance, disturbance, or vexation. *Obs. or R.*

mo-lest'ful (mŏ-lĕst'fo͝ol), *a.* Troublesome; vexatious; annoying. *Now Rare.*

mold. † 4th MOLE; 5th MOLE, 2. **mold.** Var. of MOULD.

mold, *n.* [See MOLE a spot.] A spot; a blemish; a mole. *Obs.*

mold (mōld), *n.* [AS. *molda* or *molde* the top of the head.] *Anat.* The top of the head; also, in an infant's head, the fontanel. *Obs. or R.*

mold'a-ble, mould'a-ble (mōl'dă-b'l), *a.* See -ABLE. — **mold'a-bil'i-ty, mould'a-bil'i-ty** (-bĭl'ĭ-tĭ), **mold'a-ble-ness, mould'a-ble-ness,** *n.*

mold'ale', *or* **mould'-,** *n.* Ale that is used at a funeral banquet. *Obs.*

mol'da-vite (mŏl'dă-vīt); *n. Petrog.* A clear green glass found in the form of pebbles in the Moldau Valley, Bohemia.

molde. † MOLE, of a port, MOULD.

mold'er-y, mould'er-y (mōl'dẽr-ĭ), *a.* Covered or filled with, consisting of, or like, mold.

moldery, mouldery, *a.* Crumbly. *Rare.*

mold'i-ness, mould'i-ness (-dĭ-nĕs), *n.* See -NESS.

mold'warp', mould'warp' (mōld'wôrp'), *n.* [ME. *moldwerp*: AS. *molde* soil + *weorpan* to throw up; cf. OD. *molworp*, G. *maulwurf*, Icel. *moldvarpa*, Dan. *muldvarp*. See MOLD soil, WARP; cf. MOLE the animal.] The European mole. *Local & Obsoles., Eng.*

mold'y, mould'y, *a.* Of the nature of, or like, mold, or earth.

mole, *n.* [OF.] Sunfish. *Obs.*

mole, *v. i.* To kill moles.

mole, *v. t.* To spot; stain. *Obs.*

mole'but (mōl'bŭt), **mole'bat** (-băt), *n.* [OF. *mole* sunfish + (perh.) *but* as in *halibut*.] The sunfish *Mola mola*.

mole'cast', *n.* A molehill.

mole catcher. One who makes a business of catching moles; — formerly used also as a term of contempt. — **mole'-catch'ing,** *a.*

Mo'lech. Var. of MOLOCH.

mo-lec'u-la. (mō-lĕk'ū-lă), *n.* [NL.] *Obs.* 1. A molecule. **2.** A little mass or part.

mo-lec'u-lar-ist (-lăr-ĭst), *n.* An investigator of molecules. *Rare.*

mole diver. The European dabchick. *Local, Eng.*

mole'-eyed', *a.* Having imperfect sight, like a mole.

mole'head', *n.* = PIERHEAD.

mole'hill'ish, *a.* Like a molehill. [hills.]

mole'hill'y, *a.* Full of molemole'ism (mōl'ĭz'm), *n.* Molelike character.

mol'en-da'ri-ous, *a.* Also **mo-len'di-na'ri-ous.** [L. *molendarius.*] Pertaining to a mill. *Obs.*

mo-len'di-na'ceous (mō-lĕn'dĭ-nā'shŭs), **mo-len'di-na'ri-ous** (-nā'rĭ-ŭs; 115), *a.* [L. *molendinarius*, fr. *molendinum* a mill, fr. *molere* to grind.] *Bot.* Resembling windmill sails, as certain winged fruits or seeds. *Rare.*

mo-len'di-nar (mō-lĕn'dĭ-nẽr), *a.* Pert. to a mill or miller. — *n.* A molar. — **mo-len'di-na-ry** (-nă-rĭ), *a. & n. All Humorous.*

mole plow *or* **plough.** A plow of peculiar construction for making an underground burrow for use as a drain. [catcher.]

mol'er (mō'lẽr), *n.* A mole[‖ **mo'le ru'lt su'a.** [L.] It falls down of its own greatness; — orig. of force devoid of judgment. *Horace* (*Odes*, III. iv 65).

mole shrew. **a** An American short-tailed shrew of the genus *Blarina*, esp. *B. brevicauda.* **b** An American mole of the genus *Scalopus.* **c** The Gibbs's mole. See 4th MOLE, 1.

mo-lest', *n.* [OF. *moleste.*] Molestation; annoyance; trouble; hardship. *Obs.*

mo-lest'er, *n.* One who molests.

molestie, molesty, *n.* [L. *molestia*: cf. OF. *molestie.*] Molestation. *Obs.*

mo-les'tious, *a.* Molesting; troublesome. *Obs.* — **mo-les'tious-ness,** *n. Obs.*

mo-les'tous, *a.* Also **mo-les'tu-ous.** [L. *molestus.*] = MOLESTIOUS. *Obs.*

molet. † MOLLET, MULLET.

mole tree. = MOLE PLANT.

molett. † MULLET. [WARP.]

mole'warp'. Var. of MOLD-

mo-li'men (mŏ-lī'mĕn), *n.* [L.] Effort; endeavor; specif., *Physiol.*, unusual effort of function; as, the menstrual *molimen*, the periodical effort made by the female generative organs to bring on menstruation.

mo'line (mō'lĭn; mō-lin'; 277), *n.* [L. *molina* mill. See MILL.] **1.** The crossed iron that supports the upper millstone by resting on the spindle; a millrind.
2. *Her.* A cross moline.

mo'line, *a. Her.* Resembling a moline in shape; — said of a cross each arm of which is divided at the end into two rounded branches or divisions. See CROSS, *Illust.*

Mo-lin'i-a (mō-lĭn'ĭ-ă), *n.* [NL., after Juan Ignazio *Molina*, a Chilean naturalist.] *Bot.* A genus of grasses having narrow flat leaves, slender panicles, and small spikelets with awnless glumes. The only species, *M. cærulea*, grows throughout Europe. It is a coarse perennial, of little value for pasturage.

Mo'li-nism (mō'lĭ-nĭz'm; mŏl'ĭ-), *n. Eccl.* The doctrine of Miguel de Molinos (1640–97). See QUIETISM, 1.

Mo'li-nism (mō'lĭ-nĭz'm; mŏl'ĭ-), *n. Eccl. Hist.* The doctrine of the followers of Molina. See 2d MOLINIST.

Mo'li-nist (-nĭst), *n.* A follower of Molinos; a Quietist.

Mo'li-nist (-nĭst), *n. Eccl. Hist.* A follower of Luis Molina (1535–1600), a Spanish Jesuit, who taught that the efficacy of grace depends on the assent of man's free will; — opposed to *Jansenist.* — **Mo'li-nis'tic** (-nĭs'tĭk), *a.*

Moll (mŏl), *n.* **1.** A familiar diminutive of MARY.
2. [*often l. c.*] *Slang or Dial. Eng.* **a** A sweetheart; a wench; a girl; a gill. **b** A prostitute; also, a professional thief's or vagrant's mistress or female companion.

mol-les'cence (mŏ-lĕs'ĕns), *n.* [L. *mollescere* to soften, fr. *mollis* soft.] Tendency to soften; mollities, as of bones.

mol-les'cent (-ĕnt), *a.* [L. *mollescens*, p. pr.] Tending to soften; softening.

mol'lie (mŏl'ĭ), *n.* [Cf. MALLEMAROKING.] *Naut.* A social meeting of captains of ice-bound whalers on board one of the ships. Cf. MALLEMAROKING.

mol'li-fi-ca'tion (mŏl'ĭ-fĭ-kā'shŭn), *n.* [LL. *mollificatio*; cf. F. *mollification.*] Act of mollifying, or state of being mollified; an appeasing or pacifying; *Obs.*, something that softens or mitigates, as an application or an expression.

mol'li-fy (mŏl'ĭ-fī), *v. t.*; MOL'LI-FIED (-fīd); MOL'LI-FY'ING (-fī'ĭng). [F. *mollifier*, L. *mollificare*; *mollis* soft + *-ficare* (in comp.) to make. See EMOLLIENT, MOIL, *v. t.*; -FY.]
1. To soften; to make tender or supple; to reduce the hardness, harshness, severity, or asperity of; to qualify; also, to make a favorable representation of; to euphemize; as, to *mollify* the ground. *Now Rare.*
With sweet science *mollified* their stubborn hearts. *Spenser.*
2. To allay, as rage; to appease; pacify; calm.
3. To enervate; weaken. *Obs.*
4. To lessen the intensity or violence of, as heat; to lighten or alleviate (care). *Obs.*
Syn. — See PACIFY.

mol'li-fy, *v. i. Obs.* **1.** To become soft or tender.
2. To become softened, as in temper; to become more genial or less hard or hardened; to relent.

mol'lin (mŏl'ĭn), *n.* Also **mol'line** (-ĭn; -ēn). [L. *mollis* soft.] *Pharm.* A light-colored soaplike base for ointments used in skin diseases.

mol-li'ti-es (mŏ-lĭsh'ĭ-ēz), *n.* [L., softness.] **1.** Softness; effeminacy. *Obs.*
2. *Med.* Softening; unnatural softness of an organ or part.

mol-li'tious (mŏ-lĭsh'ŭs), *a.* [L. *mollities* softness.] Softening; luxurious; sensuous.
Leave each *mollitious* haunt of luxury! *R. Browning*

Mol-lus'ca (mŏ-lŭs'kă), *n. pl.* [NL. See MOLLUSK.] *Zoöl.* A large phylum of the animal kingdom containing most of the animals popularly called *shellfish*, except the crustaceans. It comprises the slugs, snails, mussels, clams, oysters, whelks, limpets, cuttlefishes, etc. They have a soft unsegmented body without segmented appendages, but protected in most, but not all, cases by a calcareous shell of one or more pieces secreted by a modified part of the external body wall called the *mantle*, because it generally forms a flap or fold enveloping a part or the whole of the body. Part of the ventral surface of the body usually forms a muscular organ, the *foot*, which in the different groups is variously modified for creeping, digging, swimming, etc. The Mollusca have a well-developed heart and vascular system, and typically one or more pairs of gills (called *ctenidia*), which may be variously modified or entirely replaced by other breathing organs. The nervous system is composed of several pairs of ganglia with longitudinal and transverse commissures. Eyes (sometimes highly developed) and organs of hearing are often present. The sexes may or may not be distinct. In typical cases the embryos pass through trochosphere and veliger stages. The phylum is commonly divided into the classes Lamellibranchiata (syn. *Pelecypoda*), Gastropoda, Amphineura, Scaphopoda, and Cephalopoda (see these terms), all of which are geologically very ancient groups. In old classifications the brachiopods and tunicates, and sometimes the cirripeds, were included. — **mol-lus'can** (-kăn), *a. & n.*

mol-lus'coid (mŏ-lŭs'koid), *a.* [*Mollusca* + *-oid.*] *Zoöl.* **a** Resembling a mollusk. **b** Belonging to the Molluscoida. — *n.* One of the Molluscoida.

Mol'lus-coi'da (mŏl'ŭs-koi'dă), *n. pl.* [NL.] *Zoöl.* A phylum containing certain classes of animals which were formerly included among the mollusks. It comprises the Polyzoa, Brachiopoda, and often also Phoronida, distinguished principally by the possession of a lophophore. In old classifications the tunicates were included. — **mol'lus-coi'dan** (-dăn), *a.*

mol-lus'cum (mŏ-lŭs'kŭm), *n.* [NL. See MOLLUSK.] *Med.* Lit., something soft; — used in designating various cutaneous affections, esp. ‖ **mol-lus'cum e'pi-the'li-a'le** (ĕ'pĭ-thē'lĭ-ā'lē), which is marked by numerous small waxlike tumors on the skin, containing a soft cheesy material.

mol'lusk (mŏl'ŭsk), *n.* [F. *mollusque*, L. *mollusca* a kind of soft nut with a thin shell, fr. *molluscus* soft, *mollis* soft. See MOLLIFY.] One of the Mollusca.

mol'ly (mŏl'ĭ), *n.* **1.** [*cap.*] Pet or colloq. form of MARY.
2. A girl; wench; lass; sometimes, a prostitute. *Slang or Dial. Eng.*
3. An effeminate man or boy; a mollycoddle; a milksop; — often *Miss Molly. Slang or Collog.*
4. A kind of large basket for fruit, etc. *Eng.*

mol'ly-cod'dle (-kŏd'l), *n.* **1.** A person who coddles himself or is coddled; an effeminate man or boy; one who lacks spirit or courage; a person who takes excessive or unnecessary care of his health.
2. = MOLLYCOT. *Dial. Eng.*

mol'ly-cod'dle, *v. t.* To coddle; pamper.
She . . . *mollycoddled* him as if she had been his mother. *W. C. Russell.*

Mol'ly Ma-guire' (mŏ-gwīr'); *pl.* MOLLY MAGUIRES (-gwīrz'). **a** A member of a secret association formed among the tenantry in Ireland about 1843, principally for the purpose of intimidating law officers and preventing the service of legal writs. Its members disguised themselves in the dress of women. **b** A member of a similar association of Irishmen organized in the anthracite coal region of Pennsylvania, about 1854, for the purpose of intimidating employers and officers of the law, and for avenging themselves by murder on persons obnoxious to them. The society was broken up after the execution of a number of the members, following serious and extensive rioting, in 1877. — **Mol'ly Ma-guire'ism** (-ĭz'm).

Mol'loch (mŏl'ŏk), *n.* [L., fr. Gr. Μολόχ, fr. Heb. *Mōlek*; cf. Heb. *melek* king.] **1.** *Bib.* A Semitic deity, probably a fire or sun god, whose worship was accompanied by human sacrifice, esp. of firstborn children. Moloch is spoken of in the Old Testament as "the abomination of the Ammonites," but is doubtless the same god as Melkarth of the Phœnicians, and various similar Semitic deities. The form *Moloch* is an intentional distortion of later Hebrew writers for *Melech*, signifying "king." Cf. BAAL, 1.
Moloch, horrid king, besmeared with blood
Of human sacrifice and parents' tears. *Milton.*
2. [*l. c.*] A very spiny agamoid lizard (*Moloch horridus*) of western and southern Australia.

Mo-los'sian (mŏ-lŏsh'ăn) *a.* Of or pertaining to Molossia, an ancient country in Epirus. — *n.* A native or inhabitant of Molossia.

mo-los'sus (mŏ-lŏs'ŭs), *n.* [L., fr. Gr. Μολοσσός, prop., Molossian.] Moloch (*M. horridus*).
1. *Gr. & Lat. Pros.* A foot of three long syllables.
2. [*cap.*] *Zoöl.* A genus of bats of the family Emballonuridæ ranging from the southern United States to Paraguay. The ears are united above the nose, which has no leaf, and the thick fleshy tail is produced beyond the interfemoral membrane. The appearance of the thick lips and prominent nostrils gives rise to the names *bulldog bat* and *mastiff bat. Molossus* is the type of a subfamily, **Mol'os-si'næ** (mŏl'ŏ-sī'nē). — **mo-los'sine** (mŏ-lŏs'ĭn; -īn), **mo-los'soid** (-oid), *a. & n.*

molt, moult (mōlt), *v. i.*; MOLT'ED or MOULT'ED; MOLT'ING or MOULT'ING. [ME. *moulen*, L. *mutare.* See MEW to molt; cf. MUTE to molt.] **1.** To be shed or cast; — said of feathers, etc., shed periodically. *Obs.*
2. To shed or cast off the hair, feathers, outer layer of the skin, horns, or the like, the cast-off parts being replaced by new growth.

molt, moult, *v. t.* To cast off and renew, as the hair, skin, feathers, or the like; to shed.

molt, moult, *n.* The act or process of casting off and developing anew the feathers, hair, outer layer of the skin, etc.; molting. In many animals a molt of some kind is periodic and regular. Most mammals shed their hair once a year; birds shed their feathers once, twice, or in some cases three times annually; reptiles slough their skins, crustaceans their entire exoskeleton and even horny parts of internal structures, and insect larvæ cast off their outer cuticle several times during their period of growth.

mol'ten (mōl't'n), *p. a.* [See MELT.] **1.** Melted; being in a state of fusion, esp. when the liquid state is produced by intense heat; — now used only of metals or other substances in general requiring intense heat to liquefy them; as, *molten* iron.
2. Having been previously melted; — said of something, as a metal, now solid.
3. Made by melting and casting the substance or metal of which the thing is formed; as, a *molten* image.
4. Dissolved; loosely, nearly liquefied. *Obs.*
molten sea, *Jewish Antiq.*, the brazen sea. 2 *Chron.* iv. 2.

Mo-luc'ca (mŏ-lŭk'ă), *a.* Of or pert. to the Moluccas, or Spice Islands. — **Moluccа balm.** See MOLUCCELLA. — **M. bean,** the nicker nut. See NICKER TREE. — **M. berry,** the fruit of a large elæocarpaceous tree (*Elæocarpus serratus*), native of India. — **M. grains,** the seeds of *Croton tiglium.* They are the source of croton oil (which see).

Mol'uc-cel'la (mŏl'ŭk-sĕl'ă), *n.* [NL., from the *Moluccas*, or Spice Islands, of which the plants were supposed to be natives.] *Bot.* A genus of mints, having a spiny-toothed calyx enlarged at the apex, divergent anther cells, and a corolla with concave posterior lip. The two species are natives of the Mediterranean region. *M. lævis*, the Moluccа balm of gardens, is also known as *shell flower*, from the enlarged shell-like calyx.

mo'ly (mō'lĭ), *n.*; *pl.* MOLIES (-lĭz). [L., fr. Gr. μῶλυ.]
1. A fabulous herb, of occult power, having a black root and white blossom, said by Homer to have been given by Hermes to Odysseus to counteract the spells of Circe. *Milton.*
2. A kind of wild garlic (*Allium moly*), cultivated for its bright yellow flowers.

mo-lyb'date (mō-lĭb'dāt), *n.* A salt of molybdic acid.

mo-lyb'de-nite (mō-lĭb'dē-nīt; mŏl'ĭb-dē'nīt; 277), *n.* [See MOLYBDENUM.] *Min.* Molybdenum disulphide, MoS_2, occurring in foliated masses or scales resembling graphite, but differing from the latter in its bluer color and in giving a greenish streak on porcelain, and yielding a sulphurous odor before the blowpipe. H., 1–1.5. Sp. gr., 4.7–4.8. It is valuable as a source of molybdenum and its compounds.

mo-lyb'de-num (mō-lĭb'dē-nŭm; mŏl'ĭb-dē'nŭm), *n.* [NL., fr. L. *molybdæna* galena, Gr. μολύβδαινα, fr. μόλυβδος lead.] *Chem.* A metallic element of the chromium group, resembling iron in its white color, malleability, difficult fusibility, and its capacity for forming steel-like alloys with carbon. Sp. gr., 9.01. Symbol, *Mo*; at. wt., 96.0. Molybdenum occurs only in combination, chiefly in molybdenite and wulfenite, but also in scheelite, molybdite, etc., and in smaller amounts in ores of iron and copper. The metal was first isolated in 1782 by Hjelm. It is obtained by reducing certain of its compounds with hydrogen, carbon, or aluminium. Chemically, molybdenum has the valences two, three, four, five, six (as in molybdic acid), and eight. It is used, in the form of ferromolybdenum, to harden steel. Certain compounds of it are used in coloring pottery and fabrics and in analytical chemistry.

mo-lyb'dic (mō-lĭb'dĭk), *a.* [See MOLYBDENUM.] *Chem.* Of, pert. to, or containing, molybdenum; specif., designating those compounds in which the element has a higher valence as contrasted with *molybdous* compounds.
molybdic acid. **a** Any of various acids derived from molybdic anhydride. **b** Molybdic anhydride, MoO_3, a white crystalline substance obtained by heating molybdenum in air or by heating molybdenite with nitric acid.

mole'wort' (mōl'wûrt'), *n.* Any cress of the genus *Arabis. Dial. Eng.*

moleyn. ✝ MULLEIN.

Mol'ge (mŏl'jē), *n.* [NL., fr. G. *molch* salamander.] Syn. of TRITURUS.

mo'li (mō'lĭ), *n.* [Native name.] An East African liliaceous tree (*Dracæna schizantha*) yielding a variety of dragon's blood.

Mo'li (mō'lĭ). *Bib.*

Mo'lid (mō'lĭd). *Bib.*

Mol'i-dæ (mŏl'ĭ-dē), *n. pl.* [NL.; *Mola* + *-idæ.*] *Zoöl.* See SUNFISH, 1.

mol'i-fy. ✝ MOLLIFY.

mo-lim'i-nous (mō-lĭm'ĭ-nŭs), *a.* Also **mol'i-min'i-ous.** [L. *molimen* a great exertion.] Of great bulk or consequence; massive; momentous; important; also, laborious. *Obs.* — **mo-lim'i-nous-ly,** *adv. Obs.*

mol'i-na-ry (mŏl'ĭ-nā-rĭ; mō'lĭ-), *a.* [L. *molinarius*, fr. *molina* mill.] Of or pertaining to a mill or grinding.

mol'i-net, *n.* [F. *moulinet*, dim. of *moulin* mill.] A stick or mill for mixing chocolate. *Obs.*

molinet. ✝ MOLINET.

mo-li'tion (mō-lĭsh'ŭn), *n.* [L. *molitio*, fr. *molere* to grind.] Act of grinding. *Obs.*

mo-lyb'de-nous (mō-lĭb'dē-nŭs; mŏl'ĭb-dē'nŭs), *a.* Molybdous.

molybdenum steel. Steel containing molybdenum, resembling, but somewhat superior to, tungsten steel.

molybdenum trioxide. See MOLYBDIC ACID.

denum trioxide, MoO_3, of which the simplest are H_2MoO_4 (needlelike crystals) and $H_2Mo_3O_7$ (amorphous solid). **salts** of the former have been called *monomolybdates*, some of the latter *dimolybdates*; there are also *trimolybdates*, etc. More highly complex salts, like the phosphomolybdates, are also numerous. **b** A light, white solid, MoO_3, more properly called *molybdic anhydride* or *molybdenum trioxide*. — **molybdic ocher** *or* **ochre**, *Min.*, molybdite.

mo·lyb'dite (mŏ-lĭb'dīt), *n.* Molybdic ocher; a yellow pulverulent mineral associated with molybdenite and formerly supposed to have the composition MoO_3, but now known to be a hydrated ferric molybdate.

mo·lyb'do- (mŏ-lĭb'dō-). [See MOLYBDENUM.] A combining form indicating a *compound of molybdenum*.

mo·lyb'dous (-dŭs), *a.* [See MOLYBDENUM.] Of, pertaining to, or containing, molybdenum; specif., designating those compounds in which molybdenum has a lower valence as contrasted with *molybdic* compounds.

mome (mōm), *n.* [Orig. uncert.; cf. MUM.] A dull, silent person; a blockhead; a fool. *Obs. or Archaic.*

mo'ment (mō'mĕnt), *n.* [F. *moment*, L. *momentum*, for *movimentum* movement, motion, moment, fr. *movere* to move. See MOVE; cf. MOMENTUM, MOVEMENT.] **1.** A minute portion of time; a point of time; an instant; as, at that very *moment*.

In a *moment*, in the twinkling of an eye. 1 *Cor.* xv. 52.

2. *Obs.* **a** In medieval reckoning, the fortieth or fiftieth of an hour. It was the tenth of a "point." **b** In Rabbinical reckoning, $\frac{1}{1080}$ of an hour. **c** In the 17th and 18th centuries, sometimes, a second.

3. A minute portion or part; an atom. *Obs.*

4. *Math.* An infinitesimal increment or decrement. *Obs.*

5. Importance, as in influence or effect; consequence; weight or value; consideration; — now only after *of*; as, the movement is of no *moment*.

Matters of great *moment* *Shak.*

6. That which causes or prompts action; an influential or deciding point, fact, or consideration. *Obs.*

7. Movement; motion. *Obs.*

8. A definite period or point, as of an event. *Rare.*

9. Impulsive power; force; momentum. *Obs.*

The *moments* or quantities of motion in bodies. *Berkeley*

10. *Mech.* Tendency, or measure of tendency, to produce motion, esp. about a point or axis. It is measured in general by the product of a mass, force, velocity, or the like, into a perpendicular distance from or to the point or axis.

11. *Statistics.* Potency, or the measure of potency, in determining the position of the center or axis of distribution of some subject of statistical investigation, as a country's population or wealth.

12. An essential or constituent element; momentum.

Syn. — Minute, twinkling; consequence, weight, force, value, signification, avail. See INSTANT, IMPORTANCE.

moment of a couple, *Mech.*, the product of either of its forces into the perpendicular distance between them. — **m. of a force.** *Mech.* **a** *With respect to a point*, the product of the force into the perpendicular distance from the point to the line of direction of the force. **b** *With respect to a line*, the product of that component of the force which is perpendicular to the plane passing through the line and the point of application of the force into the shortest distance between the line and this point. **c** *With respect to a plane that is parallel to the force*, the product of the force into the perpendicular distance of its point of application from the plane. — **m. of a magnet**, the product of the strength of either pole by the distance between them. — **m. of flexure.** = BENDING MOMENT. — **m. of inertia** (of a body or area about a given axis), *Mech.*, the integral sum of the products of each indefinitely small portion of mass or area into the square of its distance from the given axis. — **m. of momentum** (of a body about an axis or plane), *Mech.*, the product of the mass of the body into the moment of its velocity with respect to the axis or plane. — **m. of population**, the product of the population of a locality into the distance of the locality from an assumed axis of reference. — **m. of resistance**, *Mech.*, the sum of the moments of all forces in all the infinitesimally thin layers of a beam, etc., under stress, taken about the neutral axis, counterbalancing the external bending moment. — **m. of rotation**, *Mech.*, the moment of inertia of a rotating body about its axis of rotation. — **m. of stability**, *Mech.*, the moment (of a couple in a vertical plane) that would transfer the center of resistance of a body to the limiting position consistent with stability. — **m. of torsion**, *Mech.*, the moment of either of a pair of equal and opposite couples applied in different planes so as to tend to twist a body. — **the m. a** The fitting moment; the point of time which is just suited to the purpose or which furnished an opportunity. **b** The point of time in question or passing; the time being. **c** Elliptically, the moment when or that; just as soon as.

mo·men'tal (mŏ-mĕn'tăl), *a.* [Cf. OF. *momental*.] **1.** Momentary; brief; also, of moment; momentous. *Obs.*

2. *Mech.* Of or pertaining to moment or momentum.

momental ellipse (of a lamina), **m. ellipsoid** (of a solid), *Math.*, an ellipse, or ellipsoid, the radius vector of which varies inversely as the radius of gyration (of the lamina or solid, respectively) about that radius vector as axis.

mo'men·ta'ne-ous (mō'mĕn-tā'nē-ŭs), *a.* [L. *momentaneus*: cf. F. *momentané*.] Momentary; also, instantaneous. *Obs. or R.* — **mo'men·ta'ne-ous-ness**, *n. Obs.*

mo'men·ta·ry (mō'mĕn-tā-rĭ), *a.* [L. *momentarius*. See MOMENT.] **1.** Continuing only a moment; lasting a very short time; transitory; of living things, short-lived; ephemeral; as, a *momentary* pang. *Shak.*

2. Adapted to the moment. *Nonce Use.* *Pope.*

3. Occurring, recurring, or acting, at every moment. *Now Rare.* "Hourly and *momentary* molestations." *Beresford.*

4. Done, made, etc., in a moment; instantaneous. *Obs.*

5. *Phon.* Pronounced with a complete closure of the oral cavity; incapable of being held or continued; as, *p*, *t*, etc.

Syn. — TRANSIENT.

mo'ment·ly (mō'mĕnt-lĭ), *adv.* **1.** From moment to moment; every moment.

How Life and Death
Do wrestle for me *momently*! *Ld. Lytton.*

2. At any moment; in a moment; instantly.

When *momently*
The moon went out. *S. A. Brooke.*

3. For a, or the, moment.

Mon'gol, *n.* **1.** One of the native race of Mongolia, mostly nomadic tent dwellers, by occupation herdsmen and carriers, physically typical of the Mongolian race. Both the northern Mongols or Khalkhas, occupying the Gobi deserts and the Kentei and Khingan mountains, and the southern Mongols, more directly under Chinese influence, are subject to native princes, but owe tribute and military service to China. They have their own sect of Buddhism, the head of which resides at Urga. In the 12th and 13th centuries they conquered the greater part of Asia and eastern Europe, founded several powerful khanates (cf. KIPCHAK) and the Mogul Empire of India, and gave dynasties to China and Persia.

Mon-go'li-an (mŏn-gō'lĭ-ăn), *a.* **1.** Of or pertaining to Mongolia or the Mongols, or their language.
2. Designating, or belonging or relating to, one of the five great divisions of mankind distinguished by Blumenbach (1775) and named the **Mongolian race.** This race, the most numerous in the world, comprises the peoples of nearly all of Asia excepting Hindustan and the Mohammedan countries of the southwest, and also scattered tribes in the latter regions and in eastern and northern Europe. The typical Mongolian is of a yellowish complexion, has coarse straight black hair, scant beard, a broad flat face with small nose and prominent cheek bones, and eyes which often have a narrow and slant appearance owing to the peculiar formation of the lids. The stature is characteristically short, and brachycephaly is practically universal. Mentally the Mongolians rival the Caucasian peoples, two of the oldest civilizations of the world, the Akkadian (which see) and the Chinese, being developed by them. Frugality, industry, endurance, and patience are marked traits. Their languages are mostly comprised in the Indo-Chinese and Ural-Altaic families, together with Japanese and its allied tongues. Buddhism, Confucianism, Shintoism, and Shamanism are the chief religions. The American Indians, the Eskimos, and the Malayan peoples are often considered to be Mongolian offshoots.

mon'ism (mŏn'ĭz'm; mō'nĭz'm; 277: cf. MONAD), *n.* [From Gr. μόνος single.] **1.** *Metaph.* **a** That doctrine which refers all phenomena to, or derives them from, a single ultimate constituent or agent; — contrasted with *dualism* and *pluralism.* The doctrine has three generic forms: matter and its phenomena are explained as a modification of mind, involving an idealistic *monism;* or mind is explained by and resolved into matter, giving a materialistic *monism;* or, thirdly, matter, mind, and their phenomena are held to be manifestations or modifications of some one substance, like the substance of Spinoza, or a supposed unknown something of some evolutionists, which is capable of an objective and subjective aspect. The *mind-stuff theory* which asserts that matter and mind are identical, that each is an aspect of the other, may be taken as an attempt to reduce dualism to monism. **b** Monism is also called *philosophical unitarianism.*

There is no real opposition between *monism* and dualism, for there can very well be one kind of being, without being all body or all soul; and . . . Aristotelian realism is both a *monism* of substance and a dualism of body and soul. *Encyc. Brit.*

b The doctrine that the universe is an organized unitary being or total self-inclusive structure.

Monism means that the whole of reality, i. e., everything that is, constitutes one inseparable and indivisible entirety. *Monism* accordingly is a unitary conception of the world. It always bears in mind that our words are abstracts representing parts or features of the One and All, and not separate existences. Not only are matter and mind, soul and body, abstracts, but also such scientific terms as atoms and molecules, and also religious terms such as God and world. *Paul Carus.*

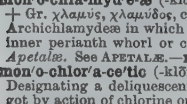
mon'o-cha'si-um (mŏn'ō-kā'zhĭ-ŭm), *n.*; *-si-a* (-ā). [NL.; *mono-* + Gr. χάσις division.] *Bot.* Any form of cymose inflorescence in which each relative main axis or pseudaxis produces only one branch. Cf. DICHASIUM, POLYCHASIUM, BOSTRYX. — **mon'o-cha'si-al** (-ăl), *a.*

Mon'o-chla-myd'e-æ (-klā-mĭd'ē-ē), *n. pl.* [NL.; *mono-* + Gr. χλαμύς, χλαμύδος, cloak.] *Bot.* A subdivision of the Archichlamydeæ in which the flowers are destitute of an inner perianth whorl or corolla; — called more generally *Apetalæ.* See APETALÆ. — **mon'o-chla-myd'e-ous** (-ŭs), *a.*

mon'o-chlor'a-ce'tic (-klôr'ā-sē'tĭk; -sĕt'ĭk), *a. Chem.* Designating a deliquescent crystalline acid, CH_2ClCO_2H, got by action of chlorine on acetic acid, and in other ways.

mon'o-chord (mŏn'ō-kôrd), *n.* [L. *monochordon*, Gr. μονόχορδον, fr. μονόχορδος with but one string; μόνος only, single + χορδή string: cf. F. *monocorde.* See CHORD; cf. MANICHORD.] **1.** *Music & Acous.* **a** An instrument of ancient invention for showing and measuring the mathematical relations of musical sounds. It consists of a single



Monochord, or Sonometer.

string stretched over a sounding board between two bridges, between which is a graduated rule, so that the vibrating length of the string between them may be readily changed and measured. The modern form is also called the *sonometer.* It often has a second wire or string for comparison. **b** A medieval musical instrument developed from the preceding, having several strings and bridges over one resonance board. *Obs. or Hist.*

2. A concord or harmony of sound; fig., harmony; concord; agreement. *Now Rare.*

— **mon'o-chord'ist** (-kôr'dĭst), *n.* — **mon'o-chord'ize** (-dīz), *v. i.*

mon'o-chro'ic (mŏn'ō-krō'ĭk), *a.* [Gr. μονόχροος; μόνος single + χρώς, χροός, color.] Monochromatic.

mon'o-chro-mat'ic (-krō-măt'ĭk), *a.* [See MONOCHROME.] Having, or consisting of, one color; presenting rays of light of one color only. — **mon'o-chro-mat'i-cal-ly**, *adv.* — **mon'o-chro'ma-tism** (-krō'mā-tĭz'm), *n.*

mon'o-chrome (mŏn'ō-krōm), *n.* [Gr. μονόχρωμος of one color; μόνος single + χρῶμα color: cf. F. *monochrome.*] A painting or drawing in a single hue; a picture made with a single hue; also, the art or process of producing the same; monochromy.

mon'o-chro'mic (-krō'mĭk) } *a.* Of, pertaining to, or
mon'o-chro'mi-cal (-mĭ-kăl) } made with, a single hue or color; monochrome.

mon'o-chro'my (mŏn'ō-krō'mĭ), *n.* The art or process of producing monochromes.

mon'o-chron'ic (-krŏn'ĭk), *a.* [*mono-* + Gr. χρόνος time.] Existing at the same time; belonging to the same period; contemporaneous.

mon'o-cle (mŏn'ō-k'l), *n.* [F. See MONOCULAR.] An eyeglass for one eye.

mon'o-cleid, mon'o-cleide (mŏn'ō-klīd), *n.* [*mono-* + Gr. κλείς, κλειδός, key.] A kind of cabinet in which all the drawers, etc., are locked simultaneously by one key.

mon'o-cli'nal (-klī'năl), *a.* [See MONOCLINIC.] *Geol.* Having, or pertaining to, a single oblique inclination; as, a *monoclinal* fold or flexure. See *Citation.* — *n.* A monoclinal fold.

Monoclinal

A *monoclinal* flexure is a single, sharp bend connecting strata which lie at different levels and are often horizontal except along the line of flexure. *W. B. Scott.* Fold.

monoclinal valley, *Geol.*, a valley produced by erosion in a region of strata with monoclinal dip, the axis of the valley following the course of one of the weaker beds. A monoclinal valley is generally asymmetrical in cross section.

mon'o-cline (mŏn'ō-klīn), *n. Geol.* A monoclinal fold.

mon'o-clin'ic (-klĭn'ĭk), *a.* [*mono-* + Gr. κλίνειν to incline.] *Cryst.* Having one oblique intersection of the axes; as, the *monoclinic* system. See CRYSTALLIZATION.

mon'o-cli'nous (mŏn'ō-klī'nŭs; mŏn'ō-klĭ'nŭs), *a.* [*mono-* + Gr. κλίνη couch: cf. F. *monocline.*] *Bot.* Having both androecium and gynœcium in the same flower. Cf. DICLINOUS. — **mon'o-cli'nism** (klī'nĭz'm), *n.*

Mon'o-con'dy-la (-kŏn'dĭ-lā), *n. pl.* [NL. See MONO-; CONDYLE.] *Zoöl.* A division of vertebrates, including the birds and reptiles, or those that have only one occipital condyle; coëxtensive with Sauropsida. — **mon'o-con'dylar** (-lär), **mon'o-con-dyl'i-an** (-dĭl'ĭ-ăn), **mon'o-con-dyl'ic** (-lĭk), **mon'o-con'dy-lous** (-kŏn'dĭ-lŭs), *a.*

mon'o-cot'yl (-kŏt'ĭl), *n. Bot.* Any monocotyledon.

mon'o-cot'y-le'don (-kŏt'ĭ-lē'dŭn), *n.* [*mono-* + *cotyledon.*] *Bot.* Any seed plant having a single cotyledon; a member of the class Monocotyledones. — **mon'o-cot'y-le'don-ous** (-lē'dŭn-ŭs; -lēd'ŭn-ŭs), *a.*

Mon'o-cot'y-le'do-nes (-lē'dō-nēz), *n. pl.* [NL.] *Bot.* One of the two subclasses of angiospermous plants (*Angiospermæ*), including all that produce a single cotyledon; — coördinate with the *Dicotyledones.* Monocotyledonous plants are further characterized by the structure of the stem, which rarely exhibits secondary growth in thickness and is without annual rings, the closed collateral vascular bundles being scattered through the ground tissue. The leaves are generally parallel veined; the flowers, 3-merous instead of 5-merous. The grasses, sedges, lilies, irises, orchids, palms, etc., are monocotyledons. The palm family includes most of the trees of this type, the other 35 families being chiefly herbaceous. Cf. DICOTYLEDONES.

mo-noc'ra-cy (mŏ-nŏk'rā-sĭ), *n.* [*mono-* + *-cracy.*] Government by a single person; undivided rule; autocracy.

mon'o-crat (mŏn'ō-krăt), *n.* [Cf. Gr. μονοκρατής ruling alone.] One who governs alone; an autocrat; also, one who favors monocracy; — applied esp., *U. S. Hist.*, by Jefferson about 1790 to the Federalists who sided with the monarchy of England against France. — **mon'o-crat'ic** (-krăt'ĭk), *a.*

mo-noc'ro-tism (mŏ-nŏk'rō-tĭz'm), *n.* [*mono-* + Gr. κρότος a beating.] *Physiol.* That condition of the pulse in which the curve or sphygmogram shows but a single crest, with no dicrotic elevation. — **mon'o-crot'ic** (mŏn'ō-krŏt'ĭk), *a.*

mo-noc'u-lar (mŏ-nŏk'ū-lär; mŏn-ŏk'-), *a.* [L. *monoculus*; Gr. μόνος single + L. *oculus* eye.] **1.** Having only one eye; monoculate.

2. Pertaining, or adapted, to the use of only one eye; as, *monocular* vision; a *monocular* microscope.

— **mo-noc'u-lar'i-ty** (-lăr'ĭ-tĭ), *n.* — **mo-noc'u-lar-ly**, *adv.*

mon'o-cule (mŏn'ō-kūl), *n.* [Cf. F. *monocule.* See MONOCULAR.] *Zoöl.* Any small crustacean with one median eye.

mo-noc'u-lous (mŏ-nŏk'ū-lŭs; mŏn-ŏk'-), *a.* Monocular.

mon'o-cy'cle (mŏn'ō-sī'k'l), *n.* [*mono-* + *cycle.*] *Mech.* A kind of velocipede having one wheel only. In one form the rider is seated inside the wheel.

mon'o-cyc'lic (-sĭk'lĭk; -sī'klĭk), *a.* Having a single cycle; specif.: **a** *Elec.* Designating a certain system or arrangement of armature windings and transmission lines for utilizing currents in a combined lighting and power service. **b** *Bot. & Zoöl.* Arranged in or consisting of one whorl or circle, as the floral organs of many flowers.

Mon'o-cys'tis (-sĭs'tĭs), *n.* [NL.; *mono-* + Gr. κύστις bladder, bag.] *Zoöl.* A genus of Gregarinida in which the protoplasm is not divided into segments by septa. *M. agilis* is an internal parasite of earthworms. It is the type of a family, **Mon'o-cys'ti-dæ** (-tĭ-dē), or suborder, **Mon'o-cys-tid'e-a** (-sĭs-tĭd'ē-ā).

mon'o-dac'ty-lous (-dăk'tĭ-lŭs), *a.* [Gr. μονοδάκτυλος; μόνος single + δάκτυλος finger.] **a** Having but one digit or claw. **b** = SUBCHELATE **b**. — **mon'o-dac'ty-lism** (-lĭz'm), *n.*

mo-nod'ic (mŏ-nŏd'ĭk), *a.* [Gr. μονῳδικός.] **1.** Of, pertaining to, or of the nature of, a monody.

2. *Music.* Of or pert. to monody; for one voice; monophonic; homophonic. *W. H. Hadow.*

mon'o-dist (mŏn'ō-dĭst), *n.* **1.** A writer or singer of a monody.

2. *Music.* A composer of monody.

mon'o-don'tal (-dŏn'tăl), *a. Elec.* Designating or pert. to a winding having one armature tooth per hole per phase.

mon'o-dra'ma (-drä'mȧ; mŏn'ō-drä'mȧ), *n.* [*mono-* + Gr. δράμα drama.] A drama acted, or intended to be acted, by a single person. — **mon'o-dra-mat'ic** (-drȧ-măt'ĭk), *a.* — **mon'o-dram'a-tist** (-drăm'ȧ-tĭst), *n.*

mon'o-drom'ic (-drŏm'ĭk), *a.* [*mono-* + Gr. δρόμος course, fr. δραμεῖν to run.] *Math.* Uniform; one-valued; monotropic. See UNIFORM FUNCTION.

mo-nod'ro-my (mŏ-nŏd'rō-mĭ), *n.* **a** The property of being monodromic. **b** The property that all paths of points of a body simply rotating about an axis shall return into themselves. *Helmholtz.*

mon'o-dy (mŏn'ō-dĭ), *n.*; *pl.* -DIES (-dĭz). [L. *monodia*, Gr. μονῳδία, fr. μονῳδός singing alone; μόνος single + ᾠδή song. See ODE.] **1.** *Gr. Lit.* **a** An ode sung by one voice, as by one of the actors in a tragedy; hence, a mournful song; a funeral song; a dirge. **b** A funeral oration.

2. A species of poem in which a single mourner expresses lamentation, as for the death of a friend.

3. *Music.* **a** The style of composition in which but one voice part carries a melody; — applied originally to the solo style of the earliest operas and oratorios, which began about 1600 to supplant the purely contrapuntal music of the Middle Ages. Hence, homophony, as opposed to *polyphony.* **b** A monodic composition; a melody. Also, a composition with but a single voice part.

4. Monotony of sound; monotonous sound.

mon'o-dy-nam'ic (mŏn'ō-di-năm'ĭk; -dĭ-năm'ĭk), *a.* [*mono-* + *dynamic.*] Possessing but one talent or power. "*Monodynamic* men." *De Quincey.*

mon'o-dy'na-mism (-dī'nȧ-mĭz'm; -dĭn'ȧ-mĭz'm), *n.* The theory that the various forms of activity in nature are manifestations of the same force. *G. H. Lewes.*

mo-noe'cious, mo-ne'cious (mŏ-nē'shŭs), *a.* [*mono-* + Gr. οἶκος house.] **1.** *Biol.* Having both male and female reproductive organs in the same individual; specif., *Bot.*, having sex organs on one gametophyte, as in most ferns and mosses; — in this sense more often written *monoicous.* In *Zoöl.*, commonly called *hermaphrodite.*

2. *Bot.* In seed plants, having distinct staminate and pistillate flowers on the same plant, as in the squash family (Cucurbitaceæ).

— **mo-noe'cious-ly, mo-ne'cious-ly**, *adv.*

monœciously polygamous, *Bot.*, having the flowers polygamous, but with a tendency to become monœcious.

mo-noe'cism, mo-ne'cism (-sĭz'm), *n. Biol.* State of being monœcious.

mon'o-ga'mi-an (mŏn'ō-gā'mĭ-ăn), *a.* [See MONOGAMOUS.] **a** Of or pertaining to monogamy; monogamous; also, of or pertaining to the order Monogamia. **b** *Zoöl.* = MONOGAMOUS, 2. *Rare.*

mon'o-gam'ic (-găm'ĭk), *a.* **1.** Of, pertaining to, or involving, monogamy; loosely, practicing monogamy.

2. *Bot.* = MONOGAMOUS, 3. *Obs.*

mo-nog'a-mist (mŏ-nŏg'ȧ-mĭst), *n.* **1.** One who upholds the principle or practice of marrying but once; also, one debarred by law or custom from remarrying after the death of one's spouse; — opposed to *deuterogamist* or *digamist.*

2. One who practices monogamy; — opposed to *bigamist* or *polygamist.*

mo-nog'a-mous (-mŭs), *a.* [L. *monogamus* having but one wife, Gr. μονόγαμος; μόνος single + γάμος marriage.] **1.** Upholding, or practicing, monogamy; specif.: **a** Having, or allowed to have, only one wife or husband at a time; — opposed to *bigamous* or *polygamous.* **b** Refraining or debarred from remarrying after the death of one's husband or wife; — opposed to *digamous.*

2. *Zoöl.* Mating with but one of the opposite sex.

3. *Bot.* Pertaining to the Linnæan order Monogamia. *Obs.*

4. Of or pertaining to monogamy; designating, or pertaining to, a social order in which monogamy is the prevalent or only legal type of marriage.

— **mo-nog'a-mous-ly**, *adv.*

mo-nog'a-my (-mĭ), *n.* [L. *monogamia*, Gr. μονογαμία: cf. F. *monogamie.*] **1.** Single marriage; specif.: **a** One marriage only during life; principle or practice of not remarrying after the death of one's spouse; — opposed to *deuterogamy* or *digamy. Now Rare.* **b** Marriage with but one person, husband or wife, at the same time; monogyny or monandry; — opposed to *bigamy* or *polygamy.*

2. *Zoöl.* State of being paired with a single mate.

mon'o-gen'e-sis (mŏn'ō-jĕn'ē-sĭs), *n.* [*mono-* + *-genesis.*] **1.** Oneness of origin; specif.: *Biol.* **a** The theory of the development of all living things from a single cell; — opposed to *polygenesis.* **b** Monogenism.

2. *Biol.* **a** Asexual reproduction. **b** Direct development without metamorphosis.

mon'o-ge-net'ic (-jē-nĕt'ĭk), *a.* [See MONOGENESIS.] **1.** *Geol.* One in genesis; resulting from one process of formation; — used of a mountain range. *Dana.*

2. *Biol.* Relating to, or involving, monogenesis.

3. *Zoöl.* Of or pertaining to the Monogenetica.

4. *Dyeing.* Yielding but one color or shade, whatever the mordant used; — said of dyestuffs.

Mon'o-ge-net'i-ca (-ĭ-kȧ), *n. pl.* [NL. See MONOGENESIS.] *Zoöl.* One of the two main divisions or orders of trematode worms. Its members are mostly external parasites infesting the gills and integuments of fishes, crustaceans, and amphibians, and pass from the embryonic to the adult form with little, if any, metamorphosis. Cf. DIGENETICA.

mon'o-gen'ic (-jĕn'ĭk), *a.* **1.** *Biol.* Of or pertaining to monogenesis; monogenetic.

2. *Zoöl.* Reproducing in one way only.

3. Having a single origin; descended from one pair; characterized by monogenism; — opposed to *polygenic.*

4. *Math.* Having a common origin; — said of a function to denote that the various power series that express it in different parts of the plane have all the same origin, $f(x)$.

monogenic algebraic construct, configuration, *or* surface, the assemblage of all places or centers of elements belonging to or determined by an algebraic equation $f(x, y) = 0$, rational and integral in both x and y, f not being factorable into similar rational polynomials; — a kind of generalization of the infinite plane used in treating functions of a single variable. — **m. analytic function**, the assemblage of all possible elements or continuations of a function $f(x)$

Bot. A monocarpic plant. — **mon'o-car'pal** (-kär'pal), *a.* **mon'o-car'pi-an** (-pĭ-ăn), *a. Bot.* Monocarpic. [Unicellular.] **mon'o-cel'lu-lar**, *a. Bot.& Zoöl.* **mon'o-cen'tric**, *a.* Having but a single center. **Mon'o-cen'tri-dæ** (-sĕn'trĭ-dē), *n. pl.*, **Mon'o-cen'tris** (-trĭs), *n.* [NL.; *mono-* + Gr. κέντρον point, center.] *Zoöl.* See PINECONE FISH. — **mon'o-cen'trid**, *n.* — **mon'o-cen'troid**, *a.* & *n.* **mon'o-cer'cous** (-sûr'kŭs), *a.* [*mono-* + Gr. κέρκος tail.] *Zoöl.* Unifilagellate, as certain protozoans.

monocerote. ✝ MONOCEROS.

mo-noc'er-ous (mŏ-nŏs'ĕr-ŭs), *a.* Having only one horn. **mon'o-chlor-an'thra-cene**, *n.* See MONO-. [See MONO-.] **mon'o-chlo'ride**, *n.* Also **-rid.** [Monochlorous.] **mon'o-chlo'rin-at'ed** (-klō'rĭ-nā'tĕd), *a. Chem.* Combined with one atom of chlorine, by substitution or addition. **mon'o-chlor'meth'ane** (-klō'rĕ-měth'ān), **mon'o-chlo'ro-meth'ane**, *n. Chem.* Methyl chloride. **mon'o-cho'a-nit'ic** (-kō'ȧ-nĭt'ĭk), *a.* [See MONO- + CHOANA.] *Paleon.* Designating cephalopod shells having siphuncular funnels extended inward (toward the apical chamber), without collars or funnels on the outer side of the septa. **mon'o-cho-re'a**, *n.* [NL.] Chorea affecting but one limb or part. **mon'o-chrom'ist** (-krŏm'ĭst), *n.* A painter in monochrome; also, an advocate of its use. **mon'o-chro'mous** (-krō'mŭs), *a.* Monochromatic **mo-noch'ro-nous** (mŏ-nŏk'rō-nŭs), *a.* [See MONOCHRONIC.] *Pros.* = MONOSEMIC. **mon'o-cil'i-at'ed** (mŏn'ō-sĭl'ĭ-ā'tĕd), *a.* Unifilagellate. **mon'o-cil'nal-ly**, *adv.* of MONOCLINAL. [Monoclinous.] **mon'o-clin'i-an** (-klĭn'ĭ-ăn), *a.* **mon'o-cli'no-met'ric** (-klī'nō-mĕt'rĭk), *a. mo-nop′o-ly (-lĭ), *n.*; *pl.* -LIES (-lĭz). [L. *monopolium*, Gr. μονοπωλία, μονοπώλιον; μόνος alone + πωλεῖν to sell.] **1.** The exclusive right, privilege, or power of selling or purchasing a given commodity or service in a given market; exclusive control of the supply of any commodity or service in a given market; hence, often in popular use, any such control of a commodity, service, or traffic in a given market as enables the one having such control to raise the price of a commodity or service materially above the price fixed by free competition. At the common law the term *monopoly* was specifically applied to an exclusive privilege of trade created by state grant or charter, and the term is still sometimes so used. Exclusive control of traffic constitutes a monopoly in the economic sense, whether acquired by state grant (as in case of patents or copyright, which are statutory exceptions to the common-law rule making monopolies illegal), by control of sources of supply (as in case of mines), by engrossing (which see) an article (as in case of cornering the market), by combination or concert of action, or by any other means.
2. A grant or charter of a monopoly (in sense 1).

month (mŭnth), *n.* [ME. *month, moneth,* AS. *mōnaƀ;* akin to *mōna* the moon, and to D. *maand* month, G. *monat,* OHG. *mānōd,* Icel. *mānuðr, mānaðr,* Goth. *mēnōþs.* See MOON.] **1.** A measure of time corresponding to the period of the moon's revolution; specif.: **a** One of the twelve portions into which the year is divided; the twelfth part of a year, corresponding nearly to the length of a synodical revolution of the moon; — called more explicitly *calendar month* (see below). In popular use, a period of four weeks or of thirty days is often called a *month.* **A calendar month** is: (1) Any of the months as adjusted in the calendar, now the Gregorian. April, June, September, and November now contain 30 days, and the rest 31, except February, which has 28 and, in leap years, 29. (2) The time from any day of such a month to the corresponding day (if any; if not, to the last day) of the next month. **b** *Astron.* More fully *lunar month.* The period of a complete revolution of the moon relative to some point, esp. of a synodical revolution, whence **synodical,** or **synodic, month,** that is, the period from one new moon to the next, mean length 29 days, 12 hours, 44 minutes, and 2.7 seconds. The other kinds of *lunar month* are the **anomalistic month,** the mean time of revolution from perigee to perigee, 27 days, 13 hours, 18 minutes, and 37.4 seconds; the **nodical,** or **draconitic, month,** the mean time of revolution from ascending node to ascending node, 27 days, 5 hours, and 35.8 seconds; the **tropical month,** the mean time of revolution from any point of the ecliptic back to the same point, 27 days, 7 hours, 43 minutes, and 4.7 seconds; the **sidereal month,** the mean time of revolution from any star back to the same star, 27 days, 7 hours, 43 minutes, and 11.5 seconds. Another astronomical month is the **solar month,** the twelfth part of the solar year, or the average time taken by the sun to pass through a sign of the zodiac. **c** A ninth part of a woman's period of gestation or pregnancy, which commonly lasts about ten lunar months, or 280 days.

☞ In the common law, a *month* is a lunar month, or 28 days, unless otherwise expressed; but by statute in Great Britain and generally in the United States the rule of the common law is changed, and a *month* is declared to mean a calendar month unless otherwise expressly stated. The *sing.* was formerly used for the *pl.* after a numeral, and still is dialectally. Cf. TWELVEMONTH.

in conspicuousness to the sun; the satellite of the earth, revolving about the latter from west to east in a little less than a calendar month and accompanying it in the annual revolution about the sun. The moon's diameter is 2,162 miles; mean distance from the earth, about 238,840 miles; mass, about one eighteith that of the earth, and volume, about one forty-ninth. The period of the moon's revolution about the earth with reference to the sun is about 29½ days; with reference to the stars, about 27⅓ days. The moon rotates while revolving, so as to present nearly always the same face to us; nearly one half of her surface is therefore never seen from the earth. Shining only by light reflected from the sun, the moon passes through her *phases* every month, being *new* when in conjunction with the sun and therefore invisible; at *first quarter* when half her disk becomes illuminated (90° east of the sun); *full* when the earth is between her and the sun (disk wholly illuminated); and at *third*, or *last*, quarter when half her disk again becomes invisible (90° west of the sun). Popularly, the moon is called new when, after passing the sun, she first becomes visible as a thin crescent. At such a time "the old moon in the arms of the new" may be seen faintly shining by sparking light. Strictly speaking, the phases last only for an instant. From first quarter to full, and from full to third quarter, the phase is called *gibbous*. No atmosphere, water, or sign of life has been detected on the moon. On her surface appear many depressions resembling volcanic craters, often of great size and with lofty rugged walls, but no present volcanic action is observable. Various superstitions as to the effect of the moon upon health, crops, etc. have existed in all ages. See ECLIPSE, LIBRATION, MONTH, TIDE, etc.

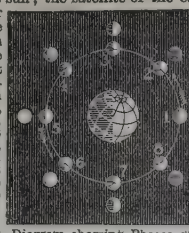

Diagram showing Phases of the Moon, the sunlight being represented as falling from the right upon the Moon in Eight Positions (1-8) and the Earth at the center. Outside each position of the moon is shown its appearance from the Earth: 1 New Moon; 3 First Quarter; 5 Full Moon; 7 Last Quarter.

I had as lief have the foppery of freedom as the *morality* of imprisonment. *Shak.*

c A kind of allegorical play, so termed because it consisted of discourses in praise of morality between actors representing such characters as Charity, Faith, Death, Vice, etc.

The Middle Ages had an appetite for allegory quite as vigorous as the liking for legend; and after the saintly legends had been set on the stage as miracle plays, allegory was also cast into dialogue, and we have the moral plays. The *morality* was a medieval forerunner of our modern novel with a purpose, as unconvincingly didactic as it is inevitably dull. The *morality* may even be defined as an attempt to dramatize a sermon, whereas the mystery is simply a dramatization of the text.
Brander Matthews.

3. Moral practice or action; rectitude of life; conformity to the standard of right; as, we may admire the polish of men whose *morality* we question.

Egoistic ethics, taking its premises from egoistic psychology, defines *morality* as the inteligent pursuit of that which instinct compels us to pursue, as the rational pursuit of pleasure and avoidance of pain, although it tries to show that such *morality* is compatible with . . . unselfishness. *Dict. of Pol. Econ.*

4. Morals; ethics.

The end of *morality* is to procure the affections to obey reason, and not to invade it. *Bacon.*

5. The relation of conformity or nonconformity to moral righteousness; quality of an intention, a character, an action, a principle, or a sentiment, when tried by the standard of right.

The *morality* of an action is founded in the freedom of that principle by virtue of which it is in the agent's power, having all things ready and requisite to the performance of an action, either to perform or not perform it. *South.*

mor'al-i-za'tion (mŏr'ăl-ĭ-zā'shŭn; -ĭ-zā'shŭn), *n.* [Cf. F. *moralisation.*] **1.** The act of moralizing; a moral reflection or discourse.

2. *Eccl.* One of a denomination of Christians, more properly the *Unitas Fratrum, Unity of Brethren,* or *United Brethren,* which was an offshoot of the Hussites in Bohemia and which formed a separate church in Bohemia and Moravia, about the middle of the 15th century. After being nearly extirpated by persecution, the society, under the name of *The Renewed Church of the United Brethren,* was reëstablished in 1722-35 on the estates of Count Zinzendorf in Saxony. Called also *Herrnhuter.* The Moravians consist of three provinces, the German, British, and American, and there is a general synod, which meets once in ten years. Their ministry is composed of bishops, presbyters, and deacons, the bishops being not diocesan, but general, and being appointed by and subject to the authority of the general synod. Their public worship is liturgical. They accept the Scriptures as the only rule of faith and practice, hold that it is not for them to "define what Scripture has left undefined, or to contend about mysteries," and emphasize the doctrines of total depravity, the love of God in the gift of His Son, the real godhead and manhood of Christ, the atonement, the work of the Holy Ghost in convicting of sin, etc., and the fruits of faith as shown in willing obedience to God's commandments.

2. *Dyeing & Calico Printing.* Acting as a mordant; serving to fix colors.

3. Biting, as a dog. *Rare.*

Syn. — MORDANT, CAUSTIC, CORROSIVE, SCATHING are here compared in their fig. senses. That is MORDANT which is biting or acridly cutting; CAUSTIC suggests esp. stinging sharpness or pungency; that is CORROSIVE which bites or wears deeply or blightingly; SCATHING adds the implication of fierce or withering severity; as, "Paris, teeming beneath a very courtly exterior, with *mordant* words" (*W. Pater*); *mordant* sarcasm; "The Earl's [wit] was crack-brained and sometimes *caustic*" (*Scott*); "his *caustic* pen" (*Thackeray*), "The invectives of Euripides are never the outpourings of the chorus, and their venom is cold as hemlock; those of Milton are hot and *corrosive*" (*Landor*); a *scathing* rebuke, *scathing* satire. See SOUR, PUNGENT, SHARP, ACRIMONY.

mor'dant, *n.* [F., originally, biting.] **1.** A metal plate or chape at the end of a belt, etc., opposite the buckle.

2. Any corroding substance used in etching.

3. *Dyeing & Calico Printing.* Any substance which, by combining with a dyestuff to form an insoluble compound or lake, serves to produce in the fiber a fixed color. Mordants are of two general classes: *basic* or *metallic,* as salts of chromium, iron, aluminium, tin, copper, etc., used with dyestuffs of alcohol or acid nature; and *acid,* as tannic acid, oleic acid, etc., used with basic dyestuffs. Lakes very often differ in color from the original dyestuffs; hence mordants are frequently used even with dyestuffs which are capable of attaching themselves to the fiber directly.

4. Any sticky matter used to cause leaf metal to adhere.

mor'dant, *v. t.;* MOR'DANT-ED; MOR'DANT-ING. To subject to the action of, or imbue with, a mordant; as, to *mordant* goods for dyeing.

OHG. *morgan* morning, in *morgengeba* morning gift, G. *morgengabe.* See MORN.] Of the nature of, or pertaining to, an inferior form of marriage which male members of various royal families in Europe and certain nobility formerly belonging to reigning families may contract with a woman of an inferior rank, so that the wife does not acquire and the children of the marriage do not inherit the rank of the husband or father, and the children do not succeed either to the father's public position or the property annexed to that position or that belonging to him in virtue of his title. It is sometimes called a **left-handed marriage,** because the left hand is often given in the ceremony. In some states the morganatic wife and her children have no rights of succession in the private property of the husband or father except under a will or marriage settlement. A morganatic marriage is a valid marriage, and while existing precludes any other; the children of it are legitimate. The morganatic marriage is historically connected with an early Germanic form of marriage in which the mund (which see) was not acquired, but the morning gift was made. No formal morganatic marriage is recognized in the law of England; marriage of members of the royal family is governed by statutory and common law.

Mor'mon (môr'mŭn), *n.* **1.** A member of the **Church of Jesus Christ of Latter-day Saints,** because of a belief in **The Book of Mormon,** which, it is claimed, is a sacred history of the ancient inhabitants of America. The "Mormons" state that this record was translated by Joseph Smith, Jr., a native of Vermont, through "the gift and power of God," from golden plates hid in Cumorah Hill, near Palmyra, New York, by Moroni, one of the ancient prophets. The Church of Jesus Christ of Latter-day Saints was organized April 6, 1830, at Fayette, Seneca County, New York. Its members claim that through apostasy the pure gospel of Christ was taken from the earth many centuries ago, and was restored through the instrumentality of Joseph Smith, Jr., by heavenly messengers sent to him for that purpose. They accept the infinite atonement of Christ and believe that all men may be saved through obedience to the principles and ordinances of the gospel, of which faith in God, repentance from sin, baptism by immersion for the remission of sin, and the laying on of hands for the reception of the Holy Spirit, form an essential part. They believe in prophecy, continued revelation, visions, healing, tongues and all the gifts and powers of the primitive church. They formerly practiced plural marriage, but that is stated to have been discontinued after the "Manifesto" of President Wilford Woodruff in 1890. The headquarters are in Salt Lake City, Utah.

2. A member of a sect, called the Reorganized Church of Jesus Christ of Latter-day Saints, which has always rejected polygamy. It was organized in 1852, and is represented in about forty States of the United States.

mortality table. A tabulated statement showing the number of deaths that may be expected to take place during a given period, as a year, among a given number of persons of a given age. Tables of this kind are chiefly used by life insurance companies in computing premiums and reserves for insurance policies and for annuities. When based upon a sufficiently large number of observations the variation between their results and the actual mortality is negligible. The most important mortality tables are as follows.

NAME.	BASIS, DATE, CONSTRUCTOR, AND USE.
Actuaries', *or* Combined Experience, Table*	Experience of 17 British companies; constructed 1838; pub. 1843; in U. S., in connection with insurance written before 1901.
American Experience Table†	Experience of Mutual Life Ins. Co. of New York; Sheppard Homans; extensively used in U. S.
Breslau Table	Records kept by the city of Breslau (Silesia) for the five years 1687–1691, comprising a total of 6,193 births and 5,869 deaths, to ascertain the price of life annuities.
British Offices Life Tables (O^M and O^F Tables)‡	Experience of 60 companies for 30 years; 1893; joint commission of the Institute and Faculty of Actuaries; used by many British offices for valuation purposes.
Carlisle Table	Statistics of Carlisle, Eng.; 1779–87; Joshua Milne; now little used.
Farr Table, No. 3	Observations of entire pop. of Eng.; pub. 1864; Dr. William Farr; no longer used.
National Fraternal Congress Table of Mortality	Experience of the leading fraternal benefit associations of the United States.
Institute of Actuaries' Life Tables (H^M and H^F Tables)§	Experience of 10 English and 10 Scotch companies; pub. 1869, 1872; largely used by British and Canadian companies.
Thirty American Offices' Experience Table (Meech Table)	Experience of 30 American companies; pub. 1881; L. W. Meech; not used in valuations.
Northampton Table	Statistics of Northampton, Eng.; 1735–80; Dr. Thomas Price; slightly in legal matters.

mort'gage (môr'găj), *n.* [F. *mort-gage,* OF. also *morgage; mort* dead (L. *mortuus*) + *gage* pledge. See MORTAL; GAGE.] **1.** *Law.* At the common law, a conveyance of property, upon condition, as security for the payment of a debt or the performance of a duty, and to become void upon payment or performance according to the stipulated terms. *Mortgage* was orig. applied, in English real estate law, to a conveyance of land with transfer of possession to the mortgagee, who was entitled to keep the rents and profits without applying them to the debt (whence the name *mortgage,* Lat. *mortuum vadium,* lit., dead pledge, as being dead to the mortgagor) and who acquired an indefeasible title to the mortgaged property upon default. Later it became customary for the mortgagor to retain possession, and the mortgagee's defeasible estate in the land was subjected to the equity of redemption and foreclosure rules of the equity courts. Technically, therefore, at common law the mortgagee's interest is an estate in real property; but, without any corresponding changes in the form of conveyance, the estate has long been treated in equity in England and in many of the United States as personal, the heir or devisee being treated as trustee of the mortgage for the personal representative, and now, by statute, the interest of the mortgagee is made personal property in Great Britain and generally in the United States. Under these conditions, therefore, a mortgage is: a nominally absolute conveyance of property defeasible only upon certain conditions, but actually operating as a lien or charge securing the payment of money or the performance of an obligation so that the mortgagee may, under certain conditions, take possession and may foreclose the property upon default. Cf. EQUITY OF REDEMPTION, PLEDGE, HYPOTHEC, ANTICHRESIS.

2. The instrument by which a mortgage conveyance is made, the state of the property so conveyed, or the interest of the mortgagee therein.

mort'gage, *v. t.*; MORT'GAGED (-găjd); MORT'GAG-ING (-gă-jĭng). **1.** *Law.* At common law, to grant or convey, as property, for the security of a debt, or other engagement, upon a condition that if the debt or engagement shall be discharged according to the contract, the conveyance shall be void, otherwise to become absolute; to make a mortgage conveyance of. See MORTGAGE, *n.*

1. Any insect of the order Lepidoptera except those known as *butterflies* (see BUTTERFLY). The moths, which in some classifications form a suborder Heterocera, vary much in form, size, and habits, but are usually nocturnal or crepuscular, and the antennæ, though of various forms (often featherlike), are rarely distinctly club-shaped, as in the butterflies, and the body is usually stouter and the wings proportionately smaller than in that group, and the colors less brilliant. Though the wings are held or folded in various positions when at rest, they are not kept erect over the body as with many butterflies. In the larval or caterpillar state most moths feed upon plants, many being very destructive (see GYPSY MOTH, BROWN-TAILED MOTH, etc.), and very few (see SILKWORM) of any direct use to man. The clothes moths are household pests, and the term *moth* is loosely applied to any insect which feeds on woolens, furs, etc. (see DERMESTIDÆ, CARPET BEETLE).

See 1st MOUNT.] **1.** Any elevation of the land high enough to be very conspicuous in its surroundings; in general, an elevation higher than a hill, and often rising with comparative abruptness, but without great extent of surface at its summit; *pl.*, a series or group of such elevations; as, the White *Mountains.* The principal mountains of the earth are the result of slow folding and upwarping of the crust, with or without rupture; but mountains also result from faulting, from volcanic extrusions, and from intrusions of lava into the outer parts of the earth. Erosion, acting on these original forms, has produced the irregular surfaces which now characterizes most mountains. Some mountains are remnants of former plateaus largely removed by erosion. Popularly the term is variously used. Hills which rise abruptly 100 or 200 feet above essentially flat surroundings are sometimes called mountains, as in southern New Jersey and the plains of Texas, while in a mountainous region, as near the Rocky Mountains, elevations of 1,000 or 2,000 or more feet are called hills.

Syn. — Induce, cause, animate, stimulate, provoke, rouse, kindle, urge, drive, stir, spur, goad. — MOVE, ACTUATE, IMPEL, PROMPT, INCITE, INSTIGATE. MOVE (see MOTIVE) is the general term for rousing one to action or inducing one to act; ACTUATE suggests more definitely the inner springs or motives of conduct; as, "If kingdom *move* thee not, let *move* thee zeal and duty" (*Milton*); "whether such vanity, and nothing else, *actuated* him therein; whether this was the true essence and *moving* principle of the phenomenon" (*Carlyle*). To IMPEL (see COMPEL) is to move (esp. to almost involuntary action) as if by a push forward; to PROMPT is to stimulate to act, as by suggestion; as, "A mightier power the strong direction sends, and several men *impels* to several ends" (*Pope*); I don't know what *impelled* me to do it; "Here was a world which did not halt in meditation, but *prompted* one to make actual trial of it" (*W. Pater*). INCITE and INSTIGATE agree in the idea of stirring or provoking to action; to *instigate* is commonly (but not always) to incite to evil; as, "No blown ambition doth our arms *incite*, but love, dear love" (*Shak.*); "and each *incited* each to noble deeds" (*Tennyson*); "Commonly, though not always, we exhort to good actions, we *instigate* to ill; we animate, *incite*, and encourage indifferently to good or bad" (*Johnson*); "But you don't so *instigate* to prayer" (*R. Browning*). See INDUCE, EXCITE, KINDLE.

mu'ci-lage (mū'sĭ-lĭj), *n.* [F., fr. L. *mucilago* a musty juice, fr. *mucere* to be moldy or musty. Cf. MUCUS.] 1. *Bot.* A gelatinous substance produced in certain plants by the action of water on the various celluloses or pectoses. In fucoid seaweeds it often forms the bulk of the internal tissue. It is also prominent in certain seed coats, as in flaxseed. Mucilage readily absorbs water and increases in bulk; its reactions are those of cellulose. See 3d GUM, 1 a. 2. An aqueous solution of gum, or of substances allied to it; as, medicinal *mucilage*; *mucilage* for envelopes.

mucilage cell. *Bot.* Any plant cell that secretes mucilage, as in fucoid seaweeds, in the testa of certain seeds, and in some bulbs, as the onion. Mucilage is generally formed by disorganization of the cell wall, thus often leading to the development of canals called **mucilage ducts.**

mu'ci-lag'i-nous (-lăj'ĭ-nŭs), *a.* [Cf. F. *mucilagineux.* See MUCILAGE.] 1. Partaking of the nature of, or like, mucilage; moist and viscid, or sticky; as, a *mucilaginous* liquid. 2. Of, pertaining to, or secreting, mucilage, as a cell. **mucilaginous glands,** *Anat.*, fringed folds of synovial membrane containing much fat, present in many joints. — **mu'ci-lag'i-nous-ness**, *n.*

mu'cin (mū'sĭn), *n.* [From MUCUS.] *Physiol. Chem.* a A glucoproteid existing in several varieties and forming when dry a white or yellowish powder. It imparts to various mucous secretions their ropy character, and is also found between the fibers of connective tissue, as in tendons. b See MUCEDIN. — **mu'cin-ous** (-sĭ-nŭs), *a.*

mu-cin'o-gen (mū-sĭn'ŏ-jĕn), *n.* [*mucin* + *-gen.*] *Physiol. Chem.* Any of a class of substances easily converted into mucins, as by the action of alkalies.

muck'er (mŭk'ẽr), *n.* 1. One who removes or clears away muck, as from stables. *Obs. or E.* 2. One who excavates earth, or "muck." 3. A term of reproach for a low or vulgar person. *Slang.*

Muck'er (mōōk'ẽr), *n.*; *G. pl.* MUCKER. [G.] An adherent of a religious sect considered to be of dubious tendency; — a German term of opprobrium signifying "canting hypocrite," first applied to a mystical and theosophical sect composed of the followers of Johann Wilhelm Ebel (1784–1861), preacher and teacher at Königsberg, who was tried for gross immorality, but ultimately acquitted.

muck rake. A rake for scraping up muck or dung. See MUCK RAKE, *v. i.*, below.

muck'rake' (mŭk'rāk'), *v. i.*; -RAKED' (-rākt'); -RAK'ING (-rāk'ĭng). To seek for, expose, or charge, esp. habitually, corruption, real or alleged, on the part of public men and corporations. On April 14, 1906, President Roosevelt delivered a speech on "The Man with the Muck Rake," in which he deprecated sweeping and unjust charges of corruption against public men and corporations. The phrase was taken up by the press, and the verb to **muck'rake'**, in the above sense, and the noun **muck'rak'er** (-rāk'ẽr), to designate one so engaged, were speedily coined and obtained wide currency. The original allusion was to a character in Bunyan's "Pilgrim's Progress" so intent on raking up muck that he could not see a celestial crown held above him.

muck'worm' (mŭk'wûrm'), *n.* 1. A larva or grub that lives in muck or manure. 2. One who scrapes together money by mean labor and devices; a miser. "Misers are *muckworms*." *Pope.*

mu'co-cel'lu-lose (-sĕl'ū-lōs), *n.* *Chem.* Any of a class of substances consisting of a combination or intimate mixture of cellulose and a mucilaginous constituent. They are found chiefly in seeds and fruits.

mu'coid (mū'koid), *a.* [*muco-* + *-oid.*] Resembling mucus. **mucoid degeneration,** degeneration marked by conversion of cells or intercellular substance into a glutinous substance containing mucin. — **m. tissue,** *Anat.*, mucous tissue.

mu'cold, *n.* [*mucin* + *-oid.*] *Chem.* Any of a group of nonphosphorized glucoproteids resembling true mucin, but differing in some reactions. They occur in the vitreous humor and the cornea, in cysts, in connective tissue, etc.

mu-con'ic (mū-kŏn'ĭk), *a.* [*mucic* + *itaconic.*] *Org. Chem.* Pertaining to or designating an unsaturated dibasic acid, $(CH:CHCO_2H)_2$, obtained indirectly from mucic acid, and forming large crystals.

mu'cor (mū'kôr), *n.* [L., fr. *mucere* to be moldy or musty.] 1. Hoariness; moldiness; filthiness. *Obs. or R.* 2. *Med.* Mucus. 3. [*cap.*] *Bot.* A genus of minute mold fungi typifying the family Mucoraceæ, and characterized by the naked zygospores. It includes some of the commonest forms of mold, as that found on bread, jam, etc.

Mu'co-ra'ce-æ (mū'kō-rā'sē-ē), *n. pl.* [NL.] *Bot.* A family of phycomycetous fungi typifying the order Mucorales, having the sporangia borne on a stalk or columella, usually producing no conidia. — **mu'co-ra'ceous** (-shŭs), *a.*

Mu'co-ra'les (-lēz), *n. pl.* [NL.] *Bot.* An order of phycomycetous fungi including most of the common molds found as saprophytes on organic substances, or parasitic on other molds. They have a well-developed branching mycelium with aërial sporangia or conidia. The species are very numerous and widespread.

mu'cor-my-co'sis (mū'kôr-mī-kō'sĭs), *n.* [NL.; *Mucor* + *mycosis.*] *Med.* A disease due to pathogenic molds of the genus *Mucor* or allied genera.

mu-co'sa (mū-kō'sä), *n.*; *pl.* -SÆ (-sē). [NL. See MUCOUS.] *Anat.* A mucous membrane.

mu-co-se'rous (mū'kō-sē'rŭs), *a.* [*muco-* + *serous.*] Both mucous and serous; as, a *mucoserous* gland, containing both mucus-secreting acini and acini producing a serous secretion.

mu-cos'i-ty (mū-kŏs'ĭ-tĭ), *n.* Quality of being mucous.

mu'cous (mū'kŭs), *a.* [L. *mucosus*, fr. *mucus* mucus.] 1. Of, pertaining to, or resembling, mucus. 2. Secreting, producing, or containing, mucus. **mucous fermentation,** viscous fermentation. — **m. membrane,** *Anat.*, the lining membrane of the passages and cavities of the body which communicate directly or indirectly with the exterior, as the alimentary, respiratory, and genitourinary tracts. Mucous membranes consist of two chief layers: deep vascular connective tissue stroma, or *corium*, which in many parts of the alimentary canal contains a thin but definite layer (the **muscularis mucosæ**) of unstriped muscle, and a superficial epithelium varying in kind and thickness, but always soft and smooth and kept constantly lubricated by the secretions of the cells and of numerous glands embedded in the membrane. These secretions contain in most cases more or less mucus. At the lips, nostrils, and other openings, the mucous membranes become directly continuous with the skin. — **m. patches,** *Med.*, elevated patches, usually syphilitic, found on mucous membranes or moist skin, esp. of the mouth or anus. — **m. tissue,** *Anat.*, a gelatinous form of connective tissue containing stellate cells with long processes, in the umbilical cord and in the embryo, and in the tumors called *myxomata.*

mu'cro (mū'krō), *n.* [L.] *Bot. & Zoöl.* Any abrupt point, tip, or process, as that which terminates some leaves.

mu'cro-nate (mū'krō-nāt) } *a.* [L. *mucronatus*, fr. *mucro*
mu'cro-nat'ed (-nāt'ĕd) } a sharp point.] Ending abruptly in a sharp point; abruptly tipped with a short spine. See APICULATE, *Illust.* — **mu'cro-nate-ly,** *adv.*

mu'cro-na'tion (-nā'shŭn), *n.* State or quality of being mucronate; also, a mucronate process.

mu-cron'u-late (mū-krŏn'ū-lāt), *a.* [Dim. of *mucronate.*] Tipped with a very small point, or mucro.

mu'cu-lent (mū'kū-lĕnt), *a.* [L. *muculentus*, fr. *mucus.*] 1. Slimy; moist and moderately viscous; also, full of mucus or phlegm. 2. *Bot.* Like mucus; gelatinous.

mu'cus (mū'kŭs), *n.* [L. *mucus, muccus*; cf. *mucere* to be moldy or musty, *emungere* to blow the nose, Gr. *μύξα* mucus, and Skr. *muc* to release. Cf. MOIST, MUCILAGE.] 1. A viscid, slippery secretion produced by mucous membranes, which it serves to moisten and protect. Its character is largely due to *mucins* (which see). In catarrhal and other morbid conditions the secretion of mucus may be greatly increased. Also, any of many other viscid animal secretions, whether or not of similar chemical composition to the above, as that secreted from the external surface of the body by snails, slugs, and various worms. 2. *Bot.* Protoplasm. *Obs.*

mud (mŭd), *n.* [Akin to LG. *mudde*, D. *modder*, G. *moder* mold, OSw. *modd* mud, Dan. *mudder* mud.] 1. A slimy or pasty mixture of earth and water, or of volcanic ashes and water; mire; also, any slimy deposit resembling the same; as, the *mud* from a storage battery. 2. *Railroads.* Natural soil, esp. as used for railroad ballast, as distinguished from gravel, stone, etc.

mu'lli-er (mŭ'lĭ-ẽr), *n.* [ME. *moillere*] woman, wife, fr. OF. *moillier* wife, L. *mulier* woman.] A woman married or single; specif., a wife; a mother; — formerly sometimes used attributively of a child born in lawful wedlock, esp. in **mulier puisne,** a younger son born in lawful wedlock, who was preferred at law to a *bastard eigne*, or elder bastard.
mul'li-er-ly, *adv.* In the manner or condition of a mulier; in wedlock; legitimately. *Obs.*
mu'li-er-ose' (-ōs'), *a.* [L. *mulierosus.*] Excessively fond of women. **2.** = **mu'li-er-os'i-ty** (-ŏs'ĭ-tĭ), *n. R.* [See MULIER.]
mulier puisne *or* **younger.** *Law.* **mu'li-er-ty** (mū'lĭ-ẽr-tĭ), *n. Law.* Condition of being born in lawful wedlock. *Obs. or R.*
mul'li'ta (mōō-lē'tȧ), *n.* [Sp., dim. fr. *mula* she mule.] The mule armadillo.
mull. ✝ MOOL.
mull. ✝ MULE.
mull (*dial.* mōōl), *n.* [Cf. MULLEY.] A cow. *Obs. or Dial. Eng.*
mull (mŭl), *n.* An inferior madder prepared from small roots or peelings and refuse of large ones.
mul'la-ga-taw'ny. Var. of MULLIGATAWNY.
mullar. ✝ MULLER.
mulla'to. ✝ MULATTO.
mulle. ✝ MILL.
mullein, *or* **mullen, dock.** The common mullein.
mul'len. Var. of MULLEIN.
mul'ler's glass (mŭl'ẽrz). *Min.* Hyalite.
mul'let, *v. t.* To curl, or dress, with the aid of mullets *Obs. & R.*
mul'let, *n.* A puffin. *Brit.*
mullet hawk. The osprey. *Local, Eng.*
mul'let-ry (mŭl'ĕt-rĭ), *n.* A pond or reservoir for breeding mullets.
mullets, *n. pl.* [F. *molet, molette*, a sort of pincers.] Small pincers for curling the hair. *Obs*
mulliegrums. ✝ MULLIGRUBS.
mul'li-pood', *n.* Multiple. *Obs.*
mull madder. An impure madder made by grinding the inferior parts of the madder roots.
mull muslin. = MULL.
mul'lock (mŭl'ŭk), *v. t.* To work in a hasty slipshod way. *Dial. Eng. & Australia.*
mul'lock, *v. t.* To mess; waste; spoil. *Dial. Eng. & Australia.*
mul'lock-er (-ẽr), *n.* One who mullocks; specif.: *Mining.* One who excavates and removes mullock, in distinction from one who excavates ore. *Australia.*
mul'lock-ing, *p. pr. & vb. n.* of MULLOCK. Specif.: *n. Mining* In Australia, act or process of excavating and removing mullock
mul'lock-y (-ĭ), *a.* Of or pertaining to mullock. *Australia*
mul'loid (mŭl'oid), *a.* [L. *mullus* surmullet + *-oid.*] *Zoöl.* Like or pert. to the family Mullidæ.
mul'lo-way (-ō-wā), *n.* The jewfish *Sciæna antarctica. Queensland.*
Mul'lus (mŭl'ŭs), *n.* [L.] *Zoöl.* The typical genus of red mullets. See MULLET, 2. [*Obs.*]
mul'wine', *n.* Mulled wine.
mul'ly (*dial.* mōōl'ĭ), *a.* Dusty; moldy. *Obs. or Dial. Eng.*
mul'mul (mŭl'mŭl), *n.* [Hind. & Per. *malmal.* Cf. MULL muslin.] Mull.
Mul-mu'ti-us (mŭl-mū'shĭ-ŭs), *n.* A legendary king and lawgiver of Britain. — **Mul'mu-tine** (mŭl'mū-tĭn), *a.*
mulne. ✝ MILL.
mulnere. ✝ MILLER.
mulsh (mŭlsh). Var. of MULCH.
mult, *v. t.* [See MULTURE.] To take multure from. *Obs.*
mult-. See MULTI-.
‖ mul'ta ge'mens. [L.] Groaning deeply. *Vergil (Æ., I. 465).*
Mul-ta'ni (mōōl-tä'nē), *n.* See INDO-EUROPEAN LANGUAGES.
mul'tar-tic'u-late (mŭl'tär-tĭk'ū-lāt), *a.* Multiarticulate. *R.*
mul-te'i-ty (mŭl-tē'ĭ-tĭ), *n.* [L. *multus* much, many.] Multiplicity. *Rare.*
Mul-tek'a (mōōl-tĕk'ȧ), *n.* [Cf. Ar. *multaqa* the place of meeting.] A Moslem code compiled from traditional sayings and opinions of Mohammed.
multepile. ✝ MULTIPLY.
mul'ter (*Scot.* mōōl'tẽr, mōō'-). Obs. or Scot. var. of MULTURE.
mul'ti, *a.* Many. *Obs.*
mul'ti-an'gu-lar. Var. of MULTANGULAR.
mul'ti-ar-tic'u-late, *a. Biol.* Having many articulations.
mul'ti-ax'i-al, *a* Having more than one axis.
mul'ti-break (mŭl'tĭ-brāk), *a. Elec.* Designating a switch that breaks the circuit at two or more points at the same time.
mul'ti-cam'er-ate (-kăm'ẽr-āt), *a. Zoöl.* Many-chambered.
mul'ti-cap'i-tate (-kăp'ĭ-tāt), *a.* Having many heads.
mul'ti-cap'su-lar (-kăp'sŭ-lẽr), *a. Bot.* Having many capsules.
mul'ti-car'i-nate (-kär'ĭ-nāt), *a. Zoöl.* Many-keeled.
mul'ti-cau'line (-kô'lĭn; -lĭn), *a.* [L. *multicaulis.*] Having many stems. *Rare.*

mul'ti-ca'vous (mŭl'tĭ-kā'vŭs), *a.* [L. *multicavus; multus* much, many + *cavum, cavus*, a cavity.] Having many cavities.

mul'ti-cel'lu-lar (-sĕl'ū-lär), *a.* Consisting of, or having, many cells or more than one cell.

mul'ti-cen'tral (-sĕn'trăl), *a.* Having many centers (esp., *Biol.*, centers of growth or development).

mul'ti-charge (mŭl'tĭ-chärj), *a.* Containing, or acting by, several charges; as, a *multicharge* gun.

multicharge gun, *Ordnance,* an experimental gun, the principal feature of which was the use of the accelerating principle in the action of the powder upon the projectile. A series of charges were placed in pockets along the bore near the breech, each being ignited as the projectile passed by the inflamed gases of the charge to the rear.

mul'ti-cip'i-tal (-sĭp'ĭ-tăl), *a.* [*multi-* + L. *caput* head.] *Bot.* Having several or many branches of a caudex, or several stems springing from one root or crown.

mul'ti-coil (mŭl'tĭ-koil), *a.* Possessing more than one coil, as the winding of an armature.

mul'ti-col'or, mul'ti-col'our (-kŭl'ẽr), *a.* [See MULTI-; COLOR.] Having many, or several, colors.

mul'ti-con'stant (-kŏn'stănt), *a.* Assuming a large number of constants, as in the theory of elastic bodies; — opposed to *variconstant.*

mul'ti-cos'tate (-kŏs'tāt), *a.* **a** *Bot.* Having numerous primary costæ, veins, or ribs, as a palmate leaf. **b** *Zoöl.* Having numerous costæ, or ridges.

mul'ti-cus'pid (-kŭs'pĭd), *a.* [See MULTI-; CUSPID.] Having numerous cusps, at least more than two; — said of teeth. — *n.* A tooth of this character.

mul'ti-cy'cle (-sī'k'l), *n.* A cycle or velocipede having many wheels; also, a cycle for carrying two or more riders.

mul'ti-cyl'in-der (-sĭl'ĭn-dẽr), *a.* Having many cylinders; specif., *Mach.*, designating an engine with three or more cylinders and a common crank shaft. — **mul'ti-cyl'in-dered** (-dẽrd), *a.*

mul'ti-fa'ri-ous (-fā'rĭ-ŭs; 115), *a.* [L. *multifarius; multus* much, many. Cf. BIFARIOUS.] **1.** Having multiplicity; having great diversity or variety; of various kinds; diversified; made up of many differing parts; manifold.

The *multifarious* complexities of human character. *Hare.*

2. *Bot.* Many-ranked, as leaves. *Rare.*

3. *Equity Pleading.* Of a pleading, improperly uniting distinct and independent matters, and thereby confounding them, whether against one or several defendants.

Syn. — See MANIFOLD.

mul'ti-fid (mŭl'tĭf'ĭd), *a.* [L. *multifidus; multus* much, many + *findere* to split.] Cleft into several or many parts; as, a *multifid* leaf.

‖ **mul'ti-fi'dus spi'næ** (mŭl-tĭf'ĭ-dŭs spī'nē). [NL.] *Anat.* A muscle of the fifth, or deepest, layer of the back, which fills up the groove on either side of the spinous processes of the vertebræ from the sacrum to the axis. It consists of many fasciculi which pass upward and inward to the spinous processes, and help to erect and rotate the spine.

mul'ti-flag'el-late (mŭl'tĭ-flăj'ĕ-lāt), *a.* Having many flagella.

mul'ti-foil (mŭl'tĭ-foil), *n.* A foil of more than five divisions; — applied to foils in windows. — **mul'ti-foil,** *a.* — **mul'ti-foiled** (-foild), *a.*

mul'ti-fold (-fōld), *a.* [*multi-* + *-fold.*] Many times doubled; manifold; numerous.

mul'ti-form (-fôrm), *a.* [L. *multiformis; multus* many + *forma* shape: cf. F. *multiforme.*] Having many forms, shapes, or appearances. — **mul'ti-for'mi-ty** (-fôr'mĭ-tĭ), *n.*

A plastic and *multiform* unit. *Hare.*

multiform function, *Math.*, a nonuniform function; one that has more than one value for a given value of its argument, or whose value depends on the path along which its argument attains that given value.

mul'ti-gen'er-ous (-jĕn'ẽr-ŭs), *a.* [L. *multigenerus; multus* many + *genus, generis,* kind.] Having many kinds.

mul'ti-gran'u-late (-grăn'ū-lāt), *a.* Having, or consisting of, many grains.

mul'ti-ju'gate (mŭl'tĭ-jōō'gāt; mŭl-tĭj'ōō-gāt; 243), *a.* [See MULTIJUGOUS.] *Bot.* Having many pairs of leaflets.

mul'ti-ju'gous (-gŭs), *a.* [L. *multijugus; multus* much, many + *jugum* yoke.] **1.** Consisting of many pairs. *Rare.* **2.** *Bot.* Multijugate.

mul'ti-lat'er-al (mŭl'tĭ-lăt'ẽr-ăl), *a.* Having many sides; many-sided.

mul'ti-lin'e-al (-lĭn'ē-ăl), **mul'ti-lin'e-ar** (-ẽr), *a.* Having many lines.

mul'ti-lo'bate (-lō'bāt), *a.* Consisting of, or having, numerous lobes.

mul'ti-lobe (mŭl'tĭ-lōb), *n. Mach.* A lobed wheel having three or more lobes.

mul'ti-loc'u-lar (-lŏk'ū-lär), *a.* Having many or several locules. — **multilocular spore,** *Bot.*, a sporidesm.

mul-til'o-quence (mŭl-tĭl'ō-kwĕns), *n.* Quality of being multiloquent; use of many words; talkativeness.

mul-til'o-quent (-kwĕnt) } *a.* [L. *multiloquus; multus*
mul-til'o-quous (-kwŭs) } much, many + *loqui* to speak.] Speaking much; very talkative; loquacious.

mul'ti-mil'lion-aire' (mŭl'tĭ-mĭl'yŭn-âr'), *n.* One having two or more million (dollars, pounds, francs, or the like).

mul'ti-nom'i-nal (-nŏm'ĭ-năl) } *a.* [L. *multinominis;*
mul'ti-nom'i-nous (-nŏm'ĭ-nŭs) } *multus* many + *nomen, nominis,* name.] Having many names or terms.

mul'ti-nu'cle-ate (-nū'klē-āt) } *a. Biol.* Having several or many nuclei.
mul'ti-nu'cle-at'ed (-nū'klē-āt'ĕd) }

mul-tip'a-ra (mŭl-tĭp'ă-rä), *n.; pl.* **-RÆ** (-rē). [NL. See MULTIPAROUS.] *Med.* A woman who has borne more than one child.

mul'ti-par'i-ty (mŭl'tĭ-păr'ĭ-tĭ), *n. Biol.* The production of two or more young at a birth.

mul-tip'a-rous (mŭl-tĭp'ă-rŭs), *a.* [*multi-* + *-parous:* cf. F. *multipare.*] **a** *Zoöl.* Producing many, or more than one, at a birth. **b** *Bot.* Producing several lateral axes; as, a *multiparous* cyme.

mul'ti-par'tite (mŭl'tĭ-pär'tīt), *a.* [L. *multipartitus, multus* much, many + *partitus* divided, p. p. See PARTITE.] Divided into many parts; having several parts; esp., *Math.*, indicating a division into many parts; — said of a number *n* enumerating a number of objects not all of the same kind, but *p* of one kind, *q* of another, *r* of another, and so on, denoted by the symbol $pqr....$ See UNIPARTITE.

mul'ti-ped (mŭl'tĭ-pĕd), *or* **-pede** (-pēd), *a.* [L. *multipes, multipeda; multus* many + *pes, pedis,* foot: cf. F. *multipède.*] Having many feet, many-footed. — *n.* A multiped animal. *R.*

mul'ti-phase (-fāz), *a.* [*multi-* + *phase.*] Having many phases; specif., *Elec.*, polyphase.

mul'ti-plane (-plān), *a.* Having several or many planes or plane surfaces: as, a *multiplane* kite.

mul'ti-ple (mŭl'tĭ-p'l), *a.* [Cf. F. *multiple,* E. QUADRUPLE, MULTIPLY.] **1.** Containing more than once, or more than one; consisting of more than one; manifold, repeated many times; having several, or many, parts.

2. Specif.: **a** *Elec.* Designating a circuit having a number of conductors in parallel. **b** *Math.* Repeated, or occurring or present more than once, or in higher degree than the first; as, *multiple* contact.

multiple algebra, *Math.*, the algebra of complex numbers involving two or more unequal units, each system having its peculiar multiplication table. — **m. arc,** *Elec.*, a multiple series. *Obsolete.* — **m. boiler,** a multitubular boiler. See BOILER. — **m. circuit** *or* **connection.** = MULTIPLE SERIES. — **m. cropping,** the taking of two or more crops from the same field in one year. Pasturage is a crop, even if after hay or grain in the same year, and every cutting of grass is a crop. — **m. drill** *or* **drilling machine,** *Mach.*, a drilling machine with many spindles for drilling a number of holes simultaneously, as in a boiler plate. — **m. effect,** *Sugar Manuf.*, a system of several vacuum pans arranged so that the vapor from any pan except the last is used to heat the next pan in which the exhaustion is more complete. — **m. fruit.** *Bot.* = COLLECTIVE FRUIT. — **m. harmonic telegraph,** a multiple telegraph employing as transmitters vibrating reeds of different pitch and as receivers reeds of corresponding pitch. — **m. integral,** *Math.*, the indicated result of a series of successive integrations, the result of each preceding integration being the integrand of the next. Thus the *first integral* is the result of performing the first integration indicated, the *second integral* is the result of integrating the first integral, and so on. — **m. lines,** *Fort.*, lines of detached defensive works. — **m. neuritis,** *Med.*, neuritis affecting several nerves at the same time. — **m. oiler,** *Mach.*, a lubricating device, as for an internal-combustion engine, having a reservoir from which the lubricant is conducted by separate pipes to each part to be lubricated, flow being promoted either by gravity or under air pressure. — **m. personality,** *Psychol.*, a pathological state of the mind in which two or more distinct personalities or individual characters appear in the same person. Multiple personalities (two, at least) may exist simultaneously, but usually they alternate, the person affected assuming one character after the other involuntarily. The different personalities may be entirely dissociated, they may have a partial acquaintance with or recognition of one another, or one may have full memory of another totally ignorant of the first. Personalities which are late or abnormal developments are called *secondary* in contrast with the *normal.* — **m. point.** A point on a curve through which two or more branches of the curve pass; a point on a surface through which three or more nappes of the surface pass; one that appears as a fixed number (*m*) of points in the total number (*n*) of intersections of the curve (or surface) with every line through the point; — called an *m-multiple,* or *m-ple, point.* **b** *Phys. Chem.* Any point representing a set of conditions under which two or more phases can exist together. — **m. rod.** See MARINE ROD. — **m. sclerosis,** = sclerosis. — **m. series.** *Elec.* **a** Two or more series circuits connected in multiple. **b** = SERIES MULTIPLE. — **m. standard.** = TABULAR STANDARD. — **m. star,** several stars in close proximity, which appear to form a single system. — **m. switch,** *Elec.*, a motor-starting switch used to cut out successive sections of a starting resistance. — **m. switchboard,** *Elec.*, a telephone switchboard with several sections, one for each operator. — **m. synchronous telegraph,** a multiple telegraph in which at the receiving station apparatus is maintained in exact synchronism with corresponding apparatus at the sending station. Commonly, rotating wheels at each station act as distributers connecting each of several transmitters to its appropriate receiver for a fraction of each revolution. — **m. tangent,** *Geom.*, a line tangent to a curve or surface at more than one point; one that appears as a fixed number (*m*) of lines in the total number (*n*) of tangents (to the curve) through a fixed point. — **m. telegraph,** a telegraph system in which several messages are transmitted simultaneously over one circuit. Hence, **m. telegraphy.** — **m. thread,** a screw thread composed of two or more distinct parallel intertwined threads or helices. Hence, **m.-threaded** (screw). — **m. transformer.** *Elec.* **a** A transformer connected in multiple, or parallel, with the primary circuit. **b** A transformer with more than one primary or more than one secondary coil. — **m. unit system,** a system of electric traction in which two or more motor cars, under a single control, are used to propel a train. — **m. voting,** voting by the same individual at the same election in various places in each of which he possesses the legal qualifications, as is possible under the British law governing the franchise.

mul'ti-ple (mŭl'tĭ-p'l), *n. Math.* **a** The product of a quantity by an integer. **b** An assemblage with respect to any of its divisions or parts. — in multiple. = *in parallel,* under PARALLEL, *n.* — **m. of gearing,** *Mach.*, a train of gearing for reducing or increasing the velocity ratio as desired.

mul'ti-ple-poind'ing (*see* POIND, *v.*), *n. Scots Law.* **Lit.,** a manyfold poinding, or distress; hence, a proceeding equivalent to the interpleader of English law for preventing this.

mul'ti-plex (mŭl'tĭ-plĕks), *a.* [L. *multiplex, -plicis.* See MULTIPLY.] **1.** Manifold; multiple.

2. *Elec.* Pertaining to or designating a system of telegraphy or telephony for transmitting, over a single wire, more than two messages in each direction at the same time.

multiplex telegraph *or* **telegraphy.** = MULTIPLE TELEGRAPH OR TELEGRAPHY.

mul'ti-pli-ca-bile (-plĭ-kă-b'l), *a.* [Cf. L. *multiplicabilis* manifold.] Capable of being multiplied; multipliable. — **mul'ti-pli-ca-bil'i-ty** (-bĭl'ĭ-tĭ), *n.*

mul'ti-pli-cand' (-plĭ-kănd'; mŭl'tĭ-plĭ-kănd'), *n.* [L. *multiplicandus* to be multiplied: cf. F. *multiplicande.*] *Math.* The number that is to be multiplied by another number called the *multiplier.* See MULTIPLICATION, 2.

mul'ti-pli-cate (-kāt), *a.* [L. *multiplicatus,* p. p. of *multiplicare.* See MULTIPLY.] Consisting of many, or of more than one; multiple; multifold. — **multiplicate ratio,** *Math.*, ratio of the like powers of two magnitudes.

mul'ti-pli-ca'tion (-kā'shŭn), *n.* [L. *multiplicatio:* cf. F. *multiplication.* See MULTIPLY.] **1.** Act or process of multiplying, or of increasing in number; state of being multiplied; as, the *multiplication* of the human species.

The increase and *multiplication* of the world. *Thackeray.*

2. *Math.* The process of repeating or adding any given number or quantity a certain number of times; commonly, the process of ascertaining by a briefer computation the result of such repeated additions; also, the rule by which the operation is performed; — the inverse of *division.* The word *multiplication* is sometimes used in mathematics, particularly in multiple algebra, to denote any distributive operation expressed by one symbol upon any quantity or anything expressed by another symbol. Corresponding extensions of meaning are given to the words *multiply, multiplier, multiplicand,* and *product.* Thus, since $\phi(x+y) = \phi x + \phi y$ (see under DISTRIBUTIVE), where $\phi(x+y)$, ϕx, and ϕy indicate the results of any distributive operation represented by the symbol ϕ upon $x+y$, x, and y, severally, then because of many very useful analogies $\phi(x+y)$ is called the *product* of ϕ and $x+y$, and the operation indicated by ϕ is called *multiplication.* Cf. FACIENT, *n.*, 2.

3. *Math.* In general, the process of affecting an operand by an operator, as the multiplication of versors in quaternions (a turning through one angle followed by a turning through another), which is not in general commutative, or the multiplication of derivations (yielding the derivative of a derivative), which in general is commutative. Generally, multiplication is the conjunction (by some defined law) of each element (or unit) of the one factor with each of the other, the result being the product. So understood, it is possible to multiply assemblages and magnitudes of the most diverse kinds.

4. *Bot.* = AUGMENTATION, 2 **d.**

5. *Alchemy.* Art of increasing gold or silver by magic. *Obs.*

6. *Symbolic Logic.* The logical operation of joining two or more terms to form an expression signifying only their common denotation. *John Venn.*

multiplication table. A table of the products of a set of numbers multiplied in some regular way; commonly, a table of the products of the first ten or twelve numbers multiplied successively by 1, 2, 3, etc., up to 10 or 12.

mul'ti-pli-ca-tive (mŭl'tĭ-plĭ-kā-tĭv), *a.* Tending or having the power to multiply, or increase, numbers; taken in multiplication. — *n.* A numeral adjective denoting how many times a thing is taken; as, *single, double, treble, twofold,* etc., are *multiplicatives.* — **mul'ti-pli-ca-tive-ly,** *adv.*

mul'ti-pli-ca'tor (-kā'tẽr), *n.* [L.: cf. F. *multiplicateur.* Cf. MULTIPLIER.] **1.** *Math.* A multiplier.

2. *Elec.* = MULTIPLIER, 3 **b.**

mul'ti-pli'cious (mŭl'tĭ-plĭsh'ŭs), *a.* [See MULTIPLEX.] Multiplex; manifold. — **mul'ti-pli'cious-ly,** *adv.*

mul'ti-plic'i-ty (-plĭs'ĭ-tĭ), *n.* [L. *multiplicitas,* fr. *multiplex* manifold: cf. F. *multiplicité.* See MULTIPLY.] Quality of being multiple, manifold, or various; state of being many; a multitude; as, a *multiplicity* of thoughts. "A *multiplicity* of gods." *South.* — **multiplicity of a curve,** *Math.*, the total number of its multiple points, or simple crunodes, acnodes, and cusps, into which each compound is supposed to be resolved.

mul'ti-pli'er (mŭl'tĭ-plī'ẽr), *n.* [Cf. F. *multiplieur.* Cf. MULTIPLICATOR.] **1.** One that multiplies or increases in number.

2. *Math.* The number by which another number is multiplied. See MULTIPLICATION, 2.

3. *Physics.* An instrument or device for multiplying or intensifying some effect, as of heat (cf. THERMOMULTIPLIER). Specif.: *Elec.* **a** A resistance placed in series with a voltmeter or pressure coil of a wattmeter when measurements are to be made on a circuit of higher voltage than that for which the instrument alone is suited. **b** A coil of wire used in conjunction with a capacity to increase the amplitude of oscillations in an oscillating circuit, particularly in a wireless telegraph receiver; — called also *multiplicator.* **c** The double coil of wire of many turns placed between the astatic needles of a galvanometer, as employed by Poggendorff and by Schweiger, to increase the delicacy of the instrument; also, a galvanometer so equipped.

4. An alchemist. *Obs.* See MULTIPLICATION, 5.

5. A money-maker. *Obs.* *Lydgate.*

6. *Hort.* One of the small offsets of a bulb, as that of an onion, used for purposes of propagation.

7. An arithmometer for multiplying.

8. A reel attachment for accelerating the speed at which the fishing line is gathered in at each turn of the handle.

mul'ti-cir'cuit, *a.* Designating a system composed of several circuits. [or.]

mul'ti-col'or-ous, *a.* Multicolor.

mul'ti-core', *a.* See MULTI-.

mul'ti-cus'pi-date, *a.* Multicuspid.

mul'ti-cyl'in-der, mul'ti-cyl'in-dered (-dẽrd), *a.* See MULTI-.

mul'ti-den'tate, *a.* Having many teeth, or toothlike processes.

mul'ti-den-tic'u-late (-dĕn-tĭk'ū-lāt), *a.* Having numerous denticulations.

mul'ti-dig'i-tate (-dĭj'ĭ-tāt), *a.* Having many fingers. [MULTI-.]

mul'ti-di-men'sion-al, *a.* See **mul'ti-faced'** (mŭl'tĭ-fāst'), *a.* Having many faces.

mul'ti-fa'ri-ous-ly (-fā'rĭ-ŭs-lĭ; 115), *adv.* of MULTIFARIOUS.

mul'ti-fa'ri-ous-ness (-nĕs), *n.* See -NESS.

multifarry, *a.* Multifarious. *Obs.*

mul'tif'er-ous (mŭl-tĭf'ẽr-ŭs), *a.* [L. *multifer; multus* much, many + *ferre* to bear.] Bearing much or many. *Rare.*

mul'ti-fe-ta'tion (mŭl'tĭ-fē-tā'shŭn), *n.* Pregnancy with more than two fetuses.

mul-tif'i-dous (mŭl-tĭf'ĭ-dŭs), *a.* Multifid.

mul'ti-flo'rous (mŭl'tĭ-flō'rŭs; 201), *a.* [L. *multiflorus; multus* much, many + *flos, floris,* flower: cf. F. *multiflore.*] Having many flowers.

mul'ti-flue, *a.* Lit., having many flues; specif., designating a kind of boiler. See BOILER, *n.*, 3.

mul'ti-fo'li-ate (mŭl'tĭ-fō'lĭ-āt), *a.* Having many leaves.

mul'ti-fo'li-o-late (-ō-lāt), *a.* Having many leaflets.

mul'ti-form, *n.* That which is multiform. *Rare.*

mul'ti-formed (mŭl'tĭ-fôrmd), *a.* Multiform.

mul'ti-for'mous (-fôr'mŭs), *a.* Multiform. *Obs. or R.*

mul'ti-gan'gli-on-ate, *a. Zoöl.* Having many ganglia.

mul'ti-gap, *a.* Having many gaps, as a kind of lightning arrester. — *n.* A set of the gaps of a multigap lightning arrester.

mul'ti-gen'er-ate (mŭl'tĭ-jĕn'ẽr-āt), *a. Math.* Generated in many ways.

mul'ti-grav'i-da, *n.* [NL.; *multi-* + L. *gravida* pregnant.] *Med.* A woman who has been pregnant several times.

mul'ti-gy'rate (-jī'rāt), *a. Anat.* Having many gyri.

mul'ti-lam'i-nar (-lăm'ĭ-nẽr), **mul'ti-lam'i-nate** (-nāt), *a.* Having many laminæ.

mul'ti-lit'er-al (-lĭt'ẽr-ăl), *a* Having many letters.

mul'ti-lo'bar (-lō'bẽr), **mul'ti-lobed** (mŭl'tĭ-lōbd), **mul'ti-lob'u-lar** (-lŏb'ū-lẽr), *a.* Multilobulate.

mul'ti-lob'u-late (-lăt), **mul'ti-lob'u-lat-ed** (-lāt'ĕd), *a.* Having, or consisting of, many lobules.

mun, *n.* A London street roisterer of the time of Queen Anne; a Mohock.
Mun-ce'ri-an (mŭn-sē'rĭ-ăn), *a.*

Mun-chau'sen, Baron (mŭn-chô'zĕn). The pretended author of a book of travels filled with the most extravagant fictions. The name is corrupted from that of Baron Karl Friedrich Hieronymus von *Münchhausen* (mün'k'hou'zĕn *or* mün'k'hou'zĕn), a German officer in the Russian service (d. 1797), said to have been famous for stories of impossible adventure.

Mun-chau'sen-ism (-Iz'm), *n.* [See MUNCHAUSEN, BARON.] An extravagant fiction embodying an account of some marvelous exploit or adventure.

mund (mŭnd; *A.-S.* mōōnd), *n.* [AS.; akin to OHG. *munt.*] Hand; palm; hence, protection; security; specif., *Early Eng. Law.* Right of protection or guardianship, as over the person and property of a wife, a widow, an orphan, or the members of one's household or dependents. The exact meaning of the term is doubtful, but it appears to have originally designated the right of the head of a household to protect and have unmolested the members of his household and to demand a mulct from those who violated his right, answering somewhat in its external relations to the early form of the Roman patria potestas. The rights appear to have been at least became, transferable, and were largely acquired by the lords from the individual householders, so that *mund* finally came to be used nearly or quite synonymously with *grith.* See GRITH, 2 b, PEACE. *Mund* was also used for *mundbreche* and *mundbyrd.*

Mun'da (mōōn'dä), *n.* A member of a division of the Dravidian race occupying eastern and southern Chutia Nagpur, Hindustan, and closely related to the Oraon and Ho. Only the more wealthy are Hinduized. Their language gives the name to one branch (called also *Kolarian*) of the Dravido-Munda languages (which see). — **Mun'da,** *a.*

Munda languages possess letters which are unknown in Dravidian; they count by twenties, while Dravidian languages count by tens; they have a dual, which Dravidian has not; but they have no negative voice, which Dravidian has. On the whole, the type of the *Munda* languages, viewed morphologically, is older than that of the Dravidian ones. They apply the agglutinative system more completely and regularly, and show much less tendency towards euphonic change. *Census of India,* 1901.

mun'dane (mŭn'dān), *a.* [L. *mundanus,* fr. *mundus* the world, an implement, toilet adornments, dress; cf. *mundus,* a., clean, neat; cf. F. *mondain.* Cf. MONDE, MOUND globe.] Of or pertaining to the world; worldly; earthly; terrestrial; as, the *mundane* sphere; *mundane* affairs. — **mun'dane-ly,** *adv.*

mu-nic'i-pal (mū-nĭs'ĭ-păl), *a.* [L. *municipalis,* fr. *municeps* an inhabitant of a *municipium,* or town possessing the right of Roman citizenship, a free town; *munia* official duties, functions + *capere* to take: cf. F. *municipal.* Cf. IMMUNITY; CAPACIOUS.] **1.** *Rom. Hist.* Of or pertaining to, or of the nature of, a municipium; as, *municipal* rights or privileges.

2. a Enjoying a local self-government more or less like that of the Roman municipium; — said of a town, city, or other corporate administrative unit, esp. of a corporation proper (a town, borough, or city), as distinguished from the quasi corporations (county, township, school district); as, *municipal* corporations. **b** Of or pertaining to, or characteristic of, such a corporation; as, *municipal* officers, government, insurance, ownership, laws, etc.

3. Of or pertaining to the internal or governmental affairs of a state, kingdom, or nation; — used chiefly to designate, or denote relation to, the law prescribed or enforced by a state in the regulation of the rights, and in the government, of those subject to its jurisdiction; that is, the national law, as distinguished from *international* law. This use of *municipal* is now avoided as unfortunate and inapt by many law writers. In its widest use *municipal law* includes all the law of the land governing the rights of the members of a state and those subject to its jurisdiction, including the written and unwritten law, but it has been, and by some, distinguished from the organic or *constitutional* law, as well as from international law.

municipal savings bank. See SAVINGS BANK. — **m. trading,** *Econ.*, the carrying on of trade by a municipality, esp. in conducting industrial undertakings such as the development and management of systems of transportation and communication, the production or control and supply of light, heat, or other utilities.

"*Mordre* will out." *Chaucer.*

2. *Law.* The offense of unlawfully killing a human being with malice aforethought, express or implied. The foregoing is one of the two most usual definitions of *murder* occurring in the judicial decisions; the other is essentially that given by Blackstone, quoting Sir Edward Coke. In the United States this is stated as follows: the offense committed "where a person of sound memory and discretion unlawfully kills any reasonable creature in being and in the peace of the commonwealth with malice aforethought, express or implied." At common law there were no grades or degrees of murder, but by statute in many States of the United States the offense is divided into two degrees, murder in the first degree being the most severely punished and restricted to those cases where the killing was willful, deliberate, premeditated, or especially cruel, or where it was done in the commission of some heinous felony, as arson, rape, etc. Murder is intentional and unlawful homicide. See HOMICIDE, MALICE, FELONY; cf. MURDRUM.

mur'der (mûr'dĕr), *v. t.*; MUR'DERED (-dĕrd); MUR'DER-ING. [ME. *mortheren, murtheren*, AS. *myrðrian*; akin to OHG. *murdiren*, Goth. *maúrþrjan*. See MURDER, *n.*] **1.** To kill (a human being) unlawfully and with premeditated malice or willfully, deliberately, and unlawfully.

4. A kind of pear, possibly the same as muscadine.

‖ **Musch'el-kalk'** (mŏŏsh'ĕl-kälk'; -kălk'), *n.* [G.; *muschel* shell + *kalk* limestone.] *Geol.* The middle division of the German Triassic. See GEOLOGY, *Chart.* The formation consists mainly of fossil-bearing limestones.

Mus'ci (mŭs'sī), *n. pl.* [L. *muscus* moss.] *Bot.* One of the two classes of Bryophyta, including the true mosses, distinguished from the Hepaticæ, or liverworts, by having a well-developed protonema, the gametophyte, or moss plant proper, being always segmented into stem and leaves, and never thalloid. The asexual spores are without elaters. It comprises three orders. Cf. HEPATICÆ; see MOSS, 2.

Mus'ci-dæ (mŭs'ĭ-dē), *n. pl.* [NL. See MUSCA.] *Zoöl.* A family of dipterous insects of which the house fly (*Musca domestica*) is the type. It has been variously limited, including in its broadest sense all the Diptera that have three-jointed antennæ, the third joint of which is setose, thus comprising both calyptrate and acalyptrate forms, which are classified into some thirty subfamilies. In this sense it is coextensive with the superfamily Muscoidea of certain recent writers. In its most restricted sense the family Muscidæ is coextensive with a subfamily, **Mus-ci'næ** (mŭs-sī'nē), of other writers, and includes comparatively few species. These are all closely allied to the house fly. — **mus'cid** (mŭs'ĭd), *a. & n.* — **mus'ci-form** (-ĭ-fôrm), *a.*

mus'cle (mŭs'ĭ), *n.* [F., fr. L. *musculus* a muscle, a little mouse, dim. of *mus* a mouse. See MOUSE; cf. sense 3 (below).] **1.** **a** An organ or mass of tissue whose special function is the production of motion or the exertion of physical force. **b** The peculiar tissue of which these organs are made up; muscular tissue. It consists of modified, usually greatly elongated, cells (called **muscle fibers**), which contract when stimulated. Muscle fibers, and hence the muscles they compose, are of two important classes, *striated* and *nonstriated.* The **striated muscles**, which in vertebrates constitute the principal part of the flesh, are mostly under the control of the will, or **voluntary muscles**, and are in typical cases made up of fibers bound together into bundles and inclosed in a sheath of connective tissue (the *perimysium*) continuous with the tendons, or fasciæ. Each fiber, which is inclosed in a delicate membrane (the *sarcolemma*), exhibits alternate transverse segments of lighter and darker material, which give it a transversely striated appearance (whence the name), and contains many protoplasmic nuclei, the so-called **muscle corpuscles.** In the higher animals **nonstriated muscles** are involuntary, or independent of the will. They constitute a large part of the walls of the alimentary canal, blood vessels, uterus, and bladder, and are found also in the iris, skin, etc. They are made up of greatly elongated spindle-shaped cells without striations, and with a central nucleus. The cells are usually grouped in bundles or sheets. **Cardiac muscle**, forming the substance of the heart of vertebrates and notable for its rhythmic contractions, is intermediate in many respects. It is involuntary, but striated, and the cells, or fibers, are extensively branched. In invertebrates the muscle fibers exhibit varying degrees of differentiation. They are, except in the Arthropoda, whether voluntary or not, commonly unstriated, distinctly striated fibers occurring occasionally where rapid and vigorous action is required.

2. Muscular strength or development; as, to show one's *muscle* by lifting a heavy weight. *Colloq.*

3. [AS. *muscle*, L. *musculus* a muscle, mussel. See above.] Var. of MUSSEL.

mus'cle-bound', *a. Med.* Having some of the muscles tense and enlarged and of impaired elasticity — a condition sometimes produced by excessive athletic exercise.

mus'cled (mŭs''ld), *a.* Furnished with muscles.

muscle plasma. *Physiol.* A thick, viscid, albuminous semifluid muscle substance contained within the sarcolemma, which on the death of the muscle yields a coagulum (myosin) and a liquid called **muscle serum.**

muscle reading. The art of making discriminations between objects of choice, of discovering the whereabouts of hidden objects, etc., by inference from the involuntary movements of one whose hand the reader holds or with whom he is otherwise in muscular contact.

muscle sensation. *Psychol.* Any sensation arising directly from muscular action; also, the complex of skin, tendon, joint, and muscle sensations accompanying their mutual action.

muscle sense. *Psychol.* The sense which functions in connection with muscular action.

muscle sound. *Physiol.* The sound given out when muscles contract, due to the vibration of the particles of the muscle.

mus'co-va'do (mŭs'kō-vä'dō), *n.* [Sp. *mascabado* or Pg. *mascavado* unrefined, for *mascabado*, p. p. of *mascabar* to depreciate, for *menoscabar; menos*, L. *minus* less + *cabo* head, end: cf. F. *moscouade, moscovade.* Cf. MISCHIEF.] Unrefined or raw sugar, obtained from the juice of the sugar cane by evaporation and draining off the molasses. It is dark-colored and moist. — **mus'co-va'do,** *a.*

Mus'co-vite (mŭs'kō-vīt), *a.* Of or pertaining to Muscovy or, sometimes, Moscow; hence, Russian; as, *Muscovite* traits; the *Muscovite* advance into Asia.

Mus'co-vite, *n.* [Cf. F. *Moscovite.*] **1.** A native or inhabitant of Muscovy, or ancient Russia; hence, a Russian.

2. [*l. c.*] *Min.* Common, or potash, mica, essentially $(H,K)AlSiO_4$, usually pale brown in color, also pale green (from the presence of iron), but commonly colorless in thin sheets. H., 2–2.5. Sp. gr., 2.76–3. See MICA.

mus'co-vit-ize (-vīt-īz), *v. t.;* **-IZED** (-īzd); **-IZ'ING** (-īz'ĭng). To convert, wholly or partially, into muscovite. — **mus'co-vit'i-za'tion** (-vīt'ĭ-zā'shŭn; -ĭ-zā'shŭn), *n.*

mus'co-vy duck (mŭs'kō-vĭ). [A corruption of *musk duck.*] A duck (*Cairina moschata*) native from Mexico to southern Brazil, but widely kept in domestication. It is larger than the mallard, has a small crest, red caruncula tions about the eyes and forehead, and the color is chiefly glossy green and brownish black.

mus'cu-lar (mŭs'kŭ-lär), *a.* [Cf. F. *musculaire.* See MUSCLE.] **1.** Of or pertaining to a muscle or a system of muscles; consisting of, or constituting, a muscle or muscles; as, *muscular* fiber; *muscular* strength.

2. Performed by, or dependent on, a muscle or the muscles. "The *muscular* motion." *Arbuthnot.*

3. Well furnished with muscles; having well-developed muscles; brawny; hence, strong; powerful; vigorous; as, a *muscular* body or arm.

muscular Christian, one who believes it a part of religious duty to maintain a healthful and vigorous physical state. — **m. Christianity.** **a** The practice and opinions of those Christians who believe that it is a part of religious duty to maintain a vigorous condition of the body, and who therefore approve of athletic sports and exercises as conducive to good health, good morals, and right feelings in religious matters. **b** An active, robust, and cheerful Christian life, as opposed to a meditative and gloomy one. — **m. excitability,** *Physiol.*, that property in virtue of which a muscle shortens when it is stimulated; irritability. — **m. sense.** *Physiol.* = MUSCLE SENSE. — **m. stomach**, a gizzard. — **m. work,** *Physiol.*, the work done by a muscle through the power of contraction.

mus'cu-lar'ĭ-ty (mŭs'kŭ-lăr'ĭ-tĭ), *n.* State or quality of being muscular.

mus'cu-la-ture (mŭs'kŭ-lȧ-tūr), *n.* [Cf. F. *musculature.*] **1.** *Physiol.* Muscular activity.

2. The muscles of an animal or of any part of it considered with reference to their arrangement or relations.

‖ **mus'cu-li pa'pĭl-la're s** (mŭs'kŭ-lī păp'ĭ-lā'rēz; 115). [NL., papillary muscles.] *Anat.* Small muscular columns attached at one end to the chordæ tendineæ, at the other to the wall of the ventricle. Their function is to maintain the tension on the chordæ as the ventricle contracts.

mus'cu-lo- (mŭs'kŭ-lō-). A combining form from Latin *musculus*, meaning *muscle.*

mus'cu-lo-cu-ta'ne-ous (-kū-tā'nē-ŭs), *a.* [*musculo-* + *cutaneous.*] *Anat.* Pertaining both to muscles and skin; designating certain mixed nerves which in their course give off motor filaments to the muscles and sensory filaments to the skin; specif.: **a** A large branch of the brachial plexus which supplies certain muscles of the upper arm, the skin of part of the forearm, etc. **b** A branch of the external popliteal nerve supplying the muscles of the fibular side of the leg and dorsum of the foot.

mus'cu-lo-spi'ral (-spī'răl), *a.* [*musculo-* + *spiral.*] *Anat.* Designating, or pertaining to, a large nerve which arises from the brachial plexus and passes spirally down the humerus to the front of the external condyle, where it divides into the radial and posterior interosseous nerves; also, an oblique shallow groove on the external border of the humerus in which this nerve lies.

muse (mūz), *v. i.;* **MUSED** (mūzd); **MUS'ING** (mūz'ĭng). [F. *muser* to loiter or trifle, OF., also, to muse, to reflect; orig. uncert.; perh. orig. to devote one's self to the Muses; or cf. L. *mussare* to murmur, to say in a low tone, to be silent. Cf. AMUSE.] **1.** To think closely; to study in silence; to meditate; ponder. "Thereon *mused* he." *Chaucer.*

He *mused* upon some dangerous plot. *Sir P. Sidney.*

2. To be so occupied in study or contemplation as not to observe passing scenes or things present; to be in a brown study; to be absent-minded. *Daniel.*

3. To wonder; also, to gaze wonderingly or meditatively. *Obs. or R.* *Spenser. B. Jonson.*

Syn. — Meditate, ruminate, ponder. See CONSIDER.

mu'sic (mū'zĭk), *n.* [F. *musique*, fr. L. *musica*, Gr. μουσική (sc. τέχνη), any art over which the Muses presided, esp. music, lyric poetry set and sung to music, fr. μουσικός belonging to the Muses or fine arts, fr. Μοῦσα Muse.] **1.** A tone or tones having any or all of the features of rhythm, melody, or consonance; melody or harmony generally, as heard in nature or art.

> If *music* be the food of love, play on. *Shak.*

2. The science or art of pleasing, expressive, or intelligible combination of tones; the art of making such combinations, esp. into compositions of definite structure and significance, according to the laws of melody, harmony, and rhythm; the art of inventing or writing, or of rendering, such compositions, whether vocal or instrumental. Greek music was generally subordinated to verse, and was further limited in expressiveness by the primitive instruments used, chiefly of the lyre and flute class. It accomplished, however, the establishment of the diatonic scales or modes, based on the tetrachord as unit, and of the rudiments of key relationship. The further growth of the art was in the early church, beginning with the derivation from the Greek of the ecclesiastical modes, followed by the invention of neumes to indicate the pitch of tones, the development of staff notation, and the superseding of the tetrachordal unit by the hexachord, with the device of solmization ascribed to Guido d' Arezzo (c. 990–c. 1050). The practice of descant, or simultaneous melody, gave rise to the system of mensurable music, from which rose the medieval school of counterpoint. This advance in church music was accompanied by the growth of secular song, both popular minstrelsy and the more artificial forms, such as the English round and catch, the settings of madrigals, villanelles, chansons, virelays, etc., throughout western Europe, the productions of the knightly troubadours and minnesingers, and those of the burgher guilds of Meistersinger. Settings of the Mass, psalms, and motets were carried to great contrapuntal elaboration, esp by Dutch and Italian masters, until, with a reaction against the abuses of secularism and excessive intricacy, the *a cappella* church music culminated in the work of Palestrina (about 1550) The establishment of the modern major and minor scales with the octave as unit, and of equal temperament, making possible modulation into any key, led to the development of harmony, as in the fugues of Bach (1685–1750), in which it forms the basis of a masterly polyphony. The progress of music since Bach has been rapid and varied. Vocal music has branched out in the great forms of (1) *opera*, which, beginning in Italy about 1600, was perfected in the work of Gluck, Mozart, Weber, Rossini, and Wagner; (2) *oratorio*, best represented by Bach's contemporary, Handel; (3) *lyric*, both secular and sacred, as in the Lied and choral. Meanwhile great improvements in the making of instruments marked the growth of purely instrumental music, the modern symphony originating with Haydn and others, about 1770 The classic sonata form, most representative of absolute music, was brought to its highest expressiveness in the consummate sonatas and symphonies of Beethoven (1770–1827). The masters of the succeeding romantic school, Berlioz, Schubert, Schumann, Chopin, etc., have diversified and enriched the expressive resources of music, breaking over too formal restrictions, until both romantic feeling and classic form have been united in the work of Brahms (d 1897). See INSTRUMENT, MODE, NOTATION, SOLMIZATION, COUNTERPOINT, FUGUE, HARMONY, etc.

my-ce'li-um (-ŭm), *n.* [NL., fr. Gr. μύκης a mushroom.] *Bot.* The mass of interwoven hyphæ forming the vegetative portion of the thallus in fungi. In the larger forms, as the mushrooms, it forms cobwebby filaments (mushroom "spawn") penetrating the soil. The mycelium of the smaller parasitic fungi is invisible to the naked eye, but ramifies through the tissues of the host, sending its sporophores to the surface. See HYPHA. — **my-ce'li-al** (-ăl), *a.*

My'ce-næ'an (mī'sē-nē'ăn), *a.* Of or pertaining to the ancient city of Mycenæ in Argolis, or designating, or pertaining to, the civilization of that city of its people was typical. The **Mycenæan** civilization covered a wide territory, including southern and eastern Greece, most of the isles of the Ægean, the western coast of Asia Minor, Crete, and Sicily, in which regions it preceded the Hellenic civilization. Argolis, Crete, and the Troad appear to have been its chief centers. It was characterized by Cyclopean architecture, dome-shaped, or "beehive," tombs, palaces adorned with painting, relief work in plaster, carved stone, etc.; by painted pottery of a series of types peculiar to itself; by skilled work in silver, gold, copper, bronze, ivory, and glass; and by unique styles of decoration, especially spiraliform designs and naturalistic treatments of plants and animals. Intaglio gems — agate, jasper, rock crystal, etc., — are among the finest achievements of its art, while clay tablets from Crete show both alphabetic and pictographic writing, as yet undeciphered. It is uncertain with what race to connect this civilization, but it was doubtless characteristic of the Pelasgians (whether as originators or inheritors) and other pre-Dorian races of Greece, while the Homeric account of Trojan culture is prob. reminiscent of it. The epoch is generally assumed to be about 1500 to 1100 B. C. Cf. ÆGEAN, CYCLADIC, MINOAN.

my'ce-to-ge-nic' (mī-sē'tō-jĕ-nĕt'ĭk), *a.* [Gr. μύκης, -ητος, fungus + *-genetic.*] Produced by fungi. — **my-ce'to-gen'e-sis** (-jĕn'ē-sĭs), *n.*

my-ce'to-gen'ic (-jĕn'ĭk), **my'ce-to-gen'ous** (mī'sē-tŏj'ē-nŭs), *a.* Mycetogenetic.

my'ce-toid (mī'sē-toid), *a.* [Gr. μύκης, -ητος, a fungus + *-oid.*] *Bot.* Resembling a fungus.

my'ce-tol'o-gy (-tŏl'ō-jĭ), *n.* *Bot.* Mycology. — **my-ce'to-log'i-cal** (mī-sē'tō-lŏj'ĭ-kăl), *a.*

my'ce-toph'a-gous (mī'sē-tŏf'ă-gŭs), *a.* [Gr. μύκης, -ητος, fungus + *-phagous.*] Fungivorous.

My-ce'to-phil'i-dæ (mī-sē'tō-fĭl'ĭ-dē), *n. pl.* [NL.; Gr. μύκης, -ητος, fungus + *-phil* + *-idæ.*] *Zoöl.* See FUNGUS GNAT.

— my-ce'to-phil'id (-ĭd), *a.* & *n.*

my-ce'to-zo'ön (mī-sē'tō-zō'ŏn), *n.* One of the Mycetozoa.

mychen. † MICHE.

mycle. † MICKLE.

my'co-cid'i-um (mī'kō-sĭd'ĭ-ŭm), *n.* [NL.; *myco-* + Gr. κηκίς, -ίδος, gallnut.] *Bot.* A gall produced by the attacks of a parasitic fungus.

my'co-derm (mī'kō-dûrm), *n.* [See MYCODERMA.] One of the bacteria causing alcoholic fermentation. *Obs.* — **my'co-der'ma-toid** (-dûr'mă-toid), **my'co-der'mic** (-dûr'mĭk), *a.*

my'co-der-mi'tis (-dĕr-mī'tĭs), *n.* [NL.; Gr. (spurious) μύκος mucus for L. *mucus* + *-derm* + *-itis.*] *Med.* Inflammation of a mucous membrane.

my'co-do-ma'ti-um (-dō-mā'shĭ-ŭm), *n.* [NL.; *myco-* + Gr. δωμάτιον chamber.] *Bot.* = MYCOCECIDIUM.

my'co-gas-tri'tis, *n.* [NL.; Gr. (spurious) μύκος mucus for L. *mucus* + *gastritis.*] *Med.* Inflammation of the mucous membrane of the stomach

my'co-hæ'mi-a, **my'co-he'mi-a,** *n.* [NL.; *myco-* + *-hæmia* = *-EMIA.*] *Med.* Condition marked by the presence of microörganisms in the blood.

my'coid (mī'koid), *a.* [*myco-* + *-oid.*] Fungoid.

my'co-mel'ic (mī'kō-mĕl'ĭk), *a.* [G. *mykomelinsäure;* cf. L. *mucus* mucus, and L. *mel* honey. Gr. μέλι.] *Chem.* Designating an acid, $C_7H_4O_2N_4$, obtained as a gelatinous precipitate from alloxan, uric acid, etc.

My'co-my-ce'tes (mī'kō-mī-sē'tēz), *n. pl.* [NL.; *myco-* + *-mycetes.*] *Bot.* In Brefeld's classification, a class of fungi including the so-called higher fungi, or the Ascomycetes and Basidiomycetes. Cf. PHYCOMYCETES and MESOMYCETES. —

my'co-my-ce'tous (-tŭs), *a.*

my'co-myr'in-gi'tis, *n.* [NL.; *myco-* + *myringitis.*] *Med.* Inflammation of the tympanic membrane caused by fungi.

my-coph'a-gist (mī-kŏf'ă-jĭst), *n.* One who eats fungi.

my-coph'a-gy (-jĭ), *n.* [*myco-* + Gr. φαγειν to eat.] The eating of fungi or mushrooms.

my'co-plasm (mī'kō-plăz'm), **my'co-plas'ma** (-plăz'mă), *n.* [NL. *mycoplasma; myco-* + *-plasm, plasma.*] *Bot.* A substance which, according to Eriksson, may exist symbiotically in the seed of cereals, giving rise to the mycelium of the ordinary rust fungus.

my'co-pro'te-in (-prō'tē-ĭn), *n.* [*myco-* + *protein.*] *Bacteriol.* A substance extracted from the cells of certain putrefaction bacteria. *Nencki.*

my'cose (mī'kōs), *n.* [Gr. μύκης a mushroom.] *Chem.* Trehalose. [Chitosan.]

my'co-sin (-kō-sĭn), *n. Chem.*

Myc-te'ri-a (mĭk-tē'rĭ-ă), *n.* [NL., fr. Gr. μυκτήρ nose, snout.] *Zoöl.* A genus of storks including the American jabiru and certain related species of the Old World.

Myc-toph'i-dæ (mĭk-tŏf'ĭ-dē), *n. pl.* [NL.] *Zoöl.* The family constituted by the true lantern fishes. See LANTERN FISH.

Myc-to'phum (-tō'fŭm) (syn. *Scopelus*) is the type genus.

my-dan'. † MAIDAN.

Myd'a-us (mĭd'ā-ŭs), *n.* [NL., fr. Gr. μυδᾶν to be clammy or damp.] *Zoöl.* A genus consisting of the celedu.

myd'dest. † MIDST.

mydelherd. † MIDDLEERD.

my'dine (mī'dĭn; -dēn; 184), *n.* Also **-din.** [Gr. μυδᾶν to be clammy from decay.] *Chem.* A nonpoisonous base, $C_5H_{14}ON$, from putrefied animal matter.

mydlerde. † MIDDLEERD.

mye, *v. t.* [OF. *esmier,* F. *émier.*] To crumb (bread). *Obs.*

myel-. See MYELO-.

my'e-las-the'ni-a (mī'ĕ-lăs-thē'nĭ-ă; -lăs'thĕ-nī'ă), *n.* [NL.; *myelo-* + *asthenia.*] *Med.* Spinal weakness due to nervous disorder.

my'e-la-tro'phi-a (-lă-trō'fĭ-ă), **my'e-lat'ro-phy** (mī'ĕ-lăt'rō-fĭ), *n.* [NL. *myelatrophia.* See MYELO-; ATROPHY.] *Med.* Atrophy of the spinal cord.

my-el'ic (mī-ĕl'ĭk), *a.* [See MYELO-.] Of or pertaining to the spinal cord.

my'e-li-na'tion (mī'ĕ-lĭ-nā'shŭn), **my'e-li-ni-za'tion** (-nĭ-zā'shŭn; -nĭ-zĭ'-), *n. Physiol.* The process of acquiring a medullary sheath.

my'e-lo-cer'e-bel'lar, *a.* Pert. to spinal cord and cerebellum.

my'e-lo-cœle' (mī'ĕ-lō-sēl'), *n.* [*myelo-* + *-cœle.*] *Anat.* The central canal of the spinal cord.

my'e-lo-cys'to-cele, *n.* [*myelo-* + *cysto-* + *-cele.*] *Teratology.* Tumor formed by distention of the central canal of the spinal cord.

my'e-lo-cyte', *n. Anat.* **a** A marrow cell. **b** A nerve cell of the spinal cord or brain.

my'e-lo-cy-thæ'mi-a, or **-the'mi-a** (mī'ĕ-lō-sī-thē'mĭ-ă), *n.* [NL.; *myelocyte* + *-hæmia* = *-EMIA.*] *Med.* The occurrence of an excessive amount of myelocytes in the blood.

my'e-lo-ma-la'ci-a, *n.* [NL.; *myelo-* + *malacia.*] *Med.* Softening of the spinal cord.

my'e-lo-men-in-gi'tis, *n.* [NL.] *Med.* Spinal meningitis.

my'e-lo-me-nin'ge-cele (-mē-nĭn'gō-sēl), *n. Med.* Spina bifida.

my'e-lon (mī'ĕ-lŏn), *n.* [NL., fr. Gr. μυελός marrow.] *Anat.* The spinal cord. — **my-el'o-nal** (mī-ĕl'ō-năl), *a.* — **my'e-lon'ic** (mī'ĕ-lŏn'ĭk), *a.*

my'e-lop'a-thy (-lŏp'ă-thĭ), *n.* [*myelo-* + *-pathy.*] *Med.* Disease of the spinal cord. — **my'e-lo-path'ic** (-lō-păth'ĭk), *a.* Var. of MYELOPLAX.

my'e-lo-plast', *n.* [*myelo-* + *-plast.*] *Physiol.* A leucocyte occurring in the bone marrow.

my'e-lo-scle-ro'sis, *n.* [NL.] Sclerosis of the spinal cord.

my'e-lo-syr'in-go'sis (-sĭr'ĭn-gō'sĭs), *n.* [NL.] *Med.* = SYRINGOMYELIA.

My'e-lo-zo'a (-zō'ă), *n. pl.* [NL.; *myelo-* + *-zoa.*] *Zoöl.* Syn. of LEPTOCARDII. — **my'e-lo-zo'an** (-ăn), *a.* & *n.*

Myg'a-le (mĭg'ă-lē), *n.* [L., a field mouse, Gr. *μυγαλῆ.*] *Zoöl.* A genus of spiders of the family Theraphosidæ, formerly including numerous very large and more or less venomous hairy species with four lungs and only four spinnerets. They are now mostly placed in other genera. Among them are the bird spider (*Avicularia avicularia*) of South America, said to destroy small birds, and the common tarantula (*Eurypelma hentzii*) of the southwestern United States. They do not spin true webs, but many make tubes in the earth, lined with silk and often furnished with a trapdoor. — **myg'a-loid** (-loid), *a.*

my-la'sis (mĭ-yā'sĭs), *n.* [NL., fr. Gr. *μυία* fly.] *Med.* A disease due to presence of larvæ of flies in or on the body.

my'lo-des-op'si-a (mĭ'yō-dĕs-ŏp'sĭ-ă), *n.* [NL. ; Gr. *μυλ-ώδης* like flies + *-opsia.*] *Med.* Abnormal vision characterized by the seeing of muscæ volitantes.

my'kiss (mĭ'kĭs ; mĭ-kĭs'), *n.* [Russ. *mykiz*, prob. fr. a native name.] A salmon (*Salmo mykiss*) of Kamchatka ; also, incorrectly, the cutthroat trout.

My'lo-don (mĭ'lō-dŏn ; mĭ'l'ō-), *n.* [NL. ; Gr. *μύλη* a mill + *ὀδούς, ὀδόντος,* a tooth.] *Paleon.* A genus of large extinct slothlike edentates of the Pleistocene of North and South America. *M. robustus* of Patagonia was as large as a rhinoceros and had its body partly covered with scaly plates. It is the type of a family, **My'lo-don'ti-dæ** (-dŏn'tĭ-dē). — **my'lo-dont** (mĭ'lō-dŏnt ; mĭl'ō-), *a. & n.*

my'lo-hy'oid (mĭ'lō-hĭ'oid), *a.* [Gr. *μύλαι* molar teeth + *hyoid.*] *Anat.* Designating, or pert. to, a muscle extending from the inner surface of the mandible to the hyoid, forming the floor of the mouth. — *n.* The mylohyoid muscle.

my'na (mī'nă), *n.* [Hind. *mainā.*] A common and widely distributed bird (*Acridotheres tristis*) of the starling family, of southeastern Asia. It is dark brown with a blackish white-tipped tail and white wing markings. Also, any of certain other species of the same and many allied genera. Some are often caged and taught to talk. See HILL MYNA, *Illust.*

Common Myna (*Acridotheres tristis*).

myn'pacht' (mĭn'păkt'), *n.* [D. *mijnpacht* ; *mijn* mine + *pacht* lease.] *South African Mining.* **a** A mining concession, esp. one made by the government to the owner of the surface concerned, and expressed in a **mynpachtbrief,** or official grant of mining rights. **b** The landowner's mining location, as distinguished from other mining claims on his tract, leased by the government. The landowner is entitled to demand a concession covering one tenth of his surface ownership.

my'o- (mĭ'ō-). A combining form fr. Gr. *μῦς, μυός, muscle.*

my-oc'lo-nus (mī-ŏk'lō-nŭs), *n.* [NL. See MYO- ; CLONIC.] *Med.* Clonic spasm of a muscle ; myoclonia. — **my'o-clon'ic** (mĭ'ō-klŏn'ĭk), *a.*

my'o-cœle (mĭ'ō-sēl), *n.* [*myo-* + *-cœle.*] *Embryol.* The cavity of a myotome.

my'o-com'ma (-kŏm'ă), *n. ; L. pl.* **-MATA** (-ă-tă). [NL. See MYO- ; COMMA.] *Zoöl.* **a** One of the segments (conspicuous in the lower forms, as fishes) into which the muscles of the body or trunk of vertebrates are separated by connective-tissue septa ; a myotome. **b** A septum between myotomes.

my-o-dy-na'mi-a (-dī-nā'mĭ-ă ; -dĭ'-), *n.* [NL. ; *myo-* + Gr. *δύναμις* power.] *Physiol.* Muscular force ; the force of muscular contraction. — **my-o-dy-nam'ic** (-năm'ĭk), *a.*

my-o-dy-nam'ics (-dī-năm'ĭks ; -dĭ-), *n.* [*myo-* + *dynamics.*] *Physiol.* That department of physiology which deals with muscular contraction.

my'o-fi-bro'ma (-fī-brō'mă), *n. ; L. pl.* **-BROMATA** (-tă). [NL. ; *myo-* + *fibroma.*] *Med.* A tumor composed of fibrous and muscular tissue.

my'o-graph (mĭ'ō-grăf), *n.* [*myo-* + *-graph.*] *Physiol.* An instrument for determining and recording the intensity, velocity, etc., of a muscular contraction.

my-og'ra-phy (mī-ŏg'ră-fĭ), *n.* [*myo-* + *-graphy.*] **a** *Anat.* Description of muscles. **b** *Physiol.* Use of the myograph. — **my'o-graph'ic** (-grăf'ĭk), **-i-cal** (-ĭ-kăl), *a.*

my'oid (mĭ'oid), *a.* [*myo-* + *-oid.*] Composed of, or resembling, muscular fiber.

my'oi-de'ma (mĭ'oi-dē'mă), *n.* [NL. See MYO- ; ŒDEMA.] *Med.* The formation of a lump in a muscle when struck a slight blow in states of exhaustion or in certain diseases.

my-ol'o-gy (mī-ŏl'ō-jĭ), *n.* [*myo-* + *-logy.*] The branch of anatomy that treats of muscles. — **my'o-log'ic** (mĭ'ō-lŏj'ĭk), **-i-cal** (-ĭ-kăl), *a.* — **my-ol'o-gist** (mī-ŏl'ō-jĭst), *n.*

my-o'ma (mī-ō'mă), *n. ; L. pl.* **-MATA** (-tă). [NL. ; *myo-* + *-oma.*] *Med.* A tumor consisting of muscular tissue. — *n.* **my'om'a-tous** (-ŏm'ă-tŭs ; -ō'mă-tŭs), *a.*

my-o'mec'to-my (mĭ'ō-mĕk'tŏ-mĭ), *n.* [*myoma* + *-ectomy.*] *Surg.* Excision of a myoma, as from the uterus.

my'o-mere (mĭ'ō-mēr), *n.* [*myo-* + *-mere.*] *Zoöl.* The muscular part of a metamere ; a myocommna.

My'o-mor'pha (-mōr'fă), *n. pl.* [NL. ; Gr. *μῦς, μυός,* a mouse + *μορφή* form.] *Zoöl.* The largest of three series into which the rodent suborder Simplicidentata is divided. It contains the rats and mice and their allies. Cf. HYSTRICOMORPHA, SCIUROMORPHA. — **my'o-morph** (mĭ'ō-mōrf), *n.* — **my'o-mor'phic** (-mōr'fĭk), *a.*

my'o-path'i-a (-păth'ĭ-ă), **my-op'a-thy** (mĭ-ŏp'ă-thĭ), *n.* [NL. *myopathia* ; *myo-* + Gr. *πάθος* suffering.] *Med.* Any affection of the muscles or muscular system. — **my'o-path'ic** (mĭ'ō-păth'ĭk), *a.*

my'ope (mĭ'ōp), *n.* [F., fr. Gr. *μύωψ, μύωπος* ; *μύειν* to close, shut the eyes + *ὤψ, ὠπός,* the eye.] A myopic person.

my'o-phys'ics (mĭ'ō-fĭz'ĭks), *n.* [*myo-* + *physics.*] The physics of muscular action. — **my'o-phys'i-cal** (-ĭ-kăl), *a.*

my-o'pi-a (mī-ō'pĭ-ă), *n.* [NL. See MYOPE.] *Med.* Nearsightedness ; shortsightedness ; a condition of the eye in which the rays from distant objects are brought to a focus before they reach the retina and form an indistinct image, while the rays from near objects are normally converged so as to produce a distinct image. It is corrected by the use of a concave lens.

my-op'ic (-ŏp'ĭk), *a.* Pert. to, affected with, or character ized by, myopia ; nearsighted. — **myopic astigmatism,** affection of the eye with myopia in one meridian only.

my'o-po'lar (mĭ'ō-pō'lăr), *a.* [*myo-* + *polar.*] *Physiol.* Of or pertaining to muscular polarity.

My-op'o-ra'ce-æ (mĭ-ŏp'ō-rā'sē-ē), *n. pl.* [NL. See MYOPORUM.] *Bot.* **A** family of plants (order Polemoniales) related to the Acanthaceæ, characterized by the irregular or bilabiate corolla, didynamous stamens, and berrylike fruit. It includes 5 genera and about 90 species, chiefly Australian. — **my-op'o-ra'ceous** (-shŭs), *a.*

My-op'o-rum (mī-ŏp'ō-rŭm ; mĭ'ō-pō'rŭm), *n.* [NL., of uncertain origin, perh. fr. Gr. *μύειν* to close + *πόρος* pore ; — from the resinous dots on the leaves.] *Bot.* A genus of Asiatic and Australian shrubs or trees typifying the family Myoporaceæ, having small axillary white flowers with a 5-parted bell-shaped calyx Several species resemble heaths, and are frequently cultivated.

my'o-pro'te-id (mĭ'ō-prō'tē-ĭd), *n.* [*myo-* + *proteid.*] *Physiol. Chem.* A globulinlike substance, not coagulable by heat, contained in the muscle plasma of fishes and crabs.

my'o-sar-co'ma (-sär-kō'mă), *n. ; L. pl.* **-COMATA** (-tă). [NL.] *Med.* A sarcoma partly composed of muscular tissue. — **my'o-sar-com'a-tous** (-kŏm'ă-tŭs ; -kō'mă-tŭs), *a.*

my'o-scope (mĭ'ō-skōp), *n.* [*myo-* + *-scope.*] *Physiol.* An apparatus for studying muscular contraction.

my'o-sin (-sĭn), *n.* [Gr. *μῦς, μυός,* a muscle.] *Physiol. Chem.* The principal proteid substance of dead muscle, formed in the coagulation of the muscle plasma which takes place in rigor mortis. It is a globulin, insoluble in water, but soluble in dilute solutions of salt, and is especially characterized by being completely precipitated by saturation of its solutions with salt.

my-o'sis (mī-ō'sĭs), *n.* [NL., fr. Gr. *μύειν* to close the eyes or lips.] *Med.* Abnormal smallness or contraction of the pupil of the eye.

my'o-sit'ic (mĭ'ō-sĭt'ĭk), *a. Med.* Myotic.

my'o-si'tis (-sī'tĭs), *n.* [NL. ; Gr. *μῦς, μυός,* muscle + *-itis.*] *Med.* Inflammation of the muscles.

My'o-so'tis (-sō'tĭs), *n.* [NL., fr. Gr. *μυοσωτίς,* lit., mouse ear.] *Bot.* A large genus of boraginaceous herbs, very varied in habit, the species widely distributed in temperate regions. They have flowers borne in racemes without bracts, the corolla salverform or funnelform with rounded lobes, the nutlets attached basally. *M. palustris* is the common forget-me-not. Also [*l. c.*], a plant of this genus.

my-ot'ic (mī-ŏt'ĭk), *a.* [See MYOSIS.] *Med.* Producing myosis, as opium, calabar bean, etc. — *n.* A myotic agent.

my'o-tome (mĭ'ō-tōm), *n.* [*myo-* + *-tome.*] **a** In vertebrates : (1) The muscle plate of a primitive segment. (2) A myocomma. **b** In segmented invertebrates, the muscles of one metamere. — **my'o-tom'ic** (-tŏm'ĭk), *a.*

my'o-to'ni-a (-tō'nĭ-ă), *n.* [NL. ; *myo-* + Gr. *τόνος* tension, tone.] **a** *Physiol.* Muscular tonicity or tonus. **b** *Med.* Muscular spasm. — **my'o-ton'ic** (-tŏn'ĭk), *a.*

Myr'ci-a (mŭr'shĭ-ă), *n.* [NL., fr. L. *myrtus* myrtle, Gr. *μύρτος.*] *Bot.* A large genus of tropical American trees and shrubs, nearly related to the tree myrtles (*Myrtus*), from which they differ in having few-seeded berries. Some are cultivated in glasshouses. The so-called *oil of myrcia* is obtained from a different plant. See BAYBERRY **b**.

myr'i-a- (mĭr'ĭ-ă-). [Gr. *μυριάς* a myriad. See MYRIAD.] A prefix, esp. in the metric system, indicating *ten thousand, ten thousand times ; as, myriameter.*

myr'i-ad (-ăd), *n.* [Gr. *μυριάς, μυριάδος,* fr. *μυρίος* numberless, pl. *μύριοι* ten thousand : cf. F. *myriade.*] **1.** The number of ten thousand ; ten thousand persons or things. **2.** An immense number ; an indefinitely large number.

myr'i-ad, *a.* Consisting of a very great, but indefinite, number ; innumerable ; multitudinous ; as, *myriad* stars.

myr'i-ad-mind'ed, *a.* Lit., having a myriad of minds ; gifted with a mind of extreme versatility and power.

Our *myriad-minded* Shakespeare. *Coleridge.*

myr'i-a-pod' (mĭr'ĭ-ă-pŏd'), *n.* One of the Myriapoda.

Myr'i-ap'o-da (-ăp'ŏ-dă), *n. pl.* [NL. ; Gr. *μυρίος* numberless + *-poda.*] *Zoöl.* A class, or subclass, of arthropods related to the hexapod insects, from which they differ in having the body made up of numerous similar segments, nearly all of which bear true jointed legs. They have one pair of antennæ, three pairs of mouth organs, and numerous tracheæ, similar to those of true insects. The larvæ, when first hatched, often have but three pairs of legs. With the exception of a few forms, the Myriapoda form two orders or subclasses, Chilognatha (syn. *Diplopoda*), the millepedes, and Chilopoda, the centipedes, which differ in so many characters that the division of the Myriapoda into two classes (called *Diplopoda* and *Chilopoda*) has been proposed. — **myr'i-ap'o-dan** (-dăn), *a. & n.* — **myr'i-ap'o-dous** (-dŭs), *a.*

myr'i-arch (mĭr'ĭ-ärk), *n.* [Gr. *μυριάρχης, μυριάρχος* ; *μύριοι* ten thousand + *ἀρχός* chief.] A captain or commander of ten thousand men.

My-ri'ca (mĭ-rī'kă), *n.* [L., tamarisk, fr. Gr. *μυρίκη.*] *Bot.* A large, widely distributed genus of aromatic shrubs and trees, wax myrtles or bayberries, typifying the Myricaceæ, distinguished from *Comptonia* by exstipulate leaves and the 2-4 bractlets of the ovary. Many fossil species occur in the Cretaceous and Tertiary. See WAX MYRTLE.

Myr'i-ca'ce-æ (mĭr'ĭ-kā'sē-ē), *n. pl.* [NL.] *Bot.* A family of shrubs constituting the order Myricales, and including two genera, *Myrica* and *Comptonia.* They have simple, alternate, mostly coriaceous leaves with small dilicuous flowers borne in aments in the axils of bracts. The fruit

my-en'ta-sis (mī-ĕn'tă-sĭs), *n.* [NL. See MYO- ; ENTASIS.] *Surg.* Forcible stretching of a muscle.

myere. ✝ MERE, water. [*Obs.*]

myese. Prob., pl. of MIX, wretch.] [*Obs.*]

myg. *Abbr.* Myriagram.

myght. ✝ MIGHT, MITE.

mygrene, mygreyn. ✝ MEGRIM.

Myhelmasse. ✝ MICHAELMAS.

My-lar'chus (mī-lyär'kŭs), *n.* [NL. ; Gr. *μυία* a fly + *ἀρχός* leader, chief.] *Zoöl.* A genus of large, plainly colored tyrant flycatchers widely distributed in America.

my'ia-sis (mĭ'yă-sĭs), *n.* [NL.] *Med.* = MYIASIS.

myist. ✝ MIST.

myith. ✝ MEITH.

my-i'tis (mĭ-ĭ'tĭs), *n.* [NL. See MYO- ; -ITIS.] *Med.* Inflammation of a muscle ; myositis.

My'ka-ne'an (mĭ'kă-nē'ăn), *n.* Var. of MYCENEAN.

my'kose. Var. of MYCOSE.

myl. *Abbr.* Myrialiter.

mylfol, a. [See MILD ; -FUL.] Milceful. [*Obs.*]

mylge, *v. t.* To dig round about. [*Obs.*]

Myl'i-o-bat'i-dæ (mĭl'ĭ-ō-băt'ĭ-dē), *n. pl.* [NL ; Gr. *μυλίας* (sc. *λίθος*) millstone + *βατής, βατίδος,* a flat fish, perh. the skate.] *Zoöl.* The family consisting of the eagle rays. — **myl'i-ob'a-tine** (-ŏb'ă-tĭn ; -tĭn ; 183), *a.* — **myl'i-ob'a-toid** (-toid), *a. & n.*

My-lit'ta (mĭ-lĭt'ă), *n.* A Babylonian goddess whose cult was described by Herodotus. The name, which does not appear in Babylonian literature, is prob. a corruption of *Belit.*

mylk. ✝ MILE, MILL.

myllan. ✝ MILAN.

my'lo-hy-oi'de-an (mĭ'lō-hĭ'oi'dē-ăn), *a. Anat.* Mylohyoid. **mylon.** ✝ MELON.

My'lo-nite (mĭ'lō-nīt ; mĭl'ō-), *n.* [Gr. *μύλη* mill.] *Petrog.* A siliceous schist produced by intense crushing of certain rocks. — **my'lo-nit'ic** (-nĭt'ĭk), *a.*

my-lord' (mĭ-lôrd'), *v. t.* To call "My Lord." *Nonce Word.*

My-o'des (mī-ō'dēz), *n.* [NL., fr. Gr. *μυώδης* ; *μῦς* mouse + *εἶδος* form.] Syn. of LEMMUS.

my'o-de-sop'si-a (mĭ'ō-dē-sŏp'sĭ-ă), *n.* [NL.] Myiodesopsia.

my'o-dome (mĭ'ō-dōm), *n.* [*myo-* + Gr. *δόμος* chamber.] *Zoöl.* A tubular chamber in the skull of most teleosts, receiving the rectus muscles of the eye.

my-o-dy-na'mi-om'e-ter (-dĭ-nă'mĭ-ŏm'ē-tĕr ; -dĭ'-), **my'o-dy'-na-mom'e-ter** (-dĭ'nă-mŏm'ē-tĕr ; -dĭn'ă-), *n.* [*myo-* + *dynamometer.*] A dynamometer

my'o-dyn'i-a (dĭn'ĭ-ă ; -dĭ'-nĭ-ă), *n.* [NL See MYO- ; -ODYNIA.] *Med.* Myalgia.

my'o-ep'i-the'li-al (-ĕp'ĭ-thē'lĭ-ăl), *a.* Muscular and epithelial.

My-o-g'a-le (mĭ-ŏg'ă-lē), *n.* [NL. ; *myo-* + Gr. *γαλῆ* a weasel.] *Zoöl.* The genus of insectivores including the desman. It is the type of a family, **My-o-gal'i-dæ** (mĭ'ō-găl'ĭ-dē), or subfamily **My'o-ga-lĭ'næ** (-gă-lī'nē). — **my-og'a-line** (mĭ-ŏg'ă-lĭn ; -lĭn ; 183), *a.*

my'o-gen (mĭ'ō-jĕn), *n.* [*myo-* + *-gen.*] *Chem.* = MYOSINOGEN.

my'o-gen'e-sis (mĭ'ō-jĕn'ē-sĭs), *n.* [NL. ; *myo-* + *-genesis.*] *Embryol.* Development of muscle. — **my'o-gen'ic** (-jĕn'ĭk), *a.*

my'o-gen-ĭ'brin (mĭ'ō-jĕn-fĭ'brĭn), *n. Physiol. Chem.* Myosin produced by the coagulation of myosinogen.

my'o-glob'u-lin (-glŏb'ū-lĭn), *n. Chem.* A globulin, precipitated at 60° C., present in muscle serum. [A muscle curve.]

my'o-gram, *n.* [*myo-* + *-gram.*]

my'o-hæ'ma-tin, my'o-he'ma-tin (-hē'mă-tĭn ; hĕm'ă-), *n. Chem.* A pigment said to occur in muscles, esp. of insects.

my'oid-ism (mĭ'oid-ĭz'm), *n. Med.* = MYOIDEMA.

my'o-lem'ma (mĭ'ō-lĕm'ă), *n.* [NL. ; *myo-* + Gr. *λέμμα* skin] *Anat.* Sarcolemma.

my'o-lin (mĭ'ō-lĭn), *n.* [Gr. *μῦς, μυός,* muscle.] *Physiol.* The supposed essential material of muscle fibers.

my'o-li-po'ma (-lĭ-pō'mă), *n.* [NL. ; *myo-* + Ist *lipo-* + *-oma.*] Myoma containing fatty tissue

my-ol'o-gist (mī-ŏl'ō-jĭst), *n.* One versed in myology.

my'o-ma-la'ci-a (mĭ'ō-mă-lā'shĭ-ă), *n.* [NL.] *Med* Morbid softening of a muscle.

my'o-man'cy (mĭ'ō-măn'sĭ), *n.* [Gr. *μῦς* mouse + *-mancy.*] Divination by movements of mice — **my'o-man'tic** (-măn'tĭk), *a.*

my'o-me'tri-tis (-mĕ-trī'tĭs), *n.* [NL.] *Med.* Inflammation of the muscular part of the uterus

my'o-me'tri-um (mĭ'ō-mē'trĭ-ŭm), *n.* [NL. ; *myo-* + Gr. *μήτρα* womb.] *Anat.* The muscular substance of the uterus.

my'o-mor'pha (-mōr'fă), *n. pl.* [*myoma* + *-tomy.*] My omectomy

my'o-neu-ral'gi-a, *n.* [NL.] *Med.* Muscular neuralgia

my'o-neure (mĭ'ō-nūr), *n.* [*myo-* + Gr. *νεῦρον* nerve.] *Physiol.* A nerve cell which supplies motor energy to a muscle.

my'o-neu-ro'ma (-nū-rō'mă), *n.* [NL.] *Med.* Neuroma containing muscular tissue.

my'o-nic'i-ty (-nĭs'ĭ-tĭ), *n.* [Gr. *μυών* a cluster of muscles, a muscle.] *Physiol.* The power of living muscle to contract under stimulation.

my'o-œ-de'ma, *n.* [*myo-* + *œdema.*] *Med.* = MYOIDEMA.

my'o-pa-ral'y-sis, *n.* [NL.] *Med.* Paralysis of a muscle.

my'o-phan (mĭ'ō-făn), *n.* [*myo-* + Gr. *φαίνειν* to show.] *Zoöl.* A contractile striated layer found in the bodies and stems of certain Protozoa.

my'o-phore (-fōr ; 201), *n.* [*myo-* + *-phore.*] *Zoöl.* A part or process of a shell adapted for the attachment of a muscle. — **my-oph'o-rous** (mĭ-ŏf'ō-rŭs), *a.*

my-op'o-rad (mĭ-ŏp'ō-răd), *n.* Any plant of the family Myoporaceæ. *Lindley.*

my'o-pro'te-ose, *n.* [*myo-* + *proteose.*] *Chem.* Myoalbumose.

my'ops (mĭ'ŏps), *n.* [NL.] A myope.

my-op'sis (mĭ-ŏp'sĭs), *n.* [NL. ; Gr. *μυῖα* fly + *ὄψις* sight.] *Med* The appearance of muscæ volitantes.

my'o-py (mĭ'ō-pĭ), *n.* [F. *myopie.*] *Med.* Myopia.

my-o-sal'pin-gi'tis (-săl'pĭn-jī'tĭs), *n.* [NL. ; *Med.* Inflammation of the muscular wall of the Fallopian tube.

my'o-scle-ro'sis, *n.* [NL. ; *myo-* + *sclerosis.*] *Med.* Hardening of a muscle, usually temporary

my-o'se-ism (mĭ-ō'sē-ĭz'm), **my'o-seis'mi-a** (mĭ'ō-sīz'mĭ-ă), *n.* [NL. *myoseismia* ; *myo-* + Gr. *σεισμός* shaking, shock.] *Med.* An affection marked by irregular contractions of various muscles, affecting esp. the limbs and eyes.

my'o-sin-ĭ'brin, *n. Physiol. Chem.* Myosin produced by the coagulation of paramyosinogen.

my'o-sin'o-gen (mĭ'ō-sĭn'ō-jĕn), *n.* [*myosin* + *-gen.*] *Physiol. Chem.* A soluble proteid, the antecedent of myosin, regarded as present in muscle plasma but not yet certainly isolated.

my'o-sin-ose' (mĭ'ō-sĭn-ōs'), *n.* [*myosin* + *-ose.*] *Physiol. Chem.* Any of a group of soluble products formed in digesting myosin with gastric or pancreatic juice.

my'o-spasm (mĭ'ō-spăz'm), *n. Med.* Spasm of a muscle.

my'o-spas'mi-a (-spăz'mĭ-ă), *n.* [NL.] *Med.* An affection marked by spasmodic muscular contractions. [Of a muscle.]

my'o-su'ture, *n. Surg.* Suture

my-o'ta-cis'mus (mĭ-ō'tă-sĭz'mŭs), *n.* [L. See MYTACISM.] = METACISM **b**.

My-o-tal-pi'næ (mĭ'ō-tăl-pī'nē), *n. pl.* [NL. ; *myo-* + L. *talpa* mole.] *Zoöl.* A subfamily of rodents of northern Asia, related to the voles but molelike in form and habits. In the typical genus, **My-o-tal'pa** (-tăl'pă), the front claws are greatly developed.

my-ot'a-sis (mī-ŏt'ă-sĭs), *n.* [NL. ; *myo-* + Gr. *τάσις* tension, *τείνειν* to stretch.] *Physiol.* Muscular tension. — **my'o-tat'ic** (mĭ'ō-tăt'ĭk), *a.*

my'o-til'i-ty (mĭ'ō-tĭl'ĭ-tĭ), *n.* [*myo-* + *motility.*] *Physiol.* Muscular contractility

my-ot'o-my (mī-ŏt'ō-mĭ), *n.* [*myo-* + *-tomy* ; cf. F. *myotomie.*] **1.** *Anat.* The anatomy or dissection of the muscles. **2.** *Surg.* Cutting or division of a muscle.

my-ot'o-ny (-nĭ), *n. Physiol.* = MYOTONIA.

My-ox'i-dæ (mĭ-ŏk'sĭ-dē), *n. pl.*, **My-ox'us** (-ŏks), *n.* [NL., fr. Gr. *μυοξός* dormouse.] *Zoöl.* See DORMOUSE. — **my-ox'ine** (-ĭn ; -ēn ; 183), *a.*

myr. ✝ MIRE.

My'ra (mĭ'ră), *n.* Fem. prop. [name.]

myr'a-bal'a-nus (mĭr'ă-băl'ă-nŭs) Var. of MYROBALAN.

my-rab'o-lam (mĭ-răb'ō-lăm ; mĭr'ă-bō'lăm) Var. of MYROBALAN.

My-ra'na (mĕ-rä'nă), *n.* See UNIVERSAL LANGUAGE.

myr'cene (mûr'sēn), *n. Chem.* A liquid hydrocarbon, $C_{10}H_{16}$, occurring in oil of bay (*Pimenta*, syn. *Myrcia, acris*) and of sweet bay (*Laurus nobilis*). It is an olefinic terpene.

myr'i-a-can'thous (mĭr'ĭ-ă-kăn'thŭs), *a.* [Gr. *μυρίος* numberless + *ἄκανθα* a spine.] *Zoöl.* Having numerous spines.

myr'i-a'chine, *n.* = MYRIACHIT.

myr'i-a-cou-lomb' (mĭr'ĭ-ă-kōō-lŏm'), *n.* See MYRIA-.

myriad leaf. The water milfoil.

myr'i-a-gram', **myr'i-a-gramme'** (mĭr'ĭ-ă-grăm'), *n.* [F. *myriagramme.*] See MYRIA-; 2d GRAM.]

myr'i-a-li'tre, myr'i-a-li'tre (-lē'tĕr), *n.* [F. *myrialitre.* See MYRIA- ; LITER.] See MEASURE.

myr'i-a-me'ter, myr'i-a-me'tre (-mē'tĕr), *n.* [F. *myriamètre.* See MYRIA- ; METER.] See MEASURE.

Myr'i-an'i-da (mĭr'ĭ-ăn'ĭ-dă), *n.* [NL. fr. Gr. *μυρίος* numberless.] *Zoöl.* A genus of worms related to *Autolytus* (which see) and similarly reproducing.

myr'i-are (mĭr'ĭ-ăr), *n.* [F. See MYRIA- ; 1st ARE.] See MEASURE.

is a small drupe or nut. The family is usually called the bayberry family, though not related to the true bayberry. — **myr'i-ca'ceous** (mĭr'Ĭ-kā'shŭs), *a.*

myr'i-cin (mĭr'Ĭ-sĭn), *n.* [Cf. *F. myricine.* Prob. so called from a fancied resemblance to the wax of the bayberry (*Myrica.*)] *Chem.* A silky, crystalline, waxy substance, forming the less soluble part of beeswax, and regarded as essentially myricyl palmitate, $C_{16}H_{31}O_2{\cdot}C_{30}H_{61}$.

myr'i-cyl (-sĭl), *n.* [*myricin* + *-yl.*] *Chem.* A hypothetical univalent hydrocarbon radical, $C_{30}H_{61}$; melissyl.

my-rin'ga (mĭ-rĭn'gă), *n.* [NL., fr. LL. *miringa* a kind of membrane, Gr. *μήνιγξ.*] *Anat.* The tympanic membrane. See EAR.

my-rin'go- (mĭ-rĭn'gō-), **myring-.** Combining form for *myringa.*

myr'i-o- (mĭr'Ĭ-ō-). Combining form from Greek *μυρίος, numberless.*

Myr'i-o-phyl'lum (-fĭl'ŭm), *n.* [NL., fr. Gr. *μυριόφυλλον* spiked water milfoil ; *μυρίος* numberless + *φύλλον* leaf.] *Bot.* A small but widely distributed genus of submerged aquatic haloragidaceous plants having the ovary sulcate. Also [*l. c.*], a plant of this genus. See WATER MILFOIL.

myr'i-o-ra'ma (-rā'mă), *n.* [*myrio-* + Gr. *ὅραμα* a sight, fr. *ὁρᾶν* to see.] A picture made up of several smaller pictures drawn upon separate pieces in such a manner as to admit of combination in many different ways.

myr'i-o-scope' (mĭr'Ĭ-ō-skōp'), *n.* [*myrio-* + *-scope.*] A form of kaleidoscope by which a pattern, as of lace or carpet, may be repeated to show the effect in a large piece of the fabric.

myr-ris'tic (mĭ-rĭs'tĭk ; mī-), *a.* [See MYRISTICA.] *Chem.* Pertaining to or designating a member of the fatty acid series, $C_{14}H_{28}O_2$, occurring (chiefly in the glyceryl ester) in nutmeg butter, spermaceti, oil of coconut, bile, lanolin, etc. It is a white solid melting at 53.8° C. (128.8° F.).

My-ris'ti-ca (-tĭ-kă), *n.* [NL., fr. Gr. *μυριστικός* good for anointing, *μυρίζειν* to anoint.] *Bot.* A large genus of trees, constituting the family Myristicaceæ, of tropical distribution. They have entire leaves and small white or yellow flowers succeeded by fleshy fruits with a hard seed inclosed by a colored arillode. Several species are of economic importance. *M. fragrans* yields nutmegs and mace. *M. bicuhyba* is the source of becuiba tallow.

My-ris'ti-ca'ce-æ (-kā'sē-ē), *n. pl.* [NL.] *Bot.* A family of trees (order Ranunculales), the nutmeg family. See MYRISTICA. — **my-ris'ti-ca'ceous** (-shŭs), *a.*

myr'me-co- (mûr'mē-kō-). Combining form from Greek *μύρμηξ, μύρμηκος, ant.*

myr'me-coid (-koid), *a.* [*myrmeco-* + *-oid.*] Like an ant.

myr'me-col'o-gy (-kŏl'ō-jĭ), *n.* [*myrmeco-* + *-logy.*] *Zoöl.* The scientific study of ants. — **myr'me-co-log'i-cal** (-kō-lŏj'Ĭ-kăl), *a.* — **myr'me-col'o-gist** (-kŏl'ō-jĭst), *n.*

myr'me-coph'a-gous (-kŏf'ă-gŭs), *a.* [*myrmeco-* + *-phagous.*] Feeding on ants.

myr'me-coph'i-lous (-Ĭ-lŭs), *a.* [*myrmeco-* + *-philous.*] *Biol.* Fond of, or benefited by, ants, as insects that live in ant hills, or plants that are cross-fertilized by ants. — **myr'me-coph'i-lism** (-lĭz'm), **myr'me-coph'i-ly** (-lĭ), *n.*

myr'me-co-phyte' (mûr'mē-kō-fīt'), *n.* [*myrmeco-* + *-phyte.*] *Bot.* A plant that affords shelter and food to certain species of ants which live in symbiotic relations with it. Special adaptations for this purpose exist ; thus *Acacia spadicigera* has large hollow thorns, species of *Cecropia* have stem cavities, and *Cordia nodosa* has enlarged internodes. Special food substances are elaborated suitable for the ants' use. — **myr'me-co-phyt'ic** (-fĭt'ĭk), *a.*

Myr-me'le-on'i-dæ (mĕr-mē'lĭ-ŏn'Ĭ-dē), *n. pl.* [NL., fr. NL. *Myrmeleon*, generic name, fr. Gr. *μυρμηκολέων* ant lion ; Gr. *μύρμηξ, -ηκος*, ant + *λέων* lion.] *Zoöl.* A family of neuropterous insects consisting of the ant lions.

Myr-mic'i-dæ (mĭr-mĭs'Ĭ-dē), *n. pl.* [NL. ; Gr. *μύρμηξ, -ηκος*, ant + *-idæ.*] *Zoöl.* A large and widely distributed family of ants including those having the pedicel of the abdomen formed of two well-marked segments. It includes many of the commonest species, as the little red ant, pavement ant, etc. (see HOUSE ANT). The type genus is **Myr-mi'ca** (-mĭ'kă). — **myr-mi'cid** (sĭd), *a. & n.* — **myr'mi-cine** (mûr'mĭ-sĭn ; -sīn ; 183), *a.* — **myr-mi'coid** (mĕr-mĭ'koid), *a. & n.*

Myr'mi-don (mûr'mĭ-dŏn), *n. ; pl.* E. **-DONS** (-dŏnz), L. **-DONES** (mĕr-mĭd'ō-nēz). [L. *Myrmidones*, Gr. *Μυρμιδόνες*, pl.] **1.** *Gr. Myth.* One of a fierce Thessalian tribe or troop who accompanied Achilles, their king, to the Trojan war. **2.** *[l. c.]* A soldier or a subordinate civil officer who executes all orders of a superior without protest or pity ; — sometimes applied to bailiffs, constables, etc. *Thackeray.*

With unabated ardor the vindictive man of law and his *myrmidons* pressed forward. *W. H. Ainsworth*

my-rob'a-lan (mĭ-rŏb'ă-lăn ; mī-), *n.* [L. *myrobalanum* the fruit of a palm tree from which a balsam was made ; Gr. *μυροβάλανος ; μύρον* any sweet juice distilling from plants, any prepared unguent or sweet oil + *βάλανος* an acorn or any similar fruit : cf. F. *myrobolan.*] **1.** A dried astringent fruit much resembling a prune. It contains tannin, and was once used in medicine, but is now chiefly used in tanning and dyeing. Myrobalans are produced by various East Indian species of *Terminalia* (which see). **2.** A European plum (*Prunus cerasifera*) much used as stock on which to graft cultivated plums.

myr'o-sin (mĭr'ō-sĭn ; mī'rō-), *n.* [Cf. MYRONIC.] *Chem.* An enzyme occurring in various brassicaceous plants, as mustard, and in other plants of allied families. It decomposes the glucoside sinigrin into allyl mustard oil, glucose, and acid potassium sulphate. This reaction takes place when ground mustard seeds are mixed with water.

My-rox'y-lon (mĭ-rŏk'sĭ-lŏn), *n.* [NL. ; Gr. *μύρον* a sweet juice distilling from a plant + *ξύλον* wood.] *Bot.* A small genus of tropical American fabaceous trees distinguished by the 1-seeded winged pod. The different species yield balsamic products.

myrrh (mûr), *n.* [ME. *mirre*, OF. *mirre*, F. *myrrhe*, L. *myrrha, murra*, Gr. *μύρρα* ; cf. Ar. *murr* bitter, also myrrh, Heb. *mar* bitter, *mōr* myrrh.] **1.** A yellowish brown aromatic gum resin with a bitter, slightly pungent taste. True myrrh is obtained from the shrub *Balsamea myrrha* of Abyssinia and Arabia, but other species of this genus yield similar products. The myrrh of the Bible is supposed to have been a mixture of myrrh and labdanum, the latter being derived from species of *Cistus.* Myrrh is used as an astringent tonic and externally as a cleansing agent ; it is also used in perfumery. See also BISABOL. **2.** The sweet cicely of Europe.

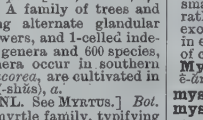
Myr'rhis (mĭr'rĭs), *n.* [NL., fr. Gr. *μυρρίς*, name of the plant.] *Bot.* A genus of apiaceous plants consisting of a single species, *M. odorata*, the sweet cicely of Europe.

myr'rho-phore (mĭr'ō-fōr ; 201), *n.* [*myrrh* + *-phore.*] *East. Ch. & Fine Arts.* Any of the women, esp. the Marys, who bore spices to the sepulcher of Christ. They are usually depicted carrying vases of myrrh.

Myr'si-na'ce-æ (mûr'sĭ-nā'sē-ē), *n. pl.* [NL., fr. Gr. *μυρσίνη* myrtle. Cf. MYRTLE.] *Bot.* A family of trees and shrubs (order Primulales), having alternate glandular leaves, white or pink 4-merous flowers, and 1-celled indehiscent fruit. There are about 25 genera and 600 species, of wide distribution. A few genera occur in southern Florida. Some species, esp. of *Icacorea*, are cultivated in greenhouses. — **myr'si-na'ceous** (-shŭs), *a.*

Myr-ta'ce-æ (mĕr-tā'sē-ē), *n. pl.* [NL. See MYRTUS.] *Bot.* A family of trees and shrubs, the myrtle family, typifying the order Myrtales, and characterized by the numerous stamens, cymose flowers with inferior ovary, and opposite exstipulate leaves, which yield a fragrant oil. There are about 80 genera and more than 1,800 species, of wide distribution, including numerous important timber and gum-producing trees, as *Eucalyptus* and *Metrosideros.* Some genera, as *Pimenta* and *Caryophyllus*, yield spices (cloves, pimento, allspice, etc.). The fruits of others, as *Psidium* and *Eugenia*, are edible. — **myr-ta'ceous** (-shŭs), *a.*

Myr-ta'les (-lēz), *n. pl.* [NL.] *Bot.* a A Lindleyan alliance comprising the myrtles and allies. *Obs.* Hence **myr'tal** (mûr'tăl), *a. Obs.* b An order of archichlamydeous dicotyledonous plants embracing 17 families, including the Myrtaceæ, Melastomaceæ, Lythraceæ, and Onagraceæ. The order is characterized by the simple leaves and inferior compound ovary with numerous ovules.



Myrtle (*Myrtus communis*).

myr'tle (mûr'tl), *n.* [F. *myrtille*, *mirtille*, bilberry, OF., myrtleberry, fr. L. *myrtus, murtus*, Gr. *μύρτος* ; cf. Per. *mūrd.*] **1.** Any shrub of the genus *Myrtus*, esp. the European *M. communis*, which has ovate or lanceolate evergreen leaves and solitary axillary white or rosy flowers, followed by black berries. The ancients considered it sacred to Venus. The flowers, leaves, and berries are used in perfumery and as a condiment, and the beautifully mottled wood is valued in turnery. **2.** In the United States : **a** The common trailing periwinkle (*Vinca minor*). **b** California laurel. **c** Moneywort. *Rare.* **3.** Any of various plants belonging to the Myrtaceæ or even to unrelated families. In Australasia the name is applied to species of *Backhousia, Eugenia, Melaleuca, Rhodamnia, Syncarpia, Cargillia, Fagus, Myoporum, Trochocarpa*, etc. **4.** A dark blue-green color, like that of myrtle leaves.

myrtle warbler. A North American warbler (*Dendroica coronata*). In full plumage the male is bluish gray streaked with black above and largely white below, with a yellow patch on the crown, rump, and each side of the breast.

myrtle wax. A green or yellowish wax obtained from the berries of certain myricaceous plants, esp. *Myrica cerifera*, and used as a substitute for beeswax, in making candles, etc. Its principal constituent is free palmitic acid.

myr'tol (mûr'tōl ; -tŏl), *n.* [*Myrtus* + 2d *-ol.*] An aromatic oil distilled from the leaves of the common myrtle (*Myrtus communis*), and used as an antiseptic and sedative. It acts as a stimulant upon the mucous membranes.

Myr'tus (-tŭs), *n.* [L., myrtle. See MYRTLE.] *Bot.* A large genus of chiefly South American shrubs, the myrtles, typifying the family Myrtaceæ and characterized by the numerous ovules. The common European myrtle (*M. communis*) occurs throughout Asia and southern Europe.

my-self' (mī-sĕlf' *or, esp. in British usage,* mĭ-sĕlf'), *pron. ; pl.* OURSELVES (our-sĕlvz'). An emphasized form of the pronoun for the 1st person singular. Its uses are : **1.** For emphasis : **a** As a simple objective ; as, he brought one for *myself.* **b** In apposition with *I* or *me* ; as, I *myself* was there. **c** As a subject nominative. *Archaic.* "*Myself* will decide it." *Webster.* **d** As a predicate nominative often with the force of *by myself, alone* ; as, I have done it *myself* (that is, unaided).

2. Specif., my true, normal self ; hence, my normal or sane condition of mind. Cf. HIMSELF, 2.

3. As a reflexive ; as, I will defend *myself.*

4. As a substantive. *Rare.*

☞ *Myself* is often divided, as in "*my own self*," being treated as possessive and noun.

Mys'i-dæ (mĭs'Ĭ-dē), *n. pl.* [NL., fr. Gr. *μύσις* a closing of the lips or eyes.] *Zoöl.* A family of small schizopod crustaceans ; the opossum shrimps. They have a rather small cephalothorax, a long abdomen, and six pairs of rather feeble leglike appendages, each of which bears an exopodite. They occur in both fresh and salt water, often in enormous numbers, and form an important food supply of certain valuable fishes and whales. The type genus is **My'sis** (mī'sĭs). — **my'sid** (mī'sĭd), **my-sid'e-an** (mī-sĭd'ē-ăn), **my'soid** (mī'soid), *a. & n.*

mys'ta-gog'ic (mĭs'tă-gŏj'Ĭk) } *a.* Of or pertaining to in-
mys'ta-gog'i-cal (-gŏj'Ĭ-kăl) } terpretation of mysteries or a mystagogue ; of the nature of mystagogy.

mys'ta-gogue (mĭs'tă-gŏg), *n.* [L. *mystagogus*, Gr. *μυσταγωγός ; μύστης* one initiated in mysteries + *ἀγωγός* leading, n., a leader, fr. *ἄγειν* to lead. See 1st MYSTERY.] **1.** One who initiates into or interprets mysteries, esp. religious mysteries, as in the early Christian church. **2.** One who keeps and shows church relics. *Obs.*

mys'ta-go'gy (-gō'jĭ), *n.* **1.** The doctrines, principles, or practice of a mystagogue ; interpretation of mysteries. **2.** *East. Ch.* a The liturgy. b Instruction before baptism.

mys-te'ri-ous (mĭs-tē'rĭ-ŭs), *a.* [F. *mystérieux.* See 1st MYSTERY.] Of or pert. to mystery ; containing, conveying, intimating, or implying, a mystery ; difficult or impossible to understand ; obscure ; enigmatical ; incomprehensible ; as, a *mysterious* event, utterance, or person.

Myr'i-ca'les (mĭr'Ĭ-kā'lēz), *n. pl.* [NL.] *Bot.* See MYRICACEÆ.

my-ri'ca tal'low (mĭ-rĭ'kă) Myrtle wax.

my-ric'e-tin (mĭ-rĭs'ē-tĭn), *n. Chem.* A yellow dyestuff, $C_{15}H_{10}O_8$, occurring in the bark of *Myrica nagi.* It is regarded as a derivative of quercetin.

myr'i-cyl al'co-hol (mĭr'Ĭ-sĭl ; mĭ-rĭ'sĭl). *Chem.* A waxy substance, $C_{30}H_{61}OH$, melting at 86° C. (187° F.), in carnauba wax, as myricin in beeswax, etc.

myrie. + MIRY.

myr'in-gi'tis (mĭr'ĭn-jī'tĭs), *n.* [NL. ; *myringo-* + *-itis.*] *Med.* Inflammation of the myringa.

my-rin'go-dec'to-my (mĭ-rĭn'gō-dĕk'tō-mĭ), *n.* [See MYRINGO- ; -ECTOMY.] *Surg.* Excision of the myringa.

my-rin'go-der'ma-ti'tis (-dûr'mă-tī'tĭs), *n.* [NL. ; *myringo-* + *dermatitis.*] *Med.* Inflammation of the external layer of the myringa.

my-rin'go-my-co'sis, *n.* [NL. ; *myringo-* + *mycosis.*] *Med.* Disease of the myringa caused by fungi.

my-rin'go-plas'ty, *n.* [*myringo-* + *-plasty*] *Surg.* A plastic operation on the myringa.

my-rin'go-tome, *n.* [*myringo-* + *-tome.*] *Surg.* An instrument used in myringotomy.

myr'in-got'o-my (mĭr'ĭn-gŏt'ō-mĭ), *n.* [*myringo-* + *-tomy.*] *Surg.* Incision of the myringa.

— mys-te'ri-ous-ly, *adv.* **— mys-te'ri-ous-ness**, *n.*

mys'ter-y (mĭs'tĕr-ĭ), *n.*; *pl.* MYSTERIES (-Iz). [L. *mysterium*, Gr. *μυστήριον*, fr. *μύστης* one initiated in mysteries; cf. *μυεῖν* to initiate into the mysteries.] **1.** *Class. Relig.* A rite to which only privileged worshipers were admitted, and that after preparatory ceremonies and under obligation of secrecy. They appear all to have had the purpose of imparting precepts and semimagical formulæ supposed to ennoble this life and to impart a belief in a future life. The most important of the Greek mysteries were the Eleusinian, Orphic, and Samothracian. In later Roman times became the Mithraic mysteries.

In general, by a *mystery* is meant a rite in which certain sacra are exhibited, which cannot be safely seen by the worshiper till he has undergone certain purifications. *J. E. Harrison.*

2. A similar secret rite or doctrine in primitive religion.

Even some of the most backward savages make a perhaps half-conscious distinction between their mythology and their religion. As to the former, they are communicative; as to the latter, they jealously guard their secret in sacred *mysteries*. *A. Lang.*

3. A profound secret; something wholly unknown, or something kept cautiously concealed, and therefore exciting curiosity or wonder; an enigma; something that has not been, or cannot be, explained; hence, something, as a religious truth or fact, that is beyond human comprehension; a sacred and at the same time mysterious thing; specif., *Eccl.*, esp. in the primitive church and in the Eastern Church, a sacrament, as the Eucharist.

We speak the wisdom of God in a *mystery*. 1 *Cor.* ii. 7.
The sweet *mysteries* of maiden thought. *G. W. Cable.*

If God should please to reveal unto us this great *mystery* of the Trinity, or some other *mysteries* in our holy religion, we should not be able to understand them. *Swift.*

What the Latins called "sacramenta," the Greeks called "*mysteries*." *G. P. Fisher.*

By the *mystery* of thy holy Incarnation. *Bk. of Com. Prayer.*

4. *pl. Eccl.* The consecrated elements in the Eucharist.

5. A medieval dramatic representation or composition of a type based on Scriptural subjects, often an event or events in the life of Christ; also, the type itself; as, the Chester *Mysteries*, consisting of dramas acted by craft associations in Chester from the 13th to the 16th century. Cf. MIRACLE PLAY, MORALITY, 2 c.

mys'ti-cal (-tĭ-kăl) } ing to secret rites, fr. *μύστης* one initiated: cf. F. *mystique*. See 1st MYSTERY.] **1.** Of or pertaining to an ancient mystery.

2. Remote from or beyond human comprehension; baffling understanding; unknowable; obscure; mysterious.

"The *mystic* gulf from God to man." *Emerson.*

God hath revealed a way *mystical* and supernatural. *Hooker.*

3. Pertaining to, or importing or implying, mysticism; involving some secret meaning; allegorical; emblematical; as, a *mystic* dance; *mystic* Babylon.

Syn. — See MYSTERIOUS.

mystic, *or* **sealed, will**, *Civil Law*, a will prepared by, or at the instance of, the testator, sealed up in an envelope, and acknowledged on the outside of the envelope.

— mys'ti-cal-ly, *adv.* **— mys'ti-cal-ness**, *n.*

mys'tic (mĭs'tĭk), *n.* **1.** One initiated into a mystery.

2. One given to mysticism; one who holds mystical views, interpretations, etc.; esp. [*cap.*], *Eccl. Hist.*, one who professed Mysticism. See MYSTICISM, 3.

mys'ti-cism (mĭs'tĭ-sĭz'm), *n.* [Cf. F. *mysticisme*.] **1.** Mystic character or quality.

2. The doctrine that the ultimate nature of reality or the divine essence may be known in an immediate apprehension, intuition, or insight, differing from all ordinary sensation or ratiocination; hence, the experience or ecstasy of those mystics who claim to attain this insight in vision, trance, or sense of absorption in, or union with, the divine spirit or the ultimate being.

3. [*cap.*] *Eccl. Hist.* The doctrine of the Mystics, who professed direct intercourse with the divine Spirit, and a knowledge of God and of spiritual things unattainable by the natural intellect, and incapable of being analyzed or explained. As a Christian philosophy, Mysticism originated in the 12th century with Bernard of Clairvaux (1091–1153) and his pupils, Hugh, Richard, and Walter of St. Victor. The chief expositor of orthodox Mysticism is St. Bonaventure (1221–74), who taught that all knowledge comes by "illumination," and that in the highest grade of contemplation the soul unites with God in mental ecstasy. Meister Eckhart (1260?–1327) is the foremost of the heterodox, pantheistic Mystics. He held that the supreme human bliss is a deification whereby man becomes one with God. Famous women Mystics are St. Theresa (1515–82) and the Quietist Mme. Guyon (1648–1717). Cf. QUIETISM, 1.

Mysticism and Scholasticism were not antagonists. Among the theological leaders, the great Mystics were Scholastics, and the most eminent Schoolmen, who are not classified with the Mystics, exemplified *Mysticism* in their own experience and found a place for it in their teaching. *G. P. Fisher.*

4. Any type of theory asserting the possibility of attaining knowledge or power through faith or spiritual insight.

mys'ti-fi-ca'tion (mĭs'tĭ-fĭ-kā'shŭn), *n.* [Cf. F. *mystification*.] Act of mystifying, or state of being mystified; also, something designed to, or that does, mystify.

mys'ti-fi-ca'tor (mĭs'tĭ-fĭ-kā'tẽr), *n.* One who mystifies.

mys'ti-fy (-fī), *v. t.*; MYS'TI-FIED (-fīd); MYS'TI-FY'ING (-fī'-Ing). [F. *mystifier*. See MYSTIC; -FY.] **1.** To involve in mystery; to make obscure or difficult to understand; as, to *mystify* a passage of Scripture.

2. To perplex the mind of; to puzzle; to bewilder; to impose upon the credulity of; as, to *mystify* an opponent.

Syn. — See PUZZLE.

— mys'ti-fi'er (-fī'ẽr), *n.*

my'ta-cism (mī'tȧ-sĭz'm), *n.* [Gr. *μυτακισμός*. Cf. METACISM.] Excessive or wrong use of the letter *m*, or of the sound it represents, as in writing or in defective speech.

myth (mĭth), *n.* Also **mythe**. [Gr. *μῦθος* myth, fable, tale, talk, speech: cf. F. *mythe*.] **1.** A story, the origin of which is forgotten, that ostensibly relates historical events, which are usually of such character as to serve to explain some practice, belief, institution, or natural phenomenon. Myths are especially associated with religious rites and beliefs, so that mythology is generally reckoned a part of primitive religion; a nonreligious story of mythical character is generally called a *fable* or a *folk tale*. Among the classes of myths commonly distinguished are: **culture myths**, comprising stories in which some hero (man, god, or animal) is said to have imparted the arts of life to man; **nature myths**, in which phenomena of nature are fictively described, esp. as to their origin; **theogonic myths**, narrating the origins of gods; **ætiological myths**, stories of fictive events which are assigned as causes of given rites or customs. Cf. EUHEMERISM.

The dead and the living, men, beasts, and gods, trees and stars, and rivers, and sun, and moon, dance through the region of *myths* . . . where everything may be anything, where nature has no laws and imagination no limits. *A. Lang.*

2. A similar story invented as a veiled explanation of a truth; a parable or allegory; esp., one of Plato's philosophical allegories. **b** The theme or plot of a mythical tale occurring in forms differing only in detail.

While a legend is usually confined to one or two localities, and is told of not more than one or two persons, it is characteristic of a *myth* that it is spread, in one form or another, over a large part of the earth, the leading incidents remaining constant, while the names and often the motives vary with each locality. *John Fiske.*

3. A person or thing existing only in imagination, or whose actual existence is not verifiable.

As for Mrs. Primmins's bones, they had been *myths* these twenty years. *Ld Lytton.*

Syn. — MYTH, LEGEND cannot always be sharply distinguished. In general, however, a MYTH deals with the actions of the gods or of beings conceived as divine or possessed of divine attributes; a LEGEND, though it may include supernatural incidents, concerns human beings, and often attaches to some definite locality. For further particulars see defs. See FABLE, FABULOUS, TRADITIONAL.

Myx'o-gas-tra'les (mĭk'sō-găs-trā'lēz), *n. pl.* [NL.; *myxo-* + Gr. *γαστήρ, γαστρός*, stomach.] *Bot.* One of the three orders of Myxomycetes, or slime molds, including saprophytic species that form a true plasmodium from which spores are developed.

myx'oid (mĭk'soid), *a.* [*myxo-* + *-oid*.] *Med.* Resembling mucus.

myx-o'ma (mĭk-sō'mȧ), *n.*; *L. pl.* **-OMATA** (-tȧ). [NL.; *myxo-* + *-oma*.] *Med.* A soft, gelatinous tumor made up of tissue resembling that found in the umbilical cord. **— myx-om'a-tous** (mĭk-sŏm'ȧ-tŭs; -sō'mȧ-tŭs), *a.*

myx'o-my-cete' (mĭk'sō-mī-sēt'), *n. Bot.* A slime mold; one of the class Myxomycetes.

Myx'o-my-ce'tes (mĭk'sō-mī-sē'tēz), *n. pl.* [NL.; *myxo-* + *-mycetes*.] *Bot.* A class of peculiar organisms, the slime molds, formerly regarded as animals (Mycetozoa), but now generally thought to be plants and often separated as a distinct phylum (Myxophyta). They are found on damp earth and decaying vegetable matter, and consist of naked masses of protoplasm, often of considerable size, which creep very slowly over the surface and ingest solid food. Ultimately these masses (*plasmodia*) come to rest and organize spores which give rise to peculiar bodies known as *myxamœbæ*, which again fuse into plasmodia. The class contains three orders, Acrasiales, Plasmodiophorales, and Myxogastrales. **— myx'o-my-ce'tous** (-tŭs), *a.*

Myx-oph'y-ta (mĭk-sŏf'ĭ-tȧ), *n. pl.* [NL. See MYXO-; -PHYTE.] *Bot.* A phylum of the vegetable kingdom consisting of the single class Myxomycetes. By some botanists it is not separated from the Thallophyta.

My-zos'to-ma (mī-zŏs'tō-mȧ; mĭ-), *n.* [NL.; Gr. *μύζειν* to suck + *-stoma*.] *Zoöl.* A genus of curious parasitic animals found on crinoids and starfishes, by some considered related to the chætopod worms, by others to the arachnids. Their body is short, unsegmented, and disk-shaped, with ten or more pairs of cirri around the margin and four pairs of suckers and five pairs of hook-bearing parapodia on the under side. With the related genus *Stelechopus* it constitutes a family, **My'zo-stom'i-dæ** (mī'zō-stŏm'ĭ-dē), and usually a group of higher rank, **My'zo-sto'ma-ta** (-stō'mȧ-tȧ; -stō'mȧ-), or **My'zo-stom'i-da** (-stŏm'ĭ-dȧ). **— my'zo-stom'a-tous** (-stŏm'ȧ-tŭs; -stō'-mȧ-), *a.* **— my'zos'tome** (mī-zŏs'tōm; mĭ-), *n.* **— my'zos'-to-mous** (-tō-mŭs), *a.*

N

N (ĕn). **1.** The fourteenth letter of the English alphabet. It came into Latin from the Greek, being further derived from the Phœnician, and ultimately, perhaps, from the Egyptian. See ALPHABET, *Illust.* The letter represents either of two nasal consonant sounds; one, as in *ran, new*, commonly classed as a *dental*, and often designated as *dentinasal*, though usually formed in English with the oral passage closed by bringing the tip of the tongue against the gums back of the upper front teeth; the other, as in *single, sink, conquer*, formed with the oral closure toward the back of the mouth and hence commonly classed as a *guttural*, being often designated as *gutturonasal*. The latter sound is the same as *ng* in *sing, bring*, etc., though sometimes not quite so strong, and is indicated in the respelling by ŋ, as in *ink, sink*, etc. See *Guide to Pron.*, §§ 197, 198. N is etymologically most closely related to M. See M.
2. As a *symbol*, used to denote or indicate: **a** The thirteenth or (cf. K, 2 **a**) the fourteenth in a series; thirteenth (or fourteenth) in order or class; sometimes, the numeral thirteen (or fourteen); as Battery *N*. **b** *Math.* An indefinite number; esp., a constant integer denoting degree, order, class, or power, as of an equation, curve, quantic, or any algebraic expression. **c** *Chem.* (1) [*cap.*] Nitrogen. (2) [*cap. or l. c.*] Normal; as, *n*-hexyl; — used esp. with reference to solutions; as, $\frac{N}{10}$ or $\frac{n}{10}$ (denoting a solution of one tenth normal strength), etc. (3) [*cap. or l. c.*] Distinguishing certain derivatives of nitrogenous organic compounds in which the hydrogen directly united to the *nitrogen* is replaced; as, *n*-methyl pyrrol. **d** *Paper Making.* Not hot-pressed; — applied to a kind of drawing paper with a finely grained surface.
3. **a** As a medieval Roman *numeral*, **N** stands for 90, and $\overline{\text{N}}$ for 90,000. **b** See L, 4.
4. As an *abbreviation:* **a** In the form **N.**: Various proper names, as Nancy, Nathaniel, Nicholas, etc.; name (as in the catechism and baptismal service and in the marriage service, where it has been explained as an abbreviation of L. *nupta*, bride); Nationalist; Navy; Nimbus; Noon; Norse; North; Northern (as *N.* Postal District, London); Novellæ (L., Novels) (*Law*); November. **b** In the form **n.** or **N.**: nail or nails; natus (L., born); navigating; navigation; nephew; neuter; new; nominative; in wigwagging, not (*Naut.*); note or notes; noun; number.

Cf. ANONYMOUS, IGNOMINY, MISNOMER, NOMINAL, NOUN.] **1.** The title by which any person or thing is known or designated; a distinctive specific appellation, whether of an individual or a class. **A** singular name designates the character of the single individual thing which it denotes; as, "the center of the earth" is a *singular* name; a proper name, such as "Milton," "Bonaparte," denotes any individual without necessarily saying anything of character; a general name, such as "man," "metal," designates a character or connotation applicable to more than one individual, but without reference to this plurality; a collective name, such as "army," "audience," denotes a plurality of individuals. Common or class name is used for any type of name other than *proper*.

What's in a *name?* That which we call a rose
By any other *name* would smell as sweet. *Shak.*
The grand old *name* of gentleman. *Tennyson.*

2. Specif. **a** *Logic.* A term; any word or combination of words designating a logical concept.

7. The mere appellation or designation of a thing, in distinction from the reality; seeming only; as, there was only the *name* of friendship between them.

Syn. — NAME, DESIGNATION, DENOMINATION; APPELLATION, TITLE, STYLE. NAME is the general term; a DESIGNATION is a distinctive name; DENOMINATION (somewhat antiquated as a mere synonym for *name*) applies esp. to a class or category; as, "Whatsoever Adam called every living creature, that was the *name* thereof" (*Gen.* ii. 19); "Thou shalt call his *name* John" (*Luke* i. 13); He modestly disclaimed the *designation* of philosopher; cf. "Let me find . . . some gentler name to *designate* [her] condition" (*De Quincey*); "All these came under the *denomination* of Anabaptists" (*Strype*); cf. "what are quaintly but happily *denominated* private means" (*Stevenson*). APPELLATION (now somewhat bookish) suggests a more or less descriptive or characterizing name; a TITLE is an appellation which designates rank, distinction, and the like; STYLE is more formal or ceremonious than *title;* the verb *style*, however, is not so formal as the noun; as, "This ridiculous *name* . . . struck the fancy of the people; and they commonly affixed to this assembly the *appellation* of Barebone's Parliament" (*Hume*); "'Confound you! You shall be Jack again.'—'I am happy in the *appellation*'" (*Sheridan*); "'Thane of Cawdor,' by which *title* . . . these weird sisters saluted him" (*Shak.*); "the Lord Justice-General would have nothing to do with it, this *title* being at the date in question only a nominal one held by a layman" (*Sidney Colvin*); "Am I a queen in *title* and in *style?*" (*Shak.*); cf. "Shall I say Jacobites? or, as they were pleased to *style* themselves, the country gentlemen?" (*Gibbon*). See EPITHET.

2. To cheat at dice. *Obs.* **b** **to nap it,** to "catch it," as when hit hard and often in sparring. *Cant.*

nape (nāp ; *see note below*), *n.* [ME. *nape ;* orig. uncert.] The back part of the neck.

☞ The pronunciation *năp*, very common in the United States, is generally regarded as colloquial or dialectal.

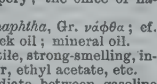
na'per-er (nā'pĕr-ĕr), *n* [*napery* + *-er.*] An officer in a royal household having charge of the table linen.

na'per-y (-ĭ), *n.* [OF. *naperie*, fr. *nape* a tablecloth, F. *nappe*, LL. *napa*, fr. L. *mappa.* See MAP ; cf. APRON, NAPKIN.] **1.** Household linen ; esp., table linen. **2.** The making or keeping of napery ; the office of naperer. *Obs.*

naph'tha (năf'thȧ ; 217), *n.* [L. *naphtha*, Gr. *νάφθα* ; cf. Ar. *naft, nift.*] **1.** Petroleum ; rock oil ; mineral oil. **2.** *Old Chem.* Any of various volatile, strong-smelling, inflammable liquids, as ordinary ether, ethyl acetate, etc. **3.** A petroleum product intermediate between gasoline and benzine, consisting largely of heptane ; — called also *Danforth's oil.* Also, any of several volatile inflammable liquids obtained by distilling certain carbonaceous materials and resembling petroleum naphtha ; as, Boghead *naphtha*, from Boghead coal ; crude *naphtha*, or *light oil*, from coal tar ; wood *naphtha* (methyl alcohol), from wood, etc.

naph'tha-cene (-sēn), *n. Chem.* An orange-yellow, crystalline, cyclic hydrocarbon, $C_{18}H_{12}$, obtained from coal tar.

naph'tha-line (-lēn), *n.* Also **naph'tha-line** (-lĭn ; -lēn ; 184). *Org. Chem.* A hydrocarbon, $C_{10}H_{18}$, one of the principal constituents of coal tar, forming brilliant white platelike crystals of peculiar odor. It is obtained esp. from the "middle oil" from coal tar, and is used extensively in the manufacture of dyestuffs and explosives, as a defense against moths (as in moth balls), etc. Chemically, it contains a double benzene nucleus and is the parent substance of a large number of derivatives. There are two kinds of mono derivatives, α and β (see NAPHTHOL). For convenience in distinguishing isomers, the carbon atoms are designated by numbers, as shown in the formula. Di-derivatives are sometimes distinguished by prefixes ; as, 1.2, *ortho-* ; 1.3, *meta-* ; 1.4, *para-* ; 1.5, *ana-* ; 1.6, *epi-* ; 1.7, *kata-* ; 1.8, *peri-* ; 2.6, *amphi-* ; 2.7, *pros-*.



Naphthalene.

naph-thal'ic (năf-thăl'ĭk), *a. Chem.* Pert. to, or derived from, naphthalene. — **naphthalic acid.** **a** A crystalline dibasic acid, $C_{10}H_6(CO_2H)_2$, formed by oxidation of acenaphthene. It is the 1.8- or pericarboxyl derivative of naphthalene. **b** A yellow crystalline substance, $C_{10}H_5(OH)O_2$. It is the β-hydroxy derivative of *a*-naphthoquinone. **c** Phthalic acid. *Obs.*

naph'tha-lize (năf'thȧ-līz), *v. t. ;* -LIZED (-līzd) ; -LIZING (-līz'ĭng). To mingle, saturate, or impregnate with naphtha. — **naph'tha-li-za'tion** (-lĭ-zā'shŭn ; -lī-zā'-), *n.*

naph-thaz'a-rin (năf-thăz'ȧ-rĭn), *n.* Also **-rine** (-rĭn ; -rēn). [*naphthalene* + *alizarin.*] *Chem.* A red crystalline dyestuff, $C_{10}H_4(OH)_2O_2$, with green metallic luster, a dihydroxy derivative of a naphthoquinone. Its colors are fugitive, but its compound with sodium bisulphite is used with chrome mordants as *alizarin black S.*

naph'thene (năf'thēn), *n. Org. Chem.* Hexamethylene ; also, any of a series of saturated cyclic hydrocarbons, C_nH_{2n}, derived from hexamethylene. They constitute the principal part of Caucasian petroleum, or naphtha, as the paraffins do of American petroleum. They occur also in other kinds of petroleum, in coal tar, in resin oil, etc.

naph'thi-on'ic (năf'thĭ-ŏn'ĭk), *a.* [Prob. *naphthalene* + *thionic.*] *Chem.* Pert. to or designating a sulphonic acid, $C_{10}H_7(NH_2)SO_3H(1.4)$, got by treating *a*-naphthylamine with sulphuric acid. It is important in dyestuff manufacture.

naph-tho'ic (năf-thō'ĭk), *a. Chem.* Pert. to or designating either of two crystalline acids, $C_{10}H_7CO_2H$, carboxyl derivatives of naphthalene, as (*a*- and β-) (see NAPHTHALENE).

naph'thol (năf'thōl ; -thŏl), *n.* Also **naph'tol** (-tōl ; -tŏl). [*naphthalene* + *-ol.*] *Org. Chem.* **a** Either of two white, crystalline derivatives of naphthalene, $C_{10}H_7OH$, distinguished by the prefixes *alpha* (*α*) and *beta* (*β*) ; specif., in the U. S. P., beta-naphthol. They occur in coal tar, but are usually prepared artificially from naphthalene. Both are used as antiseptics and in the manufacture of dyes and other substances, but β-naphthol is much the more important. **b** By extension, any of various hydroxy derivatives containing the naphthalene nucleus. They resemble the simpler phenols, but are in general more reactive.

naph'thol-sul-phon'ic (-sŭl-fŏn'ĭk), *a. Org. Chem.* Pertaining to or designating any of a large number of sulphonic acids derived from the naphthols. Many of them are used in the manufacture of dyestuffs. The 2.6 monoacid is called *Schäffer's acid ;* the 2.8 mono-acid, *Bayer's acid*, etc. (See NAPHTHALENE.)

naph'tho-quin'one (năf'thō-kwĭn'ōn ; -kwĭ-nōn'), *n.* [*naphthalene* + *quinone.*] *Org. Chem.* Either of two substances, $C_{10}H_6O_2$, derived from naphthalene, of which one (*a*-naphthoquinone) is a yellow crystalline paraquinone obtained by oxidizing naphthaleue with chromic acid, and in other ways, and the other (β-naphthoquinone) is an orthoquinone forming red needles, obtained by oxidizing an amino derivative of *a*-naphthol. See QUINONE.

naph'thous (năf'thŭs), *a.* Pertaining to, or of the nature of, naphtha.

naph'thyl-am'ine (năf'thĭl-ăm'ĭn ; -ȧ-mēn' ; 184), *n.* Also **-amin.** *Chem.* Either of two crystalline bases, $C_{10}H_7NH_2$, amino derivatives of naphthalene, distinguished as *a*- and β-, and obtained by action of ammonia on *a*- and β- naphthol respectively. The *a*- compound is commercially prepared by the reduction of the corresponding nitro compound. Both are used in dyestuff manufacture.

Na-pier'i-an } (nȧ-pē'rĭ-ăn), *a.* Also **Na-pier'e-an.** Of,
Na-pe'ri-an } pert. to, or discovered by, Napier, or Neper (John, Laird of Merchiston, 1550–1617).

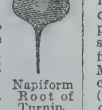
Na'pi-er's bones, Na'pi-er's rods (nā'pĭ-ĕrz). A set of eleven rods, as of bone, each divided into nine spaces and containing the numbers of a column of the multiplication table, designed to facilitate large operations in multiplication and division ; — falsely attributed to Baron Napier, who descanted upon them in his "Rabdologia" (1617), but already known and described by Finée in 1532.

Napier's circular parts. *Math.* Five parts of a right (or quadrantal) spherical triangle ; that is, the legs and the complements of their opposite angles and of the hypotenuse. Any part is called *adjacent* to the two next to it and opposite the other two. Napier's rules for these parts solve all cases of right triangles ; viz., the sine of any part equals the product of the cosines of the opposite parts and also the product of the tangent of the adjacent parts.

Napier's diagram. *Navig.* A diagram showing the graduated circular margin of a compass card cut at the north and south points, with the two semicircles straightened out into vertical lines, adjacent to which are curving ones whose degree of separation from the straight lines indicates graphically the compass deviation at every point. It also affords a ready means of converting magnetic into compass course and the reverse.

Napier's method. *Navig.* The method of graphically representing the compass deviation by means of Napier's diagram.

na'pi-form (nā'pĭ-fôrm), *a.* [L. *napus* turnip + *-form.* Cf. NAVEW.] *Bot.* Turnip-shaped ; large and round in the upper part, and tapering abruptly below ; — said of roots.



Napiform Root of Turnip.

nap'kin (năp'kĭn), *n.* [Dim. of OF. *nape* a tablecloth, cloth, F. *nappe*, L. *mappa.* See NAPERY.] **1.** A little towel, or small cloth, esp. one used at table for wiping the fingers and lips or in serving hot dishes. **2.** A handkerchief. *Obs., Scot., or Dial. Shak.* **3.** A kerchief or neckerchief. *Scot.*

nap'kin, *v. t. ;* NAP'KINED (-kĭnd) ; NAP'KIN-ING. **1.** To hide or stow away in a napkin. *Obs.* **2.** To cover, provide, serve, or the like, with a napkin ; — rarely used except in *p. p. ;* as, a *napkined* tray.

Na'ples (nā'p'lz), *n.* A city of Italy. — **Naples biscuit,** a lady finger. — **N. red,** red ocher. — **N. yellow.** **a** A basic antimonate of lead, used as an enamel color and in oil painting ; also, the color it gives. It is not affected by light. **b** Any of several yellow pigments substituted for the above, as a mixture of cadmium yellow and zinc white.

Na-po'le-on (nȧ-pō'lē-ŏn), *n.* [F. *Napoléon*, It. *Napoleone.*] Masc. prop. name. F. *Napoléon* (nȧ'pō'lā'ôN') ; It. *Napoleone* (nä-pō'lā-ō'nā).

na-po'le-on, *n.* [After the Emperor *Napoleon* I.] **1.** A French gold coin of 20 francs. See COIN. **2.** *Card Playing.* **a** A game in which each player holds five cards, the eldest hand stating the number of tricks he will bid to take, any subsequent player having the right to overbid him or a previous bidder, the highest bidder naming the trump and winning a number of points equal to his bid if he makes so many tricks, or losing the same number of points if he fails to make them. **b** A bid to take five tricks at napoleon. It is ordinarily the highest bid ; but sometimes bids are allowed of *wellington*, or of *blucher*, to take five tricks, or pay double, or treble, if unsuccessful **3.** A Napoleon gun. **4.** A kind of top boot of the middle of the 19th century. **5.** A shape and size of cigar. It is about seven inches long.

Napoleon the Little (*F.* le Pe-tit' [lē p'tē'tē']), Napoleon III. ; — so called satirically by Victor Hugo.

Napoleon blue. *Dyeing.* A variety of Prussian blue that is formed on the fabric.

Na-po'le-on'ic (nȧ-pō'lē-ŏn'ĭk), *a.* Of or pert. to Napoleon I., or his family ; resembling Napoleon I. ; as, the *Napoleonic* wars. — **Na-po'le-on'i-cal-ly** (-ĭ-kăl-ĭ), *adv.*

Na-po'le-on-ism (nȧ-pō'lē-ŏn-ĭz'm), *n.* The principles, policy, etc., of the Napoleons, esp. of Napoleon I. ; attachment to, or advocacy of, the Napoleonic dynasty ; Bonapartism. — **Na-po'le-on-ist,** *n.*

nappe (năp), *n.* [F. *nappe* cloth, sheet. See NAPERY.] *Geom.* Sheet ; surface ; all of a surface so connected that it is possible to pass from any one point of it to any other without leaving the surface.

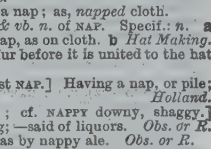
napped (năpt), *a.* Having a nap ; as, *napped* cloth.

nap'ping (năp'ĭng), *p. pr. & vb. n.* of NAP. Specif. : **a** Act or process of raising a nap, as on cloth. **b** *Hat Making.* A sheet of partially felted fur before it is united to the hat body.

nap'py (năp'ĭ), *a.* [From 1st NAP.] Having a nap, or pile ; downy ; shaggy. *Holland.*

nap'py, *a.* [Orig. uncert. ; cf. NAPPY downy, shaggy.] **1.** Strong ; heady ; foaming ; — said of liquors. *Obs. or R.* **2.** Somewhat intoxicated, as by nappy ale. *Obs. or R.*

nap'py (năp'ĭ), *n. ; pl.* -PIES (-ĭz). Also *nappie.* [Cf. ME. *nap*, AS. *hnæp* cup, bowl, E. HANAPER.] A round or oval dish, with a flat bottom and sloping sides, used for cooking, holding food, etc.



Napu (*Tragulus javanicus*). 1/2

na'pu (nä'pōō), *n.* [Native name.] Any of numerous chevrotains of the Indo-Malayan region ; esp., *Tragulus napu* of Sumatra or *T. javanicus* of Java. They are similar to the kanchils, but slightly larger. See CHEVROTAIN.

nar'cein (när'sē-ĭn ; -ēn ; 184), *n.* Also **nar'ce-in** (-ĭn), **nar-ce'ia** (när-sē'yȧ). [L. *narce* numbness, torpor, Gr. *νάρκη* : cf. F. *narcéine.*] *Org. Chem.* A bitter, white, crystalline alkaloid, $C_{23}H_{29}O_9N \cdot 3H_2O$, found in small quantities in opium, and closely related to narcotine. It is a narcotic.

Nar-cis'sus (när-sĭs'ŭs), *n. ; pl.* E. -CISSUSES (-ĕz ; -ĭz, 151), L. -CISSI (-sĭs'ī). [L. *narcissus*, and (personified) *Narcissus*, Gr. *νάρκισσος*, *Νάρκισσος*, fr. *νάρκη* torpor, in allusion to the narcotic properties of the flower. Cf. NARCOTIC.] **1.** *Bot.* A genus of Old World bulbous amaryllidaceous plants having erect linear leaves and showy yellow or white or bicolored flowers with a large cup-shaped corona. Most of the species are well known in cultivation. The most popular types are : the true daffodils (*N. pseudo-narcissus* and *N. bulbocodium*), with elongated coronas, or "trumpets ;" the medium-crowned daffodils (*N. triandrus*, *N. incomparabilis*, etc.), with coronas shorter than the perianth ; the poet's narcissus (*N. poeticus*), having a corona with an indurated rim or border ; the jonquil (*N. jonquilla*) and the polyanthus narcissus (*N. tazetta*), with a very short corona. See DAFFODIL, JONQUIL, 1.

Flower of Narcissus (*N. pseudo-narcissus*).

2. [*l. c.*] A plant, flower, or bulb of this genus. **3.** *Gr. Myth.* A beautiful youth for vain love of whom Echo died. Nemesis punished his indifference by causing him to fall in love with his own reflection which he saw in the water of a fountain. He pined away in despair over it and was changed into the flower which bears his name.

nar'co- (när'kō-). A combining form from Greek *νάρκη, numbness, stupor, torpor.*

Nar-cob'a-tus (när-kŏb'ȧ-tŭs), *n.* [NL. ; Gr. *νάρκη* electric ray (fish) + *βάτος* a ray.] *Zoöl.* The typical genus of electric rays. *Torpedo* is a synonym.

nar'cose (när'kōs ; när-kōs') } *a. Med.* In a condition of
nar'cous (när'kŭs) } stupor.

nar-co'sis (när-kō'sĭs), *n.* [NL., fr. Gr. *νάρκωσις.* See NARCOTIC.] *Med.* Production of a benumbed state, stupor, state of insensibility, or state of unconsciousness ; narcotization ; a benumbed state, stupor, or insensibility ; privation of consciousness, due to a narcotic ; narcotism ; also, *Obs.*, quality of producing such a state.

nar-cot'ic (-kŏt'ĭk), *a.* [F. *narcotique*, or LL. *narcoticus*, fr. Gr. *ναρκωτικός*, fr. *νάρκοῦν* to benumb, *νάρκη* numbness, torpor.] **1.** Having the properties of, or operating as, a narcotic ; — also often fig. ; as, a *narcotic* sermon. **2.** Characterized by, or of the nature of, narcosis ; as, a *narcolic* effect.

nape. *n.* [L. *napus.* Cf. NEEP.] The yellow turnip. *Obs.*

nape, *v. t.* To strike on the nape ; to cut at the nape. *Obs.*

na-pe'ad (nā-pē'ăd), *n.* [*Also nepe.*] A Napæa. *Rare.*

nape'-crest' (nāp'-), *n.* An African bird of the genus *Schizorhis*, related to the plantain eaters.

na'pee (nä'pē), *n.* [Burmese *ngāpi.*] Balachong.

napell, *n.* [Cf. OF. *napel.*] Napellus. *Obs.*

na-pel'lus (nȧ-pĕl'ŭs ; ēn ; 184), *n.* Also -lin. [NL. *napellus*, specific name, dim. fr. L. *napus* a kind of turnip.] *Chem.* An alkaloid obtained from monkshood (*Aconitum napellus*), used as an anodyne.

na-pel'lus (-ŭs), *n.* [Cf. NAPELLIN.] The common monkshood (*Aconitum napellus*). [IAN.]

Na-pe'ri-an. Var. of NAPIER-naperonn. † NAPRON.

na'pha wa'ter (nā'fȧ). [Sp. *nafa*, fr. Ar. *nafjah* odor.] A perfume distilled from orange flowers. [OBS.]

na'phew (nā'fū). Var. of NA-**Na'phish** (nā'fĭsh). *Bib.*

Naph'i-si (năf'ĭ-sī). *Bib.*

Naph'ta-li (-tȧ-lī), *n. Bib.* **1.** One of the twelve sons of Jacob. **2.** The tribe named for him. **3.** A region in Palestine.

naph'tha-lan (năf'thȧ-lăn), *n. Pharm.* An unctuous preparation obtained by fractional distillation of Armenian naphtha. It is used as a remedy in parasitic skin affections.

naph'tha-late (-lāt), *n. Chem.* A salt or ester of naphthalic acid.

naphthalene red, rose, or **scarlet.** Naphtalia red. See DYE.

naphthalene yellow Martius yellow. See DYE.

naph'tha-len'ic (năf'thȧ-lĕn'-ĭk), *a. Chem.* Pert. to, or derived from, naphthalene ; naphthalic ; specif., designating a hydroxy derivative of naphthoquinone. See NAPHTHALIC ACID.

naph-thal'i-dine (năf-thăl'ĭ-dĭn ; -dēn ; 184), *n.* Also -din. [*naphthalene* + *tolidine.*] *Chem.* = NAPHTHYLAMINE.

naph'tha-lin (năf'thȧ-lĭn), *n.* [F. *naphtaline.*] *Chem.* Naphthalene.

naph'tha-liz'a-rin (năf'thȧ-lĭz'ȧ-rĭn), *n.* Naphthazarin.

Naph'thar (năf'thär), *n. Bib.* A word used in 2 Macc. i. 36, and prob. equiv. to *naphtha.*

‖**naph'tha vi'tri-o'li** (vĭt'rĭ-ō'lī). [NL., naphtha of vitriol] Common ethyl ether.

naph'tha-zine (-thȧ-zĭn ; -zēn ; 184), *n.* Also -zin. *Org. Chem.* An azine, $C_{10}H_6N_2$: C_6H_4, containing two naphthalene nuclei linked together by nitrogen

naph-thin'du-line (năf-thĭn'dū-lĭn ; -lēn ; 184), *n.* Chem. See INDULINE.

naph'thi-o-nate (năf'thĭ-ō-nāt), *n.* A salt of naphthionic acid.

naphthol black, blue, green, orange, or **yellow.** See DYE.

naph'thol-ize, *v. t.* To treat or impregnate with naphthol or naphtha.

naph'thyl (năf'thĭl), *n.* [*naphthalene* + *-yl.*] *Chem.* A univalent hydrocarbon radical, $C_{10}H_7$, of which naphthalene is the hydride.

naphthylamine brown, naphthylamine black. See DYE.

naphthyl blue. See DYE.

naph'thyl-ene (năf'thĭ-lēn), *n. Chem.* The bivalent radical $C_{10}H_6$, of which naphthalene is the hydride. Cf. PHENYLENE.

naph-thyl'ic (năf-thĭl'ĭk), *a* Of or pertaining to naphthyl

naph'tol (năf'tōl ; -tŏl). Var. of NAPHTHOL. [năf'tō-]. *Bib.*

naph-tu'him (n ă f-t ū'h ĭ m ; năp'tōō-hĭm ; 184), *n.* [F. *naphtaline.*] *Chem.* Naphthalene.

Na'pi-er's a-nal'o-gies. *Math* Four formulæ, demonstrated by Napier, giving the tangent of half the sum or difference of two of the angles or sides of a spherical triangle in terms of the others. [PASS, *n.*]

Na'pi-er's com'pass. See COM-

na'pi-fo'li-ous (nă'pĭ-fō'lĭ-ŭs), *a.* [L. *napus* turnip + *folium* leaf.] *Bot.* Having leaves shaped like those of the turnip. *Rare.*

na'pit (nă'pĭt), *n.* [Hind., barber.] One of a Hindu caste of barbers found throughout India.

nap'kin-ing, *n.* Material for napkins. Cf. TOWELING.

napkin pattern. See LINEN SCROLL.

napkin ring. A ring used to inclose a table napkin.

nap'less, *a.* Without nap ; threadbare. — **nap'less-ness,** *n.*

Na-po'le-on-a'na (nȧ-pō'lē-ŏn-ā'nȧ ; -ăn'ȧ), *n. pl* [*Napoleon* + *-ana.*] Papers, books, relics, etc., relating to Napoleon

Napoleon gun *Ordnance.* A twelve-pounder, smoothbore, muzzle-loading, field combined howitzer and gun, designed to fire both shot and shell. It was first adopted by the French and later, in principle, by other European powers and the United States, but is now long obsolete.

Na-po'le-on-is'tic (-ĭs'tĭk), *a.* Napoleonic.

na-po'le-on-ite, *n.* [*Napoleon* + *-ite.*] *Petrog.* = CORSITE.

Na-po'le-on-ize, *v. t.* To subject to, or govern in accordance with, Napoleonic theories.

nappe. † NAP.

nap'per (năp'ĕr), *n.* One who naps, or sleeps lightly.

nap'per (n ă p'ĕr ; nă p'-), *n.* The head. *Dial. Eng. & Slang.*

nap'per, *n.* One, esp. a machine, that puts a nap on cloth.

napperone. † NAPRON, apron.

nap'pie. Var. of NAPPY.

nap'pi-ness (n ă p'ĭ-n ĕ s), *n.* [From 1st NAPPY.] Quality of having a nap ; abundance of nap, as on cloth.

napping hammer A knapping hammer.

nap'pish-ness, *n.* Tendency to nap ; drowsiness. *Rare.*

nap'pist (năp'ĭst), *n.* One who plays nap. *Rare.*

nap'py (n ă p'ĭ ; n ă p'ĭ), *n.* Liquor ; esp., ale *Eng*

nap'ron (*dial.* năp'rŭn ; năp'-ŭrn), *n* An apron *Obs. or Scot. & Dial. Eng.*

napsome. † NAPRON.

na'pry. † NAPERY.

nap'ta, napte. † NAPHTHA.

nap'tha. Naphtha. *Ref. Sp.*

naquil. † NOWHILE.

naquither. † NOWHITHER.

nar. Contr of *ne are*, are not. *Obs.* [were not *Obs.*]

nar. † *nere*, contr. of *ne were*, nar (när), *a.* [ME. *nerre* ; cf. AS. *nēarra*, Icel. *nærri.* See NEAR.] Nearer ; also, nearest. — *adv.* [ME *nerre* ; cf. Icel. *nærri.*] Nearer ; near ; also, nearly. *Both Obs. or Scot. & Dial. Eng.*

Nar'a-ka (n ä r'ȧ-k ȧ ; *Skr.* nŭr'-), *n.* [Skr.] *Hinduism & Buddhism.* The place of punishment for the wicked after death ; hell.

Nar-ci'ne (när-sī'nē), *n* [NL., fr. Gr. *νάρκη* an electric ray.] A genus of small electric rays represented by species in warm parts of the Atlantic and Pacific.

Nar-cis'a, *n.* = NARCISSUS.

Nar'cis-sa'les (n ä r'sĭ-s ā'l ē z), *n. pl* [NL. See NARCISSUS.] *Bot.* In Lindley's classification, an alliance comprising the amaryllis and iris families, etc. —

nar-cis'sal (när-sĭs'ăl), *a.*

Nar-cis'sine (när-sĭs'ĭn), *a.* Of or pertaining to Narcissus.

Nar'co-bat'i-dæ (n ä r'kō-b ăt'ĭ-d ē), *n. pl.* [NL. See NARCOBATUS.] *Zoöl.* The family consisting of the electric rays *Torpedinidæ* is a synonym

nar'co-hyp'ni-a (-hĭp'nĭ-ȧ), *n.* [NL. ; *narco-* + Gr. *ὕπνος* sleep.] *Med.* Numbness felt on awaking from sleep

nar'co-lep'sy (n ä r'kō-l ĕp'sĭ), *n.* [*narco-* + *-lepsy.*] *Med.* A condition characterized by brief epileptiform attacks of deep sleep. — **nar'co-lep'tic** (-lĕp'tĭk), *a.*

nar-co'ma (n ä r-k ō'm ȧ), *n.* [NL., fr Gr. *ναρκοῦν* to benumb.] *Med.* The state of stupor produced by narcotics. — **nar-com'a-tous** (-k ŏ m'ȧ-t ŭ s ; -k ō-m ă t-ŭ s), *a.*

nar'co-ma'ni-a (n ä r'kō-m ā'n ĭ-ȧ), *n* [NL. ; *narco-* + *mania.*] Uncontrollable desire for narcotics.

nar'co-ma'ni-ac. *n. Med.* One having narcomania. — **nar'co-ma-ni'a-cal** (-mȧ-nī'ȧ-kăl), *a.*

Nar'co-me-du'sæ (-m ē-d ū's ē), *n. pl.* [NL. See NARCO- ; MEDUSA.] *Zoöl.* A division of trachyline Hydrozoa in which the tentacles spring from the exumbrella, and the gonads are developed in connection with the manubrium. — **nar'co-me-du'san** (-s ă n), *a. & n.*

nar'co-pep'sis (-p ĕ p's ĭ s), *n.* [NL ; *narco-* + Gr *πέψις* digestion.] *Med.* Torpid digestion [Narcotine.]

nar'co-ti-a (när-kō'shĭ-ȧ), *n.*

nar-cot'ic (när-kŏt'ĭk), *n.* *Med.* A drug which in moderate doses allays susceptibility, relieves pain, and produces profound sleep, but which in poisonous doses produces stupor, coma, or convulsions. The chief narcotics are opium (with morphine), belladonna (with atropine), Indian hemp, stramonium, hyoscyamus, and lactucarium.

nar-cot'i-cal (-ĭ-kăl), *a.* Narcotic. — **nar-cot'i-cal-ly**, *adv.* — **nar-cot'i-cal-ness**, *n.*

nar'co-tine (närˈkō-tĭn ; -tēn ; 184), *n.* Also **nar'co-tin** (-tĭn), **nar'co-ti'na** (-tēˈnȧ). [Cf. F. *narcotine*. Cf. CO-TARNINE.] *Org. Chem.* A tasteless, white, crystalline alkaloid, $C_{22}H_{23}O_7N$, which is found in opium, and recognized as a derivative of isoquinoline. Pure narcotine is not a narcotic.

nar'co-tin'ic (-tĭnˈĭk), *a.* Pertaining to narcotine.

nar'co-tism (närˈkō-tĭz'm), *n.* [Cf. F. *narcotisme*.] **a** Narcosis. **b** Production of narcosis. **c** An unnatural desire or tendency to sleep. **d** A narcotic influence.

nar'co-tize (-tīz), *v. t.* ; NAR'CO-TIZED (-tīzd) ; NAR'CO-TIZ'ING (-tīz'ĭng). To imbue with, or subject to the influence of, a narcotic ; to put into a state of narcosis ; — often fig. — **nar-co-ti-za'tion** (-tĭ-zāˈshŭn), *n.*

This garden, and no corner leave unspied. *Milton.*

8. *Phon.* Formed or articulated with a relatively tense condition of the tongue, the upper surface of which is at the same time convexed, thus "narrowing" the oral passage ; — said of one of a pair of vowels having the same "height," as contrasted with the other called "wide." Thus, *ē* (ēve) is *narrow* compared with *ĭ* (Ill), "wide." Cf. WIDE, and see *Guide to Pron.*, § 44.

Syn. — NARROW, STRAIT. STRAIT adds to NARROW the implication of constriction ; as, "The sea is set in a wide place, that it might be deep and great. But put the case the entrance were *narrow*, and like a river. . . . If he went not through the *narrow*, how could he come into the broad ?" (*2 Esdras* vii. 3-5) ; "Behold now the place where we dwell with thee is too *strait* for us" (*2 Kings* vi. 1). Fig., *narrow* implies illiberality or intolerance, *strait*, strictness or rigor ; as, "Dante does not come before us as a large catholic mind ; rather as a *narrow* and even sectarian mind" (*Coleridge*) ; "After the most *straitest* sect of our religion I lived a Pharisee" (*Acts* xxvi. 5) ; *narrow*-minded, *strait*-laced. See STRICT, RIGID.

2. A people connected by ties of blood generally manifested by more or less community of language, religion, and customs, and by a greater sense of common interest and interrelation than exists between them and others; thus, the Jews and the Gypsies are often called *nations.*

3. Less definitely, but more commonly, any group or aggregation of people having like institutions and customs and a sense of social homogeneity and mutual interest. Most nations are formed of agglomerations of tribes or peoples either of a common ethnic stock or of different stocks fused by long intercourse. A single language or closely related dialects, a common religion, a common tradition and history, and a common sense of right and wrong, and a more or less compact territory, are typically characteristic; but one or more of these elements may be lacking and yet leave a group that from its community of interest and desire to lead a common life is called a *nation.* Among technical writers some emphasize the element of kinship (as Austin and Wheaton), others that of community of language (as Freeman).

4. The body of inhabitants of a country united under a single government, whether dependent or independent; a people united politically.

5. A community or an aggregation of men or animals; esp., a caste or class formed by the common profession or interests of its members. *Obs.*

Syn. — NATIVE, NATURAL, INDIGENOUS, ABORIGINAL, ORIGINAL. That is NATURAL, as here compared, which belongs to something by nature, or which is formed by nature; NATIVE commonly heightens the implied contrast with what is acquired or artificial, and frequently denotes, esp. in the case of qualities, that which is inborn or inherent; as, "a wretch whose *natural* gifts were poor to those of mine" (*Shak.*), "*natural* graces that extinguish art" (*id.*), "Within the hollow rocks a *natural* power" (*Shelley*); "If . . . sweetest Shakespeare, Fancy's child, warble his *native* wood-notes wild" (*Milton*); "*native* good breeding and refinement" (*De Quincey*). But *natural* and *native* are often used with little distinction. That is INDIGENOUS which is native esp. to a soil, country, or climate; the word is occasionally used, like *native*, in the sense of inborn; as, "mankind, *indigenous* to so many climates" (*Arbuthnot*); feelings *indigenous* to mankind. That is ABORIGINAL which, so far as is known, has no predecessor; the word is esp. applied to the earliest ascertainable inhabitants of a country (see also the def. of *autochthonous*); that is ORIGINAL which precedes all others of its class; as, the *aboriginal* inhabitants of America, the *aboriginal* forests, rocks; a book in its *original* binding, a modification of the *original* wording, the thirteen *original* States. See PRIMARY, INNATE, NATAL.

It occurs esp. in the Paleozoic rocks of the United States, sometimes under great pressure, and has attained industrial importance in Pennsylvania, Ohio, Indiana, West Virginia, and a few other States. It consists chiefly of methane, with small amounts of ethane, propane, hydrogen, oxides of carbon, nitrogen, etc. It is valuable as a fuel, 100 cu. ft. being equal to 8-13 lbs. of coal. Its illuminating power is low unless some form of mantle burner is used. — **n. gender.** See GENDER, 3. — **n. guardian,** *Law*, a guardian by natural right, as of relationship. — **n. harmony,** *Music*, the harmony of the triad or common chord; harmony without modulations or derived chords. — **n. historian,** a student of, or writer on, natural history. — **n. history,** formerly, the study, description, and classification of animals, plants, minerals, and other natural objects, thus including the modern sciences of zoölogy, botany, mineralogy, etc., in so far as they existed at that time. Now commonly restricted to a study of these subjects in a more or less superficial way, at least without making use of modern anatomical and analytical methods, and usually further restricted to the study of animals and plants, esp. the former, and their habits. — **n. horn,** *Music*, the simplest form of the horn, consisting merely of a tapering brass tube with mouthpiece and bell, curved upon itself and without keys or valves. — **n. idiot.** = NATURAL, *n.*, 3. — **n. law.** **a** The laws of nature. See under LAW. **b** Law which would be binding upon human societies in the absence of institutional law or which is binding as supplementing institutional law. The conception of natural law originated with the Stoics, by whom it was regarded as embodying those rules of justice discernible by right reason. This view was sometimes taken by Roman jurists, who also identified natural law with the *jus gentium* (which see). Justinian adopted Ulpian's definition of it as that law which "nature has taught all living beings," thus forecasting the modern bionomic view. The Scholastics generally regarded natural law as that part of the divine law which is not directly revealed, but is discernible to reason; and the rationalists of the 18th century derived from their analysis of human societies certain **natural rights**, as to life, liberty, and the pursuit of happiness, which they regarded as of prior validity to institutional law (cf. SOCIAL CONTRACT). Modern theories tend to put *natural law* as the body of rules or customs which the general development of mankind shows to be essential to human society. See JUSTICE, 2, RIGHT. — **n. line of sight,** *Gunnery*, an imaginary line parallel to the axis of the bore, passing through the highest points of the line of metal. — **n. magic.** See MAGIC, *n.*, 1. — **n. magnet.** See MAGNET, 1. — **n. mode** *or* **scale,** *Music*, a diatonic scale with the ideal intervals secured by using pure intonation; — distinguished from *tempered scale*. — **n. necessity.** See NECESSITY, *n.*, 1. — **n. number.** **a** An element of an ideal progression defined by the conditions that one element precedes all the rest and that each is followed by a next greater with none between; as, 1, 2, 3, . . . *n*, *n* + 1, . . . **b** A mark serving to specify the position of an element in a progression. *Dedekind.* — **n. order.** *Bot.* See FAMILY, 7, ORDER. — **n. parts,** the genitals. *Obs.* — **n. person,** *Law*, a man, woman, or child, in distinction from a juristic person. See PERSON, CORPORATION, UNIVERSITY. — **n. philosophy.** **a** Orig., the study of nature in general; — contrasted with *mental* and *moral philosophy*. **b** Physics. — **n. porcelain.** See PORCELAIN. — **n. Portland cement.** See NATURAL CEMENT. — **n. predication,** *Logic*, indirect predication; also, predication in which subject and predicate relate to a common substance or matter of which they are accidents. — **n. premium.** See PREMIUM. — **n. price.** See PRICE. — **n. pruning,** the natural falling or dropping off of branches and twigs of trees. It may result from the death of the branches, due to the exclusion of light or other physiological causes; or it may be a form of adaptation to vegetative reproduction, as in certain willows and poplars, in which the young branches separate easily while still living and are blown away to take root elsewhere. — **natural realism,** *Philos.*, the doctrine, elaborated by the philosophers of the Scottish school, that perception gives direct and indubitable evidence of the independent existence of both mind and matter; — called also the *common-sense philosophy*. See REALISM. — **n. religion,** religion derived from human reason and experience apart from revelation. See *Citation*.

I call that *natural religion* which men might know . . . by the mere principles of reason, improved by consideration and experience, without the help of revelation. *Bp. Wilkins.*

— **n. representative.** *Law.* See REPRESENTATIVE. — **n. rights,** *Law & Polit. Sci.*, those rights that are esteemed to belong to a man by the law of nature; esp., the right to life, liberty, and property, and, with Locke and later writers, to participate in the constitution of government. See RIGHT, *n.* — **n. science,** the branches of knowledge collectively which deal directly with natural objects, organic or inorganic, and the substances composing them and the phenomena exhibited by them, thus including biology in all its branches, mineralogy, geology, chemistry, physics, etc., but not abstract mathematics, philosophy, or metaphysics. — **n. selection,** the natural process tending to cause "the survival of the fittest" (that is, the survival of those forms of animals and plants best adjusted to the conditions under which they live), and extinction of poorly adapted forms. The process is dependent upon variability in the characters of different individuals. If an individual possesses peculiarities which are advantageous, the chances of long and healthy life for that individual, and hence of the reproduction of the peculiarities in its offspring (by the operation of heredity), are greater than if the character is a disadvantageous one. In succeeding generations the modification may proceed further, gradually resulting in great changes of structure, and if the environment gradually changes, races of organisms adapted to the new conditions may thus result. Darwin considered natural selection, operating by means of small fortuitous individual variations, as the most important factor in organic evolution. Later biologists do not generally regard it as of so great importance (relatively to other factors) in the origin of species and higher groups. Cf. DARWINISM, LAMARCKISM, MUTATION. — **n. slope,** *Civil Engin.*, the slope that a mass of earth thrown up into a heap assumes. The angle is the limiting angle of resistance of the earth. — **n. society,** *Sociol.*, an association of people enjoying mutual intercourse, but without, or considered apart from, government. — **n. spirit.** See SPIRIT, 1. — **n. steel,** steel made by the direct refining of cast iron in a refinery, or, as wootz, by a direct process from the ore. — **n. system.** **a** *Chem.* The periodic system of classifying the elements. See PERIODIC LAW. **b** *Biol.* A classification based upon morphological and anatomical relationships and affinities, considered in the light of phylogeny and embryology; specif., in *Bot.*, a system other than the *artificial* or *sexual system* established by Linnæus. — **n. theology,** theology deriving its knowledge of God from the study of nature independent of revelation. Hence, **n. theologian.** — **n. tones** *or* **harmonics,** *Music*, the spontaneous overtones from a sounding body, specif. those of wind instruments produced by the manner of blowing, as distinguished from those produced by valves or slides. — **n. vowel,** an unaccented neutral, or "mixed," vowel sound, as the final syllable in *nature, ever, sofa, circus*, etc.; — so called as being the most easily and instinctively uttered vowel sound. — **n. whole.** See WHOLE.

nat'u-ral (năt'ū-răl), *n.* **1.** A native; an aboriginal. *Obs.* **2.** *pl.* Natural gifts, powers, etc. *Obs. Fuller.* **3.** One born without the usual powers of reason or understanding; an idiot. "The minds of *naturals*." *Locke.* **4.** *pl.* Products of nature; the objects of the natural world; natural things or objects. *Obs.* **5.** The natural character, form, condition, or disposition of a person or thing. *Obs.* **6.** *Music.* **a** A white key of the keyboard, as of a piano. **b** A character [♮] placed on any degree of the staff to annul, or to remove the effect of, a sharp or flat preceding it. See B FLAT. **c** A note or tone affected by a sign ♮.

7. *Gaming.* Anything that immediately wins the stakes, as a nick at craps, a count of twenty-one before drawing cards at vingt et un, etc.

in one's naturals *or* **pure naturals,** in a condition of nature; without alteration or disguise; sometimes, naked. *Obs.* — **the natural,** that which is in accordance with the ordinary course of nature, or not miraculous or supernatural.

nat'u-ral-ism (năt'ū-răl-ĭz'm), *n.* **1.** A state of nature; action, inclination, or thought based on natural desires and instincts alone.

2. *Theol.* The doctrine that religious truth is derived from nature and not from revelation; the denial of the miraculous and supernatural (that is, of anything not explainable by natural laws) in religion.

3. *Philos.* The doctrine that physical laws give, or may be expected to give, an adequate account of all phenomena; the doctrine which denies universal teleology, or purpose, and asserts that the conceptions of the natural sciences furnish the only possible explanation of reality; loosely, materialism or positivism.

Naturalism we have taken to designate the doctrine that separates Nature from God, subordinates Spirit to Matter, and sets up unchangeable law as supreme. *James Ward.*

The doctrine of evolution is to be sharply distinguished from the *naturalism* of the seventeenth century. Unlike that *naturalism*, our modern doctrine is primarily disposed, not merely to explain, but to estimate, nature *Josiah Royce.*

4. a The theory that art or literature should conform to nature; realism; also, the quality, rendering, or expression of art or literature executed according to this theory. **b** Specif., the principles and characteristics professed or represented by a 19th-century school of realistic writers, notably by Zola and Maupassant, who aimed to give a literal transcription of reality, and laid special stress on the analytic study of character, and on the scientific and experimental nature of their observation of life. Cf. REALISM.

nat'u-ral-ist, *n.* [Cf. F. *naturaliste.*] **1.** One versed in natural science; a student of natural history, esp. of the natural history of animals.

na'tive-born', *a.* Born as a native. [*Obs.*]
Nativity pie. A Christmas pie.
Natl. *Abbr.* Nathanael; Nathaniel.
natr-o-my (nā'trō-mĭ). Dial. var. of NATOUR. + NATURE.
natur. + -OPHY.
nat. phil. *Abbr.* Natural philosophy.
na'tri-on (nā'trĭ-ŏn), *n.* [*natrium* + *-ion.*] *Chem.* Ionic sodium, Na^+.
na'tri-um (nā'trĭ-ŭm), *n.* [NL. See NATRON.] *Chem.* Sodium.
na'tron (nā'trŏn), *n.* [F. See ANATRON; cf. NITER.] *Min.* Native sodium carbonate, $Na_2CO_3{\cdot}10H_2O$, occurring only in solution, or with other salts.
nat'ter (năt'ẽr), *v. i.* [Cf. E. dial. *gnatter*, Fries. *gnattern.*] To find fault; to be peevish; to grumble. — **nat'tered** (-ẽrd), *a.* Peevish; querulous. — **nat'tered-ness,** *n. All Dial. Eng.*
nat'tle (năt'l), *v. i.* [Imitative.] To make a slight broken noise, as of rattling. *Dial. Eng.*
nat'ty (-ĭ), *n.* The dues paid by a member to a trade union; — called also *natty-box*. *Dial. Eng.*
Nat'ty Bump'po (bŭm'pō). See LEATHERSTOCKING.
natty money. Natty; also, an allowance to a member by a trade union. *Dial. Eng.*
‖ **na-tu'ra** (nȧ-tū'rä); *n.* [L.] Nature.
‖ **na-tu'ra ab-hor'ret a va'cu-o** (vā'kŭ-ō). [L.] Nature abhors a vacuum.
‖ **na-tu'ra il fe'ce e poi rup'pe la stam'pa** (nä-tōo'rä ēl fā'chā ā poi rōō'pā lä stäm'pä). [It.] Nature made him [a certain duke], and then broke the mold. *Ariosto* (*Orlando Furioso* X. 84).
nat'u-ral-born', *a.* Having a (certain) status or character by birth; as, *natural-born* citizens; a *natural-born* coward.
na'tu-ral-esque' (nă'tŭ-răl-ĕsk'), *a.* [*natural* + *-esque.*] Conforming closely to the natural details of objects represented; faithfully imitating or representing nature; as, *naturalesque* designs of birds or of ferns or flowers.
‖ **na'tu-ra'li-a** (nă'tŭ-rā'lĭ-ȧ), *n. pl.* [NL., neut pl.] **1.** See JURISTIC ACT. **2.** The genital organs.
na'tu-ra'lis pos-sez'si-o (-rā'lĭs pŏ-sĕsh'ĭ-ō). [L.] *Rom. Law.* See DETENTION, 4, *Cit.*
nat'u-ral-ist, *a.* Naturalistic.

2. An adherent of naturalism in religion or philosophy.
3. One who practices or teaches naturalism in art; specif., a painter who is assumed to care more for the study of external nature than for sentiment. Various groups of painters have been called **the naturalists**, the name being often changed because the tendency which passes for naturalism at one time is not so classed at others.

nat'u-ral-is'tic (năt'ū-răl-ĭs'tĭk), *a.* **1.** Pertaining to, or closely resembling or reproducing, nature; natural; realistic. "*Naturalistic* bit of pantomime." *W. D. Howells.* **2.** Pertaining to naturalism or to the methods and achievements of naturalists, in various senses.
3. Of or pertaining to natural science or the natural order of things; as, a *naturalistic* sense.

nat'u-ral'i-ty (-răl'ĭ-tĭ), *n.* [L. *naturalitas*; cf. F. *naturalité*.] **1.** Naturalness; accord with nature. *Obs. or R.*
2. Natural feeling or behavior. *Obs. or Scot.*
3. A fact or phenomenon of nature. *Obs. or R.*
4. The status of a natural-born subject or citizen. *Obs.*

nat'u-ral-i-za'tion (-răl-ĭ-zā'shŭn; -ī-zā'shŭn), *n.* [Cf. F. *naturalisation*.] Act or process of naturalizing, or state of being naturalized. The naturalization of resident aliens in a country is now general among Christian nations. Cf. ALLEGIANCE, 2.

nat'u-ral-ize (năt'ū-răl-īz), *v. t.*; NAT'U-RAL-IZED (-īzd); NAT'U-RAL-IZ'ING (-īz'ĭng). [Cf. F. *naturaliser*. See NATURAL.] **1.** To render familiar by custom and habit; as, custom *naturalizes* labor or study; also, to familiarize or accustom; as, to *naturalize* one to work. *Obs. or R.*
2. To confer the rights and privileges of a native subject or citizen on; to make as if native; to adopt (as an alien) into a state and place in the condition of a native subject or citizen. One who is naturalized renounces his former allegiance and assumes a new allegiance (which see).
3. To receive or adopt as native, natural, or vernacular; to make one's own; as, to *naturalize* foreign words.
4. To adapt and cause to grow as under natural conditions; to acclimate; as, to *naturalize* a fruit.
5. To make natural or less artificial; to bring into accord with nature.
6. To treat as natural as opposed to supernatural; to place on a natural basis; as, to *naturalize* so-called miracles

nat'u-ral-ize, *v. i.* **1.** To become as if native.
2. To explain phenomena by natural facts, agencies, or laws, to the exclusion of the supernatural.
Infected by this *naturalizing* tendency. *H. Bushnell*
3. To be, or act as, a naturalist.

nat'u-ral-ly, *adv.* **1.** By nature; by natural, native, or inherent character, condition, endowment, etc.
A woman, *naturally* born to fears. *Shak.*
2. Spontaneously; without cultivation or use of art or effort; as, her hair curls *naturally*; figs grow here *naturally*.
3. According to the laws of nature or the usual course of things; as might be expected; as a natural result; as, pain *naturally* weakens one; he *naturally* shrank from pain.
Poverty *naturally* begets dependence. *Goldsmith.*
4. In physical nature; physically. *Obs.*
5. With truth to nature or life; in a lifelike manner; as, a *naturally* painted landscape.

nat'u-ral-ness, *n.* **1.** Natural feeling or conduct. *Obs.*
2. State or quality of being natural, or in accordance with, or conformity to, nature.
3. Spontaneity; lack of affectation or artificiality; as, the *naturalness* of her speech and manner.

na'ture (nā'tūr), *n.* [F., fr. L. *natura*, fr. *natus* born, produced, p. p. of *nasci* to be born. See NATION.] **1.** Birth; origin. In James iii. 6, translating the Greek γένεσις.
2. That which is the source or essence of life; creative force; the sum and order of causes and effects in time and space; the powers which produce existing phenomena, whether in the total or in detail; the agencies which carry on the processes of creation or of being, often conceived of as a single and separate entity, embodying the total of all finite agencies and forces as disconnected from a creating or ordering intelligence. In a metaphysical sense, the source or essence of the life of the universe; what appears and acts as forces, energies, laws.
So priketh hem *nature* in hir corages. *Chaucer.*
What *nature* hath set in hir lawe
That mai no mannes miht withdrawe. *Gower.*
3. That which is produced by natural forces; the existing system of things in time and space; the world of matter, or of matter and mind; creation; the universe. The conception of *nature* (Gr. φύσις; L. *natura*) has been confused by the mingling of three chief meanings adopted with the word into English, viz.: (1) Creative or vital force; = def. 2. (2) Created being in its essential character; kind, sort; = def. 5. (3) Creation as a whole, esp. the physical universe; = def. 3. The main ambiguity is between *nature* as active or creative and *nature* as passive or created. In the original animistic and realistic conception prevailed; but Plato sharply distinguished the passive material from the active formal element, and Aristotle continued the distinction in the conception of a moving cause, or God, as separate from the moved physical universe, or Nature. This antithesis of the moving cause and its effect is all but obliterated in pantheistic and naturalistic views. It appears in the pantheism of Spinoza, but the distinction of *natura naturans* and *natura naturata* serves only to discriminate two elements or aspects of the one organic being or substance. The two elements, in the forms of matter and energy, are retained in the modern physical or mechanical view, wherein nature appears as a material universe acting according to rules, but to all intents independent of God or purposive cause. Nevertheless, the derivation and associations of the word prove a fruitful source of ambiguity, often conveying a deceptive implication of that animistic or zooidal view which still appears in the popular and poetic conception of *nature* as merely *animate nature*, i. e., as the world of plants and animals (cf. NATURALIST). Cf. PHYSICAL.
The natural mechanism which he [the naturalist] calls *Nature* would rank not as the profoundest reality there is to know; it would rather become — what indeed "machine" primarily connotes — an instrumentality subservient to the "occasions" of the living world of ends; and so regarded, it would cease to be merely calculable, and would be found intelligible as well.
James Ward (Encyc. Brit.).
4. With various reference to generation or propagation: **a** Seed; germ or germinal agency. *Obs.* **b** The female pudendum. *Obs.* **c** Created forces or beings. *Obs. or Archaic.*
God commandeth the *natures*
That thei to him obeien alle. *Gower.*
d Cause; occasion. *Obs.*
The *nature* of his great offense is dead. *Shak.*
5. Kind; species; sort; character; quality. *Chaucer.*
A dispute of this *nature* caused mischief. *Dryden*
6. Natural endowment or essential character; as: **a** Natural impulse or action; instinct or native constitution; intrinsic or inborn character; as, human *nature*.
Nature techeth me the weie of love. *Gower*
One touch of *nature* makes the whole world kin. *Shak.*
b The sum of qualities and attributes which make a person or thing what it is, as distinct from others; essential or individual character, constitution, or quality of being.
Some particular properties of a thing are selected, more or less arbitrarily, to be termed its *nature* or essence; and when this has been done, these properties are supposed to be invested with a kind of indefeasibleness, to have become paramount to all the other properties of the thing. *J. S. Mill*
c Constitution or quality of mind or character.
That reverence which is due to a superior *nature*. *Addison*
7. Physical constitution or existence; the vital powers; the natural life. "Oppressed *nature* sleeps." *Shak.*
8. **a** The primitive condition or character of living beings; the wild uncultivated state; that condition which is distinguished from domestication, society, or civilization; as, a state of *nature*. **b** Hence, a natural or normal life; a primitive or unsophisticated state considered as the healthy ideal; as in the phrase "back to *nature*." **c** *Theol.* The state of the unregenerate soul.
9. That which accords with nature; as: **a** Naturalness; spontaneity; freedom from artificiality or studied effect.
O'erstep not the modesty of *nature*. *Shak.*
b Natural affection or reverence. **c** Natural operation; established, usual, or regular course of events; connection of cause and effect.

na'tured (nā'tūrd), *a.* Having (such) a nature, temper, or disposition; — chiefly in comb.; as, good-*natured*, ill-*natured*.

nature deity. A deification of some natural force or phenomenon; as, Thor is a *nature deity*.

nature myth. A myth which explains or allegorizes natural phenomena.

nature printing. A process of printing from metallic or other plates which have received an impression, as by heavy pressure, of an object such as a leaf, lace, or the like.

nature spirit. A spirit regarded as the life or soul of any natural object (see ANIMISM); — used to distinguish animistic conceptions from conceptions of the supernatural.

nature worship. Worship of the personified powers of nature.

na'tur-ism (nā'tūr-ĭz'm), *n.* **1.** Naturalism. *Rare.*
2. The theory that the earliest religion was nature worship.
3. *Med.* The belief or doctrine that attributes everything to nature as a sanative agent. *Rare.*

na'tur-ist, *n.* A follower of nature; specif., one who believes in, or conforms to, the theory of naturism.

na'tur-is'tic (nā'tūr-ĭs'tĭk), *a.* Like, or pertaining to, naturism. — **na'tur-is'ti-cal-ly** (-tĭ-kăl-ĭ), *adv.*

naught (nôt), *n.* [ME. *naught*, *nought*, *naht*, *nawiht*, AS. *nāwiht*, *nāuht*, *nāht*, *nōwiht*, *nōht*; *ne* not + *ā* ever + *wiht* thing, whit; hence, not ever a whit. See NO, *adv.*, WHIT; cf. AUGHT, NOT.] **1.** Nothing; nought.
Doth Job fear God for *naught*? *Job* i 9
2. Wickedness; wrong; evil; hence, that which is wrong, wicked, or faulty. *Obs.* *Shak.*
3. The arithmetical character 0; a cipher. See CIPHER, *n.*, 1.
4. A wicked or bad person. *Obs. or R.*
to be naught, to go away or be still; to subside; — usually in mild imprecations equiv. to "be hanged to you." *Obs.*
"Marry, sir, be better employed and *be naught* awhile." *Shak.* — **to call,** *or* **speak, all to n.,** to abuse vigorously. *Obs.*

naught, *a.* **1.** Of no account; worthless; bad; useless.
It is *naught*, it is *naught*, saith the buyer. *Prov.* xx 14.
2. In *Obs.* senses: **a** Hence, vile; base; **naughty.** **b** Hurtful; bad; unfit. **c** Ruined; wrecked; lost.
Go, get you to your house; begone, away!
All will be *naught* else. *Shak.*

naught, *adv.* **1.** Not; not at all. *Obs.* *Chaucer.*
2. Badly; wrongly. *Obs.* *Oxf. E. D.*

naugh'ti-ly (nô'tĭ-lĭ), *adv.* In a naughty manner; specif.: **a** Wickedly; perversely. *Obs. Shak.* **b** Poorly; badly. *Obs.* **c** Misbehavingly; as, a child behaves *naughtily*.

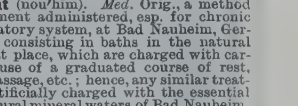
naugh'ti-ness, *n.* Quality or state of being naughty; specif.: **a** Wickedness; depravity; perverseness. *Obs.* **b** Badness; faultiness. *Obs.* **c** Misbehavior; as, the *naughtiness* of a child.

naugh'ty (nô'tĭ), *a.*; NAUGH'TI-ER (-tĭ-ẽr); NAUGH'TI-EST.
1. Having nothing; destitute. *Obs.*
[Men] that needy be and *naughty*. *Piers Plowman.*
2. Worthless; bad; disagreeable; unhealthy. *Obs.*
The other basket had very *naughty* figs. *Jer.* xxiv. 2.
3. Wicked; morally bad; wrong. *Archaic or Euphemistic.*
So shines a good deed in a *naughty* world. *Shak.*
4. Mischievous; wayward; guilty of disobedience or misbehavior; as, a *naughty* child. *Rare, exc.* as applied to children, or in sportive censure.
5. Insignificant. *Obs. or R.* *Oxf. E. D.*
Syn. — See BAD.
naughty pack, a person of bad character; esp., a loose woman. Written also **naugh'ty-pack'**, **naugh'ti-pack'**.

Nau'heim treat'ment (nou'hĭm). *Med.* Orig., a method of therapeutic treatment administered, esp. for chronic diseases of the circulatory system, at Bad Nauheim, Germany, by G. Schott, consisting in baths in the natural mineral waters of that place, which are charged with carbonic acid, and the use of a graduated course of rest, physical exercises, massage, etc.; hence, any similar treatment using waters artificially charged with the essential ingredients of the natural mineral waters of Bad Nauheim. Hence, **Nauheim bath,** etc.

nau-ma'chi-a (nô-mā'kĭ-ă), *n.*; *pl.* L. **-CHIÆ** (-ē), E. **-CHIAS** (-ăz). [L. *naumachia*, Gr. ναυμαχία; ναῦς ship + μάχη fight, battle.] *Rom. Antiq.* **a** A mock sea fight or a spectacle representing a naval battle. **b** A place for such exhibitions, usually a body of water, commonly artificial, surrounded by seats, or in an amphitheater.

nau'pli-us (nô'plĭ-ŭs), *n.*; *pl.* **-PLII** (-ī). [L., a kind of shellfish.] *Zoöl.* In many crustaceans, a larval form (usually the first stage after leaving the egg) with three pairs of appendages (corresponding to antennules, antennæ, and mandibles), a median eye, and little or no segmentation of the body. — **nau'pli-al** (-ăl), **nau'pli-i-form'** (-ĭ-fôrm'), **nau'pli-oid** (-oid), *a.*



a Nauplius of a Phyllopod (*Artemia*); *b* Nauplius of a Barnacle

nau'se-a (nô'shē-ă; -sē-ă), *n.* [L., fr. Gr. *ναυσία*, fr. *ναῦς* ship. See NAVE of a church.] **1.** Seasickness, hence, any sickness of the stomach with a desire to vomit; qualm; a feeling of distress associated with loathing of food.
2. Fig.: Extreme disgust; loathing.

nau'se-ant (-ănt), *a.* [L. *nauseans*, p. pr. of *nauseare*.] *Med.* Producing nausea; nauseating. — **n.** A substance which produces nausea.

nau'se-ate (-āt), *v. i.*; NAU'SE-AT'ED (-āt'ĕd); NAU'SE-AT'ING (-āt'ĭng). [L. *nauseare*, *nauseatum*, fr. *nausea*. See NAUSEA.] To become affected with nausea; to feel disgust.

nau'se-ate, *v. t.* **1.** To sicken at; to loathe.
The patient *nauseates* and loathes wholesome foods. *Blackmore*
2. To affect with nausea; to sicken; to cause to feel loathing or disgust; as, the stench *nauseated* him.

nau'se-a'tion (-ā'shŭn), *n.* Act of nauseating, or state of being nauseated.

nau'seous (nô'shŭs; -shē-ŭs; 277), *a.* [L. *nauseosus*.] **1.** Feeling nausea; inclined to nausea; squeamish. *Obs.*
2. Causing, or fitted to cause, nausea; sickening; loathsome; disgusting; exciting abhorrence; as, a *nauseous* drug or odor; *nauseous* hypocrisy. — **nau'seous-ly,** *adv.*

nau'seous-ness, *n.* **1.** Nausea; extreme loathing. *Obs.*
2. Quality of being nauseous. "The *nauseousness* of such company disgusts a reasonable man." *Dryden.*

Nau-sic'a-a (nô-sĭk'ā-ă; nou-), *n.* [L., fr. Gr. Ναυσικάα.] In the Odyssey, the daughter of Alcinous, king of the Phæacians, who found Ulysses on the shore where he had been shipwrecked, and led him to her father's court.

naut (nôt), *n.* [Prob. for *knot*, confused with *nautical* mile.] A sea mile of 2,029 yards, used as a measure for submarine cables. *Australia.*

nautch (nŏch), *n.* [Hind. *nāch*, fr. Skr. *nṛtya* dance.] An entertainment consisting chiefly of dancing by professional dancing (or nautch) girls. *India.*

nau'ti-cal (nô'tĭ-kăl), *a.* [L. *nauticus*, Gr. ναυτικός, fr. ναύτης a seaman, sailor, fr. ναῦς ship: cf. F. *nautique* See NAVE of a church.] Of or pertaining to seamen, navigation, or ships; as, *nautical* skill.
Syn. — Marine, maritime. See NAVAL.
Nautical Almanac (American), a mathematical publication prepared at the Naval Observatory in Washington and issued by the Bureau of Equipment. It contains tables of the position of various heavenly bodies at stated times, and other information, for the use of navigators, geodesists, and astronomers. It is issued several years in advance. Nau'ti-loi'de-a (nô'tĭ-loi'dē-ȧ), *n. pl.* [NL. See NAUTILUS; -OID.] *Paleon. & Zoöl.* An order of tetrabranchiate cephalopods having an external chambered shell, either straight (as in the genus *Orthoceras*) or variously curved or coiled, distinguished from the Ammonoidea by the straight or undulated, rarely acutely angulate, margins of the septa between the chambers, and by a scar or cicatrix on the initial chamber, supposed to indicate the point of attachment of an embryonal shell. The group was an important one in the Ordovician, but reached its greatest development in the Silurian. It then declined, until now it is represented only by the genus *Nautilus*. — **nau'ti-loid** (nô'tĭ-loid), **nau'ti-loi'de-an** (-loi'dē-ăn), *a. & n.*

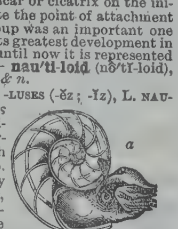
nau'ti-lus (nô'tĭ-lŭs), *n.* ; *pl.* E. -LUSES (-ŏz ; -Iz), L. NAUTILI (-tĭ-lī). [L., fr. Gr. *ναυτίλος* a seaman, sailor, a kind of shell-fish which was supposed to be furnished with a membrane which served as a sail, fr. *ναῦς* ship. See NAVE of a church.] **1.** a Any species of the genus *Nautilus*, remarkable as the only surviving genus of tetrabranchiate cephalopods (see TETRABRANCHIATA). Three or four species exist, inhabiting the South Pacific and Indian oceans. They have an external symmetrical, more or less closely involute, spiral, chambered shell formed of two layers, the outer being porcellaneous, the inner pearly, whence the name pearly nautilus, popularly applied to distinguish them from the paper nautilus (see ARGONAUTA). The animal, which is contained in the outer chamber, has numerous small tentacles arranged in groups, without suckers or hooks, no ink sac, four gills and four auricles, four nephridia, and the siphon consisting of two lobes, not fused to form a tube. The species live chiefly in moderately deep water. b [*cap.*] *Zoöl.* The genus containing the above species, and fossil forms, some dating back to the Tertiary. Formerly used in wider senses ; by Linnæus as including all the cephalopods now placed in the Tetrabranchiata, and certain Foraminifera.



Pearly Nautilus. *a* Section of Animal and Shell; *b* Shell, side view.

2. The paper nautilus. See ARGONAUTA.

3. A variety of diving bell, the lateral as well as vertical motions of which are controlled by the occupants.

Nav'a-ho, Nav'a-jo (nȧv'ȧ-hō), *n. ; pl.* -HOS, -JOS (-hōz), or -HOES, -JOES (-hōz). One of an important and numerous tribe of Athapascan Indians living as seminomadic herdsmen on a large reservation in Arizona, New Mexico, and Utah. Their silversmith work and blankets are famous.

na'val (nā'vȧl), *a.* [L. *navalis*, fr. *navis* ship : cf. F. *naval*. See NAVE of a church.] **1.** Of or pertaining to ships or shipping. *Obs. or R.*

2. Of, pertaining to, connected with, possessing, or characteristic of, vessels of war or a navy ; as, *naval* forces ; *naval* victories ; a first-class *naval* power ; *naval* stores.

Syn. — NAVAL, NAUTICAL. NAVAL designates that which pertains to a navy, or (now rarely) to ships and shipping in general ; NAUTICAL applies to seamen or to the art of navigation ; as, a *naval* engagement, a *naval* officer, the *Naval* Academy, *naval* discipline, *naval* stores ; a *nautical* almanac, *nautical* tables, *nautical* slang. See MARINE.

naval architect, one who practices the art of designing ships, esp. vessels of war. Hence, **n. architecture.** — **n. auxiliary**, in the United States navy, a vessel auxiliary to the fighting vessels, as a collier, supply vessel, etc. — **n. brass**, brass composed usually of copper 62, zinc 37, tin 1, used in shipbuilding for bolts, etc., used under water. It does not deteriorate in sea water. — **n. brigade.** a A body of seamen composed of several battalions organized for military service on land. b A militia organization trained for naval service maintained by many of the seaboard and lake States ; — called also *naval militia* and *naval reserves*. — **n. cadet**, a young man in training for service as a naval officer. In the United States, from 1882 to 1902, the name was given to a midshipman (which see). — **n. constructor**, in the United States navy, a member of a corps of officers having in charge the designing, construction, and repairing of the hulls of war vessels and their fittings, exclusive of propulsive machinery, and the installation of all armor and ordnance. The corps is composed generally of honor graduates of the Naval Academy who have received supplementary technical education. — **n. crown**, a golden crown consisting of galley prows and sails arranged alternately in a circle to form the rim, invented by the Roman Emperor Claudius as a reward for sea service. Hence, a heraldic charge depicting a crown of gold with ship sterns and square sails arranged alternately on the fillet. — **n. militia.** See NAVAL BRIGADE. — **n. officer.** a An officer in a navy. b In the United States, an official of the Treasury Department attached to the customhouses at the larger ports, who receives copies of all manifests and entries ; countersigns permits, clearances, and other documents ; with the collector estimates the duties on merchandise ; examines and certifies the collector's accounts, etc. — **n. pipe.** *Naut.* = CHAIN PIPE. — **n. reserve**, an organization comprising organized and trained bodies of volunteers, individual seamen in the mercantile marine, and, sometimes, mercantile vessels, which can be called upon to strengthen the regular navy in time of war. In Great Britain the vessels of the Royal Naval Reserve fly the blue ensign (see ENSIGN). See NAVAL BRIGADE b. — **n. square**, a diagram with arms at right angles marked on a ship's deck by which the bearings of objects may be easily determined. — **n. station**, a place where vessels of a navy can obtain coal, provisions, supplies, and, usually, minor repairs. — **n. stores.** a Supplies for vessels, esp. war vessels. b Tar, pitch, turpentine, and other resinous products. *Commercial Cant.*

na'val-ism (nā'vȧl-Iz'm), *n.* The policy or practice of maintaining the interests of the navy.

Na'var-rese' (nȧ'vär-rēz' ; -rēs' ; nȧv'ȧ-), *a.* Of or pert. to Navarre, a former kingdom of the western Pyrenees and adjacent parts of Spain and France, the nucleus of which was the Basque population of this region. Its history begins about 858 ; in 1512 Ferdinand of Aragon conquered the part south of the Pyrenees ; in 1607 the northern part was united to France. — *n. sing. & pl.* A native or inhabitant of Navarre.

NAVEL.] **1.** The block in the center of a wheel, from which the spokes radiate, and in which the axle is fixed ; the hub.

2. The navel. *Obs. & R.* *Shak.*

nave (nāv), *n.* [L. *navis* ship, to which the church was often likened ; akin to Gr. *ναῦς*, Skr. *nāus*, OIr. *nau*. Cf. NAUSEA, NAUTICAL, NAVAL.] **a** In the dromic or basilican churches, and their successors the cruciform churches, the long and relatively narrow hall which rises higher than the aisles flanking it, and which usually has windows on each side above the aisle roof (see CLERESTORY). This is the typical nave, and a great cathedral has such a hall in the choir and transept, as well as in the part between the crossing and the principal doorway (see def. **c**), although the term is often restricted to this latter hall. See *Illusts.* under ARCHITECTURE and CATHEDRAL. **b** Hence : Any higher division rising above lower roofs of the same building, as in a warehouse or in a car shed, especially if lighted by clerestory windows. **c** That part of a church which anciently was first entered from the atrium or from the narthex, and was usually, therefore, the western great division of the church, occupying about three fourths of the whole roofed space and including the high nave (sense **a**) and two or four aisles. In cruciform churches, the part between the *crossing* and the western, or greater, porch.

na'vel (nā'vl), *n.* [AS. *nafela* ; akin to D. *navel*, G. *nabel*, OHG. *nabolo*, Icel. *nafli*, Dan. *navle*, Sw. *nafle*, OIr. *imbliu*, L. *umbilicus*, Gr. *ὀμφαλός*, Skr. *nābhila*, and to E. *nave* hub. See NAVE hub ; cf. OMPHALIC, NOMBRIL, UMBILICAL.] **1.** A mark or depression in the middle of the abdomen, marking the point of attachment of the umbilical cord ; the umbilicus.

2. The central part or point of anything ; the middle.

Within the *navel* of this hideous wood. *Milton.*

3. Hence : a *Ordnance.* An eye on the under side of an old-time carronade for securing it to a carriage. b The middle of a horse's back. *Obs.* c The nave of a wheel. *Obs.* d *Her.* See ESCUTCHEON, 1.

navel gall. A bruise on the top of the chine of the back of a horse, behind the saddle.

navel orange. A type of orange in which the fruit incloses a small secondary fruit, the rind showing on the exterior a navel-like pit or depression at the apex. There are several varieties ; they are usually seedless, or nearly so, and are much grown in California.

na'vel-wort' (nā'vl-wûrt'), *n.* a A European succulent crassulaceous herb (*Cotyledon umbilicus*), having round, peltate leaves with a central depression. b Any boraginaceous plant of the genus *Omphalodes*.

na-vic'u-la (nȧ-vĭk'ū-lȧ), *n. ; pl.* -LÆ (-lē). [L., a small ship.] **1.** *Eccl.* A boat-shaped vessel for holding incense. **2.** [*cap.*] *Bot.* A genus of diatoms having a lanceolate or oblong free frustule covered with minute striæ.

na-vic'u-lar (nȧ-vĭk'ū-lär), *a.* [L. *navicularius*, fr. *navicula*, dim. of *navis* ship : cf. F. *naviculaire*.] **1.** Of, pertaining to, or resembling, a boat or ship.

2. Shaped like a boat ; cymbiform ; scaphoid.

3. *Bot.* Resembling the genus *Navicula*.

navicular bone. a *Anat.* The scaphoid bone of either the carpus or tarsus. b *Far.* A large, transversely extended sesamoid bone behind the joint between the coronary and coffin bone in the foot of the horse. — **n. disease**, *Far.*, inflammation of the navicular bone, and usually also of the tendon passing under it and of its bursa. It affects chiefly the fore feet.

nav'i-ga-bil'i-ty (nȧv'ĭ-gȧ-bĭl'ĭ-tĭ), *n.* Quality or fact of being navigable ; navigableness.

nav'i-ga-ble (nȧv'ĭ-gȧ-b'l), *a.* [L. *navigabilis* : cf. F. *navigable*. See NAVIGATE.] **1.** Capable of being navigated ; deep enough and wide enough to afford passage to vessels ; as, a *navigable* river. In the United States, for the purpose of defining the rights of ownership, some States have adopted the common-law test of flow of the tide, others that of actual navigability. For determining the right of the public to the use of a body of water as a public highway, however, the test in the United States is as to whether the water is navigable in fact or not. Technically, at the common law of England only those waters, whether rivers or not, are called *navigable* that ebb and flow with the tide, the bed of all navigable waters belonging to the crown and the right of traffic, fishing, etc., to the public ; but the public have no common-law right to rivers and streams above the ebb and flow. By prescription, or act of Parliament, however, the larger and more important rivers have been opened to public navigation.

Those rivers must be regarded as public *navigable* rivers in law which are *navigable* in fact. And they are *navigable* in fact when they are used, or are susceptible of being used, in their ordinary condition as highways for commerce, over which trade and travel are or may be conducted in the customary modes of trade and travel on water. 10 *Wall.* 557, 563

Nor is it every small creek, in which a fishing skiff or gunning canoe can be made to float, at high water, which is deemed *navigable*. But in order to have this character, it must be *navigable* to some purpose, useful to trade or agriculture. It is not a mere possibility of being used under some circumstances, as at extraordinary high tides, which will give it the character of a *navigable* stream, but it must be generally and commonly useful to some purpose of trade or agriculture. 21 *Pickering* (*Mass.*) 344, 347.

2. Capable of being navigated or steered, as a balloon.

3. a Capable of being reached by navigable water ; as, a *navigable* town. *Obs.* b Nautical ; maritime. *Obs.*

See NAVE of a church ; AGENT.] To journey by water ; to go in a vessel ; to sail or manage a vessel ; to use the waters as a highway or channel for commerce or communication.

The Phœnicians *navigated* to the extremities of the Western Ocean. *Arbuthnot.*

nav'i-gate, *v. t.* **1.** To pass over in vessels ; to sail over or on ; as, to *navigate* the Atlantic ; — said also of vessels.

2. To steer, direct, or manage in sailing ; to conduct (a vessel) upon the water by the art or skill of seamen.

nav'i-ga'tion (-gā'shŭn), *n.* [L. *navigatio* : cf. F. *navigation*.] **1.** Act of navigating.

2. a The science or art of conducting ships or other vessels on the water from one place to another, including, more especially, the method of determining a ship's position, course, distance passed over, etc., on the surface of the globe, by the principles of geometry and astronomy, including also reference to landmarks. b The management of sails, rudder, etc. ; the mechanics of traveling by water ; seamanship.

3. Hence : a A voyage by water. *Obs. or R.* b Ships in general ; shipping ; also, maritime commerce. *Obs. or R. Shak.* c A navigable passage. *Obs. & R.* d An artificial waterway or inland channel or canal. *Obs. or Dial. Eng.*

navigation act *or* **law.** An act regulating navigation or shipping ; specif. [*cap.*] : *Eng. Hist.* Any of a series of acts of Parliament, beginning with 1645, having for their objects the protection of the shipping of Great Britain and her colonies, the injuring of the commerce of the Dutch, and the exploiting of the commerce of the English colonies for the benefit of the home country. They and other navigation laws largely failed of their objects, and were finally repealed in 1849.

nav'i-ga'tion-al (-shĭ), *a.* Of, pert. to, or used in, navigation.

nav'i-ga'tor (nȧv'ĭ-gā'tẽr), *n.* [L. Cf. NAVVY.] **1.** One who navigates or sails ; esp., one who directs the course of a ship, or one skilful in the art of navigation ; specif., on war vessels, an officer who is, while holding the position, particularly charged with the navigation of the ship ; also, a book which teaches the art of navigation, as, Bowditch's *Navigator*. In the United States navy the navigator is usually the officer third in command.

2. A laborer engaged in digging, etc., on a canal, or navigation (see NAVIGATION, 3 d), or, later, in any similar earthwork ; — now generally abbreviated to *navvy*. *Eng.*

na'vi-pen'du-lum (nā'vĭ-pĕn'dū-lŭm), *n.* [L. *navis* ship + *pendulum*.] *Naval Arch.* A pendular device such that when it is actuated by an apparatus producing on it the same effect as actual waves on a ship, it will move similarly to a ship having a given form of hull, disposition of weights, etc. It is used esp. with a view to reduce rolling in designing battleships. — **na'vi-pen'du-lar** (-lär), *a.*

nav'vy (nȧv'vĭ), *n. ; pl.* NAVVIES (-Iz). [Abbr. fr. *navigator*.] **1.** A laborer on canals, railroads, embankments, etc. ; a navigator (see NAVIGATOR, 2). *Eng.*

2. A machine for excavating earth ; — more commonly called *steam excavator* or *steam navvy*.

na'vy (nā'vĭ), *n. ; pl.* NAVIES (-vĭz). [OF. *navie* ship, fleet, a derivative fr. L. *navis* ship. See NAVE of a church.] **1.** A fleet of ships ; an assemblage of vessels, or so many as sail in company ; also, *Obs.*, a ship. "The *navy* also of Hiram, that brought gold from Ophir." 1 *Kings* x. 11.

2. The war vessels belonging to a nation, considered collectively ; as, the *navy* of Italy ; also, rarely, the merchant vessels of a nation collectively. Until about the middle of the 19th century the principal classes of war vessels were ships of the line, frigates, and gun vessels. To these correspond the modern battleships, cruisers, and gunboats. The torpedo craft are a new development. The different modern types of ships are briefly as follows : **Battleships** : Heavy armor on the sides, turrets, etc., and lighter armor elsewhere ; heavy guns in turrets and lighter guns in broadside and elsewhere ; moderate speed ; from 10,000 to more than 20,000 tons displacement. **Armored cruisers** : Moderate armor on turrets and sides ; armored protective deck ; numerous guns of medium caliber ; high speed and large coal capacity ; large displacement (from 8,000 to 16,000 or more tons). **Protected cruisers** : Light armor on turrets, etc., only ; protective deck ; numerous guns ; good speed ; varying displacement (third-class 1,500–4,000 tons, second-class 3,000–8,000, and first-class all above second). **Partially protected cruisers** differ in having protective deck over vital parts only ; **unprotected cruisers** have only a water-tight deck. **Gunboats** : A water-tight deck ; small number of guns ; fair speed and good coal capacity ; less than 2,000 tons displacement. **Torpedo boats** and **torpedo-boat destroyers** : No protection ; very high speed ; small displacement. The first torpedo boats were armed only with torpedoes, and to meet them were built the destroyers, — larger, faster, and armed with quick-firing guns. But the value of the destroyer as a torpedo boat was soon realized, and it has usurped in part the functions of the torpedo boat proper. **Monitors** (which see) constitute a special type used only in coast defense. **Sloops** are vessels of the size of gunboats or larger, fitted with sails as well as steam. There are also in most modern navies submarines. See SUBMARINE.

neat'en, *v. t. & i.* To make neat; esp., *Sewing*, to finish carefully.

the word: TIDY often implies habitual neatness; as, "He was remarkably *neat* in his dress; . . . his hat was always brushed, his shoes glossy, his wig nicely curled, and his stockings without a wrinkle" (*Johnson*); "a home . . . *neat* and nestlike" (*Tennyson*); "*neat*-handed Phyllis" (*Milton*); *neat* workmanship; to keep a room *tidy*. TRIM adds the implication of spruceness or smartness, often of smugness or compactness; PRIM suggests formality, or (often) affected nicety or precision; as, "*trim* gallants" (*Shak.*); "meadows *trim*" (*Milton*); "The sward was *trim* as any garden lawn" (*Tennyson*); "*Prim* little scholars are the flowers in her garden, trained to stand in rows, and asking if they please" (*G. Meredith*); "*Prim* is her gown, and Quakerlike her shawl" (*W. E. Henley*); "If one of our boys now wrote such a letter, we should call it *prim*, if not priggish" (*M. Arnold*); "Huxley . . . was never starched or *prim*" (*J. Fiske*). See FINICAL, NICE, CORRECT, PRECISION, SNUG.

neat line, *Civil Engin.*, a line to which work is to conform.

[L., mist, vapor, cloud; akin to Gr. *νεφέλη*, *νέφος*, cloud, mist, G. *nebel* mist, OHG. *nebul*, D. *nevel*, OIr. *nēl* cloud, Skr. *nabhas* cloud, mist.] **1.** *Astron.* A faint, cloudlike, self-luminous mass of attenuated matter situated far outside the solar system, at the distance of the stars. True nebulæ are gaseous; but very distant star clusters sometimes appear like nebulæ in the telescope. Certain nebulæ are called, from their appearance, *annular*, *cometary*, *lagoon*, *spiral*, *stellar*, etc.

2. *Med.* **a** A white spot or a slight opacity of the cornea. **b** A cloudy appearance in the urine. *Obs.*

nebula of Andromeda, *Astron.*, an object visible to the naked eye in the girdle of Andromeda. It is spiral in form, and in it a new, or temporary, star appeared in 1885. — **n. of Lyra**, *Astron.*, an annular, or ring-shaped, nebula in the constellation Lyra, not visible without a telescope. — **n. of Orion**, *Astron.*, an object visible to the naked eye in the sword hilt of Orion. It is the largest of all the nebulæ, and exhibits a vast amount of irregular luminosity.

neb'u-lar (-lär), *a.* Of or pert. to nebulæ; of the nature of, or resembling, a nebula. — **nebular hypothesis**, a hypothesis to explain the process of formation of the stars and planets, presented in various forms by Kant, Herschel, Laplace, and others. As framed by Laplace, it supposed that matter of the solar system existed originally in the form of a vast, diffused, rotating nebula, which, gradually cooling and contracting, threw off, in obedience to physical laws, successive rings of matter, from which subsequently, by the same laws, were produced the several planets, satellites, and other bodies of the system. The phrase may indicate any hypothesis according to which the stars or the bodies of the solar system have been evolved from a widely diffused nebulous form of matter. Belief in the popularly accepted form of the nebular hypothesis has been shaken by the studies of Chamberlin and Moulton. See PLANETESIMAL HYPOTHESIS.

neb'u-lé (nĕb′ū-lē) } *a.* [F. *nébulé*.] **1.** *Her.* Composed
neb'u-ly (nĕb′ū-lĭ) } of successive short curves supposed to resemble a cloud; — said of a heraldic line by which an ordinary or subordinary may be bounded, or of the ordinary or subordinary.

2. *Arch.* Designating a molding consisting of an overhanging band the lower projecting edge of which conforms in shape to a continuous undulating curve.

ne-bu'li-um (nē-bū′lĭ-ŭm), *n.* [NL., fr. *nebula*.] *Astronomical Chem.* A certain chemical element whose existence in nebulæ is inferred from two characteristic green lines in their spectra. It has not been identified terrestrially.

neb'u-lize (nĕb′ū-līz), *v. t.*; -LIZED (-līzd); -LIZ'ING (-līz′ĭng). [See NEBULA.] To reduce to a fine spray or vapor; to atomize. — **neb'u-li-za'tion** (-lĭ-zā′shŭn; -lī-zā′-), *n.*

neb'u-liz'er (-līz′ẽr), *n.* An atomizer.

neb'u-lose (-lōs), *a.* Nebulous; cloudy; nebulated.

neb'u-los'i-ty (-lŏs′ĭ-tĭ), *n.*; *pl.* -TIES (-tĭz). [L. *nebulositas*: cf. F. *nébulosité*.] **1.** State or quality of being nebulous; cloudiness; nebulousness, or something nebulous.
The *nebulosity* . . . of the mother idiom. *I. Disraeli*

2. Nebulous matter; a nebula.

neb'u-lous (nĕb′ū-lŭs), *a.* [L. *nebulosus*: cf. F. *nébuleux*. See NEBULA.] **1.** Cloudy; hazy; misty; — often fig.; as, he had a *nebulous* perception of the truth.

2. *Astron.* Of, pertaining to, or having the appearance of, a nebula; nebular; cloudlike.

3. Resembling clouds.

4. Clouded; not transparent.

nebulous cluster, *Astron.*, a cluster of stars so remote, and of so many stars, that it presents a hazy shape and appearance. — **n. star**, *Astron.*, a small and fairly well-defined circular nebula, having a bright stellar nucleus.

— **neb'u-lous-ly**, *adv.* — **neb'u-lous-ness**, *n.*

nec'es-sa'ri-an (nĕs′ē-sā′rĭ-ăn; 115), *n.* [Cf. F. *nécessarien*.] A necessitarian. — *a.* Of or pert. to necessitarianism.

nec'es-sa'ri-an-ism (-ĭz'm), *n.* Necessitarianism.

nec'es-sa-ri-ly (nĕs′ē-sā-rĭ-lĭ), *adv.* In a necessary manner; by or of necessity; as a necessary consequence.

nec'es-sa-ry (-sȧ-rĭ), *a.* [L. *necessarius*, fr. *necesse* unavoidable, necessary; prob. fr. *ne* not, and *cedere* to go away: cf. F. *nécessaire*. Cf. CEDE.] **1.** Impossible to be otherwise, or to be dispensed with, without preventing the attainment of a desired result; indispensable; requisite; essential. "'T is *necessary* he should die." *Shak.*
A certain kind of temper is *necessary* to the pleasure and quiet of our minds. *Tillotson.*

2. Specif., rendering services that are useful or indispensable; — used of persons. *Obs., Archaic, or Dial.*

3. Such as must be; impossible to be otherwise; not to be avoided; inevitable. "Death, a *necessary* end." *Shak.*

4. Acting from necessity or compulsion; involuntary; — opposed to *free*; as, whether man is a *necessary* or a free agent is a question much discussed.

5. Near of kin or closely connected. *Obs.*

Syn. — See NEEDFUL.

necessary house, a privy. *Dial.* — **n. hypothecation**, *Rom. Dutch Law*, a hypothecation arising by operation of law. — **n. proposition**, *Logic*, a proposition which asserts its necessary truth; also, one that compels belief.

nec'es-sa-ry, *n.*; *pl.* -RIES (-rĭz). **1.** A thing that is necessary or indispensable to some purpose; something that one cannot do without; a requisite; an essential; — chiefly in *pl.*; as, the *necessaries* of life.

2. *pl. Law.* Such things, in respect to infants, lunatics, married women, and others similarly incompetent or dependent, as are requisite for support suitable to station.

ne-ces'si-ta'ri-an (nē-sĕs′ĭ-tā′rĭ-ăn; 115), *a.* Of or pert. to necessitarianism. — *n.* An adherent of necessitarianism.

ne-ces'si-ta'ri-an-ism (-ĭz'm), *n.* The doctrine of philosophical necessity; the doctrine that results follow by invariable sequence from causes, and esp. that the will is not free, but that human actions and choices result inevitably from motives; determinism.

ne-ces'si-tate (nē-sĕs′ĭ-tāt), *v. t.*; -TAT'ED (-tāt′ĕd); -TAT'ING (-tāt′ĭng). [Cf. LL. *necessitatus*, p. p. of *necessitare*, and F. *nécessiter*. See NECESSITY.] **1.** To make necessary, or indispensable; to render unavoidable; to demand as a condition or involve as a consequence.
Sickness [might] *necessitate* his removal from the court. *South.*

2. To reduce to the necessity of; to force; to compel.
The Marquis of Newcastle, being pressed on both sides, was *necessitated* to draw all his army into York. *Clarendon.*

3. To reduce to want or privation. *Obs. or R.*

ne-ces'si-ta'tion (-tā′shŭn), *n.* [Cf. F. *nécessitation*.] A making necessary; state of being made necessary; compulsion.

ne-ces'si-ta-tive (nē-sĕs′ĭ-tā-tĭv), *a.* Making, or tending to make, necessary.

ne-ces'si-tous (-tŭs), *a.* [Cf. F. *nécessiteux*.] **1.** Needy; indigent; pressed with poverty.
Necessitous heirs and penurious parents. *Arbuthnot.*

2. Narrow; destitute; pinching; pinched; as, *necessitous* circumstances.

3. Necessary. *Obs.*

— **ne-ces'si-tous-ly**, *adv.* — **ne-ces'si-tous-ness**, *n.*

ne-ces'si-tude (nē-sĕs′ĭ-tūd), *n.* [L. *necessitudo*, fr. *necesse*. See NECESSARY.] **1.** Connection or relation. *Obs.*
Between . . . parents and their children there is so great a *necessitude*, propriety, and intercourse of nature. . . . *Jer. Taylor.*

2. Need. *Rare.*

ne-ces'si-ty (-tĭ), *n.*; *pl.* -TIES (-tĭz). [ME. *necessite*, F. *nécessité*, L. *necessitas*, fr. *necesse*. See NECESSARY.] **1.** Quality or state of being necessary, unavoidable, or irresistibly certain; inevitableness; the relation of that which must be to the grounds of its being; inevitable connection.
Necessity has been distinguished as: logical, or metaphysical, the necessity of the forms or laws of thought and of thinking according to these; **hypothetical**, the inevitableness of a consequent when the ground is given; **mathematical**, logical necessity applied to mathematical reasonings or the necessity of axioms; **physical**, or **natural**, the necessity of the causal relation; **moral**, the compulsion of a moral being to choose the good. **Internal** and **external necessity** are contrasted: *Internal necessity* may be **absolute**, the necessity that a thing must be what it is if otherwise it would be contradictory, or **secundum quid**, the necessity of a matter of fact in its own uninterfered-with happening. *External necessity* is always **ex hypothesi**, due to some condition or ground. Leibnitz reduced all types of necessity to three: **absolute**, the rational necessity that the self-contradictory cannot be conceived to exist; **physical**, that which could be conceived otherwise, but follows from the nature of things as they are; and **moral** (see above). If *moral necessity* be conceived also as **teleological**, or including the necessity of that which follows from purpose, this division appears adequate. Hegel made all necessity relative; hence, subordinate to some self-determination which included the related elements. On this ground is based his paradox that "freedom is the truth of *necessity*."

2. *Philos.* **a** The principle of inevitable connection as a characteristic of nature; the principle of universal and uniform causation; — contrasted with *chance*.
For that philosophy, matter and energy are indestructible and ingenerable, and the laws of their working rigorous, exact, and unalterable. And this, beyond all cavil, is what is meant by natural or blind *necessity*. *James Ward.*
Error . . . would be prevented by forbearing to employ, for the expression of the simple fact of causation, so extremely inappropriate a term as *necessity*. That word, in its other acceptations, involves much more than mere uniformity of sequence: it implies irresistibleness. *J. S. Mill.*
b The negation of freedom in voluntary action; necessitarianism; — contrasted with *freedom* or *liberty*.

3. That which makes an act or an event unavoidable; irresistible force; overruling power; compulsion, physical or moral; fate; fatality.
So spake the fiend, and with *necessity*,
The tyrant's plea, excused his devilish deeds. *Milton.*

4. The condition of being needy or necessitous; pressing need; indigence; want. *Clarendon.*

5. That which is necessary; a necessary; a requisite; something indispensable; — often in *pl.*
These should be hours for *necessities*,
Not for delights. *Shak.*

6. Business; urgent or needful pursuit or task. *Obs.*

Syn. — See NEED.

neg-lect' (nĕg-lĕkt'), *v. t.* ; NEG-LECT'ED; NEG-LECT'ING. [L. *neglectus*, p. p. of *neglegere* (*negligere*) to disregard, neglect; *neg-* (cf. NEGATION) not + (prob.) a word akin to *religio*. See RELIGION.] To disregard ; specif. : **a** To omit to notice; to treat with little or no attention or respect ; to consider or deal with as though of no consequence ; to slight.

Neglect the rules each verbal critic lays . . . *Pope.*
Despised, *neglected*, and forlorn. *Shelley.*

b To fail to attend to with due care or attention ; to forbear one's duty in regard to ; negligently to omit or to suffer to pass unimproved, unheeded, undone, etc. ; to slight ; as, to *neglect* duty or business ; to *neglect* to consider the consequences ; to *neglect* a guest.

If thou *neglect'st* or dost unwillingly
What I command, I 'll rack thee with old cramps. *Shak.*

Syn. — NEGLECT, DISREGARD, SLIGHT. To NEGLECT is to fail to give due attention, esp. to the performance of a task, duty, or the like ; to DISREGARD (so also, less frequently, to *neglect*) is to pay no attention, esp. to something which is felt as unimportant ; to SLIGHT is intentionally and somewhat contemptuously to neglect or disregard ; as, to *neglect* one's business, to *neglect* a precaution, to *neglect* to pay one's debts ; to *disregard* petty annoyances, one may *disregard* much of his alleged evidence ; to *slight* a duty, to *slight* a friend. See NEGLIGENCE, OVERLOOK, DESPISE.

neg-lect', *n.* [L. *neglectus*. See NEGLECT, *v.*] **1**. Act or fact of disregarding, slighting, or neglecting (a person or thing), or state or fact of being disregarded, slighted, or neglected; also, formerly, indifference or lack of consideration ; as, to treat an offer with *neglect*.

Rescue my poor remains from vile *neglect*. *Prior.*

2. Omission of proper attention ; avoidance or disregard of duty, from heedlessness, indifference, or willfulness ; failure to do, use, or heed anything ; negligence ; as, *neglect* of business, of health, of economy.

3. An instance of negligence ; a slight. *Now Rare.*

Syn. — Inattention, disregard. See NEGLIGENCE.

neg-lect'ful (-fo͝ol), *a.* Full of neglect ; heedless ; careless ; negligent ; inattentive ; indifferent. *Pope.*
A cold and *neglectful* countenance. *Locke.*

— neg-lect'ful-ly, *adv.* — **neg-lect'ful-ness**, *n.*

neg'li-gee' (nĕg'lĭ-zhā' ; nĕg'lĭ-zhā'), ‖ **né'gli'gé'** (nā'glē'-zhā'), *n.* [F. *négligé*, p. p. of *négliger* to neglect, L. *negligere*. See NEGLECT.] **1**. A kind of easy robe or dressing gown formerly worn by women ; hence, any easy, unceremonious attire ; undress.

2. A long necklace of beads. *Obs. or R.*

neg'li-gence (nĕg'lĭ-jĕns), *n.* [F. *négligence*, L. *negligentia*.] **1**. Quality or state of being negligent ; lack of due diligence or care ; omission of duty ; neglect ; heedlessness ; disregard.

2. *Law.* Failure to exercise the care that the circumstances justly demand ; omission of duty in doing or forbearing ; the failure to do or forbear that which a reasonably prudent person would have done under the circumstances ; — opposed to *prudence*, *care*, or *diligence*. When such failure results in injury to another the negligent person is liable in damages, and may be criminally liable. (Cf. TORT, CRIME.) *Negligence* is essentially equivalent to *culpa* (which see) of the Roman and Civil law. Negligence is often divided into three degrees, *slight*, *ordinary*, and *gross*, or crass, corresponding respectively to : (1) absence of such care as would be exercised by an extraordinarily prudent person, (2) by a person of ordinary prudence, and (3) by a person who is wantonly neglectful of the consequences of his acts, or shows little or no regard for their effect upon the rights of others. The degrees correspond to the similar division of *culpa* and of *diligence* ; but they have no exact legal definition or value. The definition generally approved by both English and American courts is the following :

Negligence is the omission to do something which a reasonable man, guided upon those considerations which ordinarily regulate the conduct of human affairs, would do, or doing something which a prudent and reasonable man would not do.
11 *Excheq.* 781.

3. An act or instance of negligence or carelessness.

I must also point out his *negligences* and defects. *Blair.*

4. Indifference as to appearance, manner, or style ; disregard of convention ; as, *negligence* in dress.

. . . Horace still charms with graceful *negligence*. *Pope.*

Syn. — Heedlessness, carelessness, thoughtlessness, disregard, slight. — NEGLIGENCE, NEGLECT, INATTENTION, INADVERTENCE, REMISSNESS, OVERSIGHT. *Negligence* and *neglect* are sometimes used with little distinction ; but NEGLIGENCE commonly emphasizes the habit, NEGLECT, the fact, of leaving things undone or unattended to ; as, "No one has done more through *negligence* to corrupt the language" (*Byron*) ; "a princely *negligence* of little things" (*Landor*). "A plague for that Covid will have for my *neglect* of his almighty dreadful little might" (*Shak.*) ; "in reverend bishops note some small *neglects*" (*Pope*). INATTENTION is (often culpable) failure to attend ; INADVERTENCE is esp. unintentional or involuntary failure to heed or to pay attention ; as, "this universal indolence and *inattention* among us to things that concern the public" (*Tatler*) ; "It is . . . a practice to which I am extremely averse, and into which I could fall only by *inadvertence*" (*Macaulay*) ; "My bad Latin you properly correct ; but 'natales' in this case was an *inadverlency* : I knew better" (*Lamb*). REMISSNESS implies a lax and careless attitude toward duty or performance ; OVERSIGHT, as here compared (see OVERSIGHT), suggests esp. omission through inadvertence ; as, "some *remissness* or tardiness in good offices, or some *neglects* and failures in services" (*Waterland*) ; "whose gross defaults thy dainty pen may file, and unadvised *oversights* amend" (*Spenser*). See NEGLECT, OVERLOOK, CARELESS, SLOVENLY.

neg'li-gent (-jĕnt), *a.* [F. *négligent*, or L. *negligens*, p. pr. of *negligerè*. See NEGLECT.] **1**. Guilty of, or given to, neglect or disregard ; neglectful ; characterized by negligence ; careless ; heedless ; culpably careless ; showing lack of attention ; as, in *negligent* order.

He that thinks he can afford to be *negligent* is not far from being poor. *Rambler.*

2. Caused by, or due to, negligence. *Rare.* "*Negligent* danger." *Shak.*

Syn. — Careless, heedless, neglectful, regardless, thoughtless, indifferent, inattentive, remiss.

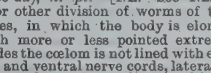
nem'a-to- (nĕm'ā-tō-). A combining form from Greek νῆμα, νήματος, *thread.*
nem'a-to-cide' (nĕm'ā-tō-sīd'), *n.* [*nemato-* + *-cide.*] Any chemical substance used to destroy nematodes.
nem'a-to-cyst' (-sĭst'), *n.* [*nemato-* + *-cyst.*] *Zoöl.* One of the minute stinging organs of hydrozoans, scyphozoans, and actinozoans; a lasso cell or nettling cell. They are developed in special cells (*cnidoblasts*) embedded in the ectoderm of exposed parts of the body, esp. the tentacles. Each consists of an ovoid, fluid-filled capsule containing a long, spirally coiled, hollow thread often barbed near the base. When stimulated (see CNIDOCIL) the cnidoblast contracts and the thread (which carries a poison) is shot out. In some of the larger jellyfishes and siphonophores the threads can penetrate the human skin and inflict painful stings. Stinging organs of more or less similar structure, to which the term *nematocyst* is extended, occur in various protozoans, mollusks, worms, etc. Cf. trichocyst. — **nem'a-to-cys'tic** (-sĭs'tĭk), *a.*
Nem'a-to'da (-tō'dà), *n. pl.* [NL. See Nematoidea.] *Zoöl.* A class or other division of worms of the phylum Nemathelminthes, in which the body is elongated and cylindrical, with more or less pointed extremities. In typical nematodes the cœlom is not lined with epithelium; there are dorsal and ventral nerve cords, lateral excretory canals, and elongated gonads continuous with their efferent ducts. The group includes both free living forms and many which are parasitic for the whole or a part of their existence, among the best known being those of the genus *Ascaris* (common roundworms), the pinworm, trichina, and Guinea worm. The hairworms (see Gordius), formerly always included, are now often separated.
nem'a-tode (nĕm'ā-tōd), *a.* Pertaining to the Nematoda. — *n.* One of the Nematoda.
Nem'a-tog'na-thi (-tŏg'nā-thī), *n. pl.* [NL. See nemato-; -gnathic.] *Zoöl.* An order of fishes of the division Ostariophysi, consisting of the catfishes (Siluridæ) and a few closely allied small families, as the Loricariidæ. The maxillary bone is developed as the base of a long barbel or feeler, and the body is scaleless or more or less covered with bony plates. — **nem'a-tog'nath** (nĕm'ā-tŏg'nāth), *a. & n.* — **nem'a-tog'na-thous** (-tŏg'nā-thŭs), *a.*



One of the Nematoidea (*Trichocephalus dispar*). Much enlarged.

Nem'a-toi'de-a (-toi'dē-à), *n. pl.* [NL.; *nemato-* + *-oid.*] *Zoöl.* **a** = Nematoda. **b** An order of Nematoda containing the typical nematodes as distinguished from the Gordioidea. — **nem'a-toid** (nĕm'ā-toid), *a. & n.*
nem'a-to-zo'oid (nĕm'ā-tō-zō'oid), *n.* [*nemato-* + *zooid.*] *Zoöl.* A defensive zooid in a hydroid or siphonophore.
Ne-me'an (nē-mē'ăn; nĕ-mē'ăn; 277), *a.* [L. *Nemeus, Nemaeus,* fr. *Nemea,* Gr. Νεμέη.] *Gr. Antiq.* Of or pertaining to Nemea, a valley in northwestern Argolis. The Nemean games constituted one of the four great Panhellenic festivals (the others being the Olympian, Pythian, and Isthmian); they were inaugurated in 573 B. C. Mythical accounts ascribed their origin either to the Seven on their expedition against Thebes or to Hercules in commemoration of his victory over the Nemean lion. In later times, at least, they were sacred to Zeus, and were under the charge of Argos. The contests were of the usual type (see Agones), and the victor's prize was a parsley wreath. The games were held every two years, in midsummer. The Nemean lion was a monstrous lion in the vale of Nemea, which Hercules strangled.
ne-mer'te-an (nĕ-mûr'tē-ăn), *a. Zoöl.* Of or pertaining to the Nemertea (syn. of *Nemertinea*). — *n.* One of the Nemertinea.

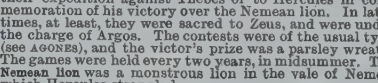
Νεμερτής, name of a Nereid, νημερτής unerring.] Also **Ne-mer'te-a** (nē-mûr'tē-à), **Nem'er-ti'na** (nĕm'ẽr-tī'nà). *Zoöl.* A class of worms generally included in, or considered related to, the Platyhelminthes, having an unsegmented, ciliated, usually long, slender, and more or less flattened body devoid of appendages and provided with a long, tubuls proboscis, ordinarily contained in a tubular sheath within the body, but capable of being everted from a pore above the mouth. They range in length from a fraction of an inch to many yards, and are often vividly colored. Most of them are marine and burrow in mud or sand along the seacoasts. A few live on land or in fresh water. They are carnivorous, feeding on small invertebrates or dead fragments. — **nem'er-tin'e-an** (-tĭn'ē-ăn), *a. & n.*



One of the Nemertinea (*Tetrastemma elegans*).

Nem'e-sis (nĕm'ē-sĭs), *n.* [L., fr. Gr. Νέμεσις, orig., distribution, fr. *νέμειν* to deal out, distribute, prob. akin to *νομός* pasture. Cf. nomad.] *Gr. Relig.* An ancient goddess whose chief significance in Greek literature is as a personification of retributive justice. *Nemesis of Rhamnus,* however, was a much more concrete figure, and was probably a local form of Artemis (which see).
Ne-moc'er-a (nē-mŏs'ẽr-à), *n. pl.* [NL., fr. Gr. *νῆμα* thread + *κέρας* horn.] *Zoöl.* A division of orthorrhaphous dipterous insects, having many-jointed, usually long, antennæ, as the mosquitoes, fungus gnats, and crane flies. — **ne-moc'er-an** (-ăn), *a. & n.* — **ne-moc'er-ous** (-ŭs), *a.*

ne/o-lith (nē'ō-lĭth), *n.* A neolithic stone implement.

ne/o-lith'ic (-lĭth'ĭk), *a.* [*neo-* + *-lith* + *-ic.*] Designating, pertaining to, or belonging to, a stage of human culture following the paleolithic and characterized by an advance in civilization denoted by more and better implements of stone, bone, and horn, by the beginnings of agriculture, and the presence of domestic animals. The typical stone implements of this period are ground and polished rather than chipped, and for this reason it is sometimes called the **polished-stone age.** The megalithic structures of western Europe and North Africa are ascribed to this period, which was represented in America, at the time of the discovery, by the culture of most of the Indian tribes. See AGE, *n.*, 7.

The neolithic era includes the latter half of the "stone age;" the human relics which belong to it are associated with the remains of animals not yet extinct. The kitchen middens of Denmark, the lake dwellings of Switzerland, and the overstocked islands, or "crannogs," of the British Isles, belong to this era. *Lubbock.*

ne/o-log'i-cal (nē'ō-lŏj'ĭ-kăl), *a.* [Cf. F. *néologique.*] Of or pertaining to neology; employing new words; of the nature of, or containing, new words or new doctrines. — **ne/o-log'i-cal-ly,** *adv.*

Ne/o-pla'to-nism, *or* **Ne/o-Pla'to-nism** (-plā'tō-nĭz'm), *n.* The philosophy of a group of thinkers of the early Christian Era who endeavored to reconcile the teachings of Plato and Aristotle with Oriental conceptions; also, teachings and doctrines similar to those of the ancient Neoplatonists promulgated in medieval and modern times. Ancient *Neoplatonism* began at Alexandria with Ammonius Saccas (about 175–250 A. D.), found its chief exponent in Plotinus (205–270), and included also as representatives Porphyry, Iamblichus, Synesius, and Proclus (died 485). Its fundamental conception is a kind of pantheism developed from the Platonic dualism of Idea and Matter, under the influence of Jewish and Oriental conceptions. The physical world was conceived as an emanation (or a lapse from true being) of the immanent divinity, or One, from whom all human souls are arisen and with whom, according to Plotinus, they may be reunited in trance or ecstasy. Contempt for the world of matter and belief in liberation of the soul through asceticism and mystic revelation made this philosophy especially congenial to Christian mystics. The writings of the Pseudo-Dionysius, closely allied to the system of Proclus, were taken up by the church (about A.D. 600) and exerted an influence which remained in the church for a long period after those writings were shown to be spurious, and repudiated (A. D. 1500). Neoplatonism formed the basis of the mysticism of Meister Eckhart.

Ne/o-pla'to-nist, *or* **Ne/o-Pla'to-nist,** *n.* One who held to Neoplatonism; a member of the Neoplatonic school.

Ne/op-tol'e-mus (nē'ŏp-tol'ē-mŭs), *n.* [L. *Neoptolemus*, fr. Gr. *Νεοπτόλεμος.*] *Gr. Myth.* The valiant son of Achilles, who after his father's death joined the forces against Troy; — called also *Pyrrhus.* He was one of the heroes in the wooden horse. Post-Homeric legend portrays him as fierce and cruel, upon the fall of Troy killing the aged Priam at the altar of Zeus, hurling Astyanax from the walls, and sacrificing Polyxena at the tomb of Achilles. In the Odyssey he returns home safely and marries Hermione. Later legend represents him as going to Epirus, accompanied by Andromache and Helenus, and settling there.

ne-phol'o-gy (nē-fŏl'ō-jĭ), *n.* [*nepho-* + *-logy.*] The department of meteorology treating of clouds. — **neph'o-log'i-cal** (nĕf'ō-lŏj'ĭ-kal), *a.* — **ne-phol'o-gist** (-jĭst), *n.*

neph'o-scope (nĕf'ō-skōp), *n.* [*nepho-* + *-scope.*] *Meteor.* An instrument for observing clouds, their direction and velocity. One form consists of a circular horizontal mirror above which is a fixed spherical knob, whose reflection the observer, by moving his eye, keeps in coincidence with the reflection of the cloud.

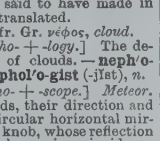
ne-phral'gi-a (nē-frăl'jĭ-ă; nĕf-răl'-), **ne-phral'gy** (-jĭ), *n.* [NL. *nephralgia*; *nephro-* + *-algia.*] *Med.* Neuralgic pain in the kidneys. — **ne-phral'gic** (-jĭk), *a.*

ne-phrec'to-my (nē-frĕk'tō-mĭ; nĕf-rĕk'-), *n.* [*nephro-* + *-ectomy.*] *Surg.* Excision of a kidney.

neph'ric (nĕf'rĭk), *a.* [Gr. *νεφρός* kidney.] Renal.

ne-phrid'i-al (nē-frĭd'ĭ-*a*; nĕf-rĭd'-), *a. Zoöl. & Anat.* Of or pertaining to a nephridium.

ne-phrid'i-um (-ŭm), *n.*; *L. pl.* **-ia** (-*ă*). [NL., fr. Gr. *νεφρίδιος* of the kidneys.] *Zoöl. & Anat.* **a** An excretory organ of the type found in annulate worms, mollusks, brachiopods, polyzoans, certain arthropods, etc. In typical cases it consists of a tube opening at one end into the cœlom by a ciliated, funnel-shaped aperture (**nephrostome**) and discharging at the other end by a minute pore (**nephridiopore**) on the exterior of the body. It is often much lengthened and convoluted, with glandular walls. In the annulate worms a pair of these organs often occurs in each of several or many of the segments of the body, whence the name **segmental organs.** In the mollusks (see ORGAN OF BOJANUS) and brachiopods but one pair is usually present. In many cases these organs also carry off the products of the generative organs from the cœlom, and in certain animals some of them are modified to perform this function only. Nephridia of a modified type also occur in *Amphioxus.* **b** *Embryol.* Sometimes, by extension, a renal tubule of a craniate vertebrate, which is comparable to a nephridium in many respects, and which in the lower vertebrates possesses nephrostomes. The term is loosely applied to other tubular excretory organs of invertebrates.



Nephridia of a Worm. *a a* External Orifices; *b* Vesicular Portion; *c* Convoluted Tubular Portion; *o* Funnel-shaped Internal Orifice.

neph'rism (nĕf'rĭz'm), *n.* [*nepho-* + *-ism.*] *Med.* The morbid condition caused by chronic disease of the kidney.

neph'rite (-rīt), *n.* [G. *nephrit*, fr. LL. *lapis nephriticus.* See NEPHRITIC.] *Min.* A tough, compact variety of tremolite or actinolite, constituting the less valuable kind of jade, and formerly worn as a remedy for kidney diseases; kidney stone. See JADE. H., 6–6.5. Sp. gr., 2.96–3.1.

ne-phrit'ic (nē-frĭt'ĭk; nĕf-rĭt'ĭk), *a.* [L. *nephriticus*, Gr. *νεφριτικός*: cf. F. *néphrétique.* See NEPHRITIS.] **1,** Of or pertaining to the kidneys or urinary organs; renal.

2. *Med.* **a** Affected with a disease of the kidneys. **b** Relieving disorders of the kidneys; affecting the kidneys.

nephritic stone, nephrite; jade. See NEPHRITE. — **n. wood,** *Old Med.*, a wood the infusion of which (**nephritic tincture**) was once used in kidney diseases. In early accounts it is said to come from "New Spain" and to be the *coatli* of Hernandez, but later use the name is applied to the wood of the horse-radish tree (*Moringa moringa*). *Oxf. E. D.*

ne-phrit'is (nē-frī'tĭs; nĕf-rī'tĭs), *n.* [L., fr. Gr. *νεφρῖτις* (sc. *νόσος*), fr. *νεφρός* a kidney.] *Med.* Inflammation of the kidneys. Nephritis occurs in acute and chronic forms, commonly known as acute and chronic **Bright's disease,** from the former of which recoveries are frequent and from the latter rare. Acute nephritis tends to suppuration, and is sometimes called **suppurative nephritis.**

neph'ro- (nĕf'rō-), **nephr-** Combining form from Greek *νεφρός*, *kidney.*

neph'ro-cele (-sēl), *n.* [*nephro-* + *-cele.*] *Med.* Hernia of the kidney.

ne-phrog'e-nous (nē-frŏj'ē-nŭs; nĕf-rŏj'-), *a.* [*nephro-* + *-genous.*] *Med.* Produced or caused by the kidney.

Ne-phrol'e-pis (nē-frŏl'ē-pĭs; nĕf-rŏl'-), *n.* [*nephro-* + Gr. λεπίς scale.] *Bot.* A small genus of polypodiaceous ferns having large pinnate fronds, the pinnæ articulated at the rachis, with the sori on the upper branches of the free veins. The species are mainly tropical, two extending to Florida. *N. exaltata* is the commonly cultivated sword fern.

neph'ro-lith'ic (nĕf'rō-lĭth'ĭk), *a.* [*nephro-* + *-lith* + *-ic.*] *Med.* Of or pertaining to gravel, or renal calculi; as, *nephrolitic* ischuria.

neph'ro-li-thot'o-my (-lĭ-thŏt'ō-mĭ), *n.* [*nephrolith* + *-tomy.*] *Surg.* The operation of removing a calculus from the kidney by incision; lithonephrotomy.

ne-phrol'o-gy (nē-frŏl'ō-jĭ; nĕf-rŏl'-), *n.* [*nephro-* + *-logy.*] The science which treats of the kidneys, their structure, functions, or diseases. — **ne-phrol'o-gist** (-jĭst), *n.*

ne-phrop'a-thy (nē-frŏp'ă-thĭ; nĕf-rŏp'-), *n.* [*nephro-* + *-pathy.*] *Med.* Any disease of the kidney.

neph'ro-pex'y (nĕf'rō-pĕk'sĭ), *n.* [*nephro-* + *-pexy.*] *Surg.* The operation of fixing a wandering kidney.

neph'rop-to'sis (nĕf'rŏp-tō'sĭs), *n.* [NL. See NEPHRO-; PTOSIS.] *Med.* Abnormal sinking downwards of the kidney; wandering kidney.

ne-phror'rha-phy (nē-frŏr'ă-fĭ; nĕf-rŏr'-), *n.* [*nephro-* + *-rhaphy.*] *Surg.* Fixation of a movable kidney by suturing it to the posterior abdominal wall.

neph'ro-stome (nĕf'rō-stōm), *n.* [NL. *nephrostoma*; *nephro-* + *-stoma.*] *Zoöl.* The funnel-shaped opening of a nephridium into the body cavity. — **ne-phros'to-mous** (nē-frŏs'tō-mŭs; nĕf-rŏs'-), *a.*

nephr'o-tome (nĕf'rō-tōm), *n.* [See NEPHROTOMY.] *Embryol.* In vertebrate embryos, the modified part of a primitive segment developing into an excretory tubule of the primitive kidney.

ne-phrot'o-my (nē-frŏt'ō-mĭ; nĕf-rŏt'-), *n.* [*nephro-* + *-tomy.*] *Surg.* Incision into the kidney, as for extraction of stone. — **ne-phrot'o-mize** (-mīz), *v. t.*

Neph'thys (nĕf'thĭs), *n.* [Gr. Νέφθυς, fr. Egypt. *nebt-het* the lady of the house.] An Egyptian goddess, daughter of Seb and Nut, sister and wife of Set, who with Isis was especially associated with the ritual of the dead, and is often represented on mummies.

‖ **ne plus ul'tra** (nē plŭs ŭl'trȧ). [L., no further; *ne* no, not + *plus* more + *ultra* beyond.] **1.** The uttermost point to which one can go or attain; hence, the summit of achievement; the highest point or degree; the acme.

The *ne plus ultra* of bell ringing. *Scott.*

2. A prohibition against proceeding further; an insuperable obstacle or limiting condition. *Obs. or R.*

nep'o-tal (nĕp'ō-tăl), *a.* Of, pert. to, or like, a nephew.

ne-pot'ic (nē-pŏt'ĭk), *a.* [See NEPOTISM.] Of or pertaining to nepotism; disposed to nepotism. "*Nepotic* ambition." *Milman.*

nep'o-tism (nĕp'ō-tĭz'm), *n.* [L. *nepos, nepotis*, nephew: cf. F. *népotisme.* See NEPHEW.] **1.** Favoritism shown to nephews and other relatives; bestowal of patronage by reason of relationship, rather than of merit.

From *nepotism* Alexander V. was safe; for he was without kindred or relatives. *Milman.*

2. Excessive fondness for one's nephews. *Rare.*

nep'o-tist (-tĭst), *n.* One who practices nepotism. — **nep'o-tis'ti-cal** (-tĭs'tĭ-kăl), *a.*

Nep'tune (nĕp'tūn), *n.* [L. *Neptunus.*] **1.** *Rom. Relig.* The son of Saturn and Ops; the god of the waters, esp. of the sea, represented as bearing a trident for a scepter. His worship was early introduced into Rome; his feast, **Nep'tu-na'li-a** (-tū-nā'lĭ-*ă*), occurred July 23. His cult was identified with that of the Greek Poseidon (which see). Cf. DY.

2. Fig.: The ocean; sea. *Rare. Shak.*

3. *Astron.* The most remote known planet of the solar system, discovered — as a result of the computations of Leverrier, of Paris — by Galle, of Berlin, September 23, 1846. Its mean distance from the sun is about 2,792,000,000 miles, its period of revolution 164.78 years, and its diameter about 32,000 miles. Neptune is known to have one satellite.

less saprophytic orchids having small racemose flowers with a long column. *N. nidus-avis* is the bird's-nest orchis.

neowe. † NEW.

ne'o-yt-ter'bi-um (nē'ō-ĭ-tûr'bĭ-ŭm), *n.* See YTTERBIUM.

Ne-o'za nus (nē-ŏ'zȧ nŭs), *n.* The seed of the Neoza pine.

nep. † NAP, a cup, NEEP.

nep. Dial. Eng. var. of NIP, *n. & v.*

nep, *n.* [Cf. ME. & AS. *nepte*, fr. L. *nepeta.* Cf. CATNIP, NEPETA.] Catnip. *Obs. or Dial. Eng.*

nep, *n.* [AS. *nēp* turnip, fr. L. *napus.*] Bryony. *Obs.*

Ne'pa (nē'pȧ), *n.* [L., scorpion.] *Zoöl.* A genus of hemipterous insects consisting of the water scorpions. It is the type of a family, **Nep'i-dæ** (nĕp'ĭ-dē), containing also the needle bugs. See RANATRA.

2. *Astron.* The constellations of Cancer, Hydra, and Scorpio combined. Also **Nepas.** *Rare.*

Nep-tu'ni-cen'tric (-sĕn'trĭk), *a.* [*Neptune* + *centric.*] *Astron.* Centering about Neptune (the planet); taken or calculated as seen from Neptune; as, *Neptunicentric* longitude or force.

Nep'tun-ist (nĕp'tŭ-nĭst), *n.* [Cf. F. *neptuniste.*] **1.** A seaman; navigator. *Obs.*

2. *Geol.* One who holds the theory that the successive rocks of the earth's crust were formed by the agency of water. Cf. PLUTONIST.

Ne're-id (nē're-ĭd), *n.* [L. *Nereis, -idis,* Gr. Νηρείς, Νηρηΐς, -ίδος, a daughter of Nereus, an ancient sea god, fr. Νηρεύς; cf. νηρός wet, Skr. *nāra* water.] **1.** *Class. Myth.* A sea nymph. The Nereids, fifty or one hundred in number, were the daughters of Nereus and Doris, and attendants upon Poseidon. They were represented as riding sea horses and other sea monsters, and usually as having the human form entire, but sometimes as having the tail of a fish. The best known were Amphitrite, Thetis, and Galatea.

2. [*l. c.*] *Zoöl.* Any species of the genus *Nereis* or family Nereidæ; often, loosely, any of various other polychæte worms, esp. of the order Errantia.

Ne're-is (nē're-ĭs), *n.; pl.* NEREIDES (nē-rē'ĭ-dēz). [L.]

1. *Class. Myth.* A Nereid. See NEREID.

2. *Zoöl.* A large genus of predaceous marine polychætous worms of the order Errantia having the body composed of numerous segments each bearing a pair of biramous parapodia. The head has a protrusile pharynx with a pair of hooked jaws and a series of denticles. Some species are dimorphic (see HETERONEREIS). Most of them live in burrows in the mud or sand or among rocks in shallow water.

Nereis (*N. pelagica*). (½)

Others are free-swimming, some of them during the breeding season only. *Nereis virens* is common on muddy shores on the Atlantic coast of the United States, and is much used for bait. It becomes over a foot long. The genus is the type of a family, **Ne-re'i-dæ** (nē-rē'ĭ-dē).

Ne're-o-cys'tis (nē're-ō-sĭs'tĭs), *n.* [NL. See NEREID; -CYST.] *Bot.* A genus of gigantic laminariaceous seaweeds of the North Pacific, having a stem many fathoms long, ending in a large bladder, which is crowned with a tuft of long leaves. The stem is used by Alaskans for fishing lines.

Sculptured Figure, probably of Nergal. After Rawlinson.

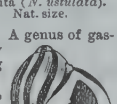
Ne'reus (nē'rŭs), *n.* [L., fr. Gr. Νηρεύς.] *Gr. Myth.* A sea god, father of the Nereids.

Ner'gal (nûr'găl), *n.* [Babylonian.] *Babylon. & Assyr. Myth.* One of the great gods. He is the god of the midsummer sun, the sun in its burning, destructive aspect; also, the god of war and pestilence, and in the later mythology the supreme lord of the world of the dead; in Assyria he was also god of the chase. Cf. ARALU.

Ne-ri'ta (nē-rī'tă), *n.* [L., a sort of sea mussel, Gr. νηρίτης, νηρείτης.] *Zoöl.* A genus of marine rhipidoglossate gastropods, having a short-spired, globose, thick-walled shell. It is the type of a family, **Ne-rit'i-dæ** (nē-rĭt'ĭ-dē). — **ner'i-toid** (nĕr'ĭ-toid), *a. & n.*

Nerita (*N. ustulata*). Nat. size.

Ner'i-ti'na (nĕr'ĭ-tī'nă), *n.* [NL.] *Zoöl.* A genus of gastropods of the family Neritidæ closely allied to *Nerita*, but chiefly inhabiting fresh and brackish waters.



Neritina (*N. zebra*). Nat. size.

Ne'ri-um (nē'rĭ-ŭm), *n.* [L., oleander, Gr. νήριον.] *Bot.* A small genus of tropical apocynaceous shrubs having coriaceous verticillate leaves and large handsome red or white fragrant flowers. *N. oleander* is the oleander.

Nernst lamp (nĕrnst). [After Walter *Nernst* (b. 1864), German physicist.] An electric incandescent lamp the filament or rod of which consists of a mixture of magnesia with oxides of the rare earth metals. This mixture, on being raised to a high temperature, as by a glowing platinum spiral, becomes luminous and conducting, and may be kept thus by the passage of a comparatively weak current and without a vacuum.

Ne'ro-nize (nē'rō-nīz), *v. t. & i.*; -NIZED (-nīzd); -NIZ'ING (-nīz'ĭng). To charge with being, to tend to make, or to be, like Nero, esp. in depravity, tyranny, or cruelty.

Ner'thus (nûr'thŭs), *n.* [L., of Teutonic origin; cf. Icel. *Njörðr*, name of a god.] *Teut. Myth.* A goddess whose chief seat of worship was the island of Seeland. She is called by Tacitus *Terra Mater*, and her character seems to have been that of a deity of peace and fertility.

nerv'ate (nûr'vāt), *a. Bot.* Nerved.

ner-va'tion (nĕr-vā'shŭn), *n.* The arrangement of nerves, in any sense of the word, esp. those of leaves or the wings of insects; neuration; venation.

nerve (nûrv), *n.* [L. *nervus*, prob. akin to Gr. νεῦρον sinew, nerve; cf. *νευρά* string, bowstring. Cf. NEURALGIA.]

1. A sinew or tendon. *Obs.*, exc.: **a** In the phrase *to strain every nerve*, that is, to put forth the utmost exertion. **b** A sinew or tendon taken from an animal, as for a bowstring.

2. One of the cordlike or filamentous bands of nervous tissue that connect the parts of the nervous system with each other and with the various organs of the body, and conduct the nervous impulses. A nerve consists essentially of fibers (**nerve fibers**), very small nerves of but one, the fibers of the larger nerves being gathered into bundles, or **funiculi**, each funiculus being surrounded by a connective-tissue sheath (**perineurium**), and these further inclosed in a common sheath (**epineurium**). Each nerve fiber consists of a central thread of protoplasm, the axis cylinder, which is the process (**axon** or **neurite**) of some nerve cell. Except near their termination and within the brain and spinal cord, each nerve fiber is usually surrounded by a delicate homogeneous sheath (the **primitive sheath**, or **neurilemma**) provided with nuclei at intervals. In the higher animals many nerve fibers (distinguished as **white**, or **medullated**, fibers) have within the neurilemma and immediately surrounding the axis cylinder an additional sheath of white fatty substance (the **medullary sheath**), interrupted at intervals, called the **nodes of Ranvier**. Fibers lacking the medullary sheath are called **nonmedullated**, or **gray**, **fibers**, or **fibers of Remak**. Nerves or their fibers are also classified as motor and sensory, efferent and afferent, etc. (see these terms). See NERVOUS SYSTEM.

3. Fig.: That part of anything that is regarded as the source or transmitter of vitality, force, sensation, or the like; as, Washington was the *nerve* of the Continental army; banks are the *nerves* of commerce.

4. Physical force or steadiness; muscular power and control; constitutional vigor; energy, strength.

> He led me on to mightiest deeds,
> Above the *nerve* of mortal arm. *Milton.*

5. a Mental strength or firmness; self-command in danger, or under suffering; coolness; pluck; resolution. **b** Audacity; "cheek." *Slang.*

6. *pl.* An attack of acute, often hysterical, nervousness; as, she suffered much from *nerves*.

7. a *Bot.* = VEIN. **b** *Zoöl.* A vein or nervure in the wing of an insect. **c** The sensitive pulp of a tooth.

8. [Cf. F. *nerfs*, pl.] *Arch.* A rib, as of a Gothic vault. *R.*

9. Strength and durability of wool fiber.

nerve of arrest, *Physiol.*, a nerve which when stimulated arrests the movements or action of a part, as the pneumogastric nerve. — **n. of Co-tun'ni-us** (kō-tŭn'ĭ-ŭs) [after Domenico Cotugno (L. *Cotunnius*) (1736–1822), Italian anatomist], *Anat.*, the nasopalatine nerve. — **nerves of Lan-ci'si** (lan-chē'zē) [after G. M. *Lancisi* (1654–1720), Italian anatomist], *Anat.*, a pair of longitudinal elevations near the middle line of the upper surface of the corpus callosum.

nerve (nûrv), *v. t.;* NERVED (nûrvd); NERV'ING (nûr'vĭng). To give strength, vigor, or courage to; to supply with physical or moral force; as, fear *nerved* his arm.

nerve cell. *Anat.* One of the characteristic cells of nerve tissue, occurring in the gray matter of the brain and spinal cord, and in the ganglia, retina, and internal ear. In man and the higher animals typical nerve cells are composed of soft reddish or grayish brown protoplasm, containing irregular granules (**Nissl's granules**) which stain with methylene blue. They have a large nucleus, usually with a conspicuous nucleolus, and are produced into long protoplasmic processes, called *axons*, or *neurites*, and *dendrites*. The axon (usually one to each cell) forms the axis cylinder of a nerve fiber. The dendrites, of which there may be many, are finely branched and interlace with the processes of other nerve cells. In a strict sense the term *nerve cell* includes these processes, but in ordinary usage it designates only the cell body from which they arise. Cf. NEURONE.

nerve center *or* **centre.** *Anat. & Physiol.* A collection of associated nerve cells having a common function.

nerved (nûrvd), *a.* **1.** Having (such or so many) nerves or veins.

2. *Her.* Having fibers of a different (specified) tincture; — said of the leaves of trees.

nerve'less, *a.* **1.** Destitute of strength or of courage; wanting vigor; weak; powerless; inert.

> Awaking, all *nerveless*, from an ugly dream. *Hawthorne.*

2. Without nerves.

— **nerve'less-ly,** *adv.* — **nerve'less-ness,** *n.*

nerv'il } (nûr'vĭl), *n.* [Dim. fr. *nerve.*] *Bot.* One of the
nerv'ille } finer nerves or veins of a leaf blade.

ner'vi-mo'tion (nûr'vĭ-mō'shŭn), *n.* [*nerve* + *motion.*] *Physiol.* The movement in the sensory organs due to external agents and transmitted to the muscles by the nerves.

nerv'ine (nûr'vēn; -vĭn; 277), *a.* [L. *nervinus* made of sinews: cf. F. *nervin.* See NERVE.] *Med.* Having the quality of affecting the nerves; soothing nervous excitement.

nerv'ine, *n.* **1.** A nervine agent; a nerve tonic.

2. Any species of *Cypripedium*; — so called from their reputed tonic properties. *Local, U. S.*

nerv'ing, *n. Surg.* An operation, chiefly of veterinary practice, consisting in the removal of a portion of a nerve trunk, in cases of chronic inflammation, to destroy sensation in the parts supplied and thus remove lameness.

ner'vose (nûr'vōs; nĕr-vōs'; 277), *a.* [See NERVOUS.]

1. a Sinewy; vigorous. *Obs.* **b** Of or pert. to the nerves; affecting the nerves. *Obs. or R.*

2. Nerved; having nerves.

ner-vos'i-ty (nĕr-vŏs'ĭ-tĭ), *n.* [L. *nervositas* strength.] Condition or quality of being nervous or nerved.

> The two Goncourts, . . . whose work may be summed up in one word, *nervosity.* *Encyc Brit.*

nerv'ous (nûr'vŭs), *a.* [L. *nervosus* sinewy, vigorous: cf. F. *nerveux.* See NERVE.] **1.** Sinewy; strong; vigorous.

> "*Nervous* arms." *Pope.* "*Nervous* strength." *Scott.*

2. Like a sinew or tendon; having strong or abundant sinews or tendons; — said of animals, meat, etc. *Obs.*

3. Possessing or manifesting vigor of mind; characterized by strength of thought, feeling, or style; forcible; spirited.

> "*Nervous*, idiomatic English." *W. D. Whitney.*

4. Full of, or abounding in, nerves; as, the *nervous* parts of the body.

5. Of or pertaining to the nerves; seated in the nerves; affected by, or employing, the nerves; as, *nervous* excitement, fever, energy. Also, affecting the nerves; as, *nervous* drugs, experience.

6. a Having the nerves weak, diseased, or easily excited; subject to, or suffering from, undue excitement of the nerves; easily agitated or annoyed; excitable.

> Poor, weak, *nervous* creatures. *Cheyne.*

b Hence: Timid; fearful; apprehensive.

> Our aristocratic class does not firmly protest against the unfair treatment of Irish Catholics, because it is *nervous* about the land. *M. Arnold.*

nervous dyspepsia. See DYSPEPSIA. — **n. fever,** *Med.*, typhoid fever. — **n. fluid,** *Physiol.*, a hypothetical fluid formerly thought to circulate through nerves, and regarded as the essential functional part. — **n. impulse,** *Physiol.*, the change in the protoplasm which travels like a wave along a nerve when it is stimulated, resulting: in sensory nerves, in a sensation; in motor nerves, in the contraction of a muscle or other phenomenon. — **n. system,** *Anat. & Zoöl.*, the nerves, and nerve centers of an animal considered collectively; the specialized coördinating apparatus of nerve tissue which regulates muscular and organic action and upon which depend the forms and states of consciousness. It consists of specially modified cells (*nerve* or *ganglion cells*) and conducting elements (*nerve fibers*, or *nerves*) arising from these cells. In nearly all animals the nervous system is known to develop chiefly or entirely from the epi-

blast. In vertebrates it is usually divided into three systems: the *central*, or *cerebrospinal*, comprising the brain and spinal cord; the *peripheral*, comprising the cranial and spinal nerves, which connect the cerebrospinal system with the various parts of the body (see CRANIAL NERVES, SPINAL NERVES); and the *sympathetic*, which consists of a pair of gangliated cords, partly ventral and partly lateral to the spinal column, and numerous nerve plexuses and small ganglia in various parts of the body, mostly in close relation with the viscera. It is connected at many points with the peripheral system. The cerebrospinal system arises in the embryo as a groove (*medullary groove*) in the epiblast along the dorsal middle line, and, by the coalescence of its bounding ridges, soon becomes converted into a tube (*medullary tube*), and sinks beneath the surface. The posterior portion of this tube becomes the spinal cord, but at the anterior end, except in *Amphioxus*, three enlargements (the primary cerebral vesicles) appear (see CEREBRAL VESICLE), out of which the brain of the adult is formed. The peripheral nerves arise for the most part from outgrowths of the medullary tube or from ganglia originally derived from the walls of the medullary groove. The origin of the sympathetic system is imperfectly understood. Physiologically the entire nervous system is dominated by the brain and spinal cord, and in the higher animals the independent action of the latter, as shown in reflex movements, is greatly reduced. Even in man, however, where the intellectual faculties control the mechanism of the body to an unusual degree, there are still a considerable number of independent centers which automatically send out impulses to certain groups of muscles (see BRAIN, 1, NERVE, 2). In invertebrates with radial symmetry the central nervous system may have the form of one or more rings; in elongated forms it often consists of an anterior bilobed *cerebral ganglion* or *brain*, and a pair of longitudinal, commonly ventrally situated, cords, which in segmented animals are usually gangliated at intervals and provided with transverse commissures. The anterior part of the system commonly forms a ring of nerve tissue (the *esophageal ring*) about the gullet. — **nervous temperament**, nervous excitability; constitution marked by unusual susceptibility of the nervous system.

nerv'ous-ly (nûr'vŭs-lĭ), *adv.* In a nervous manner; specif.: **a** Vigorously; forcibly; strongly. **b** With weakness or agitation of the nerves; agitatedly; timidly.

ner'vu-ra'tion (nûr'vū-ra'shŭn), *n. Zoöl.* Arrangement of nervures.

ner'vure (nûr'vŭr), *n.* [F. See NERVE.] **1.** *Zoöl.* One of the thickened lines or ribs in the wings of insects which serve to support and stiffen them; a vein.

2. *Bot.* A nerve or vein.

3. A rib, as of a Gothic vault. *Rare.*

nerv'y (nûr'vĭ), *a.*; NERV'I-ER (-vĭ-ẽr); -I-EST. **1.** Strong; sinewy. "His *nervy* knees." *Keats.*

2. a Characterized by spirited assurance; courageous. *Colloq.* **b** Hence: Cool; cheeky. *Slang.*

3. Nervously unsteady; jerky; as, *nervy* steps.

nes'ci-ence (nĕsh'ĭ-ĕns; nĕsh'ĕns; 277), *n.* [L. *nescientia*, fr. *nesciens*, p. pr. of *nescire* not to know; *ne* not + *scire* to know.] **1.** Lack of knowledge or of knowledge; state of not knowing, or quality of being not known or not knowable; esp., *Philos.*, the doctrine that God, noumena, etc., are incapable of being known.

The semblance of two regions, one pure fact, the other pure fancy, one all science, the other all *nescience*, is just the error that I have been trying to expose. *James Ward.*

2. The unknown. *Rare.*

It is a poor science that would hide from us the great deep sacred infinitude of *nescience*, whither we can never penetrate, on which all science swims as water on a superficial film. *Carlyle.*

nes'ci-ent (-ĕnt), *a.* [L. *nesciens*, p. pr. See NESCIENCE.] Exhibiting, or characterized by, nescience; ignorant; agnostic. — *n.* An agnostic.

ness (nĕs), *n.* [AS. *næs*, *nes*; akin to Icel. *nes*, Sw. *näs*, Dan. *næs*, and E. *nose*. See NOSE.] A promontory; a cape; a headland; — often used as a suffix in the names of places and promontories; as, Sheerness.

-ness (-nĕs; *in colloq. speech the* ĕ *becomes nearly* Y *in* Ill). [AS. *-ness*, *-nyss*, *-nys*; akin to OS. *-nissi*, *-nussi*, D. *-nis*, OHG. *-nissa*, *-nassî*, *-nussî*, G. *-nis*, *-niss*, Goth. *-inassus*. The *n* (*in*) orig. was part of the stem, not of the suffix proper.] A suffix used primarily to form abstract nouns denoting in general *quality* or *state*; as in, goodness, greatness, sickness, quality or state of being good, great, sick. These nouns often have various specific senses, as that of: (1) a particular instance of the quality or state; thus, he showed them many kindnesses; (2) something exhibiting or causing the quality or state: thus, the villa stood in the midst of that greenness; His Highness was pleased; to rub off the dimness from a glass. The suffix forms a few nouns which are primarily concrete, as in witness. It is used chiefly with native adjectives, but now also with those of Latin origin, where, however, a suffix of Latin origin, as *-ity*, is in general preferred; as in spiritualness, for spirituality. See *Introd.*, *Rules for Spelling.*

☞ The reference "See -NESS" is sometimes given as the only definition of a word ending in *-ness*, if its meaning can readily be gathered from the definitions of the suffix and the root word.

Ness'ler-ize (nĕs'lẽr-īz), *v. t.*; -IZED (-īzd); -IZ'ING (-īz'ĭng). [After Julius *Nessler* (1827–1905), German chemist.] *Anal. Chem.* To treat or test with Nessler's reagent. — **Ness'ler-i-za'tion** (-ĭ-zā'shŭn; -ī-zā'shŭn), *n.*

Ness'ler jar *or* **cylinder** (nĕs'lẽr). *Anal. Chem.* A tall, narrow glass jar with straight sides, used for comparing the colors of liquids, as in the Nessler test.

Ness'ler's re-a'gent *or* **solution** (nĕs'lẽrz). *Anal. Chem.* An aqueous solution of potassium and mercuric iodide, made strongly alkaline with potassium hydroxide. When this is added to a solution containing ammonia or an ammonium salt a reddish precipitate is formed or, if the amount of ammonia is minute, a yellow coloration. This reaction is very delicate and is used as a test for ammonia, chiefly in water analysis. By comparing the color of the solution tested with a standard solution, observing them vertically in Nessler jars, quantitative estimates are made.

Nes'sus (nĕs'ŭs), *n.* [L., fr. Gr. Νέσσος.] *Class. Myth.* A Centaur shot with a poisoned arrow by Hercules for trying to outrage his wife, Deianira. In obedience to the dying advice of Nessus, Deianira steeped her husband's shirt in the Centaur's blood as a love charm, but it poisoned his flesh, causing such agony that he killed himself.

nest (nĕst), *n.* [AS. *nest*; akin to D. & G. *nest*, Olr. *net*, Gael. & Ir. *nead*, W. *nyth*, L. *nidus*, for *nisdus*, Skr. *nīḍa* resting place, nest; from the particle *ni* down, Skr. *ni* + the root of E. *sit*, and thus orig., a place to sit down in. See NETHER, SIT; cf. EYAS, NIDIFICATION, NYE.] **1.** The bed or receptacle prepared by a bird or fowl for holding its eggs and for hatching and rearing its young.

2. Hence: The place in which the eggs of other animals, as insects, turtles, etc., are laid and hatched; a snug place in which young animals are reared.

3. Any snug, comfortable, or cozy residence or retreat; a lodging or shelter, esp. of a secluded or cozily private nature; rarely, the place of deposit of something.

A little cottage, like some poor man's *nest*. *Spenser.*

4. A place where persons of a certain character (usually bad) live or gather or where certain conditions (usually evil) prevail; an abode; haunt; as, a *nest* of traitors; a *nest* of vice.

5. The inhabitants, occupants, or frequenters of a nest, collectively; as, a *nest* of mice; a *nest* of outlaws.

6. A collection, set, or group of similar things; specif.: **a** A graduated series of boxes, cases, bowls, or the like, each put within the one next larger. **b** *Mech.* A compact group of pulleys, gears, springs, etc., working together or collectively; a group of boilers, or of tubes in a water-tube boiler, or the like. **c** *Math.* A set of conics that neither intersect nor connect visibly, that is, whose common points and common tangents are only imaginary, as concentric circles, confocal ellipses, or hyperbolas. **d** *Med.* More fully, *cell nest*. An isolated collection or clump of cells in tissue of a different structure.

7. *Geol.* A small isolated mass of any ore or mineral within a rock.

nest, *v. i.*; NEST'ED; NEST'ING. **1.** To put into a nest; to form a nest for; to settle or place in or as in a nest.

From him who *nested* himself into the chief power. *South.*

2. In p. p., with *in*: Used for making nests in; as, a bush *nested* in by birds.

3. To pack or fit one within another in a graduated series.

nest (nĕst), *v. i.* **1.** To build or occupy a nest; to settle down in or as in a nest.

Nes-to'ri-an (nĕs-tō'rĭ-ăn; 201), *n.* *Eccl.* An adherent of Nestorius, patriarch of Constantinople in the 5th century, who was condemned as a heretic by the Council of Ephesus, 431, for maintaining that the divine and the human natures were not merged into one person in Christ (who was God in man), and, hence, that it was wrong to call Mary the *mother of God*, though she might be called the *mother of Christ*; also, one of the sect established by the followers of Nestorius in Persia, India, and other Oriental countries, and still in existence. Opposed to *Eutychian* and *Monophysite*. The position of Nestorius was that there was in Christ a union, but not a union of essence, between God and man. The divine and the human entered into a relation of constant coexistence and coworking. The divine Logos took up his abode in the man Jesus. Only the smaller fraction of the evangelic affirmations respecting Jesus during his earthly life pertain to him as at once God and man. Most of them are true of him either as God exclusively or as man exclusively. *G.P. Fisher.*

Nes-to'ri-an, *a.* **1.** Of or relating to the Nestorians or Nestorius; connected with, or adhering to, Nestorianism.

2. Relating to, or resembling, Nestor, the aged warrior and counselor; hence, wise; aged; as, *Nestorian* caution.

3. *Math.* All points of the plane of complex numbers determined by the formula $z = 2mp + 2m'p'$, where $2p$, $2p'$ are constants (whose ratio is not real) and m, m' are any integers positive or negative, or 0 ; the vertices of a complete system of period parallelograms.

4. *Elec.* A system of conductors interconnected so as to form closed meshes like those of a net.

Neuf'châ'tel' (nŭf'shà'tĕl'), *n., or* **Neufchâtel cheese.** A kind of soft white cheese made from sweet milk with or without cream ; — so called from Neufchâtel in France.

Neu'mann's in'te-gral (noi'mänz). [After K. G. *Neumann*, German mathematician.] *Math.* The integral $2Q_n(\mu) = \int_{-1}^{1} \frac{P_n(u)}{\mu - u}\, du$, which equation holds for all values of u except real ones in the interval of integration.

neume (nūm), *n.* [LL. *neuma* a group of notes sung to a final syllable as long as the breath lasts, a neuma, fr. Gr. πνεῦμα breath.] *Medieval Music.* One of an early system of symbols developed from the Greek accents to indicate relative pitch. They date from as early as the 8th century, and were written originally over the words to be sung, but later between two or more horizontal lines denoting fixed pitch, as C or F. Neumes were thus the first step towards modern staff notation. The *Table* shows the more important ones as written in the 11th century and with conjectured present equivalents (the notes being taken as showing merely rise and fall of pitch, not definite intervals, nor time values).

neu-rat'ro-phy (nū-răt'rō-fĭ) } NEURO- ; ATROPHY.] *Med.* Atrophy of the nerves. — **neu'ra-troph'ic** (-trŏf'ĭk), *a.*

neu-rec'ta-sy (nū-rĕk'tă-sĭ), *n.* Also **neu-rec'ta-sis** (-sĭs), **neu'rec-ta'si-a** (nū'rĕk-tā'zhĭ-ă). [See NEURO- ; ECTASIS.] *Surg.* The operation of stretching a nerve.

neu-rec'to-my (nū-rĕk'tŏ-mĭ), *n.* [*neuro-* + *-ectomy.*] *Surg.* Excision of part of a nerve. *Cf.* NERVING. — **neu'-rec-tom'ic** (nū'rĕk-tŏm'ĭk), *a.*

neu'ren-ter'ic (nū'rĕn-tĕr'ĭk), *a.* [*neuro-* + *enteric.*] *Embryol.* Designating a canal which, in embryos of many vertebrates and tunicates, temporarily connects the medullary tube and the primitive intestine. It represents the blastopore of earlier stages.

neu-ri'a-try (nū-rī'ă-trĭ), *n.* [*neuro-* + *-iatry.*] The branch of medicine which relates to nervous diseases.

neu'ri-dine (nū'rĭ-dĭn ; -dēn ; 184), *n.* Also **-din.** [From NEURINE.] *Physiol. Chem.* A nonpoisonous base, $C_5H_{14}N_2$, found in putrescent meat and gelatin, in typhoid cultures, in brain substance, etc. It is a diamine.

neu'ri-lem'ma (-lĕm'ă), *n.* [NL. ; Gr. νεῦρον nerve + λέμμα peel, skin ; but perh. orig. fr. Gr. εἴλημα covering (*Oxf. E. D.*) ; *cf.* F. *névrilème.*] *Anat.* **a** The delicate outer sheath of a nerve fiber ; the primitive sheath. **b** Formerly, the perineurium. — **neu'ri-lem-mat'ic** (-lĕ-măt'ĭk), *a.* — **neu'ri-lem'ma-tous** (-lĕm'ă-tŭs), *a.*

neu-ril'i-ty (nū-rĭl'ĭ-tĭ), *n.* [Gr. νεῦρον nerve.] *Physiol.* The special properties and functions of the nerves ; the capacity of nerves for transmitting stimuli.

neu'rine (nū'rĭn ; -rēn ; 184), *n.* Also **neu'rin**, in sense 2. [Gr. νεῦρον a nerve.] **1.** *Physiol.* The essential material of the nervous system. *Obs.*

2. *Physiol. Chem.* A poisonous ptomaine, $C_5H_{13}ON$, formed from protagon and from choline by boiling with baryta water, and in the putrefaction of proteid matter. It resembles choline, with which it was once thought identical. Chemically, it is vinyl-trimethyl-ammonium hydroxide.

neu'rism (nū'rĭz'm), *n.* [Gr. νεῦρον nerve.] Nerve force. See VITAL FORCE.

neu'rite (nū'rit), *n.* [*neuro-* + *-ite.*] *Anat.* The axon, or axis cylinder process, of a nerve cell.

neu-rit'ic (nū-rĭt'ĭk), *a. Med.* Pertaining to, or affected with, neuritis. — *n.* A person having neuritis.

neu-ri'tis (nū-rī'tĭs), *n.* [NL. ; *neuro-* + *-itis.*] *Med.* Inflammation of a nerve or nerves.

neu'ro- (nū'rō-), **neur-.** [Gr. νεῦρον nerve.] A combining form denoting *a nerve, of or pertaining to a nerve or the nervous system.*

neu'ro-blast (-blăst), *n.* [*neuro-* + *-blast.*] **a** *Embryol.* One of the embryonic cells from which nerve cells develop. **b** *Zoöl.* A portion of the nervous system of a larval insect remaining after histolysis. — **neu'ro-blas'tic** (-blăs'tĭk), *a.*

neu-rog'li-a (nū-rŏg'lĭ-ă), *n.* [NL. ; *neuro-* + Gr. γλία glue.] *Anat.* The sustentacular tissue which fills the interstices and supports the essential elements of nervous tissue, esp. in the brain, spinal cord, and ganglia. It is probably of epiblastic origin, and consists of a network of fine fibrils and of flattened stellate cells with numerous radiating fibrillar processes. In addition to the true neuroglia, a certain amount of ordinary connective tissue penetrates the nervous tissues. — **neu-rog'li-ac** (-ăk), **neu-rog'-li-al** (-ăl), **neu-rog'li-ar** (-ar), **neu-rog'lic** (-rŏg'lĭk), *a.*

neu'ro-log'i-cal (nū'rō-lŏj'ĭ-kăl), *a.* Of or pertaining to neurology.

neu-rol'o-gist (nū-rŏl'ō-jĭst), *n.* One versed in neurology ; also, one skilled in the treatment of nervous diseases.

neu-rol'o-gy (-jĭ), *n.* [*neuro-* + *-logy.*] The branch of science which treats of the nervous system.

neu-ro'ma (nū-rō'mă), *n. ; L. pl.* **-MATA** (-mă-tă). [NL. See NEURO- ; -OMA.] *Med.* A rare form of tumor developed on, or connected with, a nerve, esp. one consisting of newformed nerve fibers or nerve cells. — **neu-rom'a-tous** (nū-rŏm'ă-tŭs ; -rō'mă-tŭs), *a.*

neu'ro-mere (nū'rō-mēr), *n.* [*neuro-* + *-mere.*] *Anat. & Zoöl.* A metameric segment of the cerebrospinal nervous system. In the spinal cord they are marked by the exits of the spinal nerves. — **neu-rom'er-ous** (nū-rŏm'ĕr-ŭs), *a.*

neu'ro-mi-me'sis, *n.* [NL. See NEURO- ; MIMESIS.] *Med.* The neurotic imitation of the symptoms of any disease.

neu'ro-my'e-lin (-mī'ĕ-lĭn), *n.* *Physiol. Chem.* A form of chitin said to replace neurokeratin in insects and Crustacea.

neu'ro-my'o-ma (-mī'ō-mă), *n.* [NL. ; *neuro-* + *myoma.*] *Med.* A tumor composed of, or originating from, neuro-epithelium.

neu'ro-nal (nū'rō-năl), *a.* [NL. ; *neuron* + *-al.*] *Anat.* The specialized sensory epithelium of an organ of special sense. — **neu'ro-ep'i-the'li-al** (-ĕl), *a.*

neu'ro-fi-bro'ma (-fī-brō'mă), *n.* [NL. ; *neuro-* + *fibro-* + *-oma.*] *Med.* Neuroma that contains fibrous elements.

neu'ro-fi-bro'ma-to'sis (-mă-tō'sĭs), *n.* [NL. See NEUROFIBROMA ; -OSIS.] *Med.* Condition marked by the presence of many neurofibromata, usually in the subcutaneous tissue.

neu'ro-gas-tral'gi-a (-găs-trăl'jĭ-ă), *n.* [NL.] *Med.* Gastralgia dependent upon nervous disorder of the stomach.

neu'ro-gen'e-sis (-jĕn'ĕ-sĭs), *n.* [NL. ; *neuro-* + *-genesis.*] *Physiol.* Production of nerves. — **neu'ro-ge-net'ic** (-jĕ-nĕt'ĭk), *a.*

neu'ro-gen'ic (-jĕn'ĭk), *a.* [*neuro-* + *-genic.*] *Physiol.* Having origin in nerves.

neu-rog'e-nous (nū-rŏj'ĕ-nŭs), *a.* [*neuro-* + *-genous.*] *Med.* Due to disorder of the nervous system.

neu'ro-gli-o'ma (nū'rō-glĭ-ō'mă), *n.* [NL.] *Med.* Glioma containing ganglionic cells and nerve fibers.

neu-rog'ra-phy (nū-rŏg'ră-fĭ), *n.* [*neuro-* + *-graphy.*] *Anat.* Description of the nervous system.

neu'ro-hyp-nol'o-gy (nū'rō-hĭp-nŏl'ō-jĭ). Var. of NEURYPNOLOGY.

neu'ro-hyp'no-tism (-hĭp'nō-tĭz'm), *n.* Nerve sleep ; hypnotism. — **neu'ro-hyp-not'ic** (-hĭp-nŏt'ĭk), *a.*

neu'roid (nū'roid), *a.* [*neuro-* + *-oid.*] *Anat. & Zoöl.* Resembling a nerve or nerve tissue.

neu'ro-ker'a-tin, *n. Physiol. Chem.* A variety of keratin present in nerve tissue, as in the sheath of the axis cylinder of medullated nerve fibers.

neu'ro-lem'ma (nū'rō-lĕm'ă). Var. of NEURILEMMA.

neu'ro-ma-la'ci-a, *n.* [NL. ; *neuro-* + *malacia.*] *Med.* Morbid softening of the nerves.

neu'ro-mast (n ū'rō-măst), *n.* [*neuro-* + Gr. μαστός hillock, breast.] *Zoöl.* = NERVE EMINENCE. — **neu'ro-ma-stic** (-măs'tĭk), *a.*

neu-rom'er-ism (n ū-rŏm'ĕr-ĭz'm), *n.* [*neuro-* + Gr. μέρος part.] *Zoöl.* The metamerism of the nervous system.

neth'er, *adv.* [AS. *nīðer.*] Down ; downwards. *Obs.*

neth'er-er, *n.* The lower parts ; also, an inferior. *Obs.*

neth'er-more' (nĕth'ĕr-mōr' ; 201), *a.* [*nether* + *more*, after the analogy of *-most*, as in *foremost.*] Lower ; nether. *Obs. or R.* — *n.* Lower part. *Obs. & R.*

neth'er-more, *adv.* Lower ; farther down. *Obs.*

neth'er-stock (nĕth'ĕr-stŏk'), *n.* A stocking ; — usually in *pl. Obs. or Hist.*

netherte, *n.* [See NETHER ; 1st -TY.] Inferiority. *Obs.*

nethermost, *conj.* Nevertheless. *Obs.*

neth'er-vert', *n.* Underbrush ; undergrowth. *Obs. & R.*

neth'er-ward (nĕth'ĕr-wĕrd), **neth'er-wards** (-wĕrdz), *adv.* [AS. *nīðerweard, -weardes.* See -WARD(S).] Downward. *Rare.*

Neth'i-nim (nĕth'ĭ-nĭm), *n. pl.* [Heb., pl. of *nāthīn* given, granted, a slave of the temple, fr. *nāthan* to give.] *Jewish Antiq.* Servants of the priests and Levites, who performed the lowest menial services about the tabernacle and temple.

nethirles. Shortened form of NEVERTHELESS. *Obs.*

netify. † NATIFY.

netinde. Obs. contr. of *ne witende*, knowing not.

net'l. Nettle. *Ref. Sp.*

netle. † NETTLE.

net'ly, *adv.* of NET, neat, smart. *Obs.* [nets.]

net'mak'er, *n.* A maker of **net'-mon'ey-re-ceipts' po ol.** See POOL.

ne'top (nē'tŏp), *n.* [Narragansett, lit., my brother or kinsman (by adoption).] Friend ; crony. *Obs., Local, U. S.*

Ne-to'phah (nē-tō'fä). *Bib.*

Ne-toph'a-thi (-tŏf'ă-thī). *Bib.*

Ne-toph'a-thite (-thīt). *Bib.*

Ne-toph'a-ti (-tī). *D. Bib.*

nets'man (nĕts'măn), *n.* One who uses a net, esp. in fishing.

nett. Var. of NET, not subject to deduction.

net'ta-ble (nĕt'ă-b'l), *a.* Capable of being fished, or caught, with a net or nets. *Rare.*

nette. † NET.

net'ted-veined' (nĕt'ĕd-vānd'), *a. Bot.* Having netted or reticulated veins, as the leaves of most dicotyledons.

net'ter (-ĕr), *n.* One who makes or uses nets, esp. for fishing.

net'ting, *n.* [From obs. *net*, v., to clean ; urine being used like lye. See NET, *a.*] Urine. *Dial. Eng.*

netting knot. See 2d KNOT, *n.*, 1.

netting needle. A kind of slender shuttle used in netting.

Net'ti-on (nĕt'ĭ-ŏn), *n.* [NL., fr. Gr. νῆττιον, dim. of νῆττα duck.] *Zoöl.* A genus of ducks including the common European teal, the American green-winged teal, and their allies.

net'tle, *v. i.* To become irritated, vexed, or provoked. *Rare.*

net'tle, *n.* A state of being nettled ; uneasiness. *Obs. or R.*

net'tle-bird', *n.* A whitethroat. *Local, Eng.*

nettle butterfly. Any of several butterflies whose larvæ feed on nettles, as *Vanessa urticæ*, and the red admiral.

nettle cell. *Zoöl.* A nematocyst.

nettle cheese. Cheese of which the curd was treated with fresh nettles. *Obs. or Hist.*

nettle cloth. A Cloth made of the fibers of nettles; also, a kind of cotton cloth. *Obs. Oxf. E. D.*

2. A kind of thick cotton stuff, japanned, and used as a substitute for leather.

nettle creeper. a A whitethroat. b The blackcap. *Local, Eng. & Scot.*

net'tle-ear'nest, *n.* Sober or downright earnest. *Scot.*

nettle family. *Bot.* The family Urticaceæ.

nettle fish. A jellyfish.

net'tle-fy, *v. t.* To crown with nettles. *Obs.*

nettle geranium. The coleus.

nettle hemp. The hemp nettle.

net'tle-mon'ger (nĕt'l-mŭn'gĕr), *n.* = NETTLEBIRD. *Eng.*

nettle potato. = QUEENROOT.

net'tler (nĕt'lĕr), *n.* One who nettles. *Rare.*

neu'rad (nū'răd), *adv.* [Gr. νεῦρον nerve + *ad-.*] *Anat.* Toward the neural side ; — opposed to *hæmad.*

neu'ral (nū'răl), **neu-ra'le** (nū-rā'lē), *n. Zoöl.* A neural plate (of a turtle).

neu-ral'gi-ac (nū-răl'jĭ-ăk), *n., Med.* One affected with, or subject to, neuralgia.

neu-ral'gi-form (-jĭ-fôrm), *a.* [*neuralgia* + *-form.*] *Med.* Resembling neuralgia.

neu-ral'gy (-jĭ), *n.* Neuralgia. *Dial. or Illit.*

neu'ral-ist (nū'răl-ĭst), *n. Med.* [*neural* + *-ist.*] = NEURASTHENIC.

neu'ra-poph'y-sis (nū'rā-pŏf'ĭ-sĭs), *n. ; pl.* **-SES** (-sēz). [NL. See NEURO- ; APOPHYSIS.] **a** = NEURAL PROCESS. **b** = NEURAL SPINE. — **neu-rap'o-phys'i-al** (nū-răp'ō-fĭz'ĭ-ăl), *a.*

neu-ra'tion (n ū-rā'shŭn), *n.* Nervation.

neu-rax'is (n ū-răk'sĭs), *n.* [NL. ; *neuro-* + *axis.*] *Anat.* **a** An axis cylinder. **b** The cerebrospinal axis. — **neu-rax'i-al** (-sĭ-ăl), *a.*

neu-rax'on (-sŏn), **neu'rax-o'ne** (nū'răk-sō'nē), *n.* [NL. *neuraxone.* See NEURO- ; AXIS.] *Anat.* An axis cylinder.

neur'hyp-nol'o-gy (n ūr'hĭp-nŏl'ō-jĭ), *n.* = NEURYPNOLOGY.

neur-hyp'no-tist (nūr-hĭp'nō-tĭst), *n.* [*neuro-* + *hypnotist.*] A hypnotist. *Rare.*

neu'ric (nū'rĭk), *a.* [*neuro-* + *-ic.*] Of, pertaining to, or provided with, nerves or a nervous system ; neural.

neu-ric'i-ty (n ū-rĭs'ĭ-tĭ), *n. Physiol.* The functions or properties peculiar to nerves.

neu'ri-le'ma (n ū'rĭ-lē'm ă), **neu'ri-le-mat'ic** (-lē-măt'ĭk), etc. Orig. forms of NEURILEMMA, etc.

neu'ri-lem-mi'tis (-lĕ-mĭ'tĭs), *n.* [NL. ; *neurilemma* + *-itis.*] *Med.* Inflammation of the neurilemma.

neu'ro-cele (nū'rō-sēl), *n.* = NEUROCYSTS.

neu'ro-cel'lu-lar (-sĕl'ū-lăr), *a. Zoöl.* Pertaining to, or situated between, the neural arch and the centrum of a vertebra.

neu'ro-chi'tin (-kī'tĭn), *n.*

neu'ro-cho'roi-di'tis (-kō'roi-dī'tĭs), *n.* [NL. ; *neuro-* + *choroid* + *-itis.*] *Med.* Inflammation of the choroid coat and the ciliary nerves.

neu-roc'i-ty (n ū-rŏs'ĭ-tĭ), *n. Physiol.* Nerve force.

neu'ro-cœle, *n.* [*neuro-* + *-cœle.*] *Zoöl.* The cavity or system of cavities in the interior of the central nervous system. It includes the central canal of the spinal cord and the ventricles of the brain. — **neu'ro-co'el'i-an** (-sē'lĭ-ăn), *a.*

neu'ro-cyte, *n.* [*neuro-* + *-cyte.*] *Anat.* A nerve cell.

neu'ro-den'dron, *n.* [NL. ; *neuro-* + *dendron.*] *Anat.* A dendrite

neu'ro-der'ma-ti'tis, *n.* Also **neu'ro-der-mi'tis.** [NL. ; *neuro-* + *dermatitis.*] *Med.* A nervous affection of the skin attended with itching.

neu'ro-din (nū'rō-dĭn), **neu'ro-dine** (-dĭn ; -dēn), *n.* [*Cf. neuralgia* and *anodyne.*] *Pharm.* A colorless crystalline substance, $C_{18}H_{18}ON$, used as an antineuralgic and antipyretic. Chemically, it is acetyl-p-hydroxy-phenyl-urethane.

neu'ro-dyn'i-a (nū'rō-dĭn'ĭ-ă), *n.* [NL. ; *neuro-* + *-odynia.*] *Med.* Pain in a nerve.

neu'ro-e-p'i-der'mal, *a. Embryol.* Pertaining to, or giving rise to, the central nervous system and epidermis.

neu'ro-ep'i-the'li-o'ma (nū'rō-ĕp'ĭ-thē'lĭ-ō'mă), *n.* [NL. ; *neuro-epithelium* + *-oma.*] *Med.* A tumor consisting of, or originating from, neuro-epithelium.

neu'ro-ep'i-the'li-um (-ĭm), *n.* [NL.] *Anat.* The specialized sensory epithelium of an organ of special sense. — **neu'ro-ep'i-the'li-al** (-ăl), *a.*

neu'ro-fi-bro'ma (-fī-brō'mă), *n.* [NL. ; *neuro-* + *fibro-* + *-oma.*] *Med.* Neuroma that contains fibrous elements.

neu'ro-fi-bro'ma-to'sis (-mă-tō'sĭs), *n.* [NL. See NEUROFIBROMA ; -OSIS.] *Med.* Condition marked by the presence of many neurofibromata, usually in the subcutaneous tissue.

neu'ro-gas-tral'gi-a (-găs-trăl'jĭ-ă), *n.* [NL.] *Med.* Gastralgia dependent upon nervous disorder of the stomach.

neu'ro-gen'e-sis (-jĕn'ĕ-sĭs), *n.* [NL. ; *neuro-* + *-genesis.*] *Physiol.* Production of nerves. — **neu'ro-ge-net'ic** (-jĕ-nĕt'ĭk), *a.*

neu'ro-gen'ic (-jĕn'ĭk), *a.* [*neuro-* + *-genic.*] *Physiol.* Having origin in nerves.

neu-rog'e-nous (nū-rŏj'ĕ-nŭs), *a.* [*neuro-* + *-genous.*] *Med.* Due to disorder of the nervous system.

neu'ro-gli-o'ma (n ū'rō-glĭ-ō'mă), *n.* [NL.] *Med.* Glioma containing ganglionic cells and nerve fibers.

neu-rog'ra-phy (nū-rŏg'ră-fĭ), *n.* [*neuro-* + *-graphy.*] *Anat.* Description of the nervous system.

neu'ro-hyp-nol'o-gy (nū'rō-hĭp-nŏl'ō-jĭ). Var. of NEURYPNOLOGY.

neu'ro-hyp'no-tism (-hĭp'nō-tĭz'm), *n.* Nerve sleep ; hypnotism. — **neu'ro-hyp-not'ic** (-hĭp-nŏt'ĭk), *a.*

neu'roid (nū'roid), *a.* [*neuro-* + *-oid.*] *Anat. & Zoöl.* Resembling a nerve or nerve tissue.

neu'ro-ker'a-tin, *n. Physiol. Chem.* A variety of keratin present in nerve tissue, as in the sheath of the axis cylinder of medullated nerve fibers.

neu'ro-lem'ma (nū'rō-lĕm'ă). Var. of NEURILEMMA.

neu'ro-ma-la'ci-a, *n.* [NL. ; *neuro-* + *malacia.*] *Med.* Morbid softening of the nerves.

neu'ro-mast (n ū'rō-măst), *n.* [*neuro-* + Gr. μαστός hillock, breast.] *Zoöl.* = NERVE EMINENCE. — **neu'ro-ma-stic** (-măs'tĭk), *a.*

neu-rom'er-ism (n ū-rŏm'ĕr-ĭz'm), *n.* [*neuro-* + Gr. μέρος part.] *Zoöl.* The metamerism of the nervous system.

neu'ro-mi-me'sis, *n.* [NL. See NEURO- ; MIMESIS.] *Med.* The

neu'ron (nū'rŏn), *n. ; pl.* **L. NEURA** (-rȧ), **E. NEURONS** (-rŏnz). [NL., fr. Gr. *νεῦρον* nerve.] **a** *Anat.* (1) The brain and spinal cord. *Rare.* (2) A neurone. **b** *Zoöl.* A nervure.

neu'rone (nū'rōn), *n.* [Cf. NEURON.] *Anat.* A nerve cell together with its processes (neurite, or axis cylinder, of a nerve, and dendrites). — **neu-ron'ic** (nū-rŏn'ĭk), *a.*

neu'ro-path'ic (nū'rō-păth'ĭk) } *a. Med.* Of or pert. to neu-
neu'ro-path'i-cal (-păth'ĭ-kăl) } ropathy; of the nature of, or having, nervous disease. — **neu'ro-path'i-cal-ly**, *adv.*

neu-rop'a-thist (nū-rŏp'ȧ-thĭst), *n.* A specialist in nervous diseases.

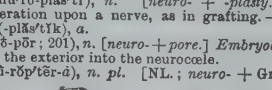
neu'ro-pa-thol'o-gy (nū'rō-pȧ-thŏl'ō-jĭ), *n.* Pathology of the nervous system. — **neu'ro-path'o-log'i-cal** (-păth'ō-lŏj'ĭ-kăl), *a.* — **neu'ro-pa-thol'o-gist** (-pȧ-thŏl'ō-jĭst), *n.*

neu-rop'a-thy (nū-rŏp'ȧ-thĭ), *n.* [*neuro-* + *-pathy.*] *Med.* An affection of the nervous system or of a nerve.

neu'ro-plas'ty (nū'rō-plăs'tĭ), *n.* [*neuro-* + *-plasty.*] *Surg.* Plastic operation upon a nerve, as in grafting. — **neu'ro-plas'tic** (-plăs'tĭk), *a.*

neu'ro-pore (nū'rō-pōr ; 201), *n.* [*neuro-* + *pore.*] *Embryol.* An opening from the exterior into the neurocœle.

Neu-rop'ter-a (nū-rŏp'tĕr-ȧ), *n. pl.* [NL. ; *neuro-* + Gr. *πτερόν* a wing.] *Zoöl.* An order of insects to which various limits have been assigned. In addition to the lacewinged flies, ant lions, and allied forms (to which it is now often restricted), it includes in older and more conservative classifications the Thysanura, Ephemerida, Odonata, Plecoptera, Isoptera, Corrodentia, Mallophaga, Mecoptera, and Trichoptera, which are mandibulate insects having four netveined wings (when wings are present), but differing widely in their development and metamorphosis. Cf. PSEUDONEUROPTERA. — **neu-rop'ter-an** (-ăn), *a. & n.* — **neu-rop'ter-oid** (-oid), *a.* — **neu-rop'ter-ous** (-ŭs), *a.*



One of the Neuroptera (*Mantispa interrupta*); *a* Young Larva; *b* Mature Larva. Both enlarged. *c* Mature Insect. Nat. size.

Neu-rop'ter-is (-tĕr-ĭs), *n.* [NL. ; *neuro-* + Gr. *πτερίς* a kind of fern.] *Paleobot.* A large genus of fossil pteridosperms represented by abundant fronds and stems from the Devonian to the Triassic.

neu-ro'sis (nū-rō'sĭs), *n. ; pl.* **-SES** (-sēz). [NL., fr. Gr. *νεῦρον* nerve.] **1.** *Med.* A functional nervous affection or disease ; that is, a disease of the nerves without any appreciable change of nerve structure.

2. *Psychol.* Any activity of nerve cells that gives rise to mental activity, or accompanies it as its physical counterpart. Cf. PSYCHOSIS.

neu'ro-ther'a-peu'tics (nū'rō-thĕr'ȧ-pū'tĭks) } *n.* [*neuro-*
neu'ro-ther'a-py (nū'rō-thĕr'ȧ-pĭ) } + *therapeutics, therapy.*] *Med.* **a** Treatment of diseases of the nerves. **b** Treatment of disease by acting on the nerves.

neu-rot'ic (nū-rŏt'ĭk), *a.* [Gr. *νεῦρον* nerve.] *Med.* **a** Acting on the nerves; useful in nervous disorders; as, a *neurotic* drug. **b** Of or pert. to the nerves ; seated in the nerves ; of the nature of neurosis; nervous; as, a *neurotic* disease. **c** Affected with neurosis ; subject to neuroses ; as, a *neurotic* person.

neu-rot'ic, *n. Med.* **a** Any toxic agent affecting mainly the nervous system. Neurotics that specially affect the spinal cord are often called *tetanics.* **b** A disease seated in the nerves. **c** A neurotic person.

neu-rot'i-cism (-ĭ-sĭz'm), *n.* Neurotic condition.

neu-rot'o-my (-ŏ-mĭ), *n.* [*neuro-* + *-tomy.*] **a** The dissection or anatomy of the nervous system. **b** *Surg.* The division of a nerve, as to relieve neuralgia. — **neu'ro-tom'i-cal** (nū'rō-tŏm'ĭ-kăl), *a.* — **neu-rot'o-mist** (nū-rŏt'ō-mĭst), *n.*

neu-rot'ro-pism (nū-rŏt'rō-pĭz'm), *n.* [*neuro-* + *-tropism.*] *Physiol.* The attractive influence exerted by nervous tissue upon new-growing nerve fibers.

neu'ter (nū'tĕr), *a.* [L. ; *ne* not + *uter* whether ; akin to E. *whether* ; cf. F. *neutre.* See NO, WHETHER ; cf. NEITHER.] **1.** *Gram.* **a** Of neither masculine nor feminine gender (see GENDER, 3) ; as, a *neuter* noun or suffix ; the *neuter* gender. **b** Neither active nor passive ; intransitive ; as, a *neuter* verb.

2. Taking no side ; impartial ; neutral. *Archaic.*

> Providence never stands *neuter.* — *South.*

3. Belonging to neither of two, usually opposed, classes. *R.*

4. *Biol.* **a** Having no generative organs ; sexless. **b** Having imperfectly developed generative organs, as a worker bee or ant. See NEUTER, *n.*, 4.

neuter passive, *Gram.*, passive in form and neuter or intransitive in meaning ; — applied to such Latin neuter verbs as *gaudeo*, in which the perfect tense is passive, and to French verbs forming their perfect with *être.*

neu'ter (nū'tĕr), *n.* **1.** *Gram.* **a** An intransitive verb. **b** A noun, pronoun, adjective, or inflectional form or class of the neuter gender.

2. A person who takes no part in a contest or controversy ; one who is neutral. Specif. [*cap.*], *Amer. Hist.*, one of a tribe of Iroquoian Indians formerly dwelling along the northern shores of Lake Erie. They were called the **Neutral Nation** by the French, because of neutrality in the war between the Iroquois and the Hurons. They were destroyed by the Iroquois in 1651.

> Damn'd *neuters*, in their middle way of steering,
> Are neither fish, nor flesh, nor good red herring. *Dryden.*

3. A thing that is neutral, in any sense. *Rare.*

4. One of the imperfectly developed females of certain social insects, as ants and honeybees, that perform the labors of the community ; a worker.

neu'ter, *v. t. ;* **-TERED** (-tĕrd) ; **-TER-ING.** To castrate. *R.*

neu'tral (nū'trăl), *a.* [L. *neutralis*, fr. *neuter* : cf. OF. *neutral.* See NEUTER.] **1.** Not engaged on either side ; not taking part with or assisting either of two or more contending parties ; neuter ; specif., of a state or power, lending no active assistance to either or any belligerent.

> The heart cannot possibly remain *neutral*, but constantly takes part one way or the other. *Shaftesbury.*

2. Of or pertaining to a neutral state or power ; not involved in hostilities ; as, *neutral* territory.

3. Neither one thing nor the other ; belonging to neither of two, usually opposed or contrasted, classes ; not decided or pronounced as to characteristics ; middling ; indifferent ; as, a *neutral* character without marked virtues or vices ; a *neutral* life ; a *neutral* expression.

> Some things good, and some things ill, do seem,
> And *neutral* some, in her fantastic eye. *Sir J. Davies.*

4. In technical senses : **a** *Chem.* Neither acid nor basic ; neither acid nor alkaline. **b** *Biol.* Neuter. See NEUTER, *a.*, 4. **c** *Bot.* Without stamens or pistils, as the ray florets of many composites, the marginal flowers of *Hydrangea*, etc. **d** Free from admixture of color ; as, *neutral* tones ; *neutral* gray ; *neutral* blue (blue without any tinge of other color). **e** *Elec.* Neither positive nor negative; of a potential which is midway between, or the average of, the extreme potentials of an electric apparatus or system. **f** Designating a rope, as for hoisting, that has no tendency to twist or untwist, a condition fulfilled esp. by flat ropes.

Syn. — **NEUTRAL, NEGATIVE,** as here compared, agree in suggesting the absence of marked characteristics. But NEUTRAL emphasizes the idea of vagueness or indefiniteness, as of that which is neither one thing nor the other ; NEGATIVE involves a more strongly implied contrast with that which is positive ; as, "a low, muffled, *neutral* tone, as of a voice heard through cotton wool" (*G. Eliot*) ; a *neutral* tint ; a *negative* character, merely *negative* results ; "Men of genius are great as certain ethereal chemicals operating on the mass of *neutral* intellect" (*Keats*) ; "The *negative* and critical minds have their place beside the men of affirmation" (*Mrs. Humphry Ward*).

neu'tral-ize (nū'trăl-īz), *v. t. ;* **-IZED** (-īzd) ; **-IZ'ING** (-īz'ĭng). [Cf. F. *neutraliser.*] **1.** *Chem.* To render inert or imperceptible the peculiar affinities of, as a chemical substance ; to destroy the effect of ; to make neutral (see NEUTRAL, *a.*, 4 a) ; as, to *neutralize* an acid with a base.

2. To destroy the peculiar properties or opposite dispositions of ; to reduce to inefficiency ; to counteract ; as, to *neutralize* parties, efforts, opposition, etc.

> Counter citations that *neutralize* each other. *E. Everett.*

3. *Elec.* To make void of electricity, or electrically inert, by combining equal positive and negative quantities.

4. *Internat. Law.* To invest with conventional or obligatory neutrality conferring inviolability by belligerents, as in the case of Switzerland.

Syn. — Counterbalance, annul, nullify, frustrate. — **NEUTRALIZE, COUNTERACT, COUNTERVAIL.** To NEUTRALIZE is to render inoperative or ineffective, esp. by an opposite influence, force, or effect ; to COUNTERACT implies more positively a contrary or contrary action ; it does not so definitely suggest that the thing itself ceases to act or becomes neutral ; as, "White shall not *neutralize* the black, nor good compensate bad in man" (*R. Browning*) ; "Unless powerfully *counteracted* by all sorts of opposite agencies, [old age] is a miserable . . . blighter to the genial charity of the human heart" (*De Quincey*). But the two words are often used with little distinction. COUNTERVAIL suggests more definitely than either of them a balance of opposing forces ; as, "The fact . . . shall, in the absence of strong *countervailing* testimony, be deemed conclusive evidence" (*A. Lincoln*). See ABOLISH.

1. Having existed, or having been made, but a short time; having originated or occurred lately; not early or long in being; recent; fresh; modern; — opposed to *old*; as, a *new* coat; a *new* régime; a *new* fashion; *new* potatoes.

Fourscore and seven years ago our fathers brought forth on this continent a *new* nation. — *A. Lincoln.*

2. a With reference to a person himself or thing itself: having been seen or known but a short time, although perhaps existing before; recently manifested, discovered, recognized, or experienced; hence, strange; unfamiliar; as, *new* lands, doctrines, grief. b With reference to another: other than the former, or old; having freshly come into a use, connection, or the like; as, to turn over a *new* leaf; my *new* physician; the *new* teacher.

To-morrow to fresh woods and pastures *new*. *Milton.*

3. Having been in some relationship, position, or condition but a short time; hence, not habituated; unaccustomed; as, a *new* member; *new* from school and as *new* to the world; *new* to the plow.

4. Beginning or appearing as the recurrence, resumption, or repetition of some previous act or thing; as, a *new* year; a *new* start; also, renovated or recreated; as, rest had made him a *new* man.

For as the sun is daily *new* and old,
So is my love still telling what is told. *Shak.*

5. Different or distinguished from a person, place, or thing of the same kind or name that has longer or previously existed; — used with *the* except in place names; as, the *new* reservoir; the *new* theology; *New* York; *New* Guinea.

6. Not of ancient extraction, nor of a family of ancient descent; not previously known or famous. *Addison.*

7. [*cap.*] In names of languages, modern; esp., in use since medieval times; as, *New* Greek; *New* Latin; *New* Hebrew. See MODERN, *a.*, 4.

Syn. — NEW, NOVEL, FRESH, RECENT, LATE, MODERN. That is NEW (opposed to *old*) which has existed, or been known, but a short time; that is NOVEL (opposed to *common, usual, familiar*) which is, often strikingly, out of the ordinary course; as, "No man putteth *new* wine into old bottles" (*Mk.* ii. 22); a *novel* method of bottling wine; "It is the chief function of the poet to make the familiar *novel*" (*Lowell*); "He found *new* words for perennially *new* things, and the *novel* accent awakened long-slumbering associations" (*W. Pater*). That is FRESH, as here compared, which has just been done, made, received, etc., or which retains or suggests the liveliness, brightness, or energy of a new thing; the word may also connote new and original qualities or characteristics; as, *fresh* butter, *fresh* footprints, the work received *fresh* impetus; "*fresh* and lasting in . . . remembrance" (*Shak.*); "How *fresh* the colors look, how fast they hold" (*Tennyson*); "If not always absolutely *new*, he [Chaucer] is always delightfully *fresh*" (*Lowell*). RECENT is a more relative term; it suggests comparative nearness to the present; as, *recent* discoveries, a *recent* number of a magazine, until *recent* years; "The village church had been ruined too *recently* to count as picturesque" (*W. Pater*). LATE (see SLOW), which is sometimes interchangeable with *recent* (as, "On the *Late* Massacre in Piedmont," *Milton*), applies esp. to that which has recently ceased to exist, or which is no longer what it recently was; as, his *late* residence, during the *late* reign, the *late* incumbent of the office, the funeral of the *late* Richard Roe. That is MODERN (in ordinary usage) which belongs to the present period, or is characteristic of it; the word commonly suggests contrast with a more distant past than that implied in *recent*, and often applies esp. to that which is of the latest and most approved form, construction, or character; as, *modern* languages, *modern* (cf. *recent*) usage, *modern* artillery; "This strange disease of *modern* life, with its sick hurry, its divided aims, its heads o'ertaxed, its palsied hearts" (*M. Arnold*). See RENEW; cf. OLD.

NARRATIVES. — **a** THE SYNOPTIC GOSPELS, **Matthew**, **Mark**, **Luke**, which recount, with considerable similarity of expressions and detail, the same general outline of events in Christ's ministry, esp. in Galilee, including but one visit to Jerusalem. They report his parables and other public addresses. **b** THE FOURTH GOSPEL, **John**, having its scene chiefly in Judea, with five visits to Jerusalem. It is not so much a narrative as a compilation of sublime discourses addressed to individuals and immediate followers. **c Acts of the Apostles**, which records the founding of the Church under Peter, and its spread under Paul.

DIDACTIC EPISTLES. — **a** PAULINE. (1) *Epistles of the Third Missionary Journey.* **Romans**, & 2 **Corinthians**, **Galatians**, which discuss the universality of Christianity as against Judaism. They expound salvation as dependent on a relation to God, not on race or observance of the Law; and justification by faith; they enjoin Christian conduct; answer doctrinal questions, and vindicate Paul's apostolic authority. (2) *Epistles of the First Imprisonment.* **Ephesians**, **Philippians**, ranging from personal details to speculations on the nature and destiny of the Church. They discuss the privileges and duties of the Christian life. **Philemon**, a personal letter commending the runaway slave, Onesimus, to his master's forgiveness. (3) *Epistles of the Second Missionary Journey.* 1 & 2 **Thessalonians**, made up of practical exhortations and discussions of questions relating to Christ's second coming. (4) *Pastoral Epistles.* 1 & 2 **Timothy**, **Titus**, defining duties of church officers, and enjoining loyalty to church doctrine. **b** MISCELLANEOUS. Syn.—Particular, discriminating, difficult, exacting, hypercritical, prudish, punctilious, scrupulous, queasy.—NICE, DAINTY, FASTIDIOUS, FINICAL, SQUEAMISH agree in the idea of very delicate susceptibility or precise discrimination, as shown, in the case of *nice* and *dainty*, chiefly in selection; in the case of *fastidious*, *finical*, and *squeamish*, rather in rejection. NICE implies fineness of discrimination, and connotes rather more of intellectual quality than the other words; as, "Demetrius is so *nice* as to be disgusted at the simile of 'swift as the wind'" (*Goldsmith*); "too *nice* for a statesman" (*id.*); "an appetite for knowledge too great to be *nice*" (*Johnson*); "In language one should be *nice* but not difficult" (*Lowell*); "You are more *nice* than wise" (*Jane Austen*). DAINTY (see DAINTY) implies delicacy of taste or sensibility; as, "No shape but his can please your *dainty* eye" (*Shak.*); "His [Thoreau's] sense was so *dainty* that he could perceive the fetor of dwelling houses as he passed them by night" (*Stevenson*); *dainty* in personal habits. FASTIDIOUS differs from *dainty* chiefly in suggesting a certain disdainfulness in rejecting what is displeasing to one's taste; as, "Making the connoisseur . . . very *fastidious* in his taste, dissatisfied by anything that has been since done" (*De Quincey*); "I am *fastidious* in voices, and I can't endure listening to an imperfect reader" (*G. Eliot*); "a *fastidious* instinct for the connotations of a phrase" (*W. Pater*). FINICAL (see FINICAL) implies an affected or fussy fastidiousness; as, "His reserve, his delicacy, his distaste for many of the persons and things surrounding him . . . have produced an impression of Gray as being a man falsely *fastidious*, *finical*, effeminate" (*M. Arnold*); "a world of little *finical* observances, and little frail proprieties" (*Stevenson*). SQUEAMISH emphasizes strongly the implication of aversion or disgust; as, "I would not be so *squeamish* as to suffer the spirit of prudery to prevail in me" (*Cowper*); "They deem it unmeet and unmanly to be *squeamish*" (*Landor*); "a . . . *squeamish* conscience" (*The Nation*). See CORRECT, NEAT, DELICACY, PUNCTILIOUS.

Ni'cene (nī'sēn; nī-sēn'; 277), *a.* [L. *Nicaenus*, fr. *Nicaea* Nice, Gr. *Νίκαια.*] Of or pert. to Nicæa, or Nice, an ancient city of Asia Minor, where were held the first ecumenical church council, A. D. 325, which condemned Arianism, and another church council, A. D. 787, which condemned the Iconoclasts; designating, or pert. to, the creed (see below) adopted by the first Council of Nicæa.

Nicene Councils. See COUNCIL, *Table.*—**N. Creed.** **a** A summary of Christian faith, compiled and adopted by the Council of Nicæa, A. D. 325, and approved by the second ecumenical council, held at Constantinople in 381 A. D. It differs considerably from what is commonly called the Nicene Creed (see def. **b**, below), as, besides several minor differences, it ends with the words, "and in the Holy Ghost," followed by clauses anathematizing the distinctive Arian assertions. **b** A creed closely resembling the foregoing exclusive of its anathemas, which came to be regarded as the product of the Council of Constantinople (381); hence called specifically the **Constantinopolitan**, or **Niceno-Constantinopolitan, Creed**, though actually founded on the baptismal confession of the church in Jerusalem as revised by Cyril, bishop of Jerusalem from 381 to 386, and recommended by Epiphanius, bishop of Salamis, as early as 374. The chief variations from the Nicene text were the substitution of the words, "begotten of the Father before all ages," for, "that is, from the substance of the Father," the omission of the phrase, "God of God" (later restored), and the addition of the clauses respecting the Holy Ghost, the church, etc., after the words "in the Holy Ghost." This creed is the ecumenical creed of the Eastern Church. The Western Church added the filioque clause at the Council of Toledo in 589, and the creed with this addition is the so-called Nicene Creed of Western Christendom. The Book of Common Prayer, apparently through a mistake, omits the epithet "holy" as one of the epithets of the church.

ni'ce-ty (nī'sē-tĭ), *n.*; *pl.* -TIES (-tĭz). [OF. *niceté* foolishness.] **1.** Quality or state of being nice; specif.: **a** Folly; light conduct. **b** Ignorance; simplicity. **c** Pleasure; lust. **d** Self-indulgence; luxuriousness; excessive elegance. **e** Modesty; reserve; also, prudishness. **2.** A dainty, delicate, or elegant thing or feature. *Archaic.* **3.** An expression, act, mode of treatment, distinction, or the like, involving delicacy or subtlety; a minute distinction, point, or detail; as, the *niceties* of the workmanship in jewelry; the *niceties* of a constitutional question.

nick'el (nĭk'ĕl), *n.* [G., abbr. fr. *kupfernickel*, a name given by German miners, as the ore seemed to contain copper, but yielded none. The second part of the word is prob. G. *nickel* demon. Cf. KUPFERNICKEL, COPPERNICKEL.] **1.** *Chem.* A hard, malleable, ductile, metallic element of the iron group, nearly silver-white, capable of a high polish, and resistant to oxidation. It is attracted by magnets. Sp. gr., about 8.8. Symbol, *Ni*; at. wt., 58.68. Nickel occurs native only in meteorites; it is found combined in millerite, gersdorffite, niccolite, garnierite, and several other minerals. It was discovered in 1751 by Cronstedt and obtained in a pure state by Richter in 1804. At present nickel is obtained chiefly from garnierite or from nickeliferous pyrrhotite, by smelting in the blast furnace and working up the resulting matte. The metal is used principally in alloys, as German silver, nickel steel, the "nickel" of coins (an alloy with copper), etc., and as a plating on other metals. Chemically, nickel resembles cobalt and iron. It is bivalent and trivalent, but it forms only bivalent salts, the cation of which (Ni^{++}) is green. **2.** A small coin made of or containing nickel; esp., a five-cent piece composed of copper (75 per cent) and nickel (25 per cent), which is legal tender for any sum not exceeding twenty-five cents in any one payment. *Colloq., U. S.*

Nic'o-la'i-tan (nĭk'ō-lā'ĭ-tăn), *n.* [After *Nicolas* of Antioch, mentioned in Acts vi. 5.] *Eccl. Hist.* **1.** One of a sect or party in the early church, mentioned twice in Rev. ii. and by certain early Christian writers. In Revelation their deeds and doctrine are said to be hated by the ascended Lord, and their deeds by the church of Ephesus also, while the doctrine had some adherents in the church of Pergamum. The precise nature of their works and teaching is uncertain, but they were apparently an antinomian sect which abused the doctrine, emphasized by Paul, of Gentile liberty from the Mosaic Law, by permitting participation in feasts to idols and in the fornication often involved. They were said to hold to community of wives, and appear to have been affected with incipient gnosticism. **2.** In the Middle Ages, a member of any of various sects or parties supposedly resembling the ancient Nicolaitans or seeking to trace descent from Nicolas the deacon (*Acts vi. 5*), as some who sought to release the clergy from en-

ni'ton (nī'tŏn), *n.* [From its phosphorescent properties; prob. fr. L. *nitere* to shine + *-on* as in *argon, neon.*] *Chem.* A colorless gas resembling argon; radium emanation. See RADIUM. Symbol, *Nt;* at. wt., 222.4.

ni-tram'i-din (nī-trăm'ĭ-dĭn) } *n.* [See NITRO-; AMI-
ni-tram'i-dine (-dĭn; -dēn; 184) } DIN.] An explosive formed by action of nitric acid on starch, paper, etc., similar chemically to guncotton, which it preceded.

ni-tram'ine (nī-trăm'ĭn; nī'trä-mēn'; 184), *n.* Also **-in.** [*nitro-* + *amine.*] *Org. Chem.* A compound containing an amino group one of whose hydrogen atoms is replaced by the nitro group.

ni'tra-nil'ic (nī'trä-nĭl'ĭk), *a.* [*nitro-* + chloran*il.*] Designating a golden-yellow crystalline acid, $C_3(NO_2)_3(OH)_2O_2$, produced by action of sodium nitrite on chloranil.

ni-tran'i-line (nī-trăn'ĭ-lĭn; -lēn; 184), *n.* Also **-lin.** [*nitro-* + *aniline.*] *Chem.* Any of three isomeric nitro derivatives (called *orthonitraniline, metanitraniline,* and *paranitraniline*) of aniline, $C_6H_4(NO_2)NH_2$, got by nitration of aniline in presence of sulphuric acid, and in other ways. They are weakly basic yellow crystalline compounds.

ni'trate (nī'trāt), *n.* [Cf. F. *nitrate.*] **1.** *Chem.* A salt or ester of nitric acid. The nitrates of the metals are, as a class, soluble crystalline salts.

2. Potassium nitrate or sodium nitrate, as a fertilizer.

nitrate of iron, *Dyeing,* a dark red liquid, chiefly ferric sulphate, made by oxidizing a solution of ferrous sulphate with nitric acid. It is a mordant. — **n. of silver.** See SILVER NITRATE. — **n. of sodium.** See CHILE SALTPETER.

ni'trate, *v. t.;* **-TRAT-ED** (-trāt-ĕd); **-TRAT-ING** (-trāt-ĭng). **1.** *Chem.* To treat, impregnate, or combine with nitric acid or a nitrate; to convert into a nitro compound or a nitrate.

2. *Photog.* To prepare with silver nitrate; — chiefly in *p. p.*

ni-tra'tion (nī-trā'shŭn), *n.* Act or process of nitrating.

ni'tri-a-ry (nī'trĭ-ä-rĭ), *n. pl.;* **-RIES** (-rĭz). [F. *nitrière.* See NITER.] An artificial bed of refuse animal matter, etc., for the manufacture of niter by nitrification.

ni'tric (nī'trĭk), *a.* [Cf. F. *nitrique.* See NITER.] *Chem.* Of, pert. to, or containing, nitrogen; specif., designating compounds in which, as contrasted with *nitrous* compounds, the element has a higher valence; as, **nitric** oxide, acid.

nitric acid, a monobasic acid, HNO_3, composed of hydrogen, nitrogen, and oxygen, and formed by the action of sulphuric acid on nitrates, by the passage of the electric spark through moist air, and in other ways; aqua fortis. The pure acid is a colorless, fuming, corrosive liquid, which has a sp. gr. of 1.54 and boils at 86° C. (187° F.) with partial decomposition, forming some gaseous nitrogen peroxide. The **fuming nitric acid** of commerce contains this gas in solution, is red or brown in color, and is more active than the colorless acid. Ordinary commercial nitric acid is yellowish in color, contains about sixty per cent of the anhydrous acid, and has a sp. gr. of about 1.37. Ordinary aqua fortis is not so strong. Nitric acid is very active, dissociating readily in water and having also strong oxidizing properties. It attacks most metals and certain other elements, and yellows and corrodes various organic matters, as the skin, hair, and dyestuffs. In some cases the products are nitrates or nitro compounds. The chief source of nitric acid at present is Chile saltpeter (sodium nitrate).

— **nitric anhydride,** a white crystalline oxide of nitrogen, N_2O_5. It combines with water with evolution of much heat to form nitric acid. — **n. bacteria,** any of various soil bacteria which oxidize nitrites to nitrates. — **n. oxide,** a colorless poisonous gas, NO, obtained by reduction of nitric acid, as by treatment with copper. On contact with the air or with oxygen, it becomes reddish brown from the formation of nitrogen dioxide, or peroxide, NO_2.

ni'tride (nī'trĭd; -trĭd; 184), *n.* Also **ni'trid.** [From NITROGEN.] *Chem.* A compound of nitrogen with a more positive element, as boron, silicon, and many metals.

ni-trif'er-ous (nī-trĭf'ẽr-ŭs), *a.* [*niter* + *-ferous.*] Containing, or yielding, niter.

ni'tri-fi'a-ble (nī'trĭ-fī'ä-b'l), *a.* Capable of nitrification.

ni'tri-fi-ca'tion (-fĭ-kā'shŭn), *n.* [Cf. F. *nitrification.* See NITRIFY.] *Chem.* Act or process of nitrifying; specif., a process of oxidation by which ammonia is converted into nitrites and nitrates, esp. by the agency of bacteria. Such oxidation can be produced in the laboratory directly, but it also occurs wherever the proper conditions of temperature, air, moisture, and alkalinity allow the nitrobacteria to act, as in all productive soils, in the heaps of waste organic matter formerly used in manufacturing saltpeter, etc. The process is: conversion of the ammonia (derived usually from decomposed vegetable or animal matter) into nitrites, and the further oxidation of nitrites to nitrates. See NITRIC BACTERIA, NITROUS BACTERIA.

ni'tri-fy (nī'trĭ-fī), *v. t.;* **-FIED** (-fīd); **-FY'ING** (-fī'ĭng). [*niter* + *-fy:* cf. F. *nitrifier.* See NITER.] *Chem.* To combine or impregnate with nitrogen; to convert, by oxidation, into nitrous or nitric acid or their salts; to subject to, or produce by, nitrification. — **ni'tri-fi'er** (-fī'ẽr), *n.*

ni'trile (nī'trĭl; -trĭl), *n.* [See NITRO-.] *Org. Chem.* A compound of the general formula RCN, which may be regarded as ammonia whose hydrogen is replaced by a trivalent hydrocarbon radical, or as an ester of hydrocyanic acid, or as an acid in which carboxyl is replaced by cyanogen. On saponification the nitriles yield their corresponding acids, with elimination of the nitrogen as ammonia, and hence are called **acetic nitrile** (or methyl cyanide, CH_3CN), **benzonitrile** (or phenyl cyanide, C_6H_5CN), etc. They are in general colorless liquids of agreeable odor or, in case of the higher members of the series, solids.

nitrile base. *Org. Chem.* A tertiary amine. See AMINE.

ni'trite (nī'trīt), *n.* [Cf. F. *nitrite.* See NITER.] *Chem.* A salt or ester of nitrous acid.

ni'tro (nī'trō-). [L. *nitrum* native soda, natron, Gr. *νίτρον.*] **1.** A combining form denoting the presence of *niter.*

2. *Chem.* A combining form (used also adjectively, **nitro**) designating: (1) *certain compounds of nitrogen* or *of its acids,* as *nitro*hydrochloric, *nitro*calcite; (2) the *group* or *radical* NO_2, or *its compounds;* as, *nitro*benzene (benzene in which the nitro group replaces a hydrogen atom).

nitro cotton, guncotton. — **n. explosive,** any explosive, as nitroglycerin or guncotton, made by nitrating organic materials. — **n. group,** *Chem.,* the univalent radical NO_2, a group of strongly acid nature; — called also *nitroxyl.* — **n. powder,** any explosive powder made from nitrated organic materials. See GUNCOTTON, SMOKELESS POWDER. — **n. substitution compound** *or* **product,** *Chem.,* a substance formed by the substitution of the nitro group, NO_2, esp. for hydrogen.

ni'tro-bac-te'ri-a (-băk-tē'rĭ-ä), *n. pl.* [NL.] *Bacteriol.* The soil bacteria concerned in nitrification. They are of two classes: the *nitric* and the *nitrous* bacteria. By some authorities *nitrobacteria* is restricted to the former class, the latter being called *nitrosobacteria.* See NITRIC BACTERIA, NITROUS BACTERIA.

ni'tro-ben'zene (-bĕn'zēn; -bĕn-zēn'), *n.* [*nitro-* + *benzene.*] *Chem.* A pale yellow, poisonous liquid, $C_6H_5NO_2$, produced by action of nitric acid on benzene, and called from its odor *artificial oil of bitter almonds,* and *oil,* or *essence, of mirbane.* It is used in perfumery, and is made in large quantities in the preparation of aniline.

ni'tro-form (nī'trō-fôrm), *n.* [*nitro-* + *formyl.*] *Chem.* A trinitro derivative of methane, $CH(NO_2)_3$, analogous to chloroform. It is a white, crystalline, acidic explosive.

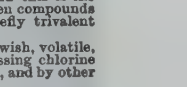
ni'tro-gel'a-tin, *or* **-tine** (-jĕl'ä-tĭn), *n.* Blasting gelatin.

ni'tro-gen (nī'trō-jĕn), *n.* [F. *nitrogène.* See NITRO-; -GEN.] *Chem.* A colorless gaseous element, tasteless and odorless, constituting about four fifths (78.06 per cent) of the atmosphere by volume; — called *azote* by French chemists, because incapable of supporting life. Symbol, *N;* at. wt., 14.007. Free nitrogen is very inactive. Except for the action of nitrogen-fixing bacteria, it combines only at high temperatures, and then only with a limited number of elements. In combined, however, it takes part in various transformations. It forms many important compounds, as ammonia, nitric oxide, nitric acid, the nitrides, the cyanides, etc., and a host of organic substances, as the azo compounds, alkaloids, a.

It is a constituent of all organized living tissue, animal or vegetable. Pure nitrogen may be obtained by heating ammonium nitrite. Its sp. gr. is 0.967, or, weighing 1.251 g. It can be reduced to a colorless liquid, boiling at −195.5° C. and to a colorless crystalline solid, melting at −210.5° C. Nitrogen and oxygen can be made to unite by a powerful electric current, and this is the basis of a method of manufacturing nitrogen compounds from the air. Chemically, nitrogen is chiefly trivalent and pentavalent.

nitrogen chloride. *Chem.* A thin, yellowish, volatile, violently explosive oil, NCl_3, made by passing chlorine into a warm solution of ammonium chloride, and by other methods.

ni'tro-gen-fix'ing, *a. Bacteriol.* Designating, or pert. to, any of certain soil bacteria having the power of causing free nitrogen to combine with other elements in the soil, forming compounds available for plant food. A few species, as the nitrobacteria, apparently act independently; others, as *Bacillus radicicola,* live symbiotically within the roots of various leguminous plants, forming nodules, or root tubercles, and storing up nitrogen. It is this property which renders leguminous crops valuable in improving impoverished soils.



Nitrogen-fixing Bacteria.

nitrogen iodide. *Chem.* A brown or black powder, $N_2H_3I_3$, obtained by the action of ammonia on iodine and by other methods. It is violently explosive when dry.

ni'trog'e-nize (nī-trŏj'ĕ-nīz; nī'trō-jĕn-īz; 277), *v. t.;* **-IZED** (-īzd); **-IZ'ING** (-īz'ĭng). To combine, or impregnate, with nitrogen or its compounds.

ni-trog'e-nous (nī-trŏj'ĕ-nŭs), *a. Chem.* Of, pert. to, or containing, nitrogen; as, a *nitrogenous* principle.

nitrogenous equilibrium, *Physiol. Chem.,* equilibrium of the animal body characterized by equality of income and output of nitrogen. — **n. foods.** See FOOD, *n.,* 1.

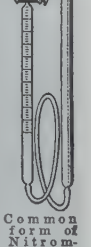
nitrogen peroxide. *Chem.* A compound of powerful oxidizing properties got as a reddish brown, suffocating, poisonous gas by mixing nitric oxide and oxygen, by heating lead nitrate, etc. At 150° C. it corresponds to the formula NO_2 (nitrogen dioxide). On cooling it becomes lighter in color, condensing to a yellow liquid, N_2O_4 (**nitrogen tetroxide**), which at 0° C. becomes nearly colorless and at −20° changes to a colorless crystalline solid.

ni'tro-glyc'er-in, ni'tro-glyc'er-ine (nī'trō-glĭs'ẽr-ĭn), *n.* [*nitro-* + *glycerin.*] *Chem.* A heavy, oily, explosive liquid, $C_3H_5(NO_3)_3$, colorless when pure, obtained by treating glycerin with a mixture of nitric and sulphuric acids, and called more properly **glyceryl trinitrate.** It is poisonous and has a sweet burning taste. Nitroglycerin burns quietly in the open air, but is exploded by percussion or by heating in a closed vessel. It produces by detonation about ten thousand times its own volume of gas. Compared with gunpowder it is eight times as powerful, weight for weight, or thirteen times, volume for volume. It is a common explosive, but usually mixed with absorbents. See DYNAMITE. In medicine it is often called *glonoin.*

ni'tro-hy'dro-chlo'ric (-hī'drō-klō'rĭk; 201), *a.* [*nitro-* + *hydrochloric.*] *Chem.* Of, pertaining to, or containing, nitric and hydrochloric acids; — in the phrase, **nitrohydrochloric acid** (aqua regia). See AQUA REGIA.

ni'trol-am'ine (nī'trōl-ăm'ĭn; *-ä-mēn'*; 184), *n.* Also **-in.** [G. *nitrolamin; nitroso-* + hydroxy*lamin.*] *Org. Chem.* Any of a class of compounds formed by the action of amines either on nitrosites or on nitrosochlorides, resulting in the substitution of the group NHR or NRR′ — in the former case for ONO, in the latter for Cl.

ni-trol'ic (nī-trŏl'ĭk), *a. Chem.* Pert. to or designating any of a series of acids of the general formula $RC(NOH)NO_2$, formed by action of nitrous acid on nitroparaffins containing the group $-CH_2NO_2$, corresponding to the primary alcohols. The intense blood-red color of solutions of their salts makes the formation of these acids a convenient test for the primary alcohols. Cf. PSEUDONITROLIC.



Common form of Nitrometer.

ni'tro-man'nite (nī'trō-măn'īt), *n.* [*nitro-* + *mannite.*] *Org. Chem.* A white crystalline compound, $C_6H_8(NO_3)_6$, made by treating mannite with nitric and sulphuric acids; mannite hexanitrate. It is used as an explosive.

ni-trom'e-ter (nī-trŏm'ĕ-tẽr), *n.* [*nitro-* + *-meter.*] *Chem.* An apparatus for determining the amount of nitrogen or some of its compounds in any substance subjected to analysis; an azotometer. It usually consists of some form of gas burette for measuring evolved nitrogen gas or nitric oxide.

ni'tro-mu'ri-ate (nī'trō-mū'rĭ-āt), *n.* [*nitro-* + *muriate.*] A substance obtained by dissolving a metal in nitrohydrochloric acid; as, *nitromuriate* of tin (a solution of stannic chloride used by dyers as a mordant).

ni'spe-ro (nĕ'spā-rō), *n.* [Sp. *níspero.*] **a** The sapodilla. *West Indies.* **b** The loquat. *Spain.*

Nis'roch (nĭs'rŏk; nĭz'-), *n. Bib.* An Assyrian deity at whose shrine Sennacherib while sleeping was slain by his sons.

Nis-san'. Var. of NISAN.

Nis'sl's gran'ules (nĭs'l's). [After Franz *Nissl* (b. 1860), German alienist.] *Anat.* See NERVE CELL.

nis'su-ee trout (nĭsh'ŏō-ē). [Prob. fr. an Amer. Indian name.] A large, voracious variety of the rainbow trout (*Salmo irideus stonei*) of the upper Sacramento basin. [not. *Obs.*]

nis'se. Contr. of *ne wiste,* knew not.

Ni'sus *and* **Eu-ry'a-lus** (nī'sŭs, ū-rī'ä-lŭs). A famous pair of friends in Vergil's "Æneid." They were young Trojan warriors, and, when one undertook a desperate adventure in the enemy's camp, the other insisted on going with him. Both were slain.

ni'sus for'ma-ti'vus. [NL. *formativus* formative.] The inherent tendency of organic matter to reproduce or perpetuate itself; vital principle.

nis'-wise'. Var. of NESE-WISE.

nisy. † NISY.

nit. † NIGHT. [pret. of NITE.]

nit. Obs. p. p. of KNIT; obs.

nit, *v. i.* To deposit nits. *Obs.*

nit, *n.* A nut; esp., a hazelnut. *Scot. & Dial. Eng.* [goods, etc.]

nit, *n.* A small spot in cotton cloth. Var. of NICHE, *n.*

nitch, *n.* A notch; a nick. *Obs. or Scot. & Dial. Eng.*

nitch, *n.* [See KNITCH.] A bunch; as of hay; a knitch; also, a load or burden. *Dial. Eng.*

nitch, *v. t.* [Cf KNITCH.] To join together; connect. *Rare.*

nite (*Scot.* nēt). Obs. or Scot. var. of NIT, *n.*

nite, *v. t.* [Cf. Icel. *níta.*] To deny; abjure; refuse. *Obs.*

ni'ten-cy (nī'tĕn-sĭ), *n.* [L. *nitens,* p. pr. of *nitere* to shine.] Brightness; luster. *Rare*

ni'ten-cy, *n.* [From L. *nitens,* p. pr. of *niti* to strive.] Endeavor; effort; tendency. *Obs.*

ni'tent, *a.* [L. *nitens.*] Shining. *Obs.* — **ni'tent-ly,** *adv. Obs.*

nit'er, *n.* One who denies. *Obs.*

ni'ter, or ni'tre, cake (nī'tẽr). The acid sodium sulphate formed as a by-product by action of sulphuric acid on sodium nitrate.

ni'tered, ni'tred (nī'tẽrd), *a.* Fertilized with nitrate.

ni'ter-ous. † NITROUS.

nit grass. An annual grass (*Gastridium australe*) of the Mediterranean region, having small shining spikelets.

nith. † NIGHT, NITHE.

nithe. † NINTH.

nithe, *n.* & *v.* [AS. *niðð.*] Envy. *Obs.* [Eng. var. of NEITHER.]

nith'er (nĭth'ẽr). Obs. or dial. nith'er. Var. of NETHER. *Obs. or Scot. & Dial. Eng.*

nith'er, *n.* & *v.* [Cf. Icel. (modern) *mótra* to shiver.] Shiver; tremble. *Scot. & Dial. Eng.*

nith'er, *v. t.* [AS. *niðerian.*] To humiliate; debase; oppress. *Obs. or Scot.* [vious. *Obs.*]

nith'ful, *a.* [*nithe* + *-ful.*] Envious. [Eng.]

Nith'hogg (nĭth'hŏg'). **Nith'hög'gr** (-hûg'r), *n.* [Icel. *Niðhöggr.*] See YGGDRASILL.

nith'ing (nĭ'thĭng), *n.* [AS. *niðing,* of Scand. origin; cf. Icel *níðingr.*] A coward; niggard; dastard. *Obs. or Archaic*

ni'thing-hede, *n.* Niggardliness. *Obs.*

Nithsdale (nĭths'dāl), *n.* [After the Countess of *Nithsdale.*] A kind of large riding hood worn in the 18th century.

nit'i-di-fo'rous (nĭt'ĭ-dĭ-fō'rŭs; 201), *a.* [L. *nitidus* shining + *-florous.*] *Bot.* Having shining flowers. *Obs. or R.*

nit'i-di-fo'li-ous, *a.* [L. *nitidus* shining + *-folious.*] *Bot.* Having shining leaves. *Obs. or R.*

ni-tid'i-ty (nĭ-tĭd'ĭ-tĭ), *n.* [L. *nitiditas* splendor.] Cleanness; brightness. *Obs. or R.*

nit'i-dous (nĭt'ĭ-dŭs), *a.* Shining or glossy; nitid; lustrous.

Nit'i-du'li-dæ (-dū'lĭ-dē), *n. pl.* [NL., fr. *Nitidula,* a genus name, fr. L. *nitidus* bright.] *Zoöl.* A family of small beetles with five-jointed tarsi and antennæ ending in a three-jointed clublike expansion. Many have the elytra considerably shortened. Their habits vary; many live on flowers.

ni'tor, *n.* [L.] Brightness. *Obs.*

ni'tor in ad-ver'sum. [L.] I press forward to the opposite side; I advance against opposition.

Ovid (Metamorphoses, II., 72).

ni'tram-ite (nī'trăm-īt), *n.* [*nitrate* + *ammonium* + *-ite.*] *Min.* Native barium nitrate, $Ba(NO_3)_2$.

ni-tran'i-on (nī-trăn'ĭ-ŏn), *n.* The anion of nitric acid and the nitrates, NO_3^-.

ni'tra-tine (nī'trä-tĭn), *n.* Chile saltpeter. [Var. of NITRATE, etc.]

ni'tre (nī'tẽr), *n.* & *v.* NITER, etc.
